TERM DAYS IN SCOTLAND.

Candlemas, and Feb.; Whitsunday, 15th May;
 Lammas, 1st Aug.; Martinmas, 11th Nov.; Re-
 moval Terms, 28th May, 28th November.

When a Scottish Term falls on a Sunday, the day after is held as Term Day.

LAW TERMS.—Sittings, 15th October to 20th March; 12th May to 20th July.

BANK HOLIDAYS.—New Year's Day, 1st Jan.; Christmas Day (if either of the preceding falls on a Sunday, the Monday following shall be the Bank Holiday); Good Friday; First Monday in May; First Monday in August.

The above, with the addition of Her late Majesty's Birthday (Empire Day), are also the holidays observed in Customs and Inland Revenue Offices.

IRELAND is an island lying between $51^{\circ} 26'$ and $55^{\circ} 23'$ N. lat. and $5^{\circ} 20'$ and $10^{\circ} 26'$ W. long. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea and St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west from 120 to 180, with an area of about 31,759 square miles. The total acreage is (1903) 20,350,725, of which 2,995,945 acres are barren mountain, turf bog, marsh, or building land. The greater part of the surface is a plain, interspersed with low hills, the highest mountain being 3,414 feet above the sea-level. The rivers are numerous, the Shannon, 254 miles in length, being the principal; but the chief water feature of the country is the beautiful series of lakes or (as they are called) loughs, the largest, Lough Neagh, covering a surface of 98,255 acres. The harbours are among the finest in the world. The climate is temperate, and many plants which can only be grown in hot-houses in England flourish in the open air in Ireland; while the great moisture which generally prevails is so favourable to vegetation that the country early received the name of the Green or Emerald Isle.

The population of Ireland on March 31, 1901, was 4,458,775 (2,200,040 males and 2,258,735 females), a decrease of 245,975, equal to 5.23 per cent., since the preceding Census of 1891. Of the counties, Dublin alone shows an increase in the decennial period amounting to 6.3 per cent., and of the provinces the population of Ulster shows a decrease of 2.28 per cent., Leinster 3.26 per cent., Munster 8.29 per cent., and Connaught 10.8 per cent. Of the total population the professional class numbered 214,343, domestic 219,419, commercial 97,889, agricultural 876,062, industrial 639,413. In 1906 there were 22,662 marriages, 103,536 births, and 74,427 deaths, and the estimated population on 30 June, 1907, was 4,378,568.

Agriculture and Live Stock.—In 1906 there were 43,888 acres under wheat, 1,076,281 under oats, 176,410 under barley, 10,446 under rye or bere, 2,259 under beans and pease—a total acreage of 1,309,284 under cereal crops; 616,097 acres were under potatoes, 278,343 under turnips, 67,190 under mangold, 40,820 under cabbage, 6,194 under vetch and rape, and 25,023 under carrots, parsnips and other green crops—a total of 1,033,667 under green crops; 55,171 acres were under flax, and 2,328,958 under hay; the total extent under crops of all kinds thus being 4,727,081 acres,

while there were 12,309,015 acres of pasture. The produce in 1906 was 87,859 cwt. of wheat, 3,090,481 cwt. of barley and bere, and 17,928,777 cwt. of oats; while 2,660,581 tons of potatoes, and 4,955,596 tons of turnips and swedes, and 1,344,410 tons of mangolds were also grown.

The live stock included 604,413 horses, 30,967 mules, 243,669 asses, 4,638,924 cattle, 3,714,832 sheep, 1,244,193 pigs, 267,342 goats, 18,976,798 poultry.

Industries.—In addition to agriculture and pasture, linen and shipbuilding are the principal industries in the north-east, sea fishing throughout the coast districts, distilling and brewing in many of the large towns, and cloth and lace locally. The western districts are being developed by the opening up of communication. An industry which is rapidly gaining ground is bee-keeping; the amount of honey produced in 1905 was 355,699 lb. in movable combs and 112,215 lb. in other hives, a total for the year of 467,914 lb.

The total value of fish landed in 1905 was £413,364, the quantities being 998,206 cwt. (including 505,164 cwt. mackerel and 354,144 cwt. herrings), exclusive of salmon and shell-fish.

The government is semi-independent. A Lord-Lieutenant, appointed by each successive Ministry, exercises almost regal sway. The peerage consists of 176 members, who are represented in the Imperial Parliament by 28 of their number; and 103 members represent the country in the House of Commons.

The prevailing religion is Roman Catholic, 3,308,661, or 74.21 per cent. of the population, professing that form of faith, there being also 581,089 Protestant Episcopalians, 443,276 Presbyterians, and 62,006 Methodists. Until the year 1871 the Established Church was a branch of that of England, with two archbishops and ten bishops, although the members of this communion were but 12 per cent.—9 per cent. of the remaining Protestants being Presbyterians.

Ireland is well supplied with educational establishments, having two universities, a large number of secondary schools, indirectly endowed under the Intermediate Education Board, and an admirable system of primary schools under the National School Commissioners. There is also a Department of Agriculture and Technical Instruction which issues detailed reports, and assists generally in the development of agriculture and industry.

The legal establishment is similar to that of England, and is presided over by a Lord Chancellor.

THE LORD LIEUTENANT.

His Excellency the Right Honourable John Campbell Gordon, 7th Earl of Aberdeen, LL.D., D.C.L., G.C.M.G., born 3rd August, 1847; married, 1877, Hon. Ishbel Maria, daughter of 1st Baron Tweedmouth; Lord Lieutenant General and General Governor of Ireland; sworn in 14th December, 1905... £20,000

ROYAL IRISH CONSTABULARY.

Headquarters, Dublin Castle.—£1,321,499.

The Royal Irish Constabulary, then styled "the Constabulary of Ireland," was formed in 1836 by the consolidation of the "Barony Constables" and the "Peace Preservation Police." The force is armed with rifle, sword, and pistol. Its duties are varied, and military as well as police work has often to be undertaken. In 1867, by Her late Majesty's command, the title of the force was changed from the Constabulary of Ireland to Royal Irish Constabulary, in special recognition of the splendid services rendered in the past, and in particular during the Fenian

outbreaks of that year. Officers and men alike have given repeated proofs of conspicuous courage and daring, and of exceptional moderation under the most trying circumstances. Approximate strength of the force 1907-8:—230. Head Constables, 1,597 Sergeants, 378 Acting Sergeants, and 7,525 Constables; total, 9,730.

Inspector-General, Col. Sir Neville Chamberlain, K.C.B. £1,500 to £1,800
Private Sec., J. E. St. George, J.P. £150
Dep. Insp.-Gen., H. F. Considine, O.B., M.V.O. £1,200
Asst. do., A. Gambell; S. B. Hamilton £700 to £800
Prin. Staff Officer, Hugh M. Metcalfe £600 to £800
Clk. in Charge of Accts., J. F. Balfe £600 to £800
Asst. Accountant, W. Campbell, C. £350 to £550
Staff Officers (1st Class Clerks), G. McConkey; W. Kelly; J. Robb, £350 to £500; J. J. Moore £300 to £400

Depôt.

Asst. Insp.-Genl. Command., Wm. Reeves ... £600
Surgeon, S. T. Gordon, F.R.C.P.I. £400

Counties, &c.

Commr. of Police (Belfast), H. O'H. Hill, J.P. £600
36 County Inspectors each £350 to £500

ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. $54^{\circ}3' - 54^{\circ}25' N.$ and long. $4^{\circ}18' - 4^{\circ}47' W.$, nearly equidistant from England, Scotland, and Ireland. It is about 34 miles long, and from 10 to 12 broad, containing an area of 145,325 acres, with a population of 55,598. Curiously enough the history of the island is intimately linked with that of the Hebrides and the Kingdoms of Scotland and Norway. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition, conquered the Orkneys and the Shetlands, the Western isles, and Man, and added them to the kingdom already beneath his sway. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1736 James, 10th Earl of Derby, died without issue male; the earldom went to his next male heir, but the sovereignty of the island went, with the Barony of Strange, to his heir-general, James, Duke of Athole, on whose death the island descended to his daughter Charlotte, from whom, in 1765, Parliament purchased the sovereignty for £70,000. In 1827 the Crown purchased it for the sum of £427,144. The land is rich in minerals, lead, iron, blende, and slate, and exports large quantities of agricultural produce. About 50 miles of railway have been constructed, and about 23 miles of electric tram roads. The natives of this island belong to a mingled race of Celts and Norwegians, and the language, in which the Celtic element is predominant, is known as the Manx.

Man is governed by an independent Legislature called the Tynwald, consisting of two branches—the Governor and Council, and the House of Keys. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL: Douglas, pop. 19,223 (Castletown, pop. 1,963, is the ancient capital); the other towns are Peel, pop. 3,306, and Ramsey, pop. 4,729.

	1903-4.	1904 5.

Speaker, House of Keys, A. W. Moore, C.V.O. 400.

THE CHANNEL ISLANDS

comprise the bailiwicks of Jersey (including the Minquiers and Ecréhou Rocks) and Guernsey (in the latter of which are comprehended the small islands of Alderney, Sark, and Herm), situated off the north-west coast of France, at distances of from ten to thirty miles. They are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. The area altogether is about 73 square miles: and the population in 1901 was 95,841 Jersey, 52,796, Guernsey, with Herm and Jéton, 40,328, Alderney, 2,054, and Sark, 506. The land under cultivation in Jersey amounted in 1904 to 19,290 acres, and in Guernsey (1904) 11,071 acres, the principal product of the soil of Jersey being potatoes and wheat, and in Guernsey green crops and oats. There were 2,292 horses, 11,560 cattle, 218 sheep, and 6,608 pigs in Jersey in 1904; in Guernsey (1904), 1,439 horses, 6,528 cattle, 209 sheep, and 5,099 pigs. The famous Jersey and Guernsey breed of cows has earned a well-deserved celebrity. The principal officer in each island is the *Lieut.-Governor*, who represents His Majesty. French is the official language of the local legislatures, called the *States*, and of the Royal Court, and the old Norman dialect is still spoken by the people, but English is now permissible in the legislative assembly. The *Bailiff*, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The climate of these islands is mild, and the soil exceptionally productive. The islands being all but exempt from imperial taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre, on the east coast.

Imports from United Kingdom, 1906... £1,353,186
 Exports to United Kingdom, 1906 1,554,217

The City of London.

LONDON was a place of importance under the Romans, and was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them; and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality, four times, A.D. 1397, 1398, 1406, 1419); and modern cases occur with Alderman Wood, 1815, 1816; Sir John Key, 1830, 1831; Alderman Cubitt, 1860, 1861; and Alderman Sir R. N. Fowler, 1893, 1895. The title of Lord Mayor is said to have been first bestowed in 1354 on Sir Thomas Legge, by Edward III.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life.

The Common Council was at an early date substituted for a popular assembly called the Folk-mote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. Sheriffs (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas, on which day the Lord Mayor is elected. He is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show. The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time 2 Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance *circa* 1319. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as officers in the charter of Edward II., A.D. 1319, but the offices can be traced to a much earlier date than this.

The Lord Mayor, Aldermen, and Principal Officers of the City of London.

© The above is abstracted from the 274th "City's Cash Account" of the series extant—A.D. 1633 to 1906. (The Accounts earlier than A.D. 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, temp. Queen Elizabeth, have been recently discovered among the Corporation Archives, as exceptions to that belief.) The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The extract is from the 123rd Annual Printed Account of the Corporation, A.D. 1784 to 1906. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, and the 14th December, 1905, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 76th Standing Order of the Court of Common Council. The Accounts for the year 1906 are the first issued in a new form under the above Orders, and show the Income and Expenditure applicable to the year on the various Funds.

Offices, Spring Gardens, S.W.—Education Offices, Victoria Embankment, S.W.

Hours 9.30 to 5 (Saturday 9.30 to 1).—Meets on Tuesday at 2.30 p.m.

THE London County Council was constituted under the Local Government Act of 1888. London is an administrative county, covering an area of 121 square miles, with boundaries conterminous with those of the area over which, prior to 1889, the Metropolitan Board of Works exercised jurisdiction under the Metropolis Management Act of 1855, except that under the London Government Act, 1899, there was some rearrangement of the county boundaries, the principal being that Penge was taken out of and South Hornsey was added to London.

The City of London is an electoral division of the county, and was not much affected by the Act. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties. Such matters as necessitate the consideration of both the administrative county and the non-administrative county are referred to "The Standing Joint Committee" of the London County Council and the London Quarter Sessions.

The Council comprises a chairman, 19 aldermen, and 118 councillors, together 138, or, if the chairman be also an elected member or alderman (as at present), 137. The term of office for aldermen is 6 years, and 10 or 9 retire every 3 years. The councillors are elected for 3 years, and will all retire in March, 1910, the seventh council having been elected in March, 1907. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office. *The first meeting of the London County Council was held on the 21st March, 1889, under the presidency of Lord Rosebery.

In the present Council the Municipal Reform Party have for the first time a large majority, previous Councils having been strongly Progressive.

The powers, duties, and liabilities of the Council include the following: *First*, those formerly belonging to the Metropolitan Board of Works in connection with the raising and loaning of money, and the sanctioning of loans required by the councils of the metropolitan boroughs; main drainage, and the sanctioning of local sewers; fire brigade; parks and open spaces; works for prevention of floods by the Thames; Thames crossings (bridges, tunnels, and ferry); street improvements; controlling the width of new streets, the building line, and the naming and numbering of streets; supervising buildings and district surveyors; dangerous structures; structure of theatres and music-halls; artisans' dwellings; cattle diseases; explosive substances and petroleum storage; infant life protection; gas, gas-meter, and electric-meter testing; tramways, &c. *Secondly*, those transferred from former county justices in connection with the granting of music and dancing licences; provision of asylums for pauper lunatics, and of reformatory and industrial schools; testing weights and measures; county buildings; coroners; and other minor matters. *Thirdly*, powers transferred from various authorities with regard to highways; licensing of houses or places for the performance of stage-plays beyond the limits of the Lord

Chamberlain's authority; licensing of slaughter-houses and of cow-houses; and the supervision of common lodging-houses. *Fourthly*, new powers with respect to registration of electors; public health; historic buildings and monuments; inspection of factories to secure means of escape from fire; suppression of nuisances; regulation of overhead wires; the administration of the Shop Hours and Shop Seats Acts, the Employment of Children Act, and the Midwives Act; reformatories for inebriates; the registration of motor cars; and the establishment of a steam-boat service on the Thames. Under the Education (London) Act, 1903, the Council became the authority for all public education in the county, both elementary and higher. As the central representative body in London, the Council also interests itself in the thousand and one things affecting the welfare of the people of London as a whole, and has delegates on the Metropolitan Water Board, the Thames and Lea Conservancy Boards, and numerous other boards, charities, &c.

The Council meets weekly, and receives reports from its numerous committees. The Finance Committee have important statutory powers. The Council is the principal money-raising body for all the local authorities in the county, and has a gross debt, according to the latest returns, of about £78,800,000, a Sinking Fund of £30,500,000, and an annual expenditure, including loans advanced to other bodies, of about sixteen millions, of which upwards of five millions are expended on education. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Asylums Committee have special powers under the Lunacy Acts, and manage Hanwell, Colney Hatch, Banstead, Cane-hill, Claybury, Bexley, and Horton Asylums. On the Horton estate an experimental working colony for epileptic patients has been opened, and a new asylum for 2,000 patients was opened last year. Accommodation is provided for over 19,000 patients. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts, including the clearance of insanitary areas and the building of working-class dwellings. The Council in 1893 established a model municipal lodging-house for men at Parker Street, Drury Lane, and has opened a lodging-house for 800 men, on the lines of the Rowton Houses, at Mill Lane, Deptford, and in 1906 a second house of this class was opened at Drury Lane. It is the aim of the Council to make its working-class dwellings self-supporting, and in this, taking all the dwellings as a whole, it has succeeded, but there is a charge on the rates in respect of estates in course of development.

The Improvements Committee have for some years past been engaged upon the formation of the new street between Holborn and the Strand (authorised by Act of 1899), now known as Kingsway and Aldwych; the new thoroughfare was opened by H.M. the King on the 18th October, 1905. The committee are also engaged upon a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge

(authorised by Act of 1900) and several smaller improvements. This committee are also now responsible for work formerly entrusted to the Bridges Committee in connection with Thames crossings. The construction of a tunnel to connect the districts of Rotherhithe and Shadwell is progressing rapidly. This tunnel will be $1\frac{1}{4}$ miles in length, will accommodate both foot and vehicular traffic, and is estimated to cost upwards of £2,000,000, including the acquisition of property and formation of approaches.

The Fire Brigade, directed by the Fire Brigade Committee, has been much increased since the Council came into existence: the authorised staff now numbers over 1,300 men, and several new stations are being built, while old stations are being improved and enlarged. Perhaps the most popular work of the Council is that connected with its parks and open spaces. Amongst the latest additions to these open spaces in and around London are Marble Hill, Twickenham (to preserve the view from Richmond Hill), Avery Hill, Eltham, Hainault Forest, Essex, Springfield Park, Clapton, and Ruskin Park, Denmark Hill. The annual expenditure on the maintenance of parks and open spaces (nearly 5,000 acres) is about £135,000.

The disposal of sewage is the work of the Main Drainage Committee. The metropolitan main drainage system covers about 140 square miles, including certain districts outside the county, and comprises 200 miles of main, storm-relief, intercepting and outfall sewers, nine pumping stations and two sewage precipitation stations. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, the harmless effluent being allowed to flow into the river. A comprehensive scheme for enlarging the main drainage system was adopted by the Council in 1900, and this was supplemented in 1904 by a scheme of extensive flood relief works. These schemes are already well in hand. The total capital outlay on main drainage up to 31st March, 1907, was £10,351,000.

In previous Almanacks particulars have been given of the purchase by the Council of the most important tramway systems within the county. The Council is now in possession of all the tramways in London with the exception of a few miles of lines, chiefly in the north-west. The tramways purchased by the Council on the north of the Thames, comprising in all about 50 miles of lines, were leased to the North Metropolitan Tramways Company for a period expiring in 1910, but on 1st April, 1906, the Council took over the working of these lines and compensated the company for the surrender of the remainder of the lease. This course was adopted with a view to the reconstruction of the lines for electric traction, and the conversion of a large section has already been completed, and a further section is in a forward state. The tramways on the south of the river, comprising now about 70 miles of lines, have been worked by the Council since their acquisition. These lines are also being reconstructed for electric traction, and about 50 miles of double line have been completed and are already working. The total capital outlay on tramways amounted, on 31st March last, to £6,946,310, and the debt outstanding to £6,108,905. A report recently presented to the Council on the results of the year 1906-7, showed gross receipts of £1,414,000, a surplus on working of £339,000, and a net sur-

plus, after payment of interest on capital outlay and providing for repayment of debt, of £9,673. The results were adversely affected by the losses incidental to the reconstruction works in progress. Over 30,000,000 car-miles were run and 314,227,000 passengers were carried during the year. This department of the Council's work is directed by the Highways Committee.

The Education Committee comprises thirty-eight members of the Council and five co-opted lady members. Names of these members will be found under the Alphabetical List of Councillors. The Council is responsible for the education of about 750,000 children in elementary schools, and is doing much to improve the supply of secondary and technical education in London and the provision of training colleges for teachers. The estimates of expenditure on rate account for education for the year 1907-8 amount to £5,255,926, of which £4,317,614 is for elementary and £838,312 is for higher education, which now includes evening schools and pupil teachers' centres, as well as secondary schools, training colleges, polytechnics, and technical institutes. The charge falling on the rates, after deducting grants and other receipts in aid, is £3,290,298, or 18. 6d. in the pound—a decrease of 1d. in the pound upon the rate for 1906-7.

Reference was made in previous Almanacks to the establishment of a service of steamboats on the River Thames under an Act obtained in 1904. This service, though providing a much-needed means of communication on the river, has not proved financially successful, and the question of the future maintenance of the service is under consideration.

The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock, and current income raised in a county rate. Certain contributions, including education grants, are also received from the Imperial Exchequer. The capital disbursements for the year ended 31st March, 1907, amounted in round figures to £4,750,000, including improvements (streets, bridges, or tunnels), £759,000; housing of the working classes, £205,000; main drainage, £728,000; fire brigade, £76,000; lunatic asylums, £273,000; tramways, £2,017,000; new county hall site, £292,000; and education, £404,000. The maintenance of these works and services, the sinking fund to pay off debt, and the interest on the debt, together with all recurring disbursements of every kind, are paid out of rates, or, in the case of tramways and working-class dwellings, out of receipts. Some idea of the nature and amount of the expenditure on rate account will be gathered from the statement on the next page.

During the year 1907 the Council made a further issue of £5,000,000 London County Consolidated Stock, carrying interest at the rate of $3\frac{1}{2}$ per cent., the Stock being issued at a fixed price of £97 per £100 of Stock. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure within a period of 60 years. The total Stock now outstanding amounts to about £72,000,000.

The rating for the year 1907-8 amounts to 28. 8d. in the pound over the whole county, including the City, and a further rate over the county outside the City of 3d. in the pound, together 28. 11d. This includes 18. 6d. for education. The assessable value of the County

of London on 6th April, 1907, was £43,870,652—a 1d. rate over the whole county producing £182,794.

The following is a summary of the estimates of the amount to be raised by county rate for

the year to 31st March, 1908, prepared at the beginning of the year. These figures do not include the receipts and expenses on account of the revenue-producing undertakings (tramways, working-class dwellings, &c.):—

ESTIMATED RECEIPTS.

1. CASH BALANCE on 1 April, 1907 (out of which the outstanding net liabilities of the previous year have to be met)	£1,190,578
2. RECEIPTS in aid of expenditure: Exchequer Contribution £504,396 Government Grants in aid of Education	1,463,467
Interest on Loans advanced to Local Authorities, &c.	643,000
Rents	135,275
Sundry contributions, fees, fines, &c.	280,577
3. CONTRIBUTIONS from Revenue-producing undertakings for interest and repayment of debt chargeable thereto (Tramways, Working-class Dwellings, &c.)	574,935
4. CONTRIBUTION from Works Account for interest and repayment of debt and interest on working capital (charged as part of cost of works executed)	8,095
5. GRANT from Local Taxation Account under the Agricultural Rates Act, 1896	1,633
6. COUNTY CONTRIBUTIONS required to be raised:— General County— For purposes other than Education (1s. 2d.) ...	£2,559,122
For Education (1s. 6d.) ...	3,290,298
Special County (3d.)	5,849,420
	481,218
[Total rate, 2s. 11d.]	6,330,638

£11,132,594

ESTIMATED EXPENDITURE.

1. DEBT:—Redemption ...	£1,374,087
Dividends on Stock (less tax)	2,053,400
Interest on sundry liabilities	208,651
Income Tax	47,576
Management of stock, &c.	73,565
2. GRANTS:—To Guardians for indoor paupers ...	£328,027
To Guardians and others out of the Exchequer contribution	301,922
Registration of Electors	15,435
Main roads	289
3. PENSIONS (including Superannuation and Provident Fund)	645,673
4. ESTABLISHMENT CHARGES (not charged to particular services) ...	68,055
5. JUDICIAL EXPENSES	233,285
6. SERVICES:— Main Drainage	47,570
Fire Brigade	£269,420
Parks and Open Spaces	261,740
Bridges Tunnels and Ferry	135,175
Embankments	53,060
Pauper Lunatics	12,570
Feltham and Mayford Industrial Schools ...	95,570
Inebriates Acts	30,445
Coroners	12,300
Weights and Measures	31,010
Gas-meter & Gas Testing	15,835
Building Acts	13,275
Diseases of Animals Acts	27,950
Miscellaneous	12,695
	46,015
Education— Elementary	£1,017,060
Higher	4,317,614
	838,312
Less debt charges included in Head 1.	5,155,926
	758,741
	4,397,185
7. PARLIAMENTARY EXPENSES, Inquiries, Rating Appeals, &c. ...	5,414,245
8. ESTIMATED DEFICIENCIES of revenue-producing undertakings— Steamboats	35,850
Working-class Dwellings	10,201,957
	42,889
	6,519
Total Expenditure	49,408
9. ESTIMATED CASH BALANCE on 31 March, 1908, out of which liabilities then outstanding have to be met	10,251,365
	881,229

£11,132,594

The Seventh London County Council.

Elected 2nd March, 1907, for three years.

Chairman H. P. Harris, South Paddington.

Vice-Chairman H. Stuart Sankey, City of London.

Deputy Chairman Capt. Hon. Fitzroy Hemphill, Central Finsbury.

** In the following list the figures after each division represent the number of voters on the Register in 1907; the figures after the names represent the votes polled at the General (or subsequent bye-) Election. The names of members are in *italics*, and members of the last Council have an asterisk * prefixed to their names; † denotes an Alderman of the late Council, and ‡ a change of constituency.

Metropolitan Water Board.

<i>Chairman</i> , Sir R. Melvill Beachcroft, L.C.C.	unp.
<i>Vice-Chairman</i> , E. B. Barnard, M.P.	unp.
<i>Clerk of the Board</i> , A. B. Pilling	£1,750
<i>Assist. do.</i> , W. J. G. Norris	£550
<i>Supervisor</i> , F. W. Drake	£700
<i>Solicitor</i> , W. Moon	£800
<i>Chief Engineer</i> , W. B. Bryan	£2,500
<i>Deputy do.</i> , J. W. Restler	£1,827
<i>Comptroller and Registrar of Debenture</i> Stocks, F. E. Harris	£1,500
<i>Deputy Comptroller</i> , A. Newton	£650
<i>Chief Revenue Officer</i> , J. Wilson	£618
<i>Director of Water Examinations</i> , Dr. A. C. Houston	£1,000

The Metropolitan Water Board was created in 1902, and came into existence in 1903, the duties of the Board being to supply water to the districts previously supplied, or authorised to be supplied, by the various authorities superseded. The total amount of water supplied during the year 1906-7 was 82,125,249,347 gallons. It is to be noted that London water, taken as a whole, contained only 10·8 microbes per cubic centimeter; practically always yielded a negative result with the B. Enteritidis Sporogenes test (with 10 c.c. of water); and in 75·4 per cent. of the samples contained no typical (*flaginac*) B. coli in 100 cubic centimeters of water, and in 1·3 per cent. only of the samples was this microbe present in one cubic centimeter. The Board consists of 66 members, nominated by the constituent authorities of the water area, and meets on alternate Fridays at Metropolitan Asylums Board Offices, Thames Embankment, E.C. Offices, Savoy Court, Strand, W.C.

Life-Boats.

THE ROYAL NATIONAL LIFE-BOAT INSTITUTION was founded in 1824, and during the year 1906 the receipts in subscriptions and donations amounted to £10,207; in contributions from branches, £20,834; Life-boat Saturday Fund, £17,685; and in dividends and interest on capital invested, £22,026; a gross total of £70,752. The expenditure of the year reached a total of £79,726. The total number of lives saved by the life-boats of the Institution and by special efforts for which it has awarded grants since its foundation in 1824 amounts to 46,189, the number of lives saved in 1906 being 772. In 1906 forty-six vessels were also saved. The rewards granted by the Institution since 1824 include 99 gold medals and clasps, 1,232 silver medals and clasps, besides aneroids, binocular glasses, addresses, and £267,037 in money. Two hundred and seventy-nine life-boats are maintained under the auspices of the Institution on the coasts of the United Kingdom. *Patron*, H.M. the King; *President*, H.R.H. the Prince of Wales; *Offices*, 22 Charing Cross Road, W.C.; *Secretary*, Charles Hibdin.

Royal Humane Society.

THE income of the Society (which was instituted in 1774) was £1,770, and the expenditure £2,615, in 1906. During the year 1906, 765 persons were rewarded by the R.H.S. for saving 717 lives, and attempting to save the lives of 65 others. The Stanhope Gold Medal was awarded in 1906 to Sub-Lieut. D. J. D. Noble, R.N. The other rewards include 9 silver medals, 107 bronze medals, 5 bronze clasps (which are

London Police.

THE CITY POLICE district comprises an area of 673 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (see p. 189). Although the area is comparatively small, the rateable value is enormous, and there are 26,923 night residents to be protected.

The Force comprises 1 Superintendent, 1 ditto, Detective Department, 4 Chief Inspectors, 15 District Inspectors, 20 Station Inspectors, 9 Detective Inspectors, 74 Sergeants, 12 Detective Sergeants, and 865 Constables; also 1 Sergeant and 59 Constables on private service duty.

THE METROPOLITAN POLICE district embraces an area of 447,626 statute acres, with a population of between seven and eight millions. There are within this area fifteen Police Courts, viz., Bow Street, Clerkenwell, Marlborough St., Greenwich, Lambeth, Marylebone, North London (Stoke Newington Rd.), Old Street, South Western (Lavender Hill), Thames (Stepney), Tower Bridge, West Ham, West London (Vernon St.), Westminster, and Woolwich (see p. 189).

The force on Oct. 20, 1907, consisted of 32 Superintendents, 562 Inspectors, 2,349 Sergeants, and 14,939 Constables, making a total of 17,882, with 286 horses.

It is scarcely possible to form an accurate estimate of the enormous actual value of the property under police protection, but the mean rateable value of the metropolitan area for Metropolitan Police purposes for the year 1906-7 was £52,911,670.

usually given for a second act of bravery, to those already in possession of the medal), 506 testimonials, and 101 pecuniary rewards. Forty-three awards went to the Royal Navy, Coast Guard and Royal Naval Reserve, 17 to the Army, 45 to the Police Force, and 28 were made on the recommendation of the Indian and Colonial Offices.

In addition to boats and ice-boats for the protection of bathers, life-buoys and drags, &c., are maintained at the cost of the Society in nearly 300 places in and around the Metropolis. *Patron*, H.M. the King; *President*, H.R.H. the Prince of Wales; *Offices*, 4 Trafalgar Square, Charing Cross; *Secretary*, Major F. A. C. Cloughton.

British Red Cross Society.

THE Society is the outcome of a fusion of two bodies—the "British National Society for Aid to the Sick and Wounded in War" and the "Central British Red Cross Council," and was inaugurated in 1905 to co-ordinate all such associations as are concerned with the succour of the sick and wounded in war.

The primary object of the British Red Cross Society is to furnish aid to the sick and wounded in time of war. Such aid must necessarily be supplementary to that furnished by the medical departments of the Navy and Army.

The Admiralty and War Office have accorded their official recognition to the British Red Cross Society as the organisation responsible for the Red Cross movement throughout the Empire. *Patron*, H.M. the King; *President*, H.M. Queen Alexandra; *Offices*, 9 Victoria St., London, S.W.; *Secretary*, James G. Vokes.

THE CITY COMPANIES, NUMBER OF LIVERYMEN (1907),
CORPORATE AND TRUST INCOMES, MASTERS, CLERKS, AND HALLS.

As will be seen from the following table, many of the London Livery Companies are possessed of great wealth. Of some portion of the property they are merely trustees, but of the "corporate" property they are the sole owners, and may dispose of the income as they please. Fifteen of the Companies have more than ten thousand pounds a year, and most of them are very liberal in their charities, especially in the way of education. The Editor is apparently regarded with

suspicion by the majority of the Companies, for his annual request for information as to the amount of the funds is, in almost every case, ignored. The following list is compiled from returns made (in many cases but partially) at the Editor's request. Where the return was incomplete the Editor allowed the old figures to remain. The order of precedence is given in parentheses after the name of each Company.

COMPANY.	No. of Livery.	Corporate Income.	Trust Income.	Total Income.	Master or Prime Warden, 1907-1908.	Clerk.	Hall.*
Mercers (1)	200	53,000	58,000	111,000	John H. Blakesley	G. H. Blakesley	4 Ironmonger Lane.
Grocers (2)	183	37,500	500	38,000	Stephen C. Goodhart	R. V. Somers-Smith	Princes St.
Drapers (3)	300	50,000	28,000	78,000	William How	Sir William Sawyer	Throgmorton St.
Fishmongers (4) ..	335	49,955	2,428	52,383	G. L. Dorman	J. Wrench Towse	Adelaide Pl., Lond. Br.
Goldsmiths (5) ..	150	43,000	16,000	59,000	Gen. Sir R. Buller, [†]	Sir W. S. Prideaux	Foster Lane.
Skinner (6)	230	31,600	31,000	62,600	Arthur T. Marson, M.A.	E. H. Draper, B.A.	Dowgate Hill.
Merchant Taylors (7)	336	37,000	13,000	50,000	G. S. Gordon Clark	Edward Nash	30 Threadneedle St.
Haberdashers (8)	341	9,000	49,000	58,000	S. Warren	J. H. Townend	33 Gresham St.
Salters (9)	180	20,000	2,000	22,000	Edward Coventry	S. W. Luard	St. Swithin's Lane.
Ironmongers (10)	37	12,000	11,000	23,000	W. T. R. Price	R. C. A. Beck	Fenchurch St.
Woolmen (11)	205	9,500	1,500	11,000	William Aste	C. Lomas	68½ Upper Thames St.
Clothworkers (12)	176	42,000	18,000	60,000	Francis Farnan	P. M. Evans, M.A.	41 Minching Lane.
The above are the Twelve "great" London Companies in order of Civic precedence.							
Apothecaries (58)	150	..	600	600	George Wilkes	A. Mowbray Upton	Water Lane.
Armourers and Brasiers (22) ..	92	7,940	60	8,000	Robert A. Hill	Marshall Pontifex	81 Coleman St.

* In case of a Company having no Hall, the address of the Clerk is given in brackets.

The report, in 5 vols., published in 1884, of the City Livery Companies' Commission appointed in 1880 (Chairman, the late Earl of Derby), stated the rateable value of the Halls of the London Companies at about £55,000, and that of their Schools and Almshouses about £18,000 a year; the value of their Plate and Furniture at £320,000; and the annual income of the livings in their gift—several of the "great" Companies are patrons of livings—about £12,300. In 1880 the Companies were indebted to the extent of about £270,000.

LONDON WITHIN VARIOUS BOUNDARIES.	AREA IN STATUTE ACRES.	POPULATION.	
		1891.	1901.
Within the Registrar-General's Tables of Mortality	74,839	4,228,317	4,536,541
Within the Limits of the County of London	673	37,702	26,923
City of London within Municipal and Parliamentary Limits	269,148	5,260,680	6,101,664
Central Criminal Court District	442,746	5,596,104	6,554,449
Metropolitan Police District (not including City)	443,419	5,633,806	6,581,372
Metropolitan and City Police Districts			

Parliamentary Boundaries.—In consequence of changes of boundaries under the London Government Act, 1899, the County of London does not now include the whole of certain Metropolitan Parliamentary Divisions; on the other hand, it includes portions of certain Extra-Metropolitan Parliamentary Divisions.

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with a rateable value in 1906-1907 of £52,911,670, and embraces an area of upwards of 699 square miles. The number of new houses built since 1870 up to and including the year 1906 is 621,719, with 5,296 in course of erection: the new mileage since 1870 being 1,718.

FELONIES IN LONDON.

Felonies Relating to Property Committed, Persons Apprehended, Property Stolen and Recovered, etc., in the Metropolitan Police District in ten years 1897-1906.

Year.	Total No. of Felonies.	Total No. of Persons Apprehended.	First Loss.	Amount Recovered.	Total Loss.	Estimated Population.*	Proportion of Felonies per 1,000 of pop.
1897	16,094	11,350	£132,248	£21,775	£110,473	6,376,610	2'524

1906	17,197	12,255	147,963	42,035	105,928	7,191,018	2'391

* The Census of 1901 showed that the Population for the years from 1897 to 1899 had been over-estimated.

THE following list of Life Offices contains the names of all the more important British offices, of eight Colonial companies, and of three offices founded in New York.

DATE OF FORMATION.—This is of importance, as the normal rate of mortality is not experienced until the company has been doing business for five-and-twenty or thirty years. Any company established more recently than this must be judged largely by its prospects instead of by its results.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system, whereby the whole of the surplus or profits are allotted to the participating policyholders, or whether the company has proprietors or shareholders by whom part of the surplus is received. Many of the Life offices also transact other insurance business as well. These are indicated by letters in the column headed "Class." In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital, however, is usually liable for the claims of all branches. The companies in the first part of the Table all transact "ordinary" Life business; the companies doing Industrial business are stated separately.

FUNDS.—The Funds as stated in the table are in all cases taken from the Revenue Accounts deposited by the offices with the Board of Trade. The Paid-up Capital of Proprietary offices that transact Life business only is included in the Funds. Paid-up capital of offices transacting other classes of business as well is excluded from the Funds as stated in the Table, because such capital is available for other claims than those of the Life Branch. The Funds as well as the premium income are derived from the latest annual accounts published by the offices, the date in the majority of cases being December, 1906. The amount of the funds taken alone affords no indication of the financial stability of a company, which cannot be judged unless its liabilities are known as well as its assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reinsurance parts of such risks as the offices do not feel justified in retaining in their entirety.

EXPENSES.—The expenses of a Life office include not only the salaries of officials, rents of offices, cost of advertising, &c., but also, in all cases where it is paid, the commission paid to agents for the introduction of business. The amount of expenses as so understood is less important in itself than in relation to premium income, consequently we have stated in the table the percentage of the premium income absorbed in commission and expenses. The average percentage of the whole of the British offices is about $14\frac{1}{2}\%$, of which $5\frac{1}{2}\%$ is expended on commission and 9% on other expenses. This ratio taken by itself is frequently misleading, because a large proportion of a company's expenditure is incurred in obtaining new business. If the proportion of new business to total business is large, the percentage of the total premiums absorbed in expenses is also large; but when the expenses are distributed between new business and old, or renewal, business, a fair indication is obtained of the real expenditure

that an office is incurring. Perhaps the most satisfactory way to split up this expenditure is to assume that the percentage of new premiums absorbed in expenses is ten times as much as the percentage of renewal premiums absorbed in expenses. The expenses per cent. of new premiums given in the table means therefore that if, as in the case of the Atlas, 82.7% of the new premiums goes in expenses, one-tenth of this percentage or 8.27% of the renewal premiums is the cost of managing the renewal business. These two percentages taken together exactly amount to the total expenditure of the office. The relative economy or extravagance of the various offices may therefore be better judged by the percentage of new premiums absorbed in expenses than by the percentage of total premiums. The average annual expenditure of British offices is 80% of new premiums and 8% of renewal premiums.

INTEREST.—The rate of interest earned upon the funds is especially important for comparison with the rate assumed in valuing the liabilities, since the greater the margin between the rates of interest earned and assumed, the greater is the surplus, and, speaking generally, the larger the bonus, though bonuses may fall at the time when a lower rate of interest is first adopted in valuing liabilities. The rate of interest here quoted is derived from the latest annual accounts, and is obtained by dividing 100 times the amount of interest, less Income Tax, by the mean of the funds at the beginning and the end of the year after deducting half a year's interest from the mean fund.

VALUATIONS.—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade usually every three, five, or seven years. It is not possible in the space here available to give anything but a very small part of the information supplied by these returns. A valuation consists of a calculation of the present liability of an office under its existing policies, after making allowance for the amounts it will have to pay and to receive. In making this calculation it has to be assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various tables are employed, those most frequently used being Healthy Males (H^m), and British Offices (O^m) and the corresponding Tables $H^m(3)$ and $O^m(5)$ which exclude from observation the mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes that only a low rate of interest will be earned, while the liability on account of mortality appears greater by some tables than by others. Consequently the position of an office is very strong and satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated liability and the experienced liability is larger and the surplus available for bonuses is larger also. The H^m and $H^m(3)$ tables in conjunction are more stringent than the H^m table alone, the H^m is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent the valuation.

The O^m Tables usually require slightly stronger reserves than the H^m .

P = Proprietary.

M = Mutual.

F = Transact Fire Business also.

S = Transact Sickness or Accident Business also.

O = Transact Ordinary Life Business also.

I = Transact Industrial Life Business also.

a = Expenses include cost of Valuation.

b = Special Reserve in addition to provide for assuming lower rates of interest in future, or for other purposes.

e = New Premiums not stated.

f = Does not pay Commission.

g = Interest earned excludes Reversions.

m = Transact Marine Business also.

* Caledonian. Fire business commenced 1805.

* Century. Accident business commenced 1885.

* Clerical, Medical. Expenses include cost of pension.

* Commercial Union. Funds exclude Hand-in-Hand and West of England funds.

* Equitable. With additional reserve of more than one-half of clear surplus. Expenses exclude provision for pensions.

* Law Union and Crown amalgamated 1891.

* Marine and General. Also insures Mariners', &c. effects. Expenses include those of Marine Branch.

* National Mutual. Amalgamated 1886.

* Scot. Acc. Accident Business commenced 1877.

* Scot. Amicable. Net Premiums valued at 34 per cent. so strengthening Reserves by £272,984.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If the policy does not participate in profits, both the sum assured and the premium remain unchanged. If the policy does participate in profits, a higher premium is charged, and bonuses are declared from time to time. The bonuses may usually be used either to increase the sum assured or to reduce the premium, or they may be taken in cash. It is usually to the advantage of an assurer to take a policy that participates in profits, but to overcome the objection of the higher premium

that participation in profits usually involves, a plan has been adopted in recent years whereby future bonuses are anticipated and used to reduce the premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed the bonuses anticipated, the difference is paid to the policyholder; if however the anticipated bonuses exceed the declared bonuses, the difference has to be paid by the policy holder or to remain as a debt upon the policy. We give below the average premiums charged by British offices for the three classes of policies. The rates quoted are the amounts payable annually for the whole of life to assure £100 at death.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The rates in the above table are the average of the rates of all the offices that quote these three classes of policy respectively. The next table shows the annual premiums payable throughout life for the assurance of £100 at death with participation in profits in the different offices. Premium rates alone are not sufficient for judging the relative methods of life offices for participating policies. An office charging a high premium is more likely to give high bonuses than an office charging a low premium, and therefore

the bonuses as well as the premiums have to be taken into account. But the details of bonuses are too voluminous to be given here; they may be obtained from various insurance annuals. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. The offices that make a special feature of this sort of policy are the London Life and the Metropolitan.

† London Life—These Rates are for nearest age and are Subject to reductions—anticipated to be not less than 50%—in the eighth year and thereafter. α Abstainers' Rates are less.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the assured however die during the endowment period, the sum assured is paid at death. The annual premiums payable throughout the endowment period, or till death if previous, for the assurance of £100 at

various ages of entry and maturity, are given in the next table. Endowment assurance may be taken either with or without participation in profits; it is usually advantageous to take participating policies. The discounted bonus system described above is also applied to endowment assurance policies.

Assurances in Force as shown by the latest Returns issued by the Board of Trade	ORDINARY LIFE ASSURANCES.		INDUSTRIAL LIFE ASSURANCES.	
	No. of Policies.	Net Sums Assured.	No. of Policies.	Net Sums Assured.
	2,397,915	£713,491,783	25,544,045	£251,553,949

Immediate Annuities.

379

THE following Table shows the amount of Annuity granted by the undermentioned Companies for every £100 paid. The age last birthday is that upon which the payment is based, but many offices quote intermediate rates for every half or quarter year of age. By a few Companies a proportionate amount of Annuity is payable to day of death.

The Annuity is calculated as payable half-yearly; the annual payment is in nearly all cases higher if paid annually and less when paid quarterly.

Fire Insurance Rates.

RATES.—For merchandise at the principal ports, and for mills and manufactories and other leading industries throughout the United Kingdom, all the tariff or associated offices charge an identical minimum. Non-tariff and some class offices advertise that they assess individual risks on their merits. The following is a digest of the scale put forward by some of the oldest companies, and the rates and classification are those which are generally adopted.

Common Insurances.—At 1s. 6d. to 2s. per cent. per annum, with certain exceptions:—

1. Buildings covered with slates, tiles, or metals, and built on all sides with brick or stone, or separated by party-walls of brick or stone which are carried through the roof, and used for residence, or non-hazardous purposes.

2. Goods in buildings as above, such as household goods, plate, wearing apparel, and printed books, liquors in private use, and personal effects not comprised in the following categories.

Hazardous Insurances.—At 2s. 6d. to 3s. 6d. per cent. per annum, with certain exceptions:—

1. Buildings of timber and plaster, or not separated by partition walls of brick or stone, or not covered with slates, tiles, or metals, and thatched barns and outhouses, having no chimney, nor adjoining to any building having a chimney; and buildings falling under the description of common insurances, but in which hazardous goods are deposited, or hazardous trades are carried on.

2. Goods.—The stock and goods of bread-bakers, tallowchandlers (not melters), drapers, stationers, also chemists and grocers not dealing in mineral oils.

Doubly Hazardous Insurances.—At 4s. 6d. to 5s. per cent. per annum, with certain exceptions:—

1. Buildings.—All thatched buildings having chimneys, or communicating with or adjoining to buildings having one, although no hazardous trade shall be carried on, nor hazardous goods deposited therein, and all hazardous buildings in which hazardous goods are deposited, or hazardous trades carried on.

2. Goods.—All hazardous goods deposited in hazardous buildings, and in thatched buildings having no chimney; also china, glass, mathematical and musical instruments, pictures, and jewels in private use.

Much depends upon the surroundings of the building insured; for a printer's or bookbinder's workshop, in a narrow lane, with old wooden houses near it, the premium would possibly be from 10s. to 15s.

Special Insurances.—5s. per cent. per annum and upwards:—

Buildings and contents among others of workers in wood, dealers in mineral oils, large drapers, some mills, warehouses, and factories; in the case of some theatres the rate is as high as 3rs. 6d. per cent.

EMPLOYERS' LIABILITY INSURANCE.

A special article on the Workmen's Compensation Act, 1906, appears on pp. 655-656. Specimen premium rates for insurance are appended to the article.

The following are Dr. W. Ogle's tables founded on the death-rates of 1871-80; in the 1897 Almanack a table appeared (p. 357) giving, alongside of the following, statistics compiled by Dr. Farr, of the General Register Office, on the basis of the death-rates of 1838-54. These columns are now omitted, and only the more recent figures appear. The first columns show the survivors of each sex at each year of life out of a million born; the other columns show the expectation of life at each year.

AGE.	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).		AGE.	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).

50	3'4371	4'3839	5'5849	7'1067	9'0236

* When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at $\frac{1}{2}$ per cent. for 25 years, take 26 years, £36'012, and deduct £1—£35'012.

REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1858, and examined by the actuary of the National Debt Office. It gives the sums needed

as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 20, 30, 40, and 50 years:—

Years	3 per Ct.	3½ per Ct.	4 per Ct.	4½ per Ct.	5 per Ct.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
20	12 14 5½	12 0 5½	12 6 7	12 12 9	12 19 0
30	6 14 5½	7 0 8½	7 7 7	7 13 9	8 0 5½
40	5 2 0½	5 8 9	5 25 ½	6 3 9½	6 10 1½
50	4 6 6½	4 13 7½	5 2 0½	5 9 8½	5 16 6½

If the loan be for £1,000, each annual instalment as shown above must be multiplied by 10; if for £2,000, then by 20, and so on.

PERSONAL PROPERTY, INCLUDING LEASEHOLDS.

TABLE of Succession applicable to England and Scotland, and showing persons entitled to administer.

The persons entitled to administer are shown in brackets.

IN EACH INSTANCE IT IS SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* Where this is prefixed the Regulation applies to Scotland only.]

By the Intestates' Estates Act, 1890, a very important change was made in the law as regards provision for widows of men dying intestate and without issue. Under this Act the widow in such a case is entitled to the whole estate both real and personal if under £500 in value; if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

If the Intestate die, leaving

His representatives take in the proportions following:—

Widow only.....	Half to widow. Half to the Crown. [Widow.]
Widow and child or children	One-third to widow, two-thirds to children in equal shares. In case of deceased children who have left issue, such issue take amongst them their deceased parent's share. [Widow.]
Widow and father.....	*One-third to widow. One-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate during life must collate the advances). One-third amongst living children <i>per capita</i> and issue of deceased children <i>per stirpes</i> . See NOTE A, next page.
Widow and mother, no father	Half to widow. Half to father. [Widow.]
Widow, brothers or sisters	*Half to widow, one-sixth to mother. Two-sixths to Crown.
Widow, mother, nephews or nieces	Half to widow. Half equally amongst brothers and sisters, whether of the whole or half blood; if a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share. [Widow.]
Husband, with or without children	Half to widow. One-fourth to mother. One fourth to nephews and nieces <i>per stirpes</i> . [Widow.]
Father, brothers, and sisters	*Half to widow. One-sixth to mother, two-sixths to nephews and nieces <i>per stirpes</i> .
Mother, brothers, and sisters	All to husband. [Husband.]
Mother, but no other kin	*Half to husband. Half to wife's next-of-kin. [Husband.]
Child, children, or grandchildren by deceased child	All to father. [Father.]
Brother or sister, and nephews or nieces.....	*One-half to father. One-half equally amongst brothers and sisters.
Brother or sister, and grandfather.....	All equally. [Mother.]
Brother or sister, and uncles or aunts	*Mother one-third. Brothers and sisters two-thirds equally.
Grandfather, no nearer relation	All to mother. [Mother.]
Father's father, and mother's mother	*One-third to mother. Two-thirds to the Crown.
Grandmother, uncles, and aunts	Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share. [Any number of children not exceeding three.]
Great-grandfather, uncles, and aunts	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share. [Brother or sister.]
Uncles and aunts	All to brother or sister. [Brother or sister.]
	All to brother or sister. [Brother or sister.]
	All to grandfather. [Grandfather.]
	Equally to both. [Either or both.]
	All to grandmother. [Grandmother.]
	*All to uncles and aunts if paternal.
	Equally <i>per capita</i> . [To either or any number not exceeding three.]
	All equally. [To either or any number not exceeding three.]

Uncle, and deceased uncle's child	All to uncle. [Uncle.]
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle. [Uncle.]
Aunts, nephew, and niece	*Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle.
Cousins	All equally. [Either not exceeding three.]
Nephew by brother, and nephew by half-sister...	*Nephew and niece.
	Equally <i>per capita</i> . [Any number not exceeding three.]
	Equally <i>per capita</i> . [Any number not exceeding three.]
	*All to nephew by brother.

NOTE A.—Taking *per capita* is taking by head individually. Taking *per stirpes* is taking by descent or representation. Thus, if A. die leaving three brothers or sisters, and no nearer kin, they each take an equal part of his personal estate in his or her own right, *i.e.*, *per capita*. If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived, *i.e.*, *per stirpes*.

NOTE B.—By English law, brothers and sisters of the half blood share equally with the whole blood. By the Scottish law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father only) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother only) and their issue.

NOTE C.—Posthumous children take equally with those born in the lifetime of their father.

Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. The Dower (*viz.*, widow's thirds) of widows married since 1833 is in the majority of cases barred.

In each instance it is supposed that there are no nearer relations than those named.

<i>If Intestate die, leaving</i>	<i>Real Property would descend to—</i>
Wife only, no blood relations	One-third to wife for life, rest to Crown; copyholds to lord of manor.
Wife and child or children, and children of a deceased child	One-third to wife for life in any case. Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female. If no son, rest to daughters equally. If daughters and grandchildren (sons and daughters of deceased daughter), rest to daughters and eldest son of deceased daughter.
Wife and father	One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will.
Wife and mother	One-third to wife for life; rest to mother, there being no heirs on father's side.
Wife, brother, or sister, and children of a deceased brother or sister	One-third to wife for life in any case, rest to eldest brother or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Sister and children of deceased sister, rest equally between sister and nephew (eldest). Sisters and nieces, only, children of deceased sister, rest equally between sisters and nieces, nieces taking <i>per stirpes</i> .
Wife, mother, nephews, and nieces	One-third to wife for life; rest to nephew (eldest), or nieces, if brother left no son.
Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters)	One-third to wife for life in any case; rest to eldest brother. Rest to nieces, equally, if children of elder brother deceased.
No wife or child or issue of a deceased child	Lineal ancestor paternal, males of whole blood first.
Children by one or more wives, and the issue of deceased children	All to eldest son, or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Daughters equally.
Husband and child or children ...	Husband for life; afterwards to only child or to eldest son or issue of a deceased eldest son. If all daughters, to them equally.
Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father...	All to mother in default of lineal ancestors on the father's side, or issue of such ancestors.
Mother, and brothers and sisters	All to eldest brother.

Mother and sisters	All to sisters.
Father, and brothers and sisters	All to father.
Child and grandchild by deceased child	See above, "Rest to eldest son or his issue," under head "Wife and child," &c.
Brother and grandfather	All to brother.
Brother's grandson, and brother or sister's daughter	All to great-nephew, if eldest brother's grandson.
Brother and two aunts	All to brother's daughter, if child of eldest brother.
Brother and wife	Brother, all.
Grandfather (no nearer)	One-third to wife for life; rest to brother.
Father's father & mother's mother	All to grandfather.
Grandmother & uncle, or aunt on father's side (no nearer)	All to father's father.
Uncle, and deceased uncle's child	All to uncle or aunt.
Uncle by mother's side, and deceased uncle or aunt's child ..	Uncle, unless deceased uncle was elder brother, when his child takes all.
Two aunts, nephew, and niece, children of deceased brother ..	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
Uncle or aunt's children, and brother's grandchildren through a son	Nephew.
Nephew by brother, and nephew by half-sister	Eldest brother's grandson, or if granddaughters between them equally.
Nephew by deceased brother, and nephews and nieces by deceased sister	Nephew by brother.
	All to eldest nephew, son of deceased brother.

NOTE A.—By the Land Transfer Act, 1897, the real estate of a deceased person devolves to the personal representative of the deceased, and probate and letters of administration may be granted in respect of real estate only, although there is no personal estate. The ultimate ownership of real estate is not affected by these provisions, which are for the convenience of administration. As to the persons entitled to administration of real estate, they are substantially the same as in the case of personal estate; but the Court shall, in granting letters of administration, have regard to the rights and interests of persons interested in the real estate, and the heir-at-law, if not one of the next-of-kin, shall be equally entitled to the grant with the next-of-kin.

INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

THE entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 37. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as remodelled under

the Finance Act of 1894, will be found in detail on pp. 458-459.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the District Probate Registries (see Appendix), application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

COMPANIES ACT, 1862.

FEEs TO BE PAID BY STAMPS.

On registration, with a capital of £2,000, £2; £3,000, £3; £4,000, £4; £5,000, £5.

Five shillings extra per £1,000 above £5,000 up to £100,000; 1s. extra per £1,000 above £100,000; but no fee higher than £50.

Deed stamp 10s. to be put both upon Memorandum and Articles of Association.

Fees on Registration of Mortgage 10s. up to £200, £1 above £200.

For ad valorem stamp on capital see p. 457.

Hours at Somerset House.

Inland Revenue Office, 10 to 5. No money received after 4 (Saturdays, 2).

BANK HOLIDAYS.

ENGLAND AND IRELAND.—Banks of England and Ireland, and the Exchequer: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day and December 26 or 27 (as the case may be). The Stock Exchange, in addition to the Bank holidays, is also closed on Jan. 1, May 1 and November 1. And special Bank Holiday for Ireland, March 17.

SCOTLAND.—New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

SCOTLAND has also special Quarter Term Days (see p. 34), and there are special holidays in Edinburgh (see pp. 30, 50), and Glasgow (see p. 42).

PRINCIPAL EVENTS, 1 Nov., 1906-31 Oct., 1907.

THE KING AND COURT.—(1906) Nov. 3. H. R. H. the Duke of Connaught presented with the diamond star of the Order of St. Patrick, formerly the property of the Duke of Cambridge, K.P. 5. His Majesty opened the new buildings of King Edward VII. Grammar School at King's Lynn. 6. The Duke of Connaught opened the new buildings of University College Hospital. 12. The King and Queen of Norway arrived at Portsmouth and proceeded to Windsor. 13. At a chapter of the Order of the Garter the King of Norway was invested with the Order; a State banquet was subsequently held in St. George's Hall. 14. His Majesty received the members of the International Federation of Master Cotton Spinners' and Manufacturers' Associations, at Windsor Castle.—The King and Queen of Norway were entertained at Guildhall by the Lord Mayor and Corporation of London. 27. His Majesty addressed a letter to the Lord Mayor supporting the movement on behalf of crippled children. 30. The Prince of Wales, accompanied by the Princess, opened the new Cotton Exchange buildings at Liverpool. Dec. 1. The Queen's Birthday celebrated throughout the country. 10. His Majesty was present at the Smithfield Club Exhibition at Islington. 14. The King and Queen of Norway left London on their return home. 17. The Prince of Wales presided at the General Council of King Edward's Hospital Fund for London; £110,000 was allocated for distribution. 18. His Majesty held an investiture at Buckingham Palace. (1907) Jan. 1. The King and Queen left Sandringham on a visit to the Duke and Duchess of Devonshire at Chatsworth; their Majesties returned to Sandringham on 7th. 10. The Duke of Connaught, accompanied by the Duchess and Princess Patricia, left London on a tour of inspection in Ceylon, Egypt, and the Straits Settlements. 12. The King and the Prince of Wales were present at a lecture on the Mountains of Equatorial Africa, by the Duke of the Abruzzi, at the Queen's Hall. 22. The King and Queen and many of the Royal Family were present at a special service at Frogmore Mausoleum in memory of Queen Victoria. Feb. 2. The King and Queen, travelling as the Duke and Duchess of Lancaster, arrived in Paris. Their visit was warmly welcomed in the French Press. 6. Their Majesties dined with President Fallières at the Elysée. 9. Their Majesties returned to England. 14. The King held a Levée at St. James's Palace. 22. His Majesty held a Diplomatic and Official Court at Buckingham Palace. 27. His Majesty opened the new buildings of the Central Criminal Court, Old Bailey, E.C. March 4. The King left London for Biarritz. 7. The Duke and Duchess of Connaught arrived at Calcutta.—The Dowager Empress Marie of Russia arrived at Buckingham Palace on a visit to her sister, Queen Alexandra. 18. The Duke and Duchess of Connaught arrived in Ceylon. April 5. The King left Biarritz for Toulon, and inspected the wrecked battleship *Iéna*. 8. The King and Queen Alexandra were met at Cartagena by the King and Queen of Spain. 13. The King and Queen arrived at Malta. 18. The King and Queen were met by the King of Italy at Gaeta. 23. The Prince and Princess of Wales visited Glasgow and opened the new University buildings. 25. The Princess of Wales opened the new Rothesay Dock at Clydebank. 27. The Prince of Wales laid the foundation stone of the new house of the Society for the Propagation of

the Gospel, at Westminster. 30. The King left Naples for Rome and Paris. May 2. The King visited the President at the Elysée. 4. His Majesty returned to England. 7. The King gave a State banquet to Prince Fushimi.—The Prince and Princess of Wales opened the extension of the General Hospital at Tottenham. 14. The Prince of Wales took the chair at a dinner at the Hotel Cecil in aid of the Association for Providing Sanatoria for Sufferers from Consumption. 23. His Majesty received Mr. John Kirk, for forty years secretary of the Ragged School Union, at Buckingham Palace, and conferred upon him the honour of knighthood. 25. The King received a number of Crimean and Mutiny veterans resident in the county of Norfolk, at Sandringham. 29. Queen Alexandra returned to London from the Continent. 30. Their Majesties received farewell visits at Buckingham Palace from Prince Fushimi. June 3. The King held a Levée at St. James's Palace. 6. Their Majesties held a Court at Buckingham Palace. 8. The King and Queen of Denmark arrived at Portsmouth and proceeded to London. 10. Their Danish Majesties entertained by the Corporation of London at Guildhall. 11. Gala performance at the Opera in honour of the King and Queen of Denmark. 13. The Queen's Fête in aid of the Lord Mayor's Fund for Crippled Children was opened by Her Majesty at the Mansion House.—The King and Queen of Denmark concluded their visit and returned to Copenhagen. 16. The King reviewed the Corps of Commissaires at Buckingham Palace. 22. Their Majesties gave a garden party at Windsor Castle; over 8,000 guests were present. 24. The King received a special mission to announce the accession of the Shah of Persia. 25. Levée at St. James's Palace. 26. The King visited the Royal Agricultural Show at Lincoln. 27. The King laid the foundation stone of the British Museum extension. 28. Official celebration of the King's Birthday; His Majesty and Queen Alexandra were present at the Trooping of the Colour on Horse Guards Parade. 29. His Majesty inspected the Yeomen of the Guard at Buckingham Palace, and subsequently left London on a week-end visit to Mr. Lewis Harcourt at Nuneham. July 1. The King, accompanied by the Queen, opened the "Union Jack Club" in Waterloo Road.—The Prince of Wales presided at the annual meeting of the Imperial Cancer Research Fund at Marlborough House. 5. The King and Queen held a Court at Buckingham Palace. 8. The King and Queen left London on a visit to Wales and Ireland.—The Prince and Princess of Wales gave a garden party to the members of the League of Mercy at Marlborough House. 9. The King and Queen visited Bangor.—His Majesty laid the foundation stone of the new buildings of the North Wales University College, and conferred the honour of knighthood on the Principal (Dr. Reichel). 10. The King and Queen arrived at Kingstown and proceeded to the Irish International Exhibition at Dublin. They received a most enthusiastic welcome. 11. The King and Queen were present at Leopardstown Races.—A letter from the King was conveyed to the Lord Lieutenant in which His Majesty thanked the Irish people for their warm reception. 13. The King, accompanied by the Queen, opened the new "Queen Alexandra" Dock at Cardiff. 15. The King held an investiture at Buckingham Palace.

17. The Duke of Connaught inspected the boys of the Duke of York's Royal Military School at Chelsea. 19. The King and Queen gave a State Ball at Buckingham Palace. 20. The King and Queen paid a week-end visit to the Marquess and Marchioness of Lansdowne at Bowood Park. 23. The Prince of Wales opened the new Out-Patients' Department at St. Bartholomew's Hospital; the Princess of Wales received her "charge" as a Governor. 24. The King and Queen took part in the Commemoration of the Royal Victoria Patriotic Asylum at Wandsworth.—H.M. the Queen opened the new Hostel of St. Luke, Fitzroy Square, Aug. 14. The King was met at Wilhelmströbe by the German Emperor. 15. The King and the Emperor of Austria met at Gmunden. 17. The King began his annual "cure" at Marienbad. 21. The King entertained the French Premier at luncheon at Marienbad. 23. The Queen, accompanied by the Princess Victoria, embarked at Dundee for Norway. Sept. 5. The King entertained the Russian Foreign Minister at luncheon at Marienbad. 6. The King left Marienbad en route for London. 7. The King arrived in London. 9. The King received the President of Liberia (Mr. Arthur Barclay) at Buckingham Palace. 16. The King visited Mr. and Mrs. Sassoon at Speyside, and arrived at Balmoral on the 23rd. Oct. 14. The King returned to London. 16. The early portion of "The Letters of Queen Victoria" (edited by Lord Esher and Mr. A. C. Benson) published, by permission of His Majesty. 26. Queen Alexandra returned from Copenhagen in company with Queen Maud of Norway and the Crown Prince Olaf.—The King received the Lords Lieutenant of Great Britain, and commended the "New Model" to their careful attention. 29. The King and Queen of Spain arrived on a visit to His Majesty.

ACCIDENTS AND DISASTERS (GENERAL).—(1906) Nov. 20. Explosion at the Albion Colliery, Rhondda Valley; five men killed. 21. A charger containing about 40,000 gallons of hot liquid suddenly collapsed at Loch Katrine Distillery, Glasgow, killing one man and maiming several others. 28. Fire and explosion at the Roburite Works, near Dortmund, Rhenish Westphalia; the towns of Witten and Annen were wrecked, and many persons killed. Dec. 7. Fatal fire at Cornell University, U.S.A.; several undergraduates suffocated. (1907) Jan. 1. The Ryde lifeboat capsized near the pier-head; two of the crew drowned. 5. Fatal fire at Brooks's Hotel, Surrey Street, W.C. 7. The Chinese quarter at Bangkok, Siam, devastated by fire; estimated damage, £750,000. 9. Three lives lost in a timber fire at New Barnet. 19. A truck-load of gunpowder exploded at Sandford, U.S.A., killing 19 and wounding a great number of others. 28. Explosion of fire-damp at a pit in Rhenish Prussia; 258 men killed. Feb. 4. A fire in Wood Street, Cheshire, caused damage to the extent of £150,000. 5. Explosion of nitro-glycerine at Nobel's factory, Ayrshire, N.B.; three killed and two injured. 11. Great damage caused by an explosion at the chemical research department in Woolwich Arsenal. March 21. Fire at Farland's wharf, Bermondsey, caused damage to the extent of £100,000. July 27. Coney Island, New York, devastated by a disastrous fire. Aug. 21. At the Welsh National Eisteddfod, at Swansea, several persons were injured through the collapse of the floor of the hall. 30. A large portion of the new bridge under construction

over the river St. Lawrence, nine miles from Quebec, collapsed, killing 70 persons and injuring many others; the damage was estimated at nearly £500,000. Sept. 16. A serious fire occurred at Rotherhithe; the damage was estimated at about £25,000. Oct. 4. Nine lives lost by fall of a cage at Davey Lever Mine, near Bolton. 15. The Dupont Blasting Powder Mills, near Fontanet, Indiana, U.S., blew up, and killed many persons. 15. A Halifax Corporation electric car got out of control at Sowerby Bridge, and was wrecked going backwards down a steep incline; several killed and injured. 24. A terrible earthquake devastated Calabria, Italy; over 250 persons killed.

ACCIDENTS AND DISASTERS (WRECKS AND DISASTERS AT SEA).—(1906) Nov. 18. Forty-one persons drowned by a collision between two steamships in Paget Sound, U.S.A. 22. The *Kaiser Wilhelm der Grosse* collided with ss. *Orinoco* outside Cherbourg Harbour in a fog; several persons were swept overboard and drowned. (1907) Feb. 12. Ss. *Larchmont* sunk in Block Island Sound after collision with the *Harry Knowlton*; nearly 200 persons drowned. 17. The British steamers *Heliopolis* and *Oriando* collided in the Bristol Channel; the latter sank, and 14 lives were lost. 21. The G.E. Ry. steamship *Berlin* stranded while trying to enter the waterway of the Maas River, Hook of Holland, and broke in half; the fore part foundered, causing great loss of life, and the remainder stranded with a few survivors, 15 of whom were eventually rescued after terrible privations. March 18. The White Star liner *Suevic* went ashore near the Lizard in a dense fog; all the passengers were safely landed, but the bow half of the vessel was lost and the remainder salvaged and towed to safety. The Elder-Dempster liner *Jebba* went ashore near Salcombe and became a total wreck. April 10. It was announced that the King had awarded a number of medals to those concerned in the rescue of survivors from the *Berlin* disaster. May 8. News received of the total loss of the French steamer *Poictou*, with over 100 lives. June 24. News reached England of the total loss of the Pacific S.N. Co.'s ss. *Santiago* off the coast of Chile, with heavy loss of life. July 21. The American ss. *Columbia* collided with the *San Pedro* on the coast of California; nearly 100 lives were lost.

AERIAL NAVIGATION.—(1907) May 25. Balloon race from Hurlingham to Goring, under the auspices of the Aero Club, won by Mr. F. H. Butler. July 22. The French war balloon *Patrie*, with M. Clemenceau and Gen. Picquart on board, made a most successful ascent from Chalais-Meudon, and, after circumnavigating the Eiffel Tower and traversing Paris, descended at the point of departure. Sept. 29. A balloon race for the Grand Prix of the Aero Club of France started from Paris. Oct. 5. The British airship *Nulli Secundus*, after a trial voyage at Aldershot, journeyed to London, and alighted in the grounds of the Crystal Palace; owing to unfavourable weather on the days immediately following the return voyage was delayed, and eventually the airship was partially wrecked in a storm while moored in the Palace grounds. 8. The German Crown Prince witnessed some highly successful manoeuvres of Count Zeppelin's airship on Lake Constance. 9. The German military airship made a successful excursion from Tegel over the city of Berlin and

home again to her shed. During the month the Wellman alrship, after repeated disasters, was forced to abandon all attempts to reach the North Pole during the present year.

ATLANTIC RECORDS.—(1907) The Cunard ss. *Lusitania* left Liverpool on her maiden voyage, and arrived at New York in record time for land to land crossing; each voyage reduced the records East and West [the best passage was 4 days 18 hrs. 40 mins. on Nov. 8].

AUTOMOBILE RECORD.—(1907) June 30. S. F. Edge created records at Brooklands Motor Track, and drove altogether 1,581 miles 1,310 yards in 24 hours.

BANK RATE AND FINANCIAL DISTURBANCES.—(1907) Oct. 22. The New York Clearing House declined to accept the business of the Knickerbocker Trust Company, which led to a run on that bank and caused a panic in Wall Street; the U.S. Treasury endeavoured to allay the disturbance, but several suspensions were announced on 24th. 31. The U.S. Treasury ordered the immediate coinage of £3,000,000 of gold double eagles (\$20). (1906) The Bank of England minimum rate of discount had stood at 6 per cent. since Oct. 19, and was lowered to 5 per cent. on (1907) Jan. 17; April 11, 4½; 25, 4; Aug. 15, 4½; Oct. 31, 5½; Nov. 4, 6; Nov. 7, 7 per cent. (in consequence of the drain from U.S.).

BILLIARDS—THE "ANCHOR" STROKE.—(1907) March 22-23. In a match at Hull, W. A. Lovejoy scored 1,068 cannons (2,257 points in all) by means of the "anchor" stroke. T. Reece, who had made the first sensational break by these means on March 5, terminated a run on July 6 with the colossal score of 499,135 in a match 500,000 up.

CRICKET.—Three South African Test Matches were played—at Lord's, July 1-2 (England 428, S. Africans 149 and 185 for 3), drawn; at Leeds, July 29-31 (England 76 and 162, S. Africans 110 and 75), won by England; at the Oval, Aug. 19-21 (England 295 and 138, S. Africans 178 and 159 for 5), drawn. Nottingham won the County Championship with an unbeaten record. The highest individual score of the year was G. L. Jessop's 240, on July 15, for Gloucestershire v. Sussex; and Kent made 596 v. Hampshire at Tonbridge. C. B. Fry headed the batting averages with 46½; R. O. Schwarz (137 wickets for 1179 each) and Hallam (168 wickets for 1269) the bowling averages. Cambridge defeated Oxford at Lord's by five wickets, and Harrow defeated Eton, the Harrow captain scoring a double century. An English team under the captaincy of A. O. Jones sailed for Australia in Sept., and played the first match v. Western Australia at Perth on Oct. 25, winning by an innings and 134 runs.

CRIMES AND CAUSES CÉLÈBRES.—(1906) Nov. 17. Signor Caruso, the famous tenor, arrested in New York and charged with disorderly conduct in the Central Park Zoological Gardens; on the 23rd he was found guilty and fined \$10. 18. A bomb exploded in St. Peter's, Rome; much alarm caused, but little damage. 28. At the Liverpool Assizes, F. H. Woolfries was sentenced to eight months' imprisonment for uttering criminal libels on Mr. Seymour Hicks, the well-known actor. Dec. 1. Daring robbery of a mail van at Toulouse; £28,000 worth of registered letters

and securities stolen. 5. Mr. Justice Parker approved of a scheme whereby the *Times* would be controlled by a limited liability company, with Mr. Walter as governing director; the scheme was propounded in settlement of an action brought by some of the proprietors. 22. Count Alexis Ignatieff, brother of the diplomatist, assassinated by a young student at the nobles' assembly rooms at Tver. (1907) Jan. 3. The Prefect of St. Petersburg assassinated at the Institute of Experimental Medicine. 5. Bomb outrage at the National Bank, Philadelphia, U.S.; several persons killed and injured. 9. General Pavloff, Russian Prosecutor-General, assassinated in his garden at St. Petersburg. 24. Mr. William Whiteley, the well-known "Universal Provider," shot dead in his private office at Westbourne Grove. Horace George Rayner subsequently arrested at St. Mary's Hospital, Paddington, and formally charged with the murder. Feb. 12. Daring burglary at the house of Mr. Wertheimer; many valuable pictures, snuff-boxes, &c., stolen. March 15. The action by Mr. William O'Brien against the *Freeman's Journal* for libel resulted in a verdict for the plaintiff, with one farthing damages, on each of the six counts. 18. The first session in the new buildings of the Central Criminal Court opened. 22. Rayner sentenced to death for the murder of Mr. Whiteley; the sentence was subsequently commuted to imprisonment for life. April 6. A convict escaped from the exercise yard at Wormwood Scrubbs Prison and defied capture for several hours. 13. Lord William Neville was convicted at the County of London Sessions of obtaining jewellery by fraudulent means, and was sentenced to twelve months' imprisonment. 29. Trial of the West Ham Guardians commenced at the Central Criminal Court. 30. In the spiritualist case, Colley v. Maskelyne, which had occupied several days, the jury decided in favour of Archdeacon Colley, and awarded him £75 damages. May 9. The Empress Eugénie was awarded the custody of a number of objects claimed, since 1879, as the property of Napoleon III., in the Civil Court at Paris. 17. The Parliamentary Committee reported on the Edalji case, and the Home Secretary ordered his immediate release, but would grant no compensation.—The West Ham trials concluded; several of the accused were convicted, and certain of them deprived of civil rights. 31. John Smith was sentenced, with the receiver, to penal servitude, to be followed by deportation, for the recent burglary at Mr. Wertheimer's house. June 3. The trial of seven persons accused of complicity in the attempt to assassinate the King and Queen of Spain on their wedding day, commenced in Madrid. 18. The Ascot Gold Cup was stolen during the racing, the thief getting away undiscovered. July 8. It was stated that a quantity of jewellery, including some State regalia, to the value of many thousands of pounds, had been stolen from Dublin Castle. 10. It was announced that a free pardon had been granted by His Majesty to Arthur Lynch, who was convicted of high treason in 1903 for having fought on the side of the enemy in the late South African War. 14. At the celebration of the National Fête, a couple of shots were fired at the President of the French Republic. 16. General Alihanoff, a prominent figure in the "Penjdeh Incident" of 1885, was assassinated at Alexandropol. 17. In the case of Lever Bros., Ltd., v. The Associated Newspapers, Ltd., the defendants, after expressing

regret for statements made, agreed to £50,000 damages and costs. 18. In the House of Commons, Mr. F. E. Smith raised the question of the Edalji case. 25. Richard Brinkley was found guilty in the Croydon poisoning case and sentenced to death at the Guildford Assizes by Mr. Justice Bigham. Aug. 14. A supposed attempt to murder by an explosion of gunpowder took place at Lord Ashtown's shooting box, in the County Waterford. Sept. 6. A free pardon, with compensation from the public funds, was granted to Henry Underwood, twice imprisoned for alleged fraud, by order of the Home Secretary. 23. At Waterford, before Judge Fitzgerald, an inquiry was held into the outrage perpetrated at Lord Ashtown's shooting lodge. Lord Ashtown was awarded £140 damages. Oct. 25. The Druce-Portland case revived in a perjury trial before Mr. Plowden; remarkable evidence was given bearing upon the question of identity. 28. At St. Pancras Coroner's Court, Edward Wood, an artist, was committed for trial for murder of a young woman in Camden Town.

NOTABLE DEATHS.—(1906) Nov. 2. Mr. George Herring, beneficent contributor to Hospital Funds, aged 73. 9. Miss Dorothea Beale, educationalist, aged 75. 30. Sir Edward Reed, naval designer, aged 76. Dec. 30. The Baroness Burdett-Coutts, aged 92; buried in Westminster Abbey. Jan. 5. (1907) Jan. 8. The Shah of Persia, at Tehran. 9. Queen Mary of Hanover, at Gmunden, aged 87. Feb. 4. Lord Thring, for many years Counsel to the Treasury, aged 88. 7. Viscount Goschen, at Hawkhurst, aged 76. 10. Sir W. H. Russell, war correspondent, aged 86. 16. Princess Clementine of Coburg, daughter of Louis Philippe, aged 89. 22. Baron de Staal, for 18 years Russian Ambassador in England, aged 85. March 4. Sir Augustus Manns, the famous conductor; Miss Rosina Brandram, the Savoy contralto. 12. M. Casimir Perier, formerly French President, aged 60. May 6. Dr. John Watson (Ian Maclaren), distinguished author and preacher, at Mount Pleasant, Iowa, aged 56. 19. Sir Benjamin Baker, designer of Assuan Dam and joint engineer of Forth Bridge, aged 66. Aug. 1. David Christie Murray, journalist and author, aged 60. Sept. 4. Dr. Edward Grieg, celebrated composer, aged 64. Oct. 6. Lord Brampton (Sir Henry Hawkins), aged 90.

ECCLASTICAL.—(1906) Dec. 6. Dr. Stubbs enthroned as Bishop of Ely. (1907) Jan. 5. A message was issued to the nation on the observance of Sunday, with signatures of the Primate, the Archbishop of Westminster, and the President of the Free Church Council. 11. The Pope issued an Encyclical letter on the Church in France and the Separation Law. Feb. 26. Dr. Clifford presented with a number of presents and testimonials at Whitefield's Central Mission on the occasion of his seventieth birthday. 27. Mr. Everett's motion in favour of Disestablishment carried in the House of Commons by 198 votes to 90. April 24. London Diocesan Conference opened at the Church House. May 13. Uproarious scenes at Church House, Westminster; Mr. Kensit protested against the action of the Archbishop of Canterbury in supporting a meeting of the Mirfield Community of the Resurrection. July 17. The Bishop of Southwark dedicated the Harvard Memorial Chapel at Southwark Cathedral. 22. Exeter Hall was finally vacated by the Young Men's Christian Association. 31. The Archbishop of Canterbury

addressed a letter to the Bishops of the Anglican Communion on the Lambeth Conference of 1908. Aug. 28. The Bishop of London, in a letter to the *Diocesan Magazine*, strongly condemned the Marriage with a Deceased Wife's Sister Bill, and urged the clergy not to solemnise such marriages. Sept. 17. The first Conference of the United Methodist Churches began at Wesley's Chapel, City Road. 26. The Bishop of London preached to a crowded congregation in Trinity Church, New York. 30. The Bishop of London was present, with Mr. Roosevelt, at the laying of the foundation stone of the new cathedral at Washington. Oct. 9. Dr. Straton enthroned as Bishop of Newcastle. 10. A convention of Welsh Nonconformists met at Cardiff, and agreed to press for Welsh Disestablishment. 19. The nave of Selby Abbey, recently restored after the fire, opened for service. 30. Father Tyrrell excommunicated by the Pope for his recent article on the Encyclical. 31. The Centenary of Protestant Missions in China celebrated at the Albert Hall.

EDUCATIONAL.—(1906) Dec. 14. In the House of Lords, judgment was given in the West Riding case, reversing the decision of the Court of Appeal and restoring that of the Divisional Court—"That the County Council were obliged by the Act of 1902 to defray the cost of giving denominational instruction." (1907) Jan. 1. Tenth annual conference of the National Association of Head Teachers opened at Leamington; the next day a resolution was carried condemning the increase of mixed schools. 10. Mr. Haldane delivered his Rectorial Address at Edinburgh University. 11. Mr. Asquith installed as Lord Rector of Glasgow University. 13. Death of Dr. Story, Principal of Glasgow University. Feb. 1. A protest against the Government scheme for the reorganisation of Trinity College, Dublin, was signed by 13 Bishops of the Church of Ireland. 13. The forthcoming establishment announced of a separate Department for Education in Wales. 15. A letter issued by the Chancellor expressing the urgent necessity of the re-endowment of the University of Cambridge. March 14. Lord Curzon of Kedleston elected Chancellor of Oxford University in succession to the late Viscount Goschen; Lord Curzon received 1,001 votes against 440 given for Lord Rosebery. 25. A meeting was held in Middle Temple Hall to consider the Government scheme for Irish University education. April 1. The Annual Conference of the National Union of Teachers opened at Oxford. 23. New buildings of Glasgow University opened by the Prince and Princess of Wales. May 8. Lord Rosebery spoke at Presentation Day at London University. 11. Lord Curzon installed as Chancellor of the University at Oxford. 16. A meeting was held at Burlington Gardens to consider the needs of the University of Oxford; the new Chancellor presided. 24. The Federal Conference on Education was opened at Caxton Hall, Westminster. June 7. Death of Dr. Routh, the famous Cambridge mathematical tutor. 12. Lord Rosebery unveiled a statue of Cecil Rhodes in the Examination Schools, Oxford. 26. At Oxford, the degree of Doctor of Literature was conferred upon General Booth, Mark Twain, and Mr. Rudyard Kipling. July 20. A deputation, headed by the Archbishop of Canterbury, waited on the Prime Minister and Mr. McKenna on the subject of the new regulations for Training Colleges. 24. In the House of Lords, the Bishop of Birmingham

ham asked the Government to appoint a Royal Commission to inquire into the endowment, government, administration, and teaching of the Universities of Oxford and Cambridge. 25. A deputation of Roman Catholics, headed by Archbishop Bourne and the Duke of Norfolk, waited on the Prime Minister and Mr. McKenna with reference to the new regulations of the Board of Education. 26. The King, accompanied by the Queen, opened the new buildings of University College School at Hampstead. Aug. 2. A Non-conformist deputation waited on the Prime Minister and Mr. McKenna with reference to the new Education regulations. Sept. 25. The American Ambassador spoke at the opening of the John Bright Secondary School at Llandudno. Oct. 2. At the Church Congress at Yarmouth, the Bishop of Manchester outlined proposals for the settlement of the Education question.

GERMANY.—(1906) Dec. 1. Herr Bebel caused a tremendous sensation in the Reichstag by his revelations of cruelty and outrages on the natives in S.W. Africa.—The shoemaker Voigt (of Köpenick fame) sentenced to four years' imprisonment for his escapade. 11. The Budget Committee of the Reichstag rejected the Supplementary Estimates for South-West Africa (£1,500,000); the credits were submitted to the Reichstag on 13th, and rejected by 178 to 168 votes; the Imperial Chancellor thereupon read a message dissolving the Reichstag. (1907) Jan. 25. First ballots in the General Election showed increase in the Centre (Clerical) party, and a great set-back to the Socialists. May 24. Dismissals from the immediate entourage of the Emperor broke up the famous *Camarilla*, or *Tafelrunde*, which was said to be poisoning the mind of His Imperial Majesty in all affairs of State. Aug. 22. Harry Quelch, one of the English delegates to the Stuttgart Socialist Congress, was expelled from Germany. Oct. 23. Sensational trial of Herr Harden, editor of the *Zukunft*, for libel; the plaintiff, Count Kuno von Moltke, had been a member of the *Camarilla*, and the charges made against him had caused his downfall; Herr Harden maintained his case, and emerged triumphant from the trial.

IMPERIAL DOMINIONS.—(1906) Nov. 1. The Governor of New Zealand opened an Industrial Exhibition at Christchurch. 15. The Earl of Selborne laid the foundation stone of new docks at Simons Town, South Africa. 17. It was announced that Ferreira and all his followers had been captured by a force of the Cape Mounted Rifles. Dec. 5. The Amir of Afghanistan left Kabul on a visit to British India. 12. The new Constitution of the Transvaal, and the King's letter thereon, published as a Parliamentary Paper. 15. The Het Volk Congress at Pretoria unanimously approved the new Constitution. 17. At Bloemfontein, the Earl of Selborne cut the first sod of the railway to Kimberley. 26. The Indian National Congress was opened at Calcutta. (1907) Jan. 2. The Amir of Afghanistan arrived at Peshawar; and on 9th at Agra. 14. A terrible earthquake devastated Jamaica; Kingston was practically destroyed, with enormous loss of life, among the victims being Sir James Fergusson. 15. The King telegraphed to the Governor of Jamaica, giving expression to his sorrow at the loss of life through the earthquake. 17. Relief fund opened at the Mansion House for the sufferers in Jamaica; the King and Queen each contributed £1,000. 19. Admiral Davis, of the U.S.

Navy, withdrew his ships from Kingstou at the request of the Governor. 28. The Amir arrived at Calcutta. Feb. 20. The Ferreira raiders sentenced to death at Kimberley, S. Africa; the sentence was subsequently commuted to penal servitude. 23. A South African Products Exhibition opened by H.M. the King at Westminster. March 11. Mr. Botha spoke at a banquet in Pretoria in honour of the newly formed Transvaal Ministry. 21. The members of the Transvaal Parliament were sworn in, and the Speaker elected; the speech from the throne was read by Lord Selborne. 30. Dr. Jameson and other South African delegates to the Colonial Conference arrived at Southampton. April 5. A large portion of the McGill University buildings at Montreal destroyed by fire. 11. Sir Edward Grey announced in the House of Commons the impending resignation of Earl Cromer, and paid a warm tribute to his long and eminent services in Egypt; a like tribute was paid by Mr. Balfour. 15. The preliminary meeting of the Colonial Conference was held at the Colonial Office. 16. The Colonial Premiers were presented with the Freedom of the City of London at Guildhall. 19. The Colonial Premiers were entertained at Claridge's Hotel by the Pilgrims' Club. 24. The Premiers were entertained in Westminster Hall by members of both Houses of Parliament. 27. The 137th anniversary of the landing of Captain Cook was celebrated at Sydney. May 1. The Imperial Conference considered the question of a Preferential Tariff. 3. The Premiers were present at a great naval display at Portsmouth.—Serious rioting took place at Rawal Pindi. 4. Lord Cromer made his farewell speech at a demonstration held in his honour at the Opera House, Cairo. 8. The Premiers were entertained by His Majesty at Buckingham Palace. It was announced in the House of Commons that a grant of £150,000 and a loan of £800,000 would be arranged for the Government of Jamaica. 9. News reached England of extensive military precautions at Lahore, and of the deportation of several leaders of sedition in India. 13. The Earl of Cromer arrived in London from Egypt, and was greeted at Victoria Station by the Prince of Wales, the Duke of Connaught, and the Prime Minister; he was subsequently received by the King at Buckingham Palace. 16. Sir Eldon Gorst presented his credentials to the Khedive. 24. "Empire Day" was celebrated throughout the Imperial dominions; at Montreal the Strathcona and South African Memorial was unveiled. 31. Prince Fushimi left London for a tour in Canada before his return to Japan. June 4. The Minutes of the Proceedings of the Imperial Conference, in abbreviated form, were issued as a Blue Book. July 23. Letter from the Maharajah of Bikanir was published in the *Times*, speaking in the name of many of his fellow princes of their unswerving loyalty to the British Crown. 24. In the House of Commons, the Prime Minister handed to the Speaker the King's message, "signed by His Majesty's own hand," recommending a grant of £50,000 to the Earl of Cromer for his eminent services. Aug. 26. Riotous scenes were witnessed in Calcutta at the sentence passed on two "national volunteers" for assaulting the police. 28. Lord Selborne laid the foundation stone of the Transvaal University College at Johannesburg. Sept. 10. The *London Gazette* contained a Proclamation by the King, that on and after 26th September this year the

colony of New Zealand should have the title of "The Dominion of New Zealand." 11. Riotous scenes were witnessed in Calcutta at the conviction of a seditious leader, who was sentenced to six months' imprisonment. Oct. 1. Seditious speeches by Mr. Keir Hardie, M.P., at Calcutta, caused much discussion in England. 4. Serious riots in Calcutta. 16. Mr. Keir Hardie received in audience by the Viceroy of India. 17. A Marconi wireless installation inaugurated between Cape Breton and Connemara. 18. Great indignation in Pretoria at the discovery that President Kruger's grave had been desecrated. 21. Notable declaration of the Government's Indian policy by Mr. Morley, at Arbroath. 22. The Premier spoke at Dunfermline. 28. Lord Cromer received the Freedom of the City of London at Guildhall, and made a striking speech on Egypt, with reference to the mischievous effects of seditious speeches by irresponsible politicians.

INTERNATIONAL CONFERENCES, EXHIBITIONS, &c.—(1906) Nov. 3. The International Conference on Wireless Telegraphy concluded its proceedings at Berlin. 15. An Exhibition of Motor Cars was opened at Olympia. 26. The Duke of Argyll presided at the inaugural banquet of the General Committee of the Franco-British Exhibition in London for 1908. Dec. 7. International Automobile Exhibition opened by the French President at the Grand Palais, Paris. Jan. 17. Exhibition of Australian products opened by the Governor-General at Melbourne. Feb. 20. Central Poor Law Conference concluded its meetings at Guildhall, under the presidency of the Lord Mayor. March 5. Association of Chambers of Commerce met at Hotel Metropole.—Hackney Horse Show opened at Agricultural Hall. April 15. National Arbitration and Peace Congress formally opened at New York, Mr. Carnegie presiding. May 4. Irish International Exhibition opened in Dublin by the Lord Lieutenant.—Balkan States Exhibition opened at Earl's Court by the Lord Mayor.—Royal Academy banquet at Burlington House. June 5. The Bath and West of England Agricultural Show was inaugurated at Newport, Mon. 7. An International Horse Show, in emulation of the *Concours Hippique* of Paris, was opened at Olympia; the undertaking met with the greatest success. 26. Royal Agricultural Show visited by the King at Lincoln. Aug. 1. At the Peace Conference, the American and Russian delegates introduced proposals for a Permanent Court of Arbitration at the Hague. 5. The International Housing Congress was opened at Caxton Hall, Westminster.—The second International Congress on School Hygiene was opened at the Imperial Institute. 10. The third International Esperanto Congress was opened at Cambridge. Sept. 16. The Annual Conference of the Institute of Journalists was opened at Scarborough. 19. An Engineering and Machinery Exhibition was opened at Olympia. 26. An Exhibition and Sale of Irish Manufactures was opened at the Horticultural Hall, Westminster. Oct. 5. At the Hague, the question of Compulsory Arbitration was adopted by a committee of the Peace Conference. 8. The new *Ausgleich* treaty between Austria and Hungary signed by the respective Premiers, to the relief and satisfaction of both nations.

INTERNATIONAL COURTESIES.—(1907) Feb. 25. Mr. Bryce presented his credentials to President Roosevelt at Washington. May 6. Prince Fu-

shimi arrived in England, to express the thanks of the Mikado to the King for the Order of the Garter. The Prince was entertained by His Majesty and by the Corporation of London, and left England on 31st for Japan *via* Canada. 27. Delegates from London University warmly welcomed by the Municipality of Paris. 29. British journalists visited Berlin, and were received by the Emperor at Potsdam. June 17. The Lord Mayor and members of the Corporation of London visited Berlin as the guests of the Municipality. Oct. 6. Members of the *Conseil Municipal* of Paris were entertained by the Corporation of London.

MUSIC.—(1906) Dec. 1. Farewell appearance of Madame Patti at the Albert Hall. 29. Mr. W. S. Gilbert entertained at the Hotel Cecil in celebration of the revival of the Gilbert and Sullivan Operas at the Savoy Theatre. (1907) Jan. 14. The Winter German Opera Syndicate opened a four weeks' season at Covent Garden, under the general management of M. Ernest van Dyck; the success attained was less than was anticipated, and the season closed on 26th; some of the performers sailed homeward in the ill-fated *ss. Berlin*, and lost their lives in the wreck. 31. Beethoven's *Fidelio* performed, M. Eugene Ysaye conducting. April 29. The Lord Chancellor's licence of *The Mikado* was withdrawn. 30. The Grand Opera Season opened with Wagner's *Ring des Niebelungen*, and closed on July 30, Dr. Richter conducting. May 1. Mr. (now Sir) Charles Santley's jubilee as a singer was celebrated at a concert in the Albert Hall. June 17. The Home Secretary promised to cancel the prohibition of *The Mikado*. 18. Reappearance of M. Paderewski at the Queen's Hall, after a long absence. July 15. The Moody-Manners Season of Grand Opera in English, at popular prices, opened at the Lyric Theatre, and closed on Sept. 7. Aug. 17. The thirteenth Promenade Concert Season commenced at the Queen's Hall, Mr. Henry Wood conducting as before; the series closed on Oct. 26. Sept. 8. The Festival of the Three Choirs commenced in Gloucester Cathedral. Oct. 3. The Royal Italian Opera season opened with *Madama Butterfly*; the season was remarkable for the success achieved by Madame Tetrazzini in several rôles.

NAVAL AND MILITARY.—(1906) Nov. 5. A number of stokers engaged in a mutinous demonstration at the R.N. barracks, Portsmouth; much damage was done by the rioters. 15. The battleship *Satsuma*, the largest afloat, was launched in the presence of the Mikado at Yokosuka. 16. Lord Rosebery unveiled a war memorial to the Royal Scots Greys at Edinburgh. 17. The Russian cruiser *Rurik* launched at Barrow. 23. A court-martial on the disturbances at Portsmouth was opened on H.M.S. *Victory* on 26th; Edwin Moody, a ringleader, was sentenced to five years' penal servitude. Dec. 1. A speech by Mr. Carnegie at the St. Andrew's Society Dinner in New York caused a sensation by his disparaging remarks concerning Scotch soldiers in the British Army. 3. The keel plates of a new battleship of *Dreadnought* class laid down at Portsmouth. 4. A court-martial on Lieut. Collard, R.N., for using abusive language, and thus indirectly leading to the recent rioting at Portsmouth, found the first charge not proved; Lieut. Collard was reprimanded on the second charge. 20. A court-martial at Chatham sentenced a yeoman of signals to five years' penal servitude for stealing a boat signal book, and for improperly leaving

his ship. (1907) Jan. 2. A fire at camp equipment store at Portsmouth caused enormous damage. 15. The King ordered the Victoria Cross to be delivered to the representatives of officers and men who would have received the decoration had they survived; one of the acts of heroism dated back to 1859.—An official statement was made that the Minister for War dissented from the Channel Tunnel Scheme. Feb. 1. The Russian Military Commission investigating the surrender of Port Arthur recommended the trial of Generals Stössel, Reiss, and Fock. 21. The Prince of Wales opened the Keyham Dockyard extension at Devonport. 25. Mr. Haldane unfolded a scheme for a National Army in a three hours' speech in the House of Commons. March 12. The French battleship *Iéna* wrecked by a series of explosions while in dry dock at Toulon; the loss of life was enormous. 16. The armoured cruiser *Indomitable* launched from the Fairfield yard at Govan. 24. Three Russian warships visited Portsmouth; two days later the officers were entertained in London. April 11. The British Minister to Belgium unveiled a tablet on the farmhouse at Hougoumont in memory of the British soldiers who fell at Waterloo. 13. Launch of the armoured cruiser *Invincible* at Elswick.—The t.b.d. *Ariel* struck the breakwater at Malta and had to be beached. 22. At Chatham, a number of gifts were presented to H.M.S. *Natal* on behalf of residents in Natal. 27. The armoured cruiser *Defence* launched at Pembroke. May 16. The Prince of Wales was present at extensive military operations at Aldershot. 17. The King was present at the Royal Naval and Military Tournament at Olympia. 24. Prince Fushimi visited Portsmouth and inspected the Dockyard, the *Victory*, and the *Dreadnought*; naval manoeuvres were subsequently witnessed. 28. The King, with Prince Fushimi, and accompanied by the Duke of Connaught, witnessed extensive military operations in the neighbourhood of Aldershot. 29. The King presented new colours to the 1st Battalion Coldstream Guards, at Buckingham Palace.—The Duke of Connaught inspected the pensioners at the Royal Hospital, Chelsea. 30. H.M.Y. *Alexandra* launched at Glasgow.—A military balloon, with empty car attached, identified as one employed at the recent Aldershot manoeuvres, discovered in the sea off Exmouth. June 11. A number of officers and men of Japanese cruisers visiting England were entertained in London. 12. The King held a review at Aldershot; torrents of rain curtailed the proceedings. 13. Fatal explosion on submarine C8 in Portsmouth Harbour. 15. The King unveiled the equestrian statue of the late Duke of Cambridge in Whitehall. 18. Extensive cavalry manoeuvres commenced in Scotland.—Torpedo Boat 99, while steaming at full speed off Berry Head, broke her screw shaft and foundered; no lives were lost. 26. Launch of the armoured cruiser *Inflexible* at Clydebank. 28. The King presented long service medals to members of the Honourable Artillery Company at a special parade of the corps in the grounds of Buckingham Palace. July 8. The annual meeting of the National Rifle Association opened at Bisley. 11. At the Bisley meeting, the Ashburton Shield was won by Rugby. 15. A gun charge exploded on the U.S. battleship *Georgia*; five men were killed and many injured. 20. The King's Prize at Bisley was won by Lieut. Addison, of Australia, after the disqualification of Armourer-Sergeant Padgett, 1st V.R. East Yorks Regt. on the ground

of his inadvertently having been allowed an extra shot. 27. The battleship *Bellerophon* was launched at Portsmouth by Princess Henry of Battenberg. Aug. 2. Interesting siege operations were witnessed by Mr. Haldane at Chatham. 3. The King inspected the Home Fleet in the Solent. 5. The King witnessed some remarkable shooting from the great guns of the *Dreadnought*. 7. While exercising off Portland, the scout *Attentive* cut the bows of t.b.d. *Scout* completely off, fortunately without loss of life. 8. In the House of Commons, Mr. Haldane announced the creation of the new Mediterranean Command, and the acceptance of it by the Duke of Connaught. 17. The final in a series of artillery competitions between British and Canadian teams resulted in the latter winning the King's Cup. 19. The Duke of Connaught opened the Memorial Arch erected in St. Stephen's Green, Dublin, to the officers and men of the Royal Dublin Fusiliers who fell in the South African War. 24. The battleship *Temeraire*, of the *Dreadnought* class, was launched at Devonport. Sept. 3. The Lord Lieutenant of Ireland visited Queenstown, and turned the first sod of the Admiralty Docks Extension Works at Haulbowline. 7. The United States team won the Palma Trophy, at the Rockcliffe Ranges, Canada being second, 41 points behind. Oct. 30. The crew of the Russian destroyer *Skonj* broke into mutiny and shelled the fortress of Vladivostock; eventually the destroyer was sunk and the mutineers killed or captured.

PAGEANTS.—(1907) June 27. The Oxford Historical Pageant opened on the banks of the Cherwell in most unfavourable weather, which brightened considerably for the concluding stages next day; the general success of the undertaking was thereby assured. July 15. At St. Albans, a battle scene marked the opening of a realistic representation of the incidents in the Wars of the Roses, which, with a historical *revue*, constituted a memorable week in the history of the city. Aug. 1. The Isle of Wight Pageant was opened at Carisbrooke Castle by Princess Henry of Battenberg in aid of the funds of the Royal Isle of Wight County Hospital. 3. Liverpool celebrated its 700th anniversary by a pageant which nearly 40,000 people witnessed at one time; the city sanctioned and inaugurated the scheme. 7. Coventry celebrated the Mercian legend in a pageant, the amount collected during the day being devoted to the Hospital Saturday Fund; there was considerable discussion as to the costume of Lady Godiva. Pageants were also held at Bury St. Edmunds, Warwick, and other places during the year.

POLITICS, IMPERIAL.—(1906) Nov. 1. Mr. W. Long elected leader of the Irish Unionist Party in succession to Col. Saunderson. 2. Mr. Balfour entertained at dinner by the "1900" Club, at the Gaiety Restaurant. 3. Mr. S. Gwynn (N.) elected for Galway City by a majority of 424 over Capt. Shawe-Taylor (N.Ind.); serious rioting supervened. 5. A largely attended meeting at the Holborn Restaurant, convened by the Free Churches, considered the Lords' amendments to the Education Bill. 6. The Prime Minister and Mr. J. Burns received a deputation from the National Housing Reform Council. 7. The New Hebrides Convention was issued. 8. The Prime Minister and Home Secretary received a deputation from the Licensed Victuallers' National

Defence League. 9. The Marquis of Ripon and Mr. Haldane spoke at the Guildhall Banquet. 13. Mr. Birrell spoke at the dinner of the "Anchor" Society, at Bristol, on the Education Bill. 20. A deputation, headed by Sir Charles Dilke, Bart., M.P., was received by the Foreign Minister, with reference to the state of affairs in the Congo Free State.—A number of Liberal and Labour Party Members of Parliament waited on the Prime Minister and Mr. Asquith with reference to the question of Old Age Pensions, and received a sympathetic reply. 22. A deputation waited on the Prime Minister and Mr. John Burns with reference to the question of Infant Mortality. 24. The Royal Commission on Canals and Waterways issued its first report. 26. A question of privilege raised in the Commons with regard to a letter in the *Times* from constituents in the Isle of Thanet. 27. The claim of Lord Mowbray to the Earldom of Norfolk disallowed by the Committee of Privileges of the House of Lords. 29. The Marquess of Lansdowne received a deputation of Roman Catholics on the subject of the Education Bill.—Report of Select Committee of House of Commons on Income Tax published. Dec. 7. Mr. Austen Chamberlain presided at a Unionist demonstration in Dublin. 8. Lord Rosebery spoke on National Defence at Edinburgh, and Mr. Lloyd-George on British Shipping at Liverpool. 19. In the House of Lords, the motion of Lord Lansdowne protesting on Constitutional grounds against the action of the House of Commons in rejecting all the amendments made by the Peers to the Education Bill, was carried by 132 votes to 52. 22. The National Passive Resistance Committee issued a manifesto urging increased agitation. (1907) Jan. 7. The New Hebrides correspondence published as a Blue Book. 24. Official announcement was made of Mr. Birrell's appointment as Irish Secretary, and of Mr. McKenna's as his successor at the Board of Education.—The seventh Annual Conference of the Parliamentary Labour Party was opened at Belfast. 25. The Prime Minister was presented with the honorary Freedom of the City of Glasgow.—Mr. Bryce, speaking to a deputation of Irish Presbyterians and Roman Catholics at Dublin Castle, outlined the decision of the Government on the University Question. 29. Mr. Birrell was sworn in as Chief Secretary for Ireland, at Dublin Castle. 30. In the King's Bench Division, Dublin, the application to attach Mr. Walter Long for contempt of court in connection with a speech made by him on December 7th, in Dublin, was refused. Feb. 12. His Majesty, accompanied by the Queen, opened Parliament in State. 15. Mr. Balfour entertained at dinner at the Savoy Hotel by the National Union of Conservative and Constitutional Associations. 16. Col. Waring (L.) elected for Banffshire by 2,009 majority.—Disturbance in the Cambridge Guildhall after a Socialist speech by Mr. Keir Hardie. 18. The Earl of Crewe and Mr. Birrell entertained at the National Liberal Club. March 27. Mr. Lewis Harcourt present at a meeting of the Cabinet, to which he had recently been admitted. 29. The twenty-seventh Annual Conference of the Social Democratic Federation opened at Carlisle. April 1. Fifteenth Annual Conference of the Independent Labour Party was opened at Derby. 18. The Chancellor of the Exchequer introduced the Budget before a crowded House. 25. Mass meeting of the Tariff Reform League held at the Albert Hall; Mr. Austen Chamberlain was the principal speaker. May 3.

Mr. Balfour spoke at the annual demonstration of the Primrose League at the Albert Hall. 10. Mr. Leverton Harris (U.) elected for Stepney Division. 15. Mr. H. Chaplin (C.) elected for Wimbledon by an overwhelming majority over his Women's Suffrage opponent. 21. At a meeting of the Irish Nationalist Convention, held at the Dublin Mansion House, Mr. Birrell's Irish Bill was unanimously repudiated. 22. Mr. G. H. Finch, Member for Rutland, and "Father" of the House of Commons, died, in his 73rd year. June 6. The annual meeting of the Council of the National Liberal Federation was held at Plymouth. 10. Bye-election in Rutland; Mr. Gretton (C.) returned by an increased majority. 13. Mr. Balfour presided at an Anti-Home Rule meeting at the Queen's Hall. July 4. The Jarrow bye-election resulted in the return of Mr. Curran, the Labour candidate. 9. Sir A. Billson, M.P. for North Staffordshire, died suddenly of heart failure, during a debate in the House of Commons on a motion for the reduction of the Sugar Tax. 12. In the House of Commons, the Attorney-General moved that an address be presented to the King for the appointment of an additional Judge to the King's Bench Division.—The anniversary of the Battle of the Boyne was celebrated in Ulster in the usual manner. 14. A protest against any agreement with the Russian Government led to riotous scenes in Whitehall. 18. The bye-election in the Colne Valley resulted in the return of Mr. Victor Grayson (Socialist). 31. Mr. Stanley (L.) elected for N.W. Staffs.; majority, 2,349. Aug. 3. Considerable rioting took place in the streets of Belfast at meetings of the constabulary on strike. 10. Further serious rioting occurred in Belfast. 12. The rioting in Belfast became so serious that the Riot Act was read, and the troops were called upon to fire a volley; two persons were killed and several wounded. 15. In the House of Commons, the Deceased Wife's Sister Bill passed the third reading. 26. In the House of Lords, the Deceased Wife's Sister Bill passed the third reading. 27. Mr. J. P. Farrell, M.P., was arrested and charged at Longford for inciting to riot. 30. The annual meeting of the Irish Unionist Alliance took place in Dublin, Lord Ardilaun presiding. 31. The Anglo-Russian Agreement with regard to the mutual relations of the two Powers in Asia was signed at St. Petersburg. Sept. 26. The Prime Minister visited Montrose, and was created an honorary Burgess of the burgh. 27. The Kirkdale Division of Liverpool bye-election resulted in the return of the Unionist candidate, Mr. McArthur, with a slightly increased majority. Oct. 4. Freedom of the burgh of Peebles conferred upon the Premier. 5. The Premier spoke at Edinburgh on the Lords question and legislative progress. 12. Lord Rosebery unveiled a statue of Queen Victoria at Leith, and paid a striking tribute to Her late Majesty in his accompanying speech. 19. Mr. Asquith spoke on Socialism at Ladybank, N.B. 30. The Premier received the Freedom of Edinburgh.

POLITICS, MUNICIPAL.—(1906) Nov. 1. The London Borough Council elections resulted in a striking victory for the Moderate (Municipal Reform) Party. 6. L.C.C. decided, by 80 votes to 34, to proceed with the "electricity in bulk" scheme. 27. Seven guardians and officials of West Ham were arrested in connection with coal contracts. Dec. 15. The L.C.C. tramways were opened along the Thames Embankment.

(1907) *Jan. 26.* The motion on behalf of the *Standard* for the committal of Mr. John Burus for contempt of court, in a speech made by him at a meeting of the Progressive Party held on the 24th, was refused by Justices Darling and Phillimore. *Feb. 23.* Riotous scenes in Trafalgar Square during a Municipal Reform demonstration. *28.* A number of West Ham guardians and officials committed for trial. *March 2.* The triennial elections of the London County Council resulted in a sweeping majority for the Municipal Reform Party. *19.* A proposal for a "commercial audit" of the London County Council accounts, in preference to that of the Local Government Board, gave rise to heated debate. *May 7.* Mr. A. F. Buxton presented the estimates for the coming financial year to the L.C.C. *June 5.* A deputation, headed by the Bishop of London, waited on the Theatre and Music Hall's Committee of the L.C.C. to urge the suppression of the "Living Statuary" exhibitions; the committee subsequently decided to disallow the performances.

RAILWAYS.—(1906) *Nov. 12.* Emigrant and freight trains collided at Woodside, U.S.A.; 50 persons killed. *24.* Collision on N.E. Ry. at Uleskelf, between Leeds and York; several railway servants killed and some passengers injured. *Dec. 13.* Board of Trade report on the Grantham disaster was issued; no definite explanation could be given. *15.* Great Northern, Brompton and Piccadilly "Tube" opened for passenger traffic. *28.* Terrible accident at Elliot Junction, near Arbroath; 21 persons killed, including Mr. A. W. Black, M.P. for Banffshire. (1907) *Jan. 2.* Collision near Altavista, U.S.A.; many killed and injured. *18.* At the conclusion of the public inquiry into the Elliot Junction Railway disaster, the jury found that it was caused by general negligence on the part of the driver, the stationmaster, and by the methods of the company. *Feb. 10.* The remaining portions of the new L.B. & S.C.R. station at Victoria were opened for traffic. *16.* An electric suburban train left the rails in New York, many persons being killed and injured. *March 12.* George Gourlay, driver of the express in the Arbroath accident, sentenced at Edinburgh to five months' imprisonment. *June 22.* The Charing Cross and Hampstead "tube" railway was opened to the public. *Aug. 4.* A train fell through the bridge over the Loire, near Pont-de-Cé; many persons were killed and injured. *19.* Mr. Whitelaw Reid unveiled a tablet in Salisbury Cathedral in memory of those who lost their lives in the great railway disaster in July, 1906. *24.* The Paris-Bordeaux express collided with a goods train near Coutras; many persons were killed and injured. *Sept. 15.* At a mass meeting held in St. James's Theatre, Manchester, Mr. Richard Bell, M.P., announced that a ballot would be taken of the members of the Amalgamated Society of Railway Servants to consider the future conduct of the dispute with the railway companies. *28.* A collision occurred on the Great Western Railway, near Newport, Mon-

mouthshire, between an express and a mineral train; one person was killed and several injured. *30.* A serious accident took place on the North British Railway at Coatbridge. The railway crisis became acute at the end of Oct., but was settled by the agency of Mr. Lloyd-George, President of the Board of Trade, on Nov. 6.] *Oct. 15.* A joint L. & N.W. and G. W. Ry. express left the rails while travelling at great speed by Shrewsbury Station; many people were killed and injured. *26.* Collision on the Metropolitan Railway at West Hampstead, the first fatal accident on that line; three persons killed and many injured.

NOTABLE SALES.—(1906) *Dec. 13.* The Lyceum Theatre, with adjoining property, was sold by auction at the Mart for £119,500. (1907) *March 23.* At a sale of books at Sotheby's, a first folio Shakespeare was sold to Mr. Quaritch for £3,600. *April 15.* At a sale at Christie's, a rope of 229 pearls, the property of the late Mrs. Lewis-Hill, realised the sum of £16,700. *20.* A first edition of Shakespeare's Sonnets was sold at Sotheby's for £800 to Mr. Quaritch, who also bought an imperfect first folio of the Plays for £680.—The sale of the jewels, &c., of the late Mrs. Lewis-Hill was concluded at Christie's; the total proceeds amounted to £134,128. *May 29.* The original warrant for the Massacre of Glencoe was sold by Messrs. Puttick & Simpson for £1,400. *June 1.* Remarkable prices were given at Sotheby's for copies of Shakespeare folios and quartos; Mr. Quaritch bid £2,400 for a first folio. *6.* The Glastonbury Abbey Estate was bought by Mr. Jardine, of Nottingham, for £30,000. *Oct. 24.* The Baroness Burdett-Coutts's estate (Holly Lodge) withdrawn at £205,000.

WOMEN'S SUFFRAGE.—(1906) *Dec. 13.* Several women suffragists were convicted of riotous behaviour at the House of Commons, and, refusing to pay the fines, went to prison on 14th. *17.* A further demonstration made in the Central Lobby of the House of Commons. (1907) *Feb. 9.* Demonstrations in favour of Women's Suffrage at Exeter Hall and Trafalgar Square. *13.* A demonstration of suffragists outside Westminster Palace culminated in a riot, and many arrests were made. *March 8.* The second reading of the Women's Enfranchisement Bill was moved in the Commons, but was talked out. *20.* A demonstration at Caxton Hall, and subsequent march by suffragists to Westminster Palace, led to disorderly scenes and 76 arrests. *May 15.* At the annual meeting of the Home Counties Liberal Federation, held at the Alexandra Palace, noisy demonstrations were made by suffragists. Similar demonstrations were made during the year.

THE QUALIFICATION OF WOMEN.—The Bill to Qualify Women to Serve on County and Borough Councils, introduced on May 14, which had been subjected to modification, was considered in the Commons on Aug. 12, who on Aug. 16 sent it back to the other House with portions restored. The Lords on Aug. 24 agreed to the amendments.

- Aldé, Charles Hamilton, novelist and playwright.

ST. JAMES'S PALACE, in Pall Mall.—*Levés* held here during the season. York House, formerly the residence of the Prince of Wales.

TOWER.—Regalia, Armouries, &c. Admission 6d. to see the Armouries and the Beauchamp Tower; and 6d. to the Jewel House. Mondays and Saturdays free by tickets issued at the office at gateway. Not open on Sundays. *Keeper of Regalia*, General Sir Hugh H. Gough, *W.C.*, G.C.B.

WESTMINSTER HALL, adjacent to the Houses of Parliament.—For admission, see regulations as to Houses of Parliament. Contains Portrait Statues of kings. One of our largest and oldest buildings.

WHITEHALL, opposite Horse Guards.—Erected by Inigo Jones, intended for a banquetting-house. King Charles I. was beheaded here. Now occupied by the Royal United Service Institution.

SUBURBAN RESORTS.

BURNHAM BEECHES.—Magnificent sylvan scenery, purchased by the City of London for the benefit of the public. During the summer months omnibus runs daily, Sundays included, from Slough, and cheap through tickets are issued from London and Suburban Stations by G. W. R.

CHESHUNT.—Temple Bar (at entrance to Theobald's Park), Cheshunt Great House, Cromwellian relics, &c.

DULWICH.—By S.E. and Chatham Railway. Large Public School. Fine Gallery of paintings at the old College, daily, from 10 to 4, 5, or 6, according to season, free. Not open on Sunday.

ENFIELD LOCK.—By G. E. Railway. Royal Small Arms Factory. Visiting days, Monday and Thursday, by order.

EPPING FOREST, LOUGHTON, BUCKHURST HILL, CHINGFORD, HIGH BEECH, on Great Eastern Railway.—Fare, 1s. Beautiful forest scenery. A favourite resort for picnic parties, breakfasts, &c.

GRAVESEND.—Access from London during summer by steamboat (25 miles), and throughout year by three lines of railway; fares 1s. to 2s. Windmill Hill, Springhead Gardens, Cobham Park, fine views of the Thames (here a mile wide), shipping, &c. Near are *Rosherville Gardens* open daily, including Sundays, from April to Oct. Opposite are *Tilbury Docks and Fort*.

GREENWICH.—Royal Naval College, commonly known as *Greenwich Hospital*. The Painted Hall, Nelson's Relics, &c., free on week-days from 10 till 4 or 6, according to time of year, and from 2 on Sundays. *Naval Museum*, interesting Collection of Models, &c., open daily, except Friday and Sunday, from 10 till 4 or 6. *Chapel* closed on Fridays and Sundays. *Observatory* only by permission of the Astronomer Royal. Blackheath and Shooter's Hill are close by.

HAMPTON COURT.—Built by Cardinal Wolsey; 15 miles from London; railway fare, 1s. 2½d.; 1s. 10d. return. Steamboats in summer, with beautiful view of river. Gardens and splendid collection of pictures, daily, except Friday, summer 10 to 6, winter 10 to 4; and every Sunday, summer 2 to 6, winter 2 to 4. Free.

RICHMOND.—The Park, and adjacent villages, &c., as Twickenham. *Pope's Villa*, Sheen, Mortlake, Teddington, Thames Ditton; boating, fishing, &c. By rail, boat, or omnibus. Fare, 1s.

RYE HOUSE, at Hoddesdon, on the River Lea. Scene of the celebrated plot. Old castle and dungeons, pictures, oak fireplaces, chests and panels; Queen Elizabeth's bed; the Great Bed of Ware (mentioned in "Twelfth Night"). Great resort for Londoners who include feasting and fishing in their day's enjoyment.

ST. ALBANS.—Abbey recently restored. Ruins of ancient City of Verulam, and St. Michael's Church, with tomb of Lord Bacon.

WALTHAM ABBEY.—By Great Eastern Railway. The Abbey, powder-mills, fishing, &c.

WINDSOR.—22 miles from London; by Great Western and South Western Railways. When the Court is not in residence, the State Apartments of Windsor Castle are generally open to the public, during His Majesty's pleasure, on Tuesdays, Wednesdays, Thursdays and Saturdays. When open, as to which due notice is given in the Press, the Lord Chamberlain's tickets can always be obtained at the Inspector's Office in the Castle Yard. The charges for admission on Tuesdays, Thursdays and Saturdays are: Adults, 1s.; children, 6d., excepting to charitable societies, when the charge for admission will be one-half in each case, the proceeds to go, by the King's command, to local charities. On Wednesdays and on Bank Holidays no charge is made. An authorised guide book can be obtained at the ticket office,

price 1d. The hours of admission to the State Apartments are from April 1 to Sept. 30, between 11 and 5; during October, between 11 and 4; and from Nov. 1 to March 31, between 11 and 3. The Albert Memorial Chapel and the Round Tower are open on the same days and at the same hours as the State Apartments, except that the Round Tower is closed during the winter. The royal stables and riding school may be viewed daily between the hours of 1 and 2.30. St. George's Chapel may be viewed on week-days (Fridays excepted), between 12.30 and 3.0 in the summer, and between 12.30 and 4 in the winter.

WOOLWICH.—*Extensive Barracks for Royal Artillery, Army Service Corps, &c.* Common for military evolutions. *Rotunda* daily, Sundays excepted, free, from 1 April to 30 Sept., 10 a.m. to 12.45 p.m. and from 2 p.m. to 5; 1 Oct. to 31 March, 2 to 4. *Royal Arsenal*, Royal Ordnance Factories, and Army Ordnance Dept., admission on Tuesdays and Thursdays, 10 to 12.30 a.m. and 2 to 4.30 p.m., by order obtained at War Office, Whitehall, or from the Chief Supt. of Ordnance Factories, Royal Arsenal, Woolwich, for British subjects only; foreigners must apply through their respective Embassies. South Eastern Dockyard Station for Barracks, Rotunda, &c., and the Arsenal Station for Royal Arsenal.

THEATRES AND MUSIC HALLS.

(Steeplechase Meetings in italics.)

[illegible]

The following table gives the winners of the Derby for the last 54 years. Including 1851, Sir J. Hawley scored four successes with Teddington, Beadsman, Musjid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. The Duke of Portland, Lord Rosebery, and Mr. Bowes have won twice consecutively, and H.M. the King, Lord Falmouth, Mr. W. F. Anson, Mr. Merry, Sir F. Johnstone, and Sir J. Miller have been twice victorious at intervals of four or more years.

* Record.

WORLD'S AQUATIC CHAMPIONSHIP.

Yr.	Winner.
1890	P. Kemp b. Neil Matterson.
1891	J. Stanbury b. J. MacLean.
1892	J. Stanbury b. T. Sullivan.
1893	J. Stanbury b. C. R. Harding.
1896	J. Gaudaur b. J. Stanbury.
1901	G. Towns b. J. Gaudaur.
1904	G. Towns b. R. Tressider.
1905	J. Stanbury b. G. Towns.
1906	G. Towns b. J. Stanbury.
1907	G. Towns b. E. Durnan.
1907	W. Webb b. G. Towns.

After Trickett had carried off the Championship to Australia in 1876, a Championship of England Cup was instituted, which, after being held in turn by R. W. Boyd, J. Higgins, and W. Elliott, was finally won by Hanlan, when he defeated the latter in 1879.

† In Canada. ‡ In Australia.

OLD BILLIARD CHAMPIONSHIP (ON SPECIAL TABLE).

Yr.	Winner.
1871	W. Cook b. J. Bennett.
1872	W. Cook b. J. Roberts, jr.
1874	W. Cook b. J. Roberts, jr.
1875	J. Roberts, jr., beat Cook.
1876	J. Roberts, jr., beat Cook.
1877	J. Roberts, jr., beat Cook.
1880	J. Bennett beat W. Cook.
1881	J. Bennett beat T. Taylor.
1885	J. Roberts, jr., beat Cook.
1885	J. Roberts, jr., b. J. Bennett.

* Bennett resigned. Cook d. 1893.

Roberts made the largest break of these matches—255. This and the previous match were 3,000 up; the others, saving the first, 1,000 up. 1899, 1st champion Billiard Association rules, C. Dawson; then H. W. Stevenson. In 1905 H. W. Stevenson defeated C. Dawson several times. In 1906 and 1907 there was no match.

E. A. Johnson	6	0 $\frac{1}{2}$	1881
J. Darby	6	0	1892

Putting the Weight (16 lbs., 7 ft. sq.), 48 ft. 3 ins., by D. Horgan, in Ireland. Throwing the Hammer, 16 lbs. J. Flanagan, 172 ft. 11 in., 1904, in America, from 7 ft. circle. A.A.U. rules, wire handle with loops. M. Sheridan holds the World's Discus Throwing record, viz., 133 ft. 11 in., at Montreal, 1905.

1 These are the only records generally accepted, though it is certain that several professionals have travelled the distances a yard or two yards quicker. Geo. Seward's apocryphal 91 secs. is no longer accepted. M. W. Long, in 1900, ran a straight quarter in 47 secs. in America.

2 After becoming a professional in a match with Cummings, Aug., 1885.

3 In America F. P. Murray is credited with 1 mile in 6 min. 29.5 s. secs., 3 miles in 21 min. 9.2 s. secs.

5 British Amateur records:—100 yds., 9.4 s. secs., by A. F. Duffey, U.S.A., on grass, and W. A. Schick (Harvard Univ.), 1904; C. Bradley has done 10 secs. uphill at Northampton; 220 yds., 27.4 s. secs., by C. G. Wood; 300 yds., 31.2 s. secs., by C. G. Wood; quarter, 481 secs., by H. C.

L. Tindall and E. C. Bredin; 500 yds., 58 $\frac{1}{2}$ secs., and 600 yds., 1 m. 11.2 s. secs., both by E. C. Bredin. Half-mile, 1 m. 54.3 s. secs., by F. J. K. Cross. Broad Jump, 24 ft. 11 in., by P. J. O'Connor. High Jump, 6 ft. 4 $\frac{1}{2}$ in., by P. Leahy. Throwing the Hammer (16 lbs., 9 ft. circle), 163 ft. 1 in., by J. Flanagan. 1,000 yds., 2 mins. 74.4 s. secs., by W. E. Lutyens.

6 The pole-jumping record is held by an amateur, R. D. Dickinson, with 11 ft. 9 in. at Kidderminster, 1891.

7 Made in N. Zealand. 8 Made in America. 9 Not music-hall exhibitions, but all doubtful. 10 Made in Australia. * Balls jammed in mouth of pocket.

N.B.—The following records (amateurs) are authentic:—120 yds. Hurdles in England, A. C. Kraenzlein, 15.3 s. secs., on grass. In America, on cinders, A. C. Kraenzlein, 15.5 s. secs. Walk, London to Brighton, 52 $\frac{1}{2}$ miles, J. Butler, 8 hrs. 23 m. 27 s. secs., 1905. Throwing the Cricket Ball, 127 yds. 1 ft. 3 in., by W. H. Game, at Oxford, 1873. Record in a six days professional contest, 623 m. 1,320 yds., by G. Littlewood, New York, 8th December, 1888.

BEST "spot-in" break (exhibition match) 3,304, by W. J. Peall, 1890; match for money 2,031, by W. J. Peall, 1888. Best spot-barred breaks, 1,392 by J. Roberts, 1894, and 1,467* by T. Taylor, 1891. Greatest number of spot-hazards in succession 623, by W. J. Peall, 1888. Successive nursery cannon record of 180 is held by W. Cook, on Jan. 11, 1906. Longest run of successive losing red hazards 98, by J. Roberts, 1894. Largest number of successive screw-back red hazards 186, by J. G. Sala, 1883. Fastest 1,000 up game, all-in, W. J. Peall, 1884, 44 min. Fastest 1,033 spot-barred, J. Roberts, 1894, 59 $\frac{1}{2}$ min. Under Billiard Association Rules, E. C. Bred is the amateur champion. The record breaks are 802 by H. W. Stevenson, Feb. 16, 1905, recognised by the B.A., and 821 by John Roberts, Jan. 24, 1905, in Scotland. On Oct. 12, 1906, in London, M. Inman scored 300 points off the red ball. By means of the now abolished cradle cannon W. Cook, in June, 1907, scored 42,746; and by the aid of the same stroke T. Reece, during June and July, totalled 499,138, but the latter was not passed by the Billiard Association, as it was not made entirely in public play.

SWIMMING.

CAPTAIN MATTHEW WEBB swam from Dover to Calais in 21 hrs 45 mins., August 24 and 25, 1875. Longest time under water, Miss E. Wallenda, 4 min. 45 $\frac{1}{2}$ secs., in a tank, Alhambra, London, Dec. 14, 1898.

English Channel attempts.—In 1905 J. Wolfe, Horace Mew, T. Burgess, and Miss A. Kellerman, of Australia, and others all failed. Wolfe once got within about 52 miles of the French coast. In 1907 J. Wolfe, Heaton, M. Holheim, and others also again made fruitless attempts.

* All these records were made with motor pacing and wind shields.

On Sept. 17-18, 1883, M. Cordang, at The Hague, Holland, rode 640 miles 196 yards in 24 hours, but owing to his suspension at the time by the U.V.F. the record is not recognised. At Madison Square Gardens, New York, December, 1898, Charles Miller rode 2,007 miles 4 laps in 124 hours.

Auzani, at Paris, Sept. 16, 1905, rode a motor cycle 58 miles 489 yards in 60 minutes.

Cricket.—Highest score, A. E. Stoddart, 425, Hampstead v. Stoics, 1886; A. E. J. Collins (age 13), 628 in house match at Clifton College, 1899. English largest gross score, Orleans Club v. Rickling Green, 920, Aug. 3rd, 1882. In a first-class match, Yorkshire, 887, v. Warwickshire, May 8, 1896. Also in first-class cricket highest individual score, A. C. Maclaren, 424, for Lancashire v. Somerset, at Taunton, July, 1895. Lowest score in an innings, 12, by Oxford University (one man absent) v. M.C.C. and Ground, at Oxford, May, 1877. Most runs made in a year in England, 358 by T. Hayward in 1906 in 61 innings (8 times not out) aver. 66.37; previous best, 339 by Abel, 1901, in 68 innings (8 not out), aver. 55.15. Also T. Hayward in 1906 equalled C. B. Fry's record of 13 centuries in one season. England v. Australia matches, 42 in Australia, 34 in England. England won 33, Australia 28, drawn 15, up to end of 1905. Total 75.

Trotting.—Fastest mile, in America, 1 m. 53 1/2 s. by Lou Dillon, Oct. 24, 1903. Fastest pacing mile, 1 m. 56 1/2 s., Dan Patch, Oct. 22, 1903.

THE NATIONAL AMATEUR WRESTLING ASSOCIATION CHAMPIONS, 1906.

CUMBERLAND AND WESTMORELAND STYLE.
Feather Weight (141 st.), M. E. Tredwell, London A.W.S.
Light Weight (161 st.), S. V. Bacon, London A.W.S.

Munts and Hounds.

Staghounds:—England, 26 packs (399 couples); Ireland, 4 packs (106 couples).
 Foxhounds:—England and Wales, 170 packs (over 6,400 couples); Scotland, 11 packs (353 couples); Ireland
 24 packs (1042 couples).

PACK.	COUPLES.	MASTER.	KENNELS.
Staghounds (20 couples or more).			
Amory's (Sir J.)	25	Sir J. Amory, Bart.	Hensleigh, Tiverton.
Berks and Bucks	23	Messrs. Headington	Highbury, Maidenhead.
Barton's (Mr.)	20	Mr. W. P. Burton	Edgehill, Ipswich.
County Down	34	Mr. S. B. Combe	Rockmount, Ballinahinch, county Down
Devon and Somerset	60	Mr. E. A. V. Stanley	Exford, Taunton, Somerset.
Enfield Chase	23	Mr. D. D. Bulger	Beeson End, Childwick, Herts.
Essex	20	Mr. A. Jackson	Baddow Park, Chelmsford.
Gerard's, Mr.	20	Hon. R. Gerard	Wrightington Hall, Wigan.
Mid Kent	24	Mr. A. Leney	Wateringbury, Maidstone.
New Forest	25	Mr. O. T. Price	New Park, Brockenhurst, Hants.
Norwich	23	Mr. J. Cooke	Brooke Lodge, Norwich.
Oxenholme	25	Mr. C. H. Wilson	Gate Beck, Kendal.
Ribblesdale	25	Lord Ribblesdale	Ellenthorpe, Gisburn.
Rothschild's (Lord)	25	Lord Rothschild	Ascot, Leighton Buzzard.
Surrey	30	Captain MacTaggart	Horleyland, Horley, Surrey.
Ward Union	30	Mr. Percy Maynard	Ashbourne, county Meath.
Warrnam	23	Mr. H. C. Lee Steere	Oakwood, Ockley, Dorking.
Foxhounds (50 couples or more).			
Albrighton	53	Col. Goulburn	Whiston Cross, Albrighton.
Atherstone	60	Mr. J. C. Munro	Witherley, Atherstone, Warwickshire.
Badsforth	55	Mr. H. J. Hope Barton	Badsforth, Pottofract.
Beaufort's (Duke of)	75	Duke of Beaufort	Badminton, Wilt.
Belvoir	66	Sir G. Greenall, Bart.	Belvoir Castle, Grantham, Lincoln.
Bicester	53	Mr. Heywood Lonsdale	Stratton Audley, Bicester, Oxon.
Blackmore Vale	57	Col. J. P. Browne, C.B.	Charlton Horethorne, Sherborne, Dorset.
Blankney	50	Lord Chas. Bontinck	Blankney, Lincoln.
Bramham Moor	52	Mr. G. E. Lane-Fox, M.P.	Bramham Park, Boston Spa, Yorkshire.
Cattistock	54	Rev. E. A. Milne	Cattistock, Dorchester.
Cheshire	80	Duke of Westminster	Sandway, Northwich.
Cotswold	50	Mr. H. O. Lord	Cotswold, Cheltenham.
Cottesmore	65	Lord Lonsdale	Ashwell Road, Oakham, Rutland.
Craven	50	Mr. W. J. Yorke Scarlett	Walcot, Hungerford.
Crawley and Horsham	54	Col. C. B. Godman	West Grinstead, Horsham.
Croome	54	Mr. G. Dudley Smith	Croome, Severn Stoke, Worcester.
Dartmoor	50	Mr. W. Coryton	Woodlands, Ivybridge.
Essex	50	Mr. J. Swire	Harlow, Essex.
Ferne's (Mr.)	55	Mr. E. T. Mashiter	Billrosey, Essex.
Fitzhardinge's (Lord)	61	Lord Fitzhardinge	Medbourne, Market Harborough
Fitzwilliam's (Earl)	56	Earl Fitzwilliam	Berkeley, Gloucester.
Fitzwilliam's (Mr.)	54	Mr. G. W. Fitzwilliam	Serby, Bawtry, Yorks.
Garth	60	Mr. R. H. Gosling	Beech, near Peterborough.
Grafton	69	Mr. C. McNeill	Brenham's Heath, Twyford, Berkshire
H. H. (Hampshire)	55	Messrs. F. Coryton & A. T. Jervoise	Baulersbury, Tewkesster.
Hambledon	50	Capt. W. P. Standish	Ropley, Aylesford.
Harrington's (Earl)	80	Earl of Harrington	Droxford, Bishop's Waltham.
Hertfordshire	56	Mr. T. F. Harrison	Gedling, Notts.
Heythrop	54	Mr. A. Brassey	Knosbourne Green, Luton.
Holiness	53	Mr. C. Brook	Chipping Norton, Oxon.
Kent, East	55	Mr. Selby Lowndes	Elton, near Hull.
Leconfield's (Lord)	90	Lord Leconfield	Elham, Canterbury.
Lodbury	60	Sir W. Cooke Bart.	Potterworth Park, Sussex.
Meynell	65	Mr. Gerald Hardy	Lodbury, Herefordshire.
Middleton's (Lord)	50	Lord Middleton	Sudbury, Derby.
Morpeth	54	Mr. F. B. Atkinson	Birdsall, Malton, York.
North Shropshire	52	Mr. F. Bibby	River Green, Moldon, Morpeth.
North Staffordshire	58	Col. W. Dobson	Lee Bridge, Preston Brockhurst
North Warwickshire	52	Mr. J. P. Arkwright	Trantham, Stoke.
Puckeridge	63	Mr. E. E. Barclay	Kenilworth.
Pytchley	55	Lord Annaly	Brent Pelham, Buntingford.
Quorn	52	Captain F. Forester	Brixworth, Northampton.
Rufford	50	Earl Manvers	Barrow-on-Soar, Loughborough
South Berks	65	Mr. S. Dubourg	Wellow, Newark.
Southwold	55	Mr. E. P. Rawnsley	Purley, Reading.
Tedworth	50	Mr. H. C. Connop	Beleford, Horncastle, Lincolnshire.
Warwickshire	70	Lord Willoughby de Broke	Tedworth, Marlborough.
Worcestershire	60	Mr. A. Jones	Kineton, Warwick.
Wynnstay	50	Sir W. Williams Wynon, Bart.	Fernhill Heath, Worcester.
Yarborough's (Earl of)	52	Earl of Yarborough	Wynnstay, Ruabon.
Zetland's (Marquess of)	53	Marquess of Zetland	Brocklesby Park, Lincs.
			Aske, Richmond, Yorkshire.
Scotland			
Berwickshire	56	Mr. F. Usher	Briery Hill, Edrom.
Buccleuch's (Duke of)	57	Duke of Buccleuch, K.T.	St. Boswells, Roxburghshire.
Eglinton's (Earl of)	50	Earl of Eglinton and Winton	Kilwinning Castle, Irvine, Ayr.
Ireland.			
Galway	69	Mr. I. Bell	Craughwell, Co. Galway.
Kildare	60	Mr. A. P. Pollok	Jigginstown, Naas, county Kildare.
Kilkenny, East	50	Lord Southampton	Kilbane, Thomastown.
Meath	54	Mr. John Watson	Bective, Navan, county Meath.
Tipperary	55	Mr. J. C. Higgins	Grove, Fethard, county Tipperary.
Waterford	50	Marquis of Waterford	Curraghmore, county Waterford.
Westmeath	50	Mr. H. Whitworth	Gulleen, Mullingar.

BIRTHS.

WHEN a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration thereof rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free of charge when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending to register may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the superintendent Registrar, and on payment of fees to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees. It is important to persons of all classes to be able to prove their age and the place of their birth. The only legal proof of these is afforded by the civil registers, which the law now requires to be made as above described. The child's baptismal name, if changed, or not previously given, may be inserted in the register within twelve months after the registration of the birth.

DEATHS.

WHEN a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The nearest relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased in the same (Registrar's) sub-district. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased. The written notice will be useless without a legal medical cer-

tificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. The penalty for not delivering this certificate is forty shillings. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees.

CORONERS' INQUESTS are held in all cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Sudden deaths are supposed by the law to demand inquiry. Still, it often occurs that a medical man quite familiar with the case will give his certificate that the death arose naturally, from heart disease, apoplexy, &c., and in such case a coroner's inquest is dispensed with. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person having been duly summoned as a *witness* is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for defaulting *jurymen* being £5. The exemptions of persons from serving on juries contained in Jury Acts do not apply to Coroners' inquests. Coroners' inquests are frequently held into the causes of fire, but where there is no loss of life this excellent practice obtains only in the City of London.

VACCINATION.

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth of the child he satisfies two justices or a stipendiary or metropolitan police magistrate that he conscientiously believes that vaccination would be prejudicial to the health of the child and within seven days thereafter delivers to the Vaccination Officer for the district a certificate of such justices or magistrate of such conscientious objection. It will be seen that a conscientious objector to vaccination can thus escape all penalties, but a person who does not obtain this certificate of exemption will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1898, issued under the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions.

MARRIAGE BY BANNS OR LICENCE.

BANNS OF MARRIAGE.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. Formerly banns might be proclaimed on Church holidays, but the Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony. If there is morning service the right time for banns is after the Nicene Creed; and if there be afternoon or evening, and no morning service, then the right time is after the lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force. Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the Established church of the parish. In like manner in Scotland the publication takes place in the parish church, even where the parties are married in the Anglican or Episcopal church. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage. The

names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage will be null and void (*Middleley v. Wood*, 4 Sw. & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may licence a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on a registrar's certificate without banns.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 428). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two witnesses present, and that these witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may under Section 56 of this Act refuse to marry a divorced person, whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service. A person whose marriage has been dissolved for the adultery of the other party is entitled to be married in church by the incumbent, or his curate or substitute.

Although the presumption of law is in favour of the validity of a marriage, great care should be taken to comply with the directions of the several statutes in every particular. Where it is impossible to comply literally, the parties must do all they can to comply with the law.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2s. 6d., and a stamp duty of 1d. Searches on the register-books may be made on payment of small fees, viz., 1s. for a single year, and 6d. additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5s. to the clerk; and the

usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knightrider Street, Doctors' Commons, E.C., or at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays 10 to 2), are available for London and all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, 10s. 6d. *No previous notice is required and the licence is available as soon as it is issued.* The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15s. to £2 12s. 6d. By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury through the Faculty Office, Doctors' Commons, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must be such as to meet with his Grace's approval. Fees for licence stamp, &c., average £29 5s. 6d.

PROCEEDINGS AS TO A MARRIAGE BEFORE A REGISTRAR.

NOTICE AND DECLARATION.—In case of an intended marriage by Certificate at a register office (i.e., the superintendent registrar's office), or a certified building (i.e., usually a Roman Catholic or Nonconformist church or chapel), it is necessary for one of the parties to give notice under his or her hand (in the form prescribed by the 19 & 20 Vict. c. 119, schedule A.) to the superintendent registrar of the district within which the parties shall have dwelt for the space of seven days then next immediately preceding; or if the parties dwell in different superintendent registrars' districts, a like notice must be given to the superintendent registrar of each district; every form of notice contains solemn declarations that there is no lawful

hindrance to such marriage, as to the necessary residence, the ages of the parties, and consent of parent in case of a minor; such notice and declarations must be signed before a registration officer of the district, namely, a superintendent registrar, or registrar of births and deaths or marriages or the deputy of some such registrar. If the marriage is intended to be had by licence, it is necessary for only one of the parties to give notice to the superintendent registrar, in manner before mentioned, in whose district he or she has resided for the space of fifteen days immediately preceding, and if the other party reside in a different superintendent registrar's district, it is not requisite that notice should be given to such last-mentioned superintendent registrar; but one of the parties must, for the space of fifteen days immediately preceding the giving of the notice, have had his or her usual place of residence within the district of the superintendent registrar to whom such notice is to be given. In case a minister did not happen to attend and the parties wished, they might be married before the registrar without any religious ceremony.

CERTIFICATE.—After the expiration of twenty-one days next after the day of the entry of notice of marriage which is to be had without licence, the superintendent registrar is required, provided there be no lawful impediment, to issue, upon the request of the party giving the notice, a certificate in the form prescribed by the 19 & 20 Vict. c. 119, schedule B. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the certificate.

LICENCE.—In the case of marriage by licence the superintendent registrar is required, after the expiration of one whole day next after the day of the entry of the notice of marriage, provided there be no lawful impediment, to issue his certificate and also a licence to marry. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the licence.

MARRIAGE CEREMONY.—After the expiration of twenty-one days after the entry of the notice if the marriage is intended to be had without licence, or of one whole day if by licence, the marriage may be contracted at the register office and in the presence of the superintendent registrar and some registrar of the district, and in the presence of two witnesses, between the hours of eight a.m. and three in the afternoon, with open doors. Each of the parties is required to declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.;" and each of the parties shall say to the other, "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." A wedding-ring is usually required. In case a minister does not happen to be present, and the parties wish it, they may be married in any chapel or building certified for marriages, the registrar only being present with the two witnesses. The marriage laws of Scotland are peculiar, and cannot here be set out; but it may be mentioned that "Gretna Green weddings" are obsolete, a period of residence being now required by law. Provision is made in the Marriages and Registration Act, 1837, sect. 23, for the declaration and form of words to be used in Welsh in Wales and in all places where the Welsh tongue is commonly used. If both

parties are of the Jewish persuasion, they must give notice to the registration officer, in manner before mentioned, and may marry according to their usages in a synagogue or private dwelling-house, and at any hour of the day; the marriage must be registered by the secretary of the synagogue to which the husband belongs. If both parties are members of the Society of Friends, they must give notice to the registration officer in manner before mentioned, and may be married in a Friends' meeting-house, and the marriage must be registered as soon as conveniently may be after its solemnization by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a registrar of marriages is not requisite at such marriages of Jews or members of the Society of Friends. The provisions as to Notices and Licences given above do not apply to Ireland. [Marriages before a Registrar in that country are regulated by 7 & 8 Vict. c. 81, and 26 & 27 Vict. c. 27; the Act regulating marriages in that country in places of Worship is 33 & 34 Vict. c. 110.]

Under the Marriage Act, 1898 (which does not apply to Scotland or Ireland or to marriages according to the usages of the Society of Friends or of Jews), marriages may be solemnized in Nonconformist places of worship, provided they are duly registered for the solemnization of marriages without the presence of a Registrar, provided "the authorised person" (which means a person certified as having been duly authorised for the purpose by the trustees or other governing body of the building) is present and no notice has been given to the Superintendent Registrar that the parties to the marriage require the presence of a Registrar.

Where a marriage is solemnized under this Act each of the contracting parties shall in some part of the ceremony make the following Declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D."

And each of the parties shall say to the other:—

"I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband];"

or, in lieu thereof:—

"I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

The Act provides for the registration after marriage by "the authorised person." The Act provides for the payment to the Superintendent Registrar of the district in which the registered building selected for the marriage is situated, of an additional fee of 6s. 6d. if the marriage is by licence, and otherwise a fee of 4s., but this provision for additional fees is only to remain in force for 10 years from the passing of the Act.

CERTIFICATE OF BIRTH, DEATH, OR MARRIAGE.

—On giving the name and date this can be obtained at Somerset House on payment of 3s. 7d. made up as follows: 2s. 6d. for certificate, 1s. for search, and 1d. for stamp. Enquiries by post from residents in the Metropolis will not be considered; attendance in person or by agent is necessary. Certificates are also obtainable at the above rate from the superintendent registrar of the district in which the birth, death, or marriage occurred.

FEES FOR MARRIAGE AT REGISTRY OFFICE.

For entering notice of a marriage without s. d.
licence into the marriage notice-book... 1 0

For entering notice of a marriage by licence into the marriage notice-book,	s. d.

For every marriage solemnized in the presence of the Registrar without licence...	5 0
Ditto, by licence	10 0
For every certificate of marriage	2 6
Stamp duty on ditto	0 1

MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed 27th June, 1892; came into force 1st Jan., 1893. Order in Council passed 28th Oct., 1892, laying down Regulations for Marriages under the Act.

British subjects desirous of being married at an embassy, legation, or consulate, must give seven days' notice of the intended marriage, but one of the parties at least must have resided for that time in the district immediately preceding the giving of such notice. After the suspension of such notice for fourteen days the marriage may take place, provided one or both parties have resided for three weeks immediately preceding within the consular district. In cases where one of the parties only has dwelt within the district of the officer by whom the marriage is to be solemnized, the non-resident party, if resident abroad, must give notice to the Consular Officer for the district in which he or she resides; or, if resident in a place in the United Kingdom, the same notice must be given as if that party were about to be married at that place, and in England or Ireland shall be given to the superintendent registrar, or registrar, and in Scotland shall be given by proclamation of banns. In either case it is necessary that the non-resident party shall have had his or her abode in the marriage district (whether in the United Kingdom or abroad) for three consecutive weeks immediately preceding the date of the declaration required before the marriage can take place, and notice of the intended marriage must be given during those weeks. A Consular Officer holding a warrant for a district can only solemnize a marriage at his own official house. He cannot solemnize a marriage at the office of any subordinate consular officer, or elsewhere. No marriages performed at any other place are valid under the Foreign Marriage Act. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present; and an oath, declaration or affirmation must be made by both parties with reference to their age, and parents' consent, if minors.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of 18th August, 1892, and are payable to His Majesty's Govt. :—

For receiving notice of an intended marriage.....	£ s. d.
For receiving notice of a caveat.....	0 10 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	1 0 0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing	0 10 0

outside the consular district in which the marriage is to take place..... £ s. d.
 For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same 0 5 0

Marriages may be solemnized 8 a.m. to 3 p.m.

The ceremony, if a marriage under the Foreign Marriage Act, may be performed by, or in the presence of, any Ambassador, Minister, Chargé d'Affaires, or any of the Secretaries authorised for that purpose, or by any Consul-general, Consul, Vice-consul, Consular agent (or any person duly authorised to discharge their duties), or Pro-consul, provided that such consular officer is furnished with a warrant signed by the Secretary of State for Foreign Affairs. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church. If the service be not that of the Church of England, the contracting parties must make a declaration before the Marriage Officer to the effect that they know not of any lawful impediment why they may not be joined in matrimony, and that they call upon the persons present to witness that they take each other respectively to be lawful wedded husband and wife. In the absence of any religious ceremony, such declaration is sufficient.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited. A consular officer is authorised to register, at the consulate at which he is appointed to reside, marriages solemnized in accordance with the *local law* between parties of whom one at least is a British subject, provided that he be satisfied by personal attendance that the marriage has been so solemnized; he cannot be required to attend at the solemnization of a *lex loci* marriage beyond the place at which he is appointed to reside.

A marriage which would not be valid if solemnized in England would be equally invalid if solemnized in one of His Majesty's embassies, legations, or consulates abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity (such as deceased wife's sister) would not be valid in England even if valid in the country where the marriage was contracted.

Marriages may also be solemnized under the "Foreign Marriage Act, 1892," before any governor, high commissioner, or resident, who may be duly authorised to that effect, and also before the commanding officers of any of His Majesty's ships on a foreign station.

BRITISH NATIONALITY AND NATURALIZATION.

NATIONALITY.—The following are, by the law of England, deemed to be British subjects:—

1. All persons born in His Majesty's dominions, whether of British or of Foreign parents.
2. Children of natural-born British subjects, wherever born.
3. Grandchildren of natural-born British subjects, wherever born.
4. Persons naturalized (a) By Special Act of Parliament, (b) Under the provisions of the "Naturalization Act, 1870."

The above does not apply to married women, who are deemed to be subjects of the state of which their husbands for the time being are subjects.

Natural-born British subjects can only deprive themselves of British nationality, (x) If they happen to be born in the British dominions of foreign parents, in which case they may, if of full age and if under no disability, make a declaration of alienage; (a) If they voluntarily become naturalized in a foreign state.

British subjects born in foreign countries sometimes become, by the law of the country of their birth, subjects or citizens of that country. In such case they may, by the law of England, when of full age, and if under no disability, make a declaration of alienage, and they then cease to be British subjects. Should they retain their British nationality, and continue to reside in the country of their birth, their British nationality will not avail them if claimed as subjects or citizens of the country in question.

NATURALIZATION.—The ordinary way of becoming a British subject is by fulfilling the requirements of the "Naturalization Act, 1870." The applicant must either have resided in the United Kingdom for a term of not less than five years, or have been in the service of the Crown for a similar period. He must also furnish evidence of his intention, when naturalized, either of residing in the United Kingdom, or of serving under the Crown. All applications for certificates of naturalization should be addressed to the Secretary of State for the Home Department.

Privileges of naturalized British subjects:

"An alien to whom a certificate of naturalization is granted shall in the United Kingdom be entitled to all political and other rights, powers, and privileges, and be subject to all obligations, to which a natural-born British subject is entitled or subject in the United Kingdom, with this qualification, that he shall not, when within the limits of the foreign state of which he was a subject previously to obtaining his certificate of naturalization, be deemed to be a British subject unless he has ceased to be a subject of that state in pursuance of the laws thereof, or in pursuance of a treaty to that effect."

With reference to the last paragraph of the foregoing extract, it may be mentioned that the only country with which Great Britain has yet concluded a treaty on the subject of naturalization is the United States of America.

A natural-born British subject, who has become naturalized in a foreign country, may obtain a certificate of re-admission to British nationality in fulfilling the conditions required in the case of aliens applying for a certificate of naturalization.

The children of naturalized British subjects, if born in the British dominions, are by the law of England deemed to be British subjects. If born abroad, they are only deemed to be naturalized British subjects provided that their father was naturalized under the Naturalization Act, 1870, and that during infancy they became resident with their father, or mother being a widow, in any part of the United Kingdom.

British colonies have power to legislate on the subject of naturalization. Colonial naturalization is, however, only operative within the limits of the particular colony in which the naturalization may have been granted.

The following fees are leviable under the Naturalization Act, 1870:—

On grant of certificate of naturalization	£ s. d.
For registration of declaration, with or without oath of allegiance.....	5 0 0
For certified copy of any declaration or certificate with or without oath	0 10 0
	11 0 0

STATUS OF ALIENS.—Real and personal property of every description may be taken, acquired, held, and disposed of by an alien in the same manner in all respects as by a natural-born British subject, but the acquisition of a title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any municipal, parliamentary, or other franchise.

Aliens are not entitled to be tried by a jury *de medietate lingue*, but are triable in the same manner as if they were natural-born subjects.

NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the 1st January, 1899. Every case of infectious disease, as defined by the Act, is to be notified to the Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family to which the patient belongs, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate concerning the case to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40s. fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets *zs. 6d.* for every case in his private practice and *zs.* for every case in a public institution of which he is officer.

The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the fevers known by any of the following names: typhus, typhoid, enteric, relapsing, continued, or puerperal. The local authority may by resolution order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Government Board. The Local Government Board have refused to allow consumption or phthisis to be added to the list. In the case of London the provisions of the Public Health (London) Act, 1891, are similar to those now extended to the rest of the country.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED:—

By the Public Health Act, 1875, it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance without previously notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, room, or part of a house in which any person has been suffering from any dangerous infectious disorder without having the same and all articles liable to retain infection, disinfected to the satisfaction of a legally qualified medical practitioner, as testified by a certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. Where the Infectious Disease (Prevention) Act, 1890, is in force, the occupier of a house, or of any part in which there has been a case of infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. If the outgoing occupier gives false information to the owner or to an intending tenant as to the occurrence of the infection he is liable to heavy penalties and to an action for damages. Where, on the certificate of the Medical Officer of Health, or of any two medical practitioners, it appears to any District Council that any house, or part thereof, is in such a filthy or unwholesome condition that the health of any person is affected or endangered thereby, or that the whitewashing, cleansing, or purifying of any house, or part thereof, would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, cleanse, or purify the same, and such person is liable to a penalty of 10s. for every day during which he fails to comply with the notice, and the Council may cause the work to be done, and recover the expenses from the person in default. Where any suitable hospital or place for the reception of the sick is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, may, on a certificate signed by a legally qualified medical practitioner, and with the consent of the superintending body of such hospital or place, be removed by order of any justice to such hospital or place. Similar provisions apply to the Metropolis.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, however remote may seem the probability of death, however confident that his property will pass to those he most wishes to benefit, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by means of a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious of the very benefits which had demanded a life-long struggle to provide. Thus a widow may find, to her grievous disappointment, that the estate, a life policy perhaps, or a few hundreds in Consols, is not all hers, but has to be shared with a distant cousin of her husband's, whose name perhaps she had never before heard. Or it may be the eldest son of an intestate ousting all his brothers and sisters from possession of the real estate, or an improvident or unbusinesslike nearest relative may claim to administer the estate. Instances might be multiplied in which negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.*, the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (*i.e.*, the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of *any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who,

in cases of emergency, are called upon to draw up wills, either for themselves or others :—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is :—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows :—"And I revoke all former wills and codicils. Dated this tenth day of December, 1890."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient :—

Signed by the testator (or testatrix, as the case may be), in the presence of us, both present at the same time who in his (or her) presence and in the presence of each other have hereunto set our names as witnesses.

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses,

and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee under the will. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary, if it is well known who are the persons intended; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees."

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood], and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

WHO CANNOT MAKE A WILL.—A minor cannot make a will. A woman married before the 1st of January, 1883, can make a will with her husband's consent; but without such consent

she can only (under the Married Women's Property Act) bequeath property accruing to her after that date except in certain circumstances, respecting which it is advisable to consult a solicitor. But a woman married after that date can dispose by will of all property belonging to her at the time of her marriage, and of all property acquired thereafter, in all respects as if she were an unmarried woman.

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors, or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1886, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1894, duties are charged

on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy on succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

Marriages in Scotland.

The marriage laws of Scotland are peculiar among those of all nations for the latitude allowed the contracting parties, and, beyond requiring proof of present consent, the utter absence of direction as to celebration. No religious ceremony is obligatory, although the intervention of the Church is recognised and is becoming more usual in practice. That the parties give their free and serious consent is the only requisite. Males over fourteen and females over twelve may contract marriage without consent of their parents or guardians.

Marriages are of two kinds: (1) Those solemnized by a minister after (a) banns, or (b) publication of notice by the Registrar, called Regular Marriages; and (2) those celebrated without the assistance of a clergyman, called Irregular Marriages.

On Banns.—The proclamation of banns in Scotland has been customary authentically since 1242, and is probably of greater antiquity. It is regulated chiefly by the Acts of Assembly of the Church of Scotland. One of the parties (if not already domiciled in Scotland) must have resided in that country for six weeks previous to the proclamation, and in the parish where the banns are to be proclaimed for the space of fifteen clear days immediately preceding. The banns are proclaimed in the parish church (i.e., the church in the parish of the Established Church of Scotland) on two separate Sundays during service, but it is customary to complete the publication by proclamation at two services on the same Sunday. Where the parties reside in different parishes, the proclamation is made in both. There is no provision for cases where one of the parties resides in England, but it is usual to accept an English certificate. Episco-

pals, unlike other Dissenters in Scotland, have privilege of proclamation also in their chapel. Application for proclamation of banns is made to the session clerk of the parish church. A certificate of residence signed by two householders is usually required to accompany the application. The fee for banns is 2s. 6d.

The certificate of publication of banns is authority to a clergyman of any denomination to celebrate the marriage. After the lapse of three months the banns are useless. The marriage must take place in presence of at least two witnesses capable of giving evidence. It need not be celebrated in a church, but may be in a dwelling-house or elsewhere, and at any hour; the time and place is a matter of absolute indifference to the law. After the marriage a schedule, signed by the parties, the clergyman, and two witnesses, must be transmitted to the registrar within three days, under penalties. Clergymen do not charge fees.

After Notice by Registrar.—This procedure is regulated by the Marriage Notice (Scotland) Act, 1878. Both parties must have resided in Scotland for at least fifteen days prior to publication of the notice. Application is made to the registrar, who publicly exhibits the notice of the intended marriage for seven days. At the expiry of this period, unless written objections have been filed, the registrar issues a certificate of publication, which is equivalent in effect to banns. The fee is 2s. 6d. Roman Catholics avail themselves of this method exclusively.

Irregular Marriages.—By declaration or acknowledgment. One of the parties must have resided in Scotland for twenty-one days immediately preceding. The parties, being capable of marriage and without legal impediment, may express either verbally or in writing, in presence of two witnesses (to whom the parties are known) capable of giving evidence, their mutual consent to take each other then and there for husband and wife. This act constitutes marriage. Registration is not essential to the validity of the marriage. If, however, it is desired to register the marriage, application is made to the sheriff of the county where it has been contracted. It is advisable to employ a solicitor to conduct the matter. After examination on oath of the parties and witnesses, and on being satisfied on the facts, the sheriff issues an order to the registrar to register the marriage and grant a certificate of registration. The fees are £1 5s.

ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A menial servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

To find a will proved before 1st January, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

Registry.	Registrar.	District.
Bangor.....	G. H. Reid (£350)	Carnarvon and Anglesey.
Birmingham	W. G. Middleton (£800)	Warwickshire.
Blandford	H. F. C. de Crespigny (£250)	Dorsetshire.
Bodmin ...	W. H. L. Shadwell (£500)	Cornwall.
Bristol.....	John Henry Clark (600)	Bristol & Bath, present County Court Districts.
Bury St. Edmunds	Ronald Southey (£200)	Suffolk, West.
Canterbury	H. Mapleton Chapman (£350)	Kent, East, and Canterbury.
Carlisle ...	W. C. Butler (£700)	Cumberland and Westmoreland.
Carmarthen	W. Morgan Griffiths (£400)	Carmarthen, Cardigan, Pembroke, with the Deaneries of East and West Gower (including the town of Swansea) in the county of Glamorgan.
Chester ...	H. A. Jenner (£800)	Chester.

Registry.	Registrar.	District.
Chichester	W. B. B. Freeland (£200)	Sussex, West.
Derby	C. T. E. Wilde (£600)	Derbyshire.
Durham ...	W. J. Maynard (£500)	Durham.
Exeter	W. H. Bailey (£1,000)	Devonshire.
Gloucester	R. Fuller (£600) ...	Gloucestershire (except Bristol County Ct. Dist.).
Hereford...	T. C. Paris (£400)...	Herefordshire, Radnor, and Brecknock.
Ipswich ...	G. Pritchard, B.A. (£300)	Suffolk, East, & Essex, North.
Lancaster	Baldwin Daeres Adams (£700)	Co. of Lancs., except the Hundreds of Salford and West Derby, and the City of Manchester.
Leicester...	H. Pickering Clarke (£500)	Leicester and Rutland.
Lewes	J. W. Heisch (£350)	Sussex, East.
Lichfield ...	H. G. Faussett-Osborne (£800)	Staffordshire.
Lincoln ...	J. Swan (£850) ...	Lincolnshire.
Liverpool	T. E. Paget (£750)	W. Derby H'nd'd.
Llandaff ...	Charles H. Wilkinson (£350)	Glamorgan (except Deaneries of E. and W. Gower), Monmouth.
Manchester	R. S. O. Mais (£800)	Manchester and Salford H'nd'r'd.
Newcastle-on-Tyne	H. E. Edwards (£500)	Northumberland.
N'ht'mpton	C. C. Becke (£250)	Northants, S'th., and Beds.
Norwich ...	L. D. Powles (£700)	Norfolk.
N'ottin'ham	Dr. F. Oswald (£400)	N'tinghamshire.
Oxford	T. M. Davenport (£500)	Oxon, Berks, and Bucks.
Peterboro'	C. S. Magee (£400)	Northants, N'th., Hunts, and Cambs.
St. Asaph	J. P. Lewis (£350)	Flint, Denbigh, & Merioneth.
Salisbury...	H. Elliott Fox (£350)	Wiltshire.
Shrewsb'ry	R. K. A. Green (£500)	Salop and Montgomery.
Taunton ...	E. T. Alms (£350)	Somerset, West.
Wakefield	G. Bridgeman (£1,200)	Yorks, West Riding.
Wells	J. R. Holligan (£350)	Somerset, East, except Bath C. C. District.
Winchester	C. Wooldridge (£500)	Hampshire.
Worcester	G. F. Adams (£500)	Worcestershire.
York	H. A. Hudson (£1,000)	Yorks, N. & E. Riding (including York).

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vic. c. 77; but the provision has been almost a dead-letter. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar.

Architects' Fees.

THE custom is to charge 5 per cent. on the cost of new work, if exceeding £1,000. Below that sum, an increased scale is usual. An increased charge is also made for alterations to existing buildings, and for designs for decorations, fittings, and furniture. If PLANS, &c., are prepared for works which are never carried out, the charge is one-half the above, with a further half per cent. if tenders have been invited and received. These charges do not include negotiations for purchase of site, &c., nor settlement of difficulties with adjacent owners and public authorities, nor taking out quantities. For repetitions a modified charge is usually arranged. The minimum charge per day is three guineas. In all cases, travelling and other out-of-pocket expenses are paid by the employer in addition to the fees. For furnishing or checking a Schedule of Dilapidations and Estimate the usual charge is 5 per cent. on the estimate, but in no case less than two guineas. For valuing and negotiating the settlement of claims under the Lands Clauses and similar Acts the charge is on Ryde's Scale.

Surveyors' Fees.

SURVEY with plain plan—100 acres and under—by arrangement, according to work required. Over 100 acres, 2s. per acre and expenses; if with finished map, according to amount of embellishment.

VALUATION to fix rent—5 per cent. on first £200, and 2½ on remainder of one year's rental value, and expenses.

TIMBER valuation—5 per cent. on first £100, and 2½ on the excess, and out-of-pocket expenses.

CROPPING—5 per cent. up to £100, and 2½ on the excess, and out-of-pocket expenses.

VALUATION for probate—2 per cent. on first £500, and 1¼ on the excess, and out-of-pocket expenses. But it is now usual to make a bargain for a fixed and moderate sum.

VALUATION of land—6d. per acre, and out-of-pocket expenses. No fee less than 5 guineas.

Auctioneers' and Estate Agents' Fees.

FOR THE SALE OF FREEHOLD AND COPYHOLD ESTATES AND HOUSES AND GROUND LEASES, BY AUCTION OR BY PRIVATE TREATY.—£5 per cent. on the first £100; £2½ per cent. up to £5,000; and on the residue above that sum £1½ per cent.; and the usual commission of £5 per cent. in addition on the amount paid for fixtures, furniture, and effects, and in addition for any disbursements.

FOR LETTING UNFURNISHED HOUSES, OR DISPOSING OF LEASES OTHER THAN GROUND LEASES BY ASSIGNMENT OR OTHERWISE.—Where the term is for three years or less, £5 per cent. on one year's rent; where for more than three years, £7½ per cent. on one year's rent, and (in either case) upon the premium or consideration, £5 per cent. up to £1,000, and 2½ per cent. on the residue, and the commission of £5 per cent. on any sum obtained for fixtures, furniture, or effects of any kind.

FOR LETTING FURNISHED HOUSES, IN TOWN OR COUNTRY.—When let for a year or less period, £5 per cent. on the rental. When let for more than a year, £5 per cent. on first year's rent, and £2½ per cent. on rent for remainder of term. Where a property is let, and the tenant afterwards purchases, the commission for selling will then become chargeable, less the amount pre-

viously paid for letting furnished or unfurnished.

FOR VALUATIONS OR SALE OF FURNITURE, FIXTURES, AND OTHER EFFECTS.—For Sale, £5 per cent.; for Valuation, £5 per cent. up to £500, and £2½ per cent. on the residue.

FOR VALUATION OF FURNITURE AND EFFECTS FOR PROBATE OR ADMINISTRATION. £2½ per cent. on the first £100, and £1½ per cent. on the residue.

FOR VALUATION OF PROPERTIES FOR SALE, PURCHASE OR MORTGAGE.—£1 per cent. up to £1,000, 5s. per cent. above, on full amount of valuation. In valuations for Mortgage, if an advance is not made, one-third of the above scale, the minimum fee to be £3 3s.

FOR VALUATIONS FOR PROBATE OR ADMINISTRATION (UNDER THE FINANCE ACT, 1894) OF FURNITURE AND EFFECTS.—£2½ per cent. on the first £100, and £1½ per cent. on the residue. OF FREEHOLD, COPYHOLD, OR LEASEHOLD PROPERTIES—5s. per cent. on amount of valuation. Minimum fee, £3 3s.

FOR NEGOTIATING THE PURCHASE OF ESTATES, HOUSES, AND GROUND LEASES.—£2½ per cent. up to £500, and £1 per cent. beyond that amount.

FOR NEGOTIATING THE TAKING OF FURNISHED OR UNFURNISHED HOUSES.—Half the scale for letting.

FOR LETTING BUILDING LAND.—Amount of one year's ground rent, or by agreement.

FOR MAKING AND EXAMINING INVENTORIES, and making catalogue for auction sale.—From one guinea, according to length, exclusive of expenses.

MAKING schedule of fixtures to attach to lease.—From 1 to 4 guineas, or about 3 guineas per day.

FOR MAKING schedule of dilapidations, and serving notice to repair.—From 2 to 5 gs. per day.

FOR SETTLING amount of dilapidations—5 per cent. on amount, and out-of-pocket expenses.

RAILWAY, School Board, Corporation, Board of Works, and other compensations—SCALE:—

If the award be for £1,000 the fee chargeable is 18 gs., and for £1,200 19 gs., and so on, each £200 additional earning a further guinea, but no fee less than 7 guineas; and a fee of 3 guineas per day for London valuers, and 5 guineas per day for valuers outside the London area, for attendance in London before jury or arbitrator.

MANAGEMENT of estates, including collection of rents—Tithe-rent charges, ground rents, &c., from 3 to 5 per cent.; cottage property, from 5 to 10 per cent., according to special agreement.

Allowances under Bankruptcy Acts, 1883 and 1890.

The following charges are to be subject to reduction by agreement with the Official Receiver or the trustee, or to increase with the sanction of the Committee of Inspection and the Receiver:—

Brokers.—For inventory not exceeding 5 folios, 10s. 6d.; additional per folio to 20 folios, 1s. 6d.; each folio after 20, 1s. For inventory and valuation:—On the first £100, £2 10s.; for the next £400, £1 5s.; above £400 up to £10,000, £1; above £10,000, 10s. Travelling expenses in addition.

Auctioneers.—For sales by private contract half the above charges for inventory and valuation; for sales by auction (in addition to certain out-of-pocket expenses) of chattel property, 5 per cent. on first £500, 4 per cent. on next £500, above £1,000 2½ per cent.; and of estates in land, including prior valuations for determining amount of reserve bids, on first £300 5 per cent., on next £1,600 2½, above up to £5,000 1¼, and above £5,000 1 per cent. Cost of surveys, dilapidations and specifications, £2 to £5.

Accountants.—For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, including necessary affidavit, £1 1s. to £5 5s. Chief clerk's time, 10s. 6d. to £1 11s. 6d. Other clerk's time, per day of seven hours, 7s. 6d. to 16s. These charges to include stationery, except forms used.

MEDICAL FEES.

UNLIKE those in most other businesses or professions, the charges made by medical men are assessed upon a sliding scale. All engaged in the profession are supposed to be equal in point of skill, and therefore entitled to charge alike, the tariff depending chiefly upon the residence of doctor or patient. A medical man living in the eastern suburbs of London will perhaps charge but half a crown or three-and-sixpence if waited upon by a patient; but, when he removes to the neighbourhood of Cavendish Square, the fee charged for the first visit will be two guineas, and one guinea for the second and every subsequent visit.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

GENERAL PRACTITIONERS.	RENTALS.			
	£10 to £25.	£25 to £50.	£50 to £100	
Ordinary Visit	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.	
Night Visit	Double an ordinary visit.			
Mileage beyond two miles from Home	1s. 6d.	2s.	3s. 6d.	
Detention per ½ hour	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.	
Letters of Advice	Same charge as for an ordinary visit.			
Attendance on servants	2s. 6d.	3s. 6d.	3s. 6d. to 5s.	
Midwifery	21s.	21s. to 63s.	63s. to 105s.	
Administering Chlform.	10s. 6d.	21s.	42s.	
CONSULTANTS.				
Advice or Visit alone	21s.	21s.	21s.	
Advice or Visit with another Practitioner	21s.	21s. to 42s.	21s. to 42s.	
Mileage beyond two miles from Home	10s. 6d.	10s. 6d.	10s. 6d.	

Special visits—*i.e.*, of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 21s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year, and contain but one amount—

"Attendance and medicine," from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their ledgers when requested.

SOLICITORS' CHARGES.

THESE are now usually regulated in conveying and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveying liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

TRUST FUNDS AND INVESTMENTS.

BY RULE OF THE SUPREME COURT, DATED NOVEMBER, 1888, trustees may invest trust funds in the following securities:—

2½ per Cent. Consols; to be reduced, 5th April, 1903, to 2½ per Cent. Consols and Reduced 3 per Cent. Annuities, 2½ per Cent. and 2½ per Cent. Annuities, Exchequer Bills. Bank Stock. India 3½ per Cent. and 3 per Cent. Stocks. Indian Guaranteed Railway Securities. Colonial Government Stocks guaranteed by Imperial Government. Mortgage of freehold or copyhold estates in England or Wales. 3 and 3½ per Cent. Metropolitan Consolidated Stock.

Debenture, preference, guaranteed, or rent-charge stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on ordinary stock or shares.

Nominal stocks or nominal debenture stocks issued under the Local Loans Act, 1875, provided in each case that such stocks shall not be liable to be redeemed within a period of fifteen years from the date of investment.

Local Loans Stock under the National Debt and Local Loans Act, 1887.

THE RULE OF COURT OF NOVEMBER, 1888, will be little referred to now that all the foregoing items

in more extensive, and in some cases slightly different, language, are authorized by the Trustee Act, 1893, the more important clauses of which, especially where the Rule of Court is varied, may be summarized as follows:—This Act, which consolidates the enactments relating to trustees, authorizes mortgages on freeholds, or property equivalent to freehold, not only in England and Wales, but also (where not prohibited) in Ireland and Scotland. A very few leaseholds, viz., terms of 200 years, at a nominal rent, are also authorized by the Trustee Act, 1893.

THIS ACT ALSO AUTHORIZES investments by trustees upon any securities guaranteed by Parliament, and these include the following:—Certain Colonial Government stocks, the Turkish Loan of 1855, the Egyptian 3 per cent. Guaranteed Loan, and one or two others. In addition to Metropolitan Stock, any stocks of the London County Council are now authorized; also any Corporation or Municipal stocks of the cities or boroughs (about 60 in number) having at the last census a population exceeding 50,000. Also stocks, &c., under certain conditions, of waterworks companies and of water commissioners. Another very important addition to the list of trust securities is this: Preference, debenture, guaranteed, or rentcharge stocks of British railway companies which have paid 3 per cent. on their ordinary stocks for ten years. This includes all the great lines in England, Ireland, and Scotland, except a few, e.g., the North British, Great Eastern, and Chatham and Dover, which have not, for the whole period of ten years, paid regular dividends to their ordinary shareholders.

THE ACT FURTHER AUTHORIZES trust investments in certain Indian Railways guaranteed by the Indian Government, which can be found on reference to the Stock Exchange official lists. But with regard to the entire list, a trustee cannot invest in anything which is (directly or by implication) prohibited by the terms of his trust. It remains to add (1) that by this Act a

trustee may buy at a premium under fixed conditions, but not where the stock is redeemable within 15 years at par, "or some other fixed rate." (2) The last power, as well as every other, is to be used at the "discretion of the trustee"—a phrase which can only be taken in a technical sense, as the Court expects him to show a prudent and cautious discretion, and forbids him, for instance, to favour the tenant for life at the expense of those to follow after. (3) A trustee must consider what is directed, and what is forbidden, by the terms of his trust, before resorting to any of the securities authorized by the Rule of Court or by the new Act. (4) The Settled Land Act of 1882 also gives a list of securities on which "capital money" arising from sales of property under that Act may be invested—it does not materially differ from the above. The safest plan for a trustee to adopt is this: after looking to his trust, to see that nothing is prohibited, to turn his attention solely to the Act of 1893, sect. 1, and take his choice of the securities therein mentioned.

STREETS AND FOOTPATHS.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

The Harvests of 1906 and 1907 (Great Britain).

A TABLE showing the Estimated Total Produce and Yield per Acre of the Corn, Pulse, and Hay Crops in Great Britain in the year 1907, with comparisons for 1906, and the average yield per acre of the ten years, 1897–1906. The estimated produce of Hops for 1907 is 374,129 cwt., being an average yield of 8·33 cwt. per acre.

Crops.	Estimated Total Produce.		Acreage.		Average Estimated Yield per Acre.		Average of the Ten Years 1897–1906.

HORSE VEHICLES.

FARES BY DISTANCE (Hackney Carriages either with or without a Distance Recorder, but without a Taximeter): If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding *s. d.*

two miles..... *1 0*

The driver may notify, by means approved by the Commissioner of Police, that he is willing to accept a fare of *6d.* for any journey not exceeding a mile. *s. d.*

For every additional mile or part of a mile *0 6*

If hired *outside* the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile *1 0*

If hired *within*, but discharged *outside* the Four-Mile Circle, whole distance not exceeding one mile, *1s.*; exceeding one mile, then for each mile *ended* within the circle, *6d.*; and for each mile or part of a mile *ended* outside *1 0*

FARES BY TIME: *Inside* the Four-Mile Circle. Four-wheeled Cabs, for one hour or less, *2s.*; two-wheeled Cabs..... *2 6*

If above one hour, for every quarter hour or part of a quarter of the whole time, four-wheeled Cab, *6d.*; if a two-wheeled Cab... *0 8*

If hired *outside* the Circle, wherever discharged, for one hour or less..... *2 6*

If above one hour, then for every quarter hour or part of quarter of the whole time... *0 8*

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should particularly notice these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE OR BY TIME.

LUGGAGE.—For each package carried *s. d.*
outside the carriage..... *0 2*

EXTRA PERSONS: For each above two (two children under 10 years of age count as one person)..... *1 6*

WAITING:—By distance: for every 15 minutes completed—*if* hired within the Four-Mile Circle, 4 wheels, *6d.*; 2 wheels... *0 8*

if hired without Circle, 2 or 4 wheels... *0 8*

MOTOR CABS.

The fare payable for the hiring of a *Motor Hackney Carriage fitted with a Taximeter* shall be according to the following scale:—

(a) Not exceeding one mile, or for a period of time, or a journey not exceeding ten minutes..... *s. d.*
..... *0 8*

(b) Exceeding one mile or ten minutes:—

(1) For each quarter of a mile, or for a period of time, or a journey, not exceeding two and a half minutes... *0 2*

(2) For any less period or distance..... *0 2*

In addition to the above the driver may be entitled to charge the following extra payments:—

(1) Luggage:—Whether hired by distance or by time—for each package carried *s. d.*
outside..... *0 2*

NOTE.—Luggage carried on the footboard so that the doors do not close over it is deemed to be outside within the meaning of this clause.

(2) Extra persons:—When licensed to carry more than two persons—for each additional person beyond two, *s. d.*
the whole journey..... *0 6*

Provided that two children under the age of ten years shall count as one person.

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is *40s.*

The driver of every hackney carriage shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any hackney carriage shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty *40s.*, if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of *40s.*

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any hackney carriage shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of *£10.*

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a hackney or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

HACKNEY CARRIAGE STATISTICS.

During 1906 there were licensed public carriages:—Hansoms, 6,648; clarences—animal power 3,844, mechanical power 96; omnibuses—animal power 2,964, mechanical power 783; tramway cars—mechanical power 1,396, animal power 905; total, 16,636. Drivers and conductors:—Hackney drivers—animal power 12,343, mechanical power 124; stage drivers—animal power 5,316, mechanical power 4,148; conductors, 10,658; total, 32,589.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney

carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1906, of 578 men examined, 302 were successful. The annual average number of applicants who passed the examination during the past five years was 527. The proportion of drivers to hackney carriages is 11·77 drivers to 10 carriages; 223 of the drivers are over 70 years of age.

Of lost property, 56,754 articles were deposited, of which 25,882 were claimed by the owners, and £4,213 awarded to the drivers and conductors.

Tithe Commutation.

THE tithe of produce, the ancient provision for the maintenance of the clergy, was, after various attempts at modification and composition, commuted in 1836 by Act of Parliament to a payment in money. The land was valued, and a modus fixed, based upon the average value of corn for the preceding seven years, and payments, collected half-yearly by the clergy or lay-owners, have since been made on a septennial average. The value fixed amounted in some cases to as much as ten shillings per acre. The better the land for corn-growing, the larger was the sum to be paid, as it was a direct charge upon the corn grown, the prices upon which the Act was based being per quarter—wheat at 56s. 2d.; barley, 31s. 8d.; and oats, 22s. Consequently much land, not being worth the tithe, is now out of cultivation, or let at a price which just covers the charge. An Act passed in 1881 makes it compulsory for the owners of the land, instead of the occupiers, to pay the tithe, which amounts in the aggregate to about four millions annually, of which sum £766,334 is paid to 2,056 lay-owners or impropricators. Extraordinary tithes were an additional charge made, when the Commutation Act was passed, upon hop, fruit, and market-garden grounds. These special industries were so affected by the tax, which in some cases amounted to thirty shillings an acre, that serious resistance against the payment ensued, and an Act was passed in 1886 providing that it should not be levied on land brought under such cultivation after the passing of the Act, but land under these crops at the time was permanently burdened with the impost. The tithe map and apportionment for each parish is deposited with the incumbent and churchwarden. Any one interested therein may have access to the same and obtain extracts by paying 2s. 6d. for inspection, and 3d. for every 72 words contained in the extract. Tithe may, upon the joint application of the land-owner and tithe-owner to the Board of Agriculture, be redeemed for a sum not less than 25 times its amount. This is dependent upon the consent of the Board, and sometimes on that of the Bishop and patron. Town property and building land is often redeemed, agricultural land rarely, the cost being too great.

The average Tithe Rent Charge for the first fifty years from 1836 was £102 9s. 9½d., and for the past 71 years (1837–1907) £93 16s. 1½d.

DIVIDENDS are paid:—

On Sterling Stocks transferable in the Bank Books—(a) Warrants will be sent by Post—x. To Sole or First Stockholders *without application*, in the absence of any instructions to the contrary. (Sole Stockholder includes Sole Surviving Stockholder, Sole Executor or Administrator, and Sole Surviving Executor or Administrator. First Stockholder includes the First Executor.) z. To any Stockholder, Executor, or Administrator, other than the Sole, or First, Stockholder, Executor, or Administrator, or to any Person, Firm, or Company, upon the written Request, in the prescribed form, of all the Stockholders, Executors, or Administrators. (b) Dividends will be paid to any Stockholder, Executor, or Administrator, *personally attending at the Bank*, on his written Request, in the case of a Sole Account, or on the written Request of all the Stockholders, Executors, or Administrators, in the case of a Joint Account. The Request in either case must be in the prescribed form.

On Indian Railway and Thames Conservancy Debenture Stocks, Chinese 5% and 4½% Stocks, Greek 2½% Stock, Japanese 5% Stock, and Corporation of London 2½% Debenture Stock—by transmission of Warrants through the Post to the Stockholders or their Nominees.

On Indian Rupee Promissory Notes and Registered Stock—(a) On personal application at the India Office, Bank of England:—to the owner of the Notes or Stock; or, to his Attorney or Agent. (b) By Post:—to the owner of the Notes or Stock; or, to his Attorney or Agent.

Dividends on Promissory Notes and Registered Stock are paid by Bills of Exchange on India, commonly called Interest Bills. (As an Interest Bill is payable in India in Rupees, the Bill is usually sold in London, for Sterling, at the Exchange of the day, through a Banker or Agent.)

HOURS, &c.—The Dividend Office is open from 9 A.M. to 4 P.M. (x P.M. Saturdays).

The India Office (Bank of England) is open from 9.30 A.M. to 4 P.M. (x P.M. Saturdays).

INVESTMENT OF DIVIDENDS.—Holders of certain stocks in amounts of less than £1,000 may instruct the Bank to receive and invest their dividends by filling up forms, to be obtained at the Head Office, at any of the Branches, or at any Money Order Office. A commission is charged of *1d.* per £, or part of a £, with *3d.* additional for each advice of a purchase, should such advice be required.

TRANSFER DAYS, any day but Saturday; Instructions 9.30 to 1 (to 3, fee *2s. 6d.*); Executions 11 to 3; Acceptances 9.30 to 4 (Saturdays to 1). Transfers made on Saturdays (between 11 and 12.30) are charged a fee of *2s. 6d.*

* When the due date of the Dividends falls on a Sunday or Bank Holiday, the Dividends are payable on the business-day next ensuing.

Voters' Qualifications.

I. PARLIAMENTARY ELECTIONS.

1. PROPERTY.

A. England.

i. Freehold Estate of clear yearly value of forty shillings, if owned in fee simple or fee tail, or in occupation, or acquired by marriage, marriage settlement, devise or promotion to a benefice or office.

ii. Lands of any tenure, of £5 clear yearly value, held for life.

iii. Leasehold

a. of £5 clear yearly value, original term being not less than sixty years.

b. of £50 clear yearly value, original term being not less than twenty years.

B. Scotland.

i. Lands and heritages in proprietorship of £5 yearly value as appearing in the valuation roll.

ii. Leasehold.

a. of £10 clear yearly value, original term being not less than fifty-seven years or for life.

b. of £50 clear yearly value, original term being not less than nineteen years.

C. Ireland.

i. Freehold of £5 net annual value.

ii. Rent charges or leases for life or lives of £10 clear yearly value.

iii. Leasehold.

a. of £10 clear yearly value, original term being not less than sixty years.

b. of £20 clear yearly value, original term being not less than fourteen years.

N.B.—The Property Qualification is confined to Counties and to Boroughs which are Counties Corporate.

MISCELLANEOUS.

Mortgagee. A mortgagor in possession is entitled to vote, but the mortgagee becomes entitled on taking possession.

Trusts. The beneficiary, not the trustee, has the vote.

Joint Owners. Only one may now vote, unless they were all entitled to vote in 1884, or their interests were derived by succession, or they are partners in business on the land owned by them.

Freeholds. Two or more freeholds may be joined to make up the requisite value.

Property in Boroughs. Property situate in a borough, such as would give a vote for the borough, will not give one for the county unless the freeholder be disqualified for the borough vote by non-occupation.

Leaseholds. A lessee who has sublet does not lose his right to vote; but a lessee who has assigned loses the right. To be entitled to a vote, a sub-lessee or assignee of a sublease must be in actual occupation.

2. OCCUPATION

for twelve months, before registration of lands or tenements within a county or borough, entitled the occupier to a vote. This qualification is uniform throughout the United Kingdom.

"Occupier" means one who uses the premises either as a dwelling house or place of business. Continuous occupation is unnecessary, provided the occupier has the exclusive right to occupy. He or some other person must have been during twelve months rated to the poor in respect of the premises, and all poor rates made and allowed during the twelve months preceding January 5th paid on or before July 20th.

Residence required. In English and Scotch counties, and in Ireland, none, but in English boroughs there must be residence during six months of the qualifying year (four months being allowed for absence on duty or employment); in Scotch Boroughs during the whole year in or within seven miles of the borough.

£50 Rental Franchise. This qualification, resting on the occupation of land in counties at a yearly rent of not less than £50, is now virtually obsolete, but persons registered in 1884 with this qualification are entitled to be re-registered from time to time, so long as they retain it.

Service Franchise. Lodgers, licensees and servants do not enjoy the occupation Franchise, as they are neither owners nor tenants, but a servant if allowed to occupy land (only in counties) as a reward for service may be a tenant and therefore entitled.

N.B.—Occupation Qualification extends to any part of a house separately occupied.

3. RESIDENCE.

This Household Qualification is given to the "inhabitant occupier" throughout the United Kingdom (whether he occupies as owner, as tenant, or in virtue of any office, &c.) of a dwelling house (including flats and residential chambers), or any part of a house occupied as a separate dwelling, which has been rated, and for which rates have been paid by a certain date. There need not be actual inhabitation, but there must be an intention of returning after a temporary absence, and a power of doing so without a breach of a legal obligation. So an undergraduate occupying college rooms from which he is excluded during vacation is not entitled to vote, nor a soldier occupying rooms from which he is required to be absent from time to time on duty.

In calculating the twelve months, a period not exceeding four months may be counted during which the house has been occupied and furnished by some one else, or during which the inhabitant occupier has been absent on duty in connection with any office, employment, etc.

Occupation in immediate succession of different premises in the same parliamentary county or borough is equivalent to continued occupation of the same premises during the qualifying period.

N.B.—This rule applies both to occupation and Residence.

4. LODGERS.

This qualification belongs to anyone in the United Kingdom who has resided in the same lodgings for twelve months next preceding July 15th, such lodgings being of the clear yearly value, unfurnished, of £10. The Lodger is not disqualified because he has occupied different lodgings of the requisite value in the same house, nor because he occupies them jointly with another lodger, if the aggregate value is sufficient.

5. FREEMEN.

Reform Act, 1832, left the franchise to freemen of towns in which, prior to 1832, such qualification gave a right to vote, but only to those who have acquired freedom by birth or servitude, and who, during the year preceding claim, have resided in or within seven miles of the town.

In the City of London a freeman, to obtain a vote, must also be a Liveryman of one of the City Companies. He may also acquire freedom by purchase. He must reside within 25 miles of the place of poll.

6. THE UNIVERSITIES.

Graduates on electoral roll of Oxford, Cambridge, Dublin, and London, the Chancellor, the Professors, the members of the University Court and General Council of Edinburgh, Glasgow, St. Andrews and Aberdeen, are qualified to vote for their respective Universities.

Registration.

i. Property Voter must claim in order to get on to the Register, but once there he need not make a fresh claim. He must have been in possession, or receipt of rents, in case of freeholds for six, leaseholds for twelve calendar months prior to July 25th in the year in which they claim to be registered. This is not necessary where the qualifying property is freehold, and has been acquired by marriage, marriage settlement, etc.

ii. Occupiers need not claim at all, unless omitted by the Overseers, whose duty it is to register their names.

iii. The Lodger Voter has to claim afresh every year.

Claims for the Old Lodgers' List must be sent in by July 25th, all other new claims by August 20th. The Register, when made up, comes into force on the ensuing January 1st, unless accelerated by special legislation.

Disqualifications.

Aliens, idiots, lunatics (except during lucid interval), infants, peers (except Irish actually elected and serving in the House of Commons), convicted felons (until freed by pardon or otherwise), persons convicted of corrupt practices, either at Parliamentary or Municipal Elections (seven years from date of conviction), and School Board Elections (six years from date of election), persons convicted of illegal practices at Parliamentary and Municipal Elections (five years from date of conviction), persons employed at elections, or within six months before, for pay or reward, bankrupts, persons in receipt of parochial or other relief, persons with fictitious or collusive qualifications (e.g., fagot voters), corporations, returning officers (unless the votes are equal), corporations, and women.

II. MUNICIPAL AND COUNTY COUNCIL ELECTIONS (ENGLAND AND WALES).

A. CITY OF LONDON.

1. Election of Lord Mayor, Sheriffs, and Chamberlain.

The Electors are Liverymen.

2. Election of Aldermen, Common Councilmen, and Ward Officers.

The Electors are (a) Freemen occupying

premises in the city, and rated in that respect at not less than £10 per annum. (b) Male persons who have occupied for twelve months premises in the city, and are similarly rated. (c) Persons registered as Parliamentary Electors for the city by virtue of the borough occupation Franchise. (d) Persons otherwise entitled to be registered as Parliamentary Electors for the city, but disqualified by non-residence.

B. OTHER BOROUGHES AND COUNTIES.

1. Election of Mayor or Chairman.

The Electors are the Councillors or County Councillors.

2. Election of Aldermen or County Aldermen.

The Electors are the Councillors or County Councillors.

3. Election of Elective Auditors.

The Electors are the Burgesses. This, however, does not apply to County Councils, whose accounts are audited by district auditors appointed by the Local Government Board.

4. Election of Councillors or County Councillors.

The County Electors, together with the burgesses of every borough within the county, form the Electorate for the County Council. A qualification which in a Municipal Borough would entitle a person to be a Burgess will, if held in a county, entitle him to be a County Elector.

The Municipal Franchise differs from the Parliamentary Borough Franchise in two important particulars—

a. The Franchise is, except in case of land, irrespective of the value of premises occupied.

b. Women may vote.

The qualifications are—

i. Occupation in the borough of a building of any value, or of land of the clear yearly value of £10.

ii. Residence in or within seven miles of the borough.

iii. Being rated and paying rates.

There are two additional qualifications for the County Franchise—

i. Being a peer owning property in the county.

ii. Being registered as an ownership voter for Parliamentary in a county.

Disqualifications.—These are the same as in the case of Parliamentary Electors, except that peers, women, bankrupts, and persons with fictitious qualifications are not disqualified. Women may not vote in the City of London.

III. PARISH COUNCILS ELECTIONS (ENGLAND AND WALES).

The Electors are the "Parochial Electors," i.e., those persons registered in such portion, either of the Local Government Register (see II.), or the Parliamentary Register (see I.) of Electors, as relates to the parish.

N.B.—A woman is not disqualified by marriage from being on any Local Government Register of Electors, but husband and wife cannot both be qualified in respect of the same property.

IV. DISTRICT COUNTY ELECTIONS.

URBAN AND RURAL (ENGLAND AND WALES).

The Electors are the "Parochial Electors" of the parishes in the district.

V. LONDON BOROUGH COUNCILS.

The Mayor is elected by the Council, the Aldermen by the Councillors, and the Councillors by the "Parochial Electors."

CANDIDATES' QUALIFICATIONS.

I. PARLIAMENTARY ELECTIONS.

The following are not eligible: Aliens, women, minors, lunatics, English and Scotch peers, Irish representative peers, judges, the holders of various offices, clergy of the Established Church, and of the Roman Catholic Church, and ministers of the Church of Scotland, Government contractors, persons holding pensions of the Crown (other than diplomatic and civil service), convicted felons, and bankrupts.

II. MUNICIPAL AND COUNTY COUNCIL ELECTIONS.

1. Mayor or Chairman must be chosen from the Aldermen or Councillors, or persons qualified to be such.

2. Aldermen must be Councillors or persons qualified to be such.

3. Elective Auditors must be qualified to be Councillors, but not members of the Council, town clerk, or treasurer.

3. Councillors must be, and entitled to be, burgesses, resident within seven miles of the borough, or within fifteen miles, if they possess a property qualification of £1,000, or the persons qualified to elect to the office of Councillor.

Disqualifications.—Officers on the active list, bankrupts, persons convicted of crime or corrupt or illegal practices, and women are disqualified for all corporate office. A person is disqualified for election as Councillor if and while he is an elective auditor, or revising assessor, or holds any office of profit other than that of Mayor or Sheriff under the Council, or is directly or indirectly interested in any contract or employment with or on behalf of the Council.

N.B.—Clerks in holy orders, and other ministers of religion, are qualified for election as County but not Borough (except London Borough) Councillors or Aldermen.

III. PARISH COUNCIL ELECTIONS.

Persons eligible are: "Parochial electors," or persons who have resided during the whole

twelve months preceding the election in or within three miles of the parish. Persons may be disqualified by receipt of parochial relief, bankruptcy, crime, tenure of a paid office under the Council, or pecuniary interest. Women, married and unmarried, are eligible.

IV. DISTRICT COUNCIL ELECTIONS. (URBAN AND RURAL.)

1. *Urban.*—In urban districts, which are boroughs, the Municipal Council is the District Council. Elsewhere, the Urban District Councillors must be either "parochial electors" of some parish within the district, or persons who have, during the whole twelve months preceding the election, resided in the district.

2. *Rural.*—The District Councillors must be either "parochial electors" of some parish with a union, comprising the district, or persons who have, during the whole twelve months preceding the election, resided in the union, or, if the parish be wholly or partly situate within the area of a county borough or other borough, is qualified to be elected as a Councillor for that borough.

Disqualifications are the same as in III.

V. LONDON BOROUGH COUNCIL ELECTIONS.

A person is not qualified to be elected a Borough Councillor unless he—

1. is a Borough Elector of the borough;

2. has, during the whole twelve calendar months preceding the elections, resided in the borough.

The qualifications for Mayor and Borough Alderman are the same as those given in II., 1 and 2.

Women are ineligible for office. Otherwise the disqualifications are the same as in III.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

Totals ...	£353,398,000	£55,841,000	£285,441,000	£478,192,000	£638,839,000	£534,033,000

The figures given in the above table are based mainly on Returns prepared by the Director of the United States Mint and published in his annual Reports, and on those contained in "The Mineral Industry," published by the *Engineering and Mining Journal*.

Gold has been valued in the table at the legal rate of £3 17s. 10¹/₂d. per troy ounce standard, and silver at its *coining* value in this country, namely 6s. 6d. per troy ounce standard.

IMPERIAL COINAGE, 1897-1906.

Year.	GOLD.			Silver.	Bronze.	Total.
	London Mint.	Australian Mints.	Total.

1905	7,300,000	11,288,000	18,588,000	510,490	100,325	19,198,875
1906	12,565,000	11,475,000	24,040,000	1,705,070	184,520	25,929,590

Note.—Since 1871, inclusive, the designs adopted for gold coins have been identically the same in the four Mints of London, Sydney, Melbourne, and Perth. They are distinguishable, however, in that the Australian coins bear minute "Mint Marks" immediately above the date on the reverse side, the letter S being borne by Sydney coins, M by those issued from Melbourne, and P by those issued from Perth.

CONSUMPTION OF TEA, COFFEE, COCOA, &c., IN U.K.

† Manufactured and unmanufactured.

The Imperial Coinage.

THE authorized Coinage of the United Kingdom consists of the following pieces, some of which are issued only on special occasions:—

Denomination.	Standard Weight.	Least Current Weight.	Remedy of Weight.
GOLD:			
Grains.	Grains.	Grains.	Grains.
Five Pound	616'37239	612'500	1'00000
Two Pound	246'54895	245'000	0'40000
Sovereign	123'27447	122'500	0'20000
Half-Sovereign	61'63723	61'125	0'15000
SILVER:			
Crown	436'36363	—	2'000
Double Florin	349'09090	—	1'678
Half-Crown	218'18181	—	1'264
Florin	174'54545	—	0'997
Shilling	87'27272	—	0'578
Sixpence	43'63636	—	0'346
Groat or 4d.	29'09090	—	0'262
Threepence	21'81818	—	0'212
Twopence	14'54545	—	0'144
Penny	7'27272	—	0'087
BRONZE:			
Penny	145'83333	—	2'91666
Halfpenny	87'50000	—	1'75000
Farthing	43'75000	—	0'87500

STANDARD GOLD contains eleven-twelfths of fine metal and one-twelfth of alloy; fineness, 916'66, or 22 carats. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, intrinsically worth £3 17s. 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11½d.

STANDARD SILVER consists of thirty-seven-fortieths of fine metal and three-fortieths of alloy; fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958'33), is practically obsolete. It is occasionally used, however, for high-class plate.]

*BRONZE is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

THE "REMEDY" is the amount of variation permitted in fineness and in weight of coins when first issued from the Mint.

TOKENS.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight; but under the

* It is interesting to note that the legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois. Further, the halfpenny is one inch in diameter.

provisions of the Coinage Act, 1891, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

BANK POST BILLS are drawn for any sum from £10 to £1,000, and made payable to order at seven days' date, or at sixty days'. No charge is made for bills so drawn: they may be obtained at the Chief Office in London, or at any of the branches.

LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change, Gold, if above the least current weight, is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

OLD MONIES.—Guinea, 21s.; Carolus, 23s.; Moldore, 27s. 6d.; Angel, 10s.; Noble, 6s. 8d.; Tester, 6d.; Groat, 4d.

SCOTS MONEY.—Merk=1s. 1½d.; Pound=1s. 8d.; Shilling=1d.; Plack=2 Boddies=4d. Scots.

Foreign Monies.

TABLE FOR CALCULATING THE VALUE OF ANY GIVEN WEIGHT OF STANDARD SILVER IN TROY OUNCES.

Market Price of Standard Silver in Pence per Troy Ounce.

Oz.	26	26½	27½	28½	29½	30½	31½	32½	33	33½
1	26	26'5	27'5	28'5	29'5	30'5	31'5	32'5	33	33'5
2	52	53'0	55'0	57'0	59'0	61'0	63'0	65'0	66	67'0
3	78	79'5	82'5	85'5	88'5	91'5	94'5	97'5	99	100'5
4	104	106'0	110'0	114'0	118'0	122'0	126'0	130'0	132	134'0
5	130	133'5	137'5	142'5	147'5	152'5	157'5	162'5	165	167'5
6	156	159'0	165'0	171'0	177'0	183'0	189'0	195'0	199	201'0
7	182	185'5	192'5	199'5	206'5	213'5	220'5	227'5	232	234'5
8	208	212'0	220'0	228'0	236'0	244'0	252'0	260'0	264	268'0
9	234	238'5	247'5	256'5	265'5	274'5	283'5	292'5	297	301'5

By means of the above table, taken in conjunction with the column of the opposite page headed "Equivalent Weight of Standard Silver in Troy Ounces," the intrinsic value of any coin can be easily calculated with silver at several prices other than those given. It will only be necessary to take the numbers representing tenths, hundredths, and thousandths of ounces in that column, find the numbers opposite to them in the column of the above table giving the price of silver, and add these together, taking care to move the decimal point successively one, two, and three places to the left; the result will be the coin's intrinsic value in pence.

Price of Silver, 1897-1906.

The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—

1897.	1898.	1899.	1900.	1901.	1902.	1903.	1904.	1905.	1906.
d.	d.	d.	d.	d.	d.	d.	d.	d.	d.
27½	26½	27½	28¼	27½	24½	24¼	26½	27½	30½

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce *fine*, first express the pence as a whole number

and decimal fraction and then multiply by 2'125 to express a United States price on the English system multiply the cents by 0'4562.

Foreign Monies and their English Equivalents.

EXPLANATORY NOTES.—France, Belgium, Italy, Greece, and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and fineness, occasionally differing, however, in name. The same system has been in part adopted by Spain, Servia, Bulgaria, Russia, and Rumania, but they have not joined the Union. France and centimes of France, Belgium, and Switzerland are respectively designated lire and centesimal in Italy; drachmi and lepta in Greece; dinars and paras in Servia; francs and centimes in Spain; leys and bans in Alsace. Most of the South American States possess a standard coin, equal in weight and fineness to the silver 5fr. piece, generally termed a "peso." In Hayti the corresponding coin is a "gourde." In Ecuador and Paraguay the standard is silver, in all other South American States gold, but usually without a gold currency, paper taking its place.

The exchange value of the monies of those countries indicated by a * is determined by the rate of exchange for the day, and may be taken as approximately that given in the last column. The rate given in the daily papers generally represents the number of the standard coins that are equivalent to one sovereign. The Spanish rate is given in terms of pence per dollar (= 2 escudos), the Russian in pence per rouble, Portuguese in pence per milreis, and the United States rate in pence per dollar. The approximate value of other silver coins must be sought in one of the columns headed "Intrinsic Value with Silver at per Troy Oz." In "bimetallic" countries pure gold is generally taken as being worth 15½ times its weight of pure silver. This proportion corresponds to giving standard silver a constant value of 66½d., as in the last column of the table.

Colonial Moneys and their English Equivalents.

IMPERIAL sterling coins are the sole legal metallic currency in the following British Colonies:—

AUSTRALASIA.
CAPE OF GOOD HOPE AND SOUTH AFRICA
GENERALLY.
FALKLAND ISLANDS.
Fiji.
GIBRALTAR.
ST. HELENA.

In the following Colonies special coins are current in addition to the Imperial series:—

BRITISH GUIANA AND CERTAIN W. INDIAN ISLANDS.—A special groat or fourpence.
GUERNSEY.—Eight doubles (= 1 penny), 4, 2, and 1 double. (farthings.)
JERSEY.—Special pence, halfpence, and MALTA.—One-third of a farthing.
NIGERIA, NORTH AND SOUTH.—One penny (nickel-bronze) and one-tenth penny (aluminium), both perforated.

COLONIES POSSESSING SPECIAL METALLIC CURRENCIES.

COLONY.	STANDARD COIN.	SUBSIDIARY COINS.
BRITISH HONDURAS ...	U.S. Gold Dollar, and all U.S. gold coins. British Sovereign = \$4.867. " ½ = \$2.433. Mexican Dollar.	Silver—50, 25, 10, and 5 cents. Nickel-bronze—5 cents. Bronze—cents.
BRITISH NORTH BORNEO	Same as British Honduras, but dollar of U.S. is described as \$4.86½ = £1.	Nickel-Bronze—5, 2½ and 1 cents. Bronze—1 and ½ cent.
CANADA	Indian Rupee at fixed rating, 15 rupees = £1.	Silver—50, 25, 10, and 5 cents. Bronze—cents.
CEYLON	British Sovereign = 180 piastres.	Silver—50, 25, and 10 cents; ½ and ¼ Indian rupees. Copper—5, 1, ½, and ¼ cents.
CYPRUS	Indian Rupee at fixed rating, 15 rupees = £1.	Silver—18, 9, 4, and 3 piastres. Bronze—1, ½, and ¼ piastre.
EAST AFRICA AND UGANDA	Indian Rupee at fixed rating, 15 rupees = £1.	Silver—50 and 25 cents. Nickel-bronze (perforated)—10 and 5 cents. Aluminium (perforated)—1 and ½ cent.
HONG KONG AND LABUAN	Mexican Dollar, British Dollar, or Hong Kong Dollar.	Silver—50, 20, 10, and 5 cents. Bronze—1 and ½ cent.
INDIA	Indian Rupee at fixed rating, 15 rupees = £1. (1 rupee = 16 annas = 64 pice.)	Silver—½, ¼, and ⅛ rupee. Copper—2, 1, ½ pice, and ⅛ pice or pie. Nickel—1 anna (serrated).
LABUAN	(See Hong Kong).	Silver—20 and 10 cents.
MAURITIUS AND REYCHELLES	Indian Rupee at fixed rating, 15 rupees = £1.	Bronze—5, 2, and 1 cents.
NEWFOUNDLAND	Two-dollar Gold Piece = 100 pence.	Silver—50, 20, 10, and 5 cents. Bronze—cents.
STRAITS SETTLEMENTS	S.S. Dollar, or British Sovereign—7 sovs. = 60 S.S. dollars. Also S.S. ½ dollar.	Silver—50, 20, 10, and 5 cents. Bronze—1, ½, and ¼ cent.
UGANDA	(See East Africa).

Regulations respecting Passports.

1. APPLICATIONS for Foreign Office Passports must be made in the form printed on the back of the Regulations issued by the Foreign Office, and enclosed in a cover addressed to "The Passport Department, Foreign Office, London, S.W."

2. The charge for a Passport, whatever number of persons may be named in it, is 2s. Passports are issued at the Foreign Office between the hours of 11 and 4 on the day following that on which the application for the Passport has been received, except on Sundays and Public Holidays, when the Passport Office is closed. If the applicant does not reside in London, the Passport may be sent by post, and a Postal Order for 2s. should in that case accompany the application. *Postage stamps will not be received in payment.*

3. Foreign Office Passports are granted only (1) to natural-born British subjects, viz., persons born within His Majesty's dominions, and to persons born abroad who derive British nationality from a father or paternal grandfather born within His Majesty's dominions, and who, under the provisions of the Acts 4 George II., cap. 21, and 13 George III., cap. 21, are to be adjudged and taken to be natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

4. Passports are granted to such persons as are known to the Secretary of State, or recommended to him by some person who is known to him, or (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by any *Banking Firm* established in the United Kingdom, or by any Mayor, Magistrate, Barrister-at-law, Justice of the Peace, Minister of Religion, Physician, Surgeon, Solicitor or Notary, resident in the United Kingdom; the applicant's Certificate of Birth may also be required, especially when his name is of foreign origin; (2) in the case of children under the age of 14 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a form (B), to be obtained upon application to the Foreign Office; (3) in the case of persons naturalised in any of the British Colonies upon production of a letter of recommendation from the Colonial Office; and in the case of natives of British India, and persons naturalised therein, upon production of a letter of recommendation from the India Office.

5. If the applicant for a Passport be a NATURALISED BRITISH SUBJECT, his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects, if resident in London or in the suburbs, must apply personally for their Passports at the Foreign Office;

if resident in the country, the Passport will be sent, and the Certificate of Naturalisation returned, to the person who may have verified the declaration, in order that he may cause the applicant to sign the Passport in his presence. Naturalised British subjects will be described as such in their Passports, which will be issued subject to the necessary qualifications.

6. Foreign Office Passports may be renewed at the Foreign Office on personal application, or, if the applicant does not reside in London, on the receipt of a letter signed by him, returning the Passport previously issued to him, and enclosing a Postal Order for 2s.

7. A Passport cannot be issued by the Foreign Office, or by an Agent at an outpost, on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate.

8. The bearer of every Passport granted by the Foreign Office must sign his Passport as soon as he receives it; without such signature either the *visa* may be refused or the validity of the Passport questioned abroad.

9. Travellers who intend to visit the Russian Empire, the Turkish Dominions, the Kingdom of Roumania, Persia, Venezuela, Hayti, or Eritrea in the course of their travels, must not leave the United Kingdom without having had their Passports *visés* either at the Russian Consulate-General, 17 Great Winchester Street, E.C.; the Consulate-General of the Sublime Porte, 4 Broad Street Place, E.C.; the Roumanian Consulate-General, 65 London Wall, E.C.; the Persian Consulate-General, 122 Victoria Street, S.W.; the Venezuelan Consulate, Finsbury Pavement House, E.C.; the Haytian Consulate, 32 Fenchurch Street, E.C.; or the Italian Consulate-General (for Eritrea), 44 Finsbury Square, E.C., respectively, or at one of the other Consulates of Russia, Turkey, Rumania, Persia, Venezuela, Hayti, or Italy in the United Kingdom. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country, except as an additional precaution, which is recommended in the case of Passports of old date.

10. Although travellers are now permitted to enter most Foreign Countries without Passports, and the rules respecting Passports have been generally relaxed, nevertheless British subjects travelling abroad are recommended to furnish themselves with Passports, for even in those countries where they are no longer obligatory, they are found to be useful as affording a ready means of identification in case of need. British subjects intending to reside in Germany or in Switzerland should provide themselves with Passports.

N.B.—A statement of the requirements of Foreign Countries with regard to Passports may be obtained upon application to "The Passport Department, Foreign Office, London, S.W."

Patents for Inventions.

PATENTS AND DESIGNS ACT, 1907.

THIS new Act contains the entire future law on the subject, and repeals all the Patent Acts which were in existence up to the end of 1907. Much of the old law, however, is re-enacted, whilst there is much new matter based upon a Bill which was introduced into the Commons early in 1907 by Mr. Lloyd-George. The substance of the information given on pages 668-671 of WHITAKER'S ALMANACK for 1905 remains almost unaltered, the principal changes providing for the Comptroller to decide cases which were previously dealt with by the High Court, and the High Court dealing with cases which the Privy Council had previously decided. But there are some additions of importance which are mentioned below.

The new Act comes into force on the 1st January, 1908, with the exception of a few points of procedure which are postponed until the issue of rules to be made by the Board of Trade. The principal novel features of the new Act are as follows:—

Applications.—The new Act makes no alteration either in the procedure or in the fees for procuring patents. The old rule as to the deposit of models at the Patent Museum has not been enforced by the Science and Art Department (which may not have thought any models worth paying for), and has long been a dead letter. The Comptroller of Patents may, however, now ask for actual samples or specimens to be furnished in the case of chemical inventions (Sec. 2).

Investigation into Novelty.—The Comptroller has had heretofore no statutory authority to refuse to grant a patent on the mere ground that the invention is old (save in opposition cases), though from 1st January, 1905, when official searching was first instituted, he has had power to insist upon the applicant's specification containing a reference to any similar prior patent brought to his notice by the search. He is now empowered to refuse to grant a patent altogether, if the invention is found to have been wholly and specifically claimed in a prior specification of the past fifty years (Sec. 7 [4]).

Extension of time for Sealing Patent.—Extension of the time for sealing a patent may be provided for by rules to be made by the Board of Trade. Previously an inventor could be denied his patent by omitting to pay the sealing or other fees within sufficient time to ensure the grant within the statutory fifteen months of the day of application. It was then futile to apply for a patent *de novo*, because the specification being already in print would be a barrier to the grant of a valid patent, and hence the rights in the invention were formerly absolutely lost (Sec. 12 [2d]).

Fraudulent Applications for Patents.—A patent may, as previously, be revoked on the petition of any person proving that the patent was obtained in fraud of his rights, and the true inventor may have a substituted patent granted to him. Under the new Act such patent will bear the same date as the fraudulent patent, but it will not be effective for stopping infringements committed before the date of its actual grant (Sec. 15 [1]).

Single Patent for Cognate Inventions.—A single patent can now be granted for two or more cognate inventions or modifications, though each of them is the subject of separate

provisional protection, provided they be such as to constitute a single invention. Inventors will thus be saved the necessity of obtaining separate patents, which often pressed hardly upon a most meritorious class of inventors, the expense of a number of separate patents being unduly heavy when the ultimate invention consisted of only one result which was gradually evolved. It is enacted, however, that the respective dates of the several provisional specifications shall be recognised when considering the validity of the patent or grounds of opposition, but the nominal date assigned to the patent will be the date of the earliest of such provisional specifications (Sec. 16).

Reasons for Extensions of Time abolished.—The Comptroller is bound, upon payment of the prescribed fees, to grant the usual extensions of time for deposit of a complete specification, acceptance of same, and for payment of renewal fees respectively. Previously, reasons had to be assigned (Secs. 5, 6 [5], and 17 [2]).

Extension of Term.—Petitions for prolongation of the term of the patent beyond fourteen years may be presented to and decided by the Supreme Court instead of by the Judicial Committee of the Privy Council as under the old Act, and the expense, which was generally prohibitive, will thus be kept within more reasonable bounds. It will still be necessary to show conclusively that the patentee has been inadequately remunerated, and to apply at least six months before expiry of the patent, the patentee previously announcing his intention by advertisement (Sec. 18).

Patents of Addition.—This provision, so long enjoyed on the Continent, has at last been enacted in our own patent law. It provides that a patentee who wishes to make an addition to his patent, may request that a further patent be granted to him to run concurrently with the original patent, and to expire with it. No renewal fees will be payable for maintaining such "patent of addition," but it will remain in force no longer than the original patent. Its validity will not be impeachable on the ground that the invention ought to have been the subject of an independent patent (Sec. 19).

Revival of Lapsed Patents.—The only remedy when a patent had lapsed through the patentee not paying the renewal fee used to be to obtain a special Act of Parliament, the cost of which was seldom less than £500. The Comptroller of patents is now empowered (subject to appeal to the Court) to issue an order restoring a lapsed Patent, upon being satisfied that the omission was unintended, and that no undue delay has occurred in the making of the application, which furthermore must have been previously advertised in prescribed manner. Provision will be made in the order for the protection of persons who may have availed themselves meanwhile of the lapsed patent (Sec. 20).

Compulsory Licences and Revocation.—A petition to the Board of Trade for the grant of a compulsory licence or, in the alternative, for the revocation of the patent, will be referred by the Board to the Court instead of, as previously, to the Privy Council, the grounds of 1902 being retained, namely, that "the reasonable requirements of the public with respect to the patented invention have not been satisfied." The latter is defined as being the case when any existing trade or new industry is being unfairly pre-

judged by the default of the patentee, or the demand for the patented article is not being reasonably met (*Sec. 24*).

Revocation of a Patent by Comptroller.—Though revocation may be obtained on petition to the Court as before, the Comptroller of Patents is given power to revoke a patent on the application of anyone who would have been entitled to oppose the grant, or of his successor in interest, on the same grounds as those on which the grant might have been opposed. The Comptroller is invested here for the first time with judicial power. Heretofore a patent once granted was unassailable, excepting by proceedings before a judge of the High Court. Appeal from the Comptroller may, however, be made to the Court. Provision is now also made for a patentee to surrender his patent by giving notice to the Comptroller (*Sec. 26*). Another instance of judicial functions being given to the Comptroller occurs in connection with opposition proceedings, in which he will in future be able to award costs, and will even require security for costs from persons who neither reside nor carry on business in the United Kingdom, not in opposition cases merely, but in appeals from any decision of his (*Sec. 39*). Any person may apply to the Comptroller for revocation of a patent which is not under four years old, on the ground that the patented article or process is manufactured or carried on exclusively or mainly outside the United Kingdom (*Sec. 27*).

Secret Inventions of Warfare.—Patents for improvements in instruments or munitions of war may be taken over by the Admiralty, and not, as before, merely by the Secretary for War, and such patents and improvements may be kept secret (*Sec. 30*).

Infringement Proceedings and Marking Articles.—A defendant in an infringement suit may counterclaim for revocation (*Sec. 3a*). An innocent infringer is not liable to pay any damages, who proves that at the date of the infringement he was not aware, nor had reasonable means of making himself aware, of the existence of the patent. Marking with the word "patent" will not be deemed sufficient notice of the existence of the patent unless the year and number of the patent is also specified (*Sec. 33*).

Position of Co-Patentees.—Where a patent was granted to two persons jointly, the interest did not, under the old law, pass on the death of either of them to his successor, but the whole patent became the property of the survivor, in the absence of any agreement to the contrary. Under the new law, co-grantees will usually be treated for the purpose of devolution of the legal interest as joint tenants; but, in the absence of any contrary contract, each of such persons will be entitled to use the invention for his own profit without accounting to the other, and if one of them dies, his beneficial interest will devolve on his personal representatives as part of his estate. But a co-grantee may not grant a licence without the other's consent (*Sec. 37*).

Illegal Conditions imposed by Patentees.—Certain conditions attached to the sale, licence,

&c., of patented articles (*e.g.*, prohibiting the purchaser from using any article which is not supplied by the seller or licensor, or requiring the purchaser to acquire from the seller or licensor any article not protected by the patent) will, in all future contracts, be null and void, as being in restraint of trade and contrary to public policy. But this avoidance will not apply if (i.) the purchaser had at the time of the contract an option of purchasing the article or obtaining a licence on reasonable terms unencumbered by any such condition as above, and (ii.) the contract contains a provision for relieving the purchaser or licensee of his liability to observe any such condition on giving the other party three months' written notice, and on paying for such relief a sum or royalty to be fixed by an arbitrator appointed by the Board of Trade. Contracts, whether new or old, will be liable to three months' notice of termination, if the patent in question has ceased to be in force, suitable compensation being payable. Contracts made before the passing of the Act which may contain any of the avoidable conditions above named will be *ipso facto* liable to three months' notice of termination, notwithstanding any provision to the contrary (*Sec. 38*).

Prior Publication not always Fatal.—Prior publication will not, as hitherto, invalidate a patent, if it was made without the patentee's knowledge and consent, and if the matter published was derived from him, and if he protected his invention with all reasonable diligence after learning of the publication (*Sec. 41 [2]*).

Registration of Designs.—Under this head come designs of shape, configuration or ornamentation, but not mechanical inventions. The term of protection, which was formerly limited to five years, may be extended for second and third periods of five years each (*Sec. 53*).

The Comptroller may, on application, cancel the registration of a design used wholly or mainly abroad (*Sec. 58*).

Status of Patent Agents.—The penalty of twenty pounds against any person describing himself as a patent agent unless he is registered (*Sec. 1* of the 1888 Act) is repeated. The Comptroller may not recognise any agent whose name has been erased from the official register of patent agents, nor may he recognise as agent any person abroad. Consequently all foreign patent agents will be compelled to transact their business through representatives in this country. Similar provisions have long been in force in Germany and elsewhere (*Sec. 84*).

PENALTIES.

Twenty pounds is the penalty against a person using the words "Patent Office," or any other words suggesting that his place of business is officially connected with, or is, the Patent Office, which is a Government office responsible to the Board of Trade (*Sec. 89*).

The same penalty attaches to the unauthorised assumption of the Royal Arms or any close imitation of them, and no authority to use the Royal Arms is conferred by the grant of a patent under the Act (*Sec. 90*).

ARTHUR HUGH STANLEY.

Metric Weights and Measures.

THE Metric System is based upon the (assumed) length of the direct distance from the Equator to the North Pole. The ten-millionth part of this distance, as calculated in 1795, was adopted by the French Government as the unit of length, and called a *metre*. All other measurements are derived from this unit; the cube of the tenth part of the *metre* is the unit of capacity, called a *litre*, and the weight of a litre of water, at a certain temperature, is the unit of weight, called a *kilogramme*. The unit of land measurement is 10,000 sq. *metres*, called a *hectare*. The above terms are now used in this country under the English names of meter, liter, kilogram, and hectare. In the designs at the left of the page, the figures refer to inches and centimeters, the former being divided into 16ths, 8ths, 4ths, and the latter into millimeters.

Rough Comparisons.

10 centimeters = 4 inches	8 kilometers = 5 miles.
1 liter = $1\frac{3}{4}$ pints	1 cubic meter = 220 gallons.
1 kilogram = $2\frac{1}{4}$ lbs.	1,000 kilograms = 1 ton.
1 sq. meter = 10 sq. feet.	1 hectare = $2\frac{1}{2}$ acres.

Accurate Comparisons.

Time and Watch on Board Ship.

WATCH.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided:—

Afternoon Watch	 noon to 4 p.m.
First Dog	 4 p.m. to 6 p.m.
Second Dog	 6 p.m. to 8 p.m.
First	 8 p.m. to midnight.
Middle	 12 a.m. to 4 a.m.
Morning	 4 a.m. to 8 a.m.
Forenoon	 8 a.m. to noon.

This makes seven WATCHES, which enables the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two *Watches*.

TIME.—Time is kept by means of "Bells," although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds; then two more strokes with a second's interval apart, then a rest of two seconds, thus:—

BELL, ONE SECOND; B., TWO SECS.; B. S.; B. SS. B. S.; B. SS.; B.

1 Bell is struck at 12.30, and again at 4.30, 6.30, 8.30 p.m.; 12.30, 4.30, and 8.30 a.m.

2 Bells at 1 (struck with an interval of a second between each—B. s. B.), the same again at 5, 7, and 9 p.m.; 1, 5, and 9 a.m.

3 Bells at 1.30 (B. s. B. ss. B.), 5.30, 7.30, and 9.30 p.m.; 1.30, 5.30, and 9.30 a.m.

4 Bells at 2 (B. s. B. ss. B. s. B.), 6 and 10 p.m.; 2, 6, and 10 a.m.

5 Bells at 2.30 (B. s. B. ss. B. s. B. ss. B.) and 10.30 p.m.; 2.30, 6.30, and 10.30 a.m.

6 Bells at 3 (B. s. B. ss. B. s. B. ss. B. s. B.) and 11 p.m.; 3, 7, and 11 a.m.

7 Bells at 3.30 (B. s. B. ss. B. s. B. ss. B. s. B. ss. B.) and 11.30 p.m.; 3.30, 7.30, and 11.30 a.m.

8 Bells (B. s. B. ss. B. s. B. ss. B. s. B. ss. B. s. B.) every 4 hours, at noon, at 4 p.m., 8 p.m., midnight, 4 a.m., and 8 a.m.

METRIC CONVERSION—continued.

AVOIRDUPOIS WEIGHT.

1 grain	 =	0.0648 gramme.
1 dram	 =	1.772 grammes.
1 ounce (16 drams)	 =	28.350 "
1 POUND (16 ozs. or 7,000 grains)	 =	0.45359243 KILOGRAM.
1 stone (14 lb.)	 =	6.350 kilograms.
1 quarter (28 lb.)	 =	12.70 "
1 hundred weight (cwt.) (112 lb.)	 =	50.80 "
	 =	0.5080 quintal.
1 ton (20 cwt.)	 =	10.160 tonnes or 10.16 kilograms.

TROY WEIGHT.

1 grain	 =	0.0648 gramme.
1 pennyweight (24 grains)	 =	1.5552 grammes.
1 troy ounce (10 pennyweights)	 =	31.1035 "

APOTHECARIES WEIGHT.

1 grain	 =	0.0648 gramme.
1 scruple (20 grains)	 =	1.296 grammes.
1 dram (3 scruples)	 =	3.893 "
1 oz. (8 drachms)	 =	31.1035 "

NOTE.—Approximately one liter equals 1.000 cubic centimeters, and one milliliter equals 1.000016 cubic centimeters.

THERMOMETER. 419

Comparison between Scales of Fahrenheit, Réaumur, and the Centigrade.

Fahrenheit.			Réaumur.		
CENT.	FAH'T.	RMR.	CENT.	FAH'T.	RMR.

Freezing point = 32° F = 0° C; Boiling point = 212° F = 100° C = 80° R. To convert degrees CENTIGRADE or REAUMUR into degrees FAHRENHEIT, or vice versa, use one of the following formulae:

Let F = Number of degrees Fahrenheit, C = Number of degrees Centigrade, and R = Number of Degrees Réaumur, then—

$$F = C \times \frac{9}{5} + 32$$

$$C = \frac{5}{9} (F - 32)$$

$$R = \frac{4}{9} (F - 32)$$

UNIFORMITY.—In 1824 an Act was passed rendering uniformity compulsory from the 1st of January, 1826, since which time the Imperial Statute System of Weights and Measures has been in general use, although some remains of the older forms still linger.

Avoirdupois Weight.

Drachm *dr.* = 27/34375 grains.
Ounce *oz.* = 16 drachms, 437/5 grains.
Pound *lb.* = 16 *oz.*, 256 *dr.*, 7,000 grains.
Customary Stone.....*st.*, Butcher's Meat = 8 *lb.*
Legal Stone.....*st.* = Horseman's weight = 14 *lb.*
Quarter*qr.* = 28 *lb.*
Cental or Quintal, *cent.* = 100 *lb.*
Hundredweight, *cwt.* = 4 *qr.*, 112 *lb.*
Ton *T.* = 20 *cwt.*, 2,240 *lb.*

Avoirdupois weight is used in almost all commercial transactions and common dealings, but in addition to the above there are special weights for various articles, the chief of which are:—

A Quartern Loaf = 4 *lb.*
A Peck of Flour, 2 Gallons = 14 „
A Firkin of Butter..... = 50 „
A Firkin of Soft Soap = 64 „
A Box of Fish, about = 90 „
A Barrel of Gunpowder = 100 „
A Barrel of Raisins = 112 „
A Seam of Glass, 24 stones of 5 *lb.* = 120 „
A Barrel of Butter—4 firkins = 224 „
A Barrel (or pack) of Soft Soap..... = 256 „
A Faggot of Sticks = 120 „
A Pig of Ballast = 56 „
A Fodder of Lead, London and Hull = 19½ *cwt.*
A do. Derby = 22½ *cwt.*; Newcastle = 21½ „
A Cask of Blacklead = 11½ „
A Sack—Flour, 280 *lb.*; Coals, 224 *lb.*; a ton of Coals, 10 sacks.

The Metrical System of Weights is used in Belgium, France, Germany, Italy, Portugal, Spain, Sweden and Norway, and some other countries, the unit of which is the *Gramme*=15/432 grains; the chief multiple of the Gramme is the *Kilogramme*=2,2046 *lb.*: in practical use this is found inconvenient for small purchases, and nearly all commodities are sold by the demi or half kilo. The *Centner* of 50 kilos=110¼ *lb.*; very nearly represents the English *cwt.*; but heavy goods are sold by the *Tonneau* of 2204.621 *lb.*, about 19 *cwt.* 77 *lb.*, the *Myriagramme* being ignored.

In the United States and in Canada the *cwt.* is generally reckoned as 100 *lb.*, and the ton of 20 *cwt.*=2,000 *lbs.*

In Russia the *Pood* of 36 *lb.* is the commercial weight: 62½ *Poods*=1 English ton.

Indian Weights (Bengal).

Tola, unit of postage=180 grains.
Chittak=5 Tolas; Seer (16 Chittaks)=2¾ *lb.*
Imperial or Indian Maund=82¾ *lb.*

Madras.

Viss=3'09 *lbs.*, Maund=25 *lb.*, Candy=500 *lb.*

Troy Weight.

Carat = 3'17 grains.
Pennyweight*dwt.* = 24 grains.
Ounce*oz.* = 20 *dwt.*, 480 *gr.*
Pound*lb.* = 12 *oz.*, 240 *dwt.*, 5,760 *gr.*
Hundredweight.....*cwt.* = 100 *lb.*

TROY is the weight used by goldsmiths and jewellers. The grains Troy, Apothecaries', and Avoirdupois are equal, and the same in England, France, the United States, Holland, and in most other countries; but the carat varies: in France

it is 3'18 grains, in Holland 3'0 *gr.*, and in the U.S. 3'2 *gr.* In the U.K. the jewellery ounce is divided into 151½ carats or 600 pearl grains.

The *oz.* Troy and Apothecaries' = 1'09714 *oz.* avoirdupois; but the *lb.* Troy and *lb.* Apothecaries' = only 0'82286 *lb.* avoirdupois; while 175 *lb.* Troy and Apothecaries' = 144 *lb.* avoirdupois.

Apothecaries' Weight.

Scruple ʒ = 20 Grains..... = 20 *gr.*
Drachm ʒ = 3 Scruples..... = 60 „
Ounce ʒ = 8 Drachms = 480 „
Pound ʒ = 12 Ounces = 5760 „

The avoirdupois *oz.* of 437½ grains, and the *lb.* of 7,000 grains, are the weights named in the British Pharmacopœia; drugs are purchased by avoirdupois, but compounded by Apothecaries' weight. The Apothecaries' *oz.* and *lb.* may now be considered obsolete.

Hay and Straw.

Truss of Straw, 36 *lb.* Truss of Old Hay, 56 *lb.*
Truss of New Hay (to September 1st), 60 *lb.*
Load, 36 Trusses—Straw, 11 *cwt.* 2 *qr.* 8 *lb.*;
Old Hay, 18 *cwt.*; New Hay, 19 *cwt.* 1 *qr.* 4 *lb.*

Wool.

Clove, *cl.* = 7 *lb.*
Stone, *st.* = 2 Cloves 14 *lb.*
Tod, *td.* = 2 Stones 1 *qr.*
Wey, *wy.* = 6½ Tod 1 *cwt.* 2 *qr.* 14 *lb.*
Pack, *pk.* = 240 *lb.*
Sack, *sk.* = 2 Weys 13 *qr.*
Last, *la.* = 12 Sacks 39 *cwt.*

Since the advent of SHODDY, some of the above weights have become nearly obsolete, although the terms are still in use with different values: thus 16 *lb.* = 1 *st.*; 28 *lb.* = 1 Tod; 20 *lb.* = 1 Score; 12 Score or 240 *lb.* = 1 Pack.

Worsted Yarn.

Wrap, 80 yards; Hank=560 yards=7 Wraps;
Counts or Numbers are the number of hanks in a *lb.*

Cotton Wool.

Cotton Wool, Bale variable; U.S.A. average 477 *lb.*; Egyptian, 719 *lb.*; East Indian, 396 *lb.*; Brazilian, 220 *lb.*

Cotton Yarn.

Thread = 1½ yards.
Lea, or Skein, *skn.* = 120 Yards. } Also same
Hank, *hk.* = 7 Skeins, or Leas. } for Silk.
Spindle, *spdl.* = 18 Hanks.
Counts=the number of Hanks in 1 *lb.*
Bundle Hanks, either of 5 *lb.* or 10 *lb.*
Reels of Cotton vary from 30 to 1,760 yards, but by the new Act must be marked correctly.
Bundles of Cotton are chiefly made up for export.

An Inch of Rain.

An "inch of rain" on the surface of an imperial acre = 43,560 sq. feet.
3,630 cubic feet = 100'993 tons upon an acre.

Liquid Measure.

The Gill contains 8'665 cubic inches.
The Pint contains 4 gills or 34'660 inches.
Quart = 2 pints = 8 gills.
Gallon = 4 quarts = 32 gills.
Pin = 4½ Gallons or ½ Barrel. Gals. Qts. Pts.
Firkin or Quarter Barrel 9 36 72
Anker (10 gallons) 10 40 80
Kilderkin, Rundlet, or ½ Barrel 18 72 144
Barrel 36 144 288
Tierce (42 gallons) 42 168 336
Hogshead of Ale (1½ barrels)..... 54 216 432
Punchon 72 288 576
Butt of Ale 108 432 864

Practically, the only measures in use are gallons, quarts, pints, and gills, the others are merely nominal; e.g., the hoghead of 54 gallons, *old measure*, contains but 52 gallons, 1 quart, 1 pint, and 3⁵⁵ gills imperial measure; and of wine six nominal quart bottles go to the gallon. Of wines imported in casks the following are the usual measurements:—

Pipe of Port or Masden	= 115 gallons.
„ Teneriffe	= 100 „
„ Marsala	= 93 „
„ Madeira and Cape	= 92 „
„ Sherry and Tent	= 108 „
Butt of Lisbon and Bucellas	= 117 „
Aum of Hock and Rhenish	= 30 „
Hoghead of Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons.	

In the United States the old British or “Winchester” wine gallon of 231 cubic inches is in use; the names of measures are the same, but the capacity of the gill is only 7²¹875 cubic inches.

Apothecaries' Fluid Measure. Marked

60 Minims (drops) = 1 Fluid Drachm.....	f 5
8 Drachms	= 1 Ounce..... f 3
20 Ounces	= 1 Pint..... 0
8 Pints	= 1 Gallon..... C., or Cong.
1 Drachm = 1 Tea-spoonful.	Prescribing medicine by the spoon, glass or cupful is unsafe, as all those vessels vary in size. Graduated glass measures may be purchased for a few pence.
2 Drachms = 1 Dessert-spoonful.	
4 Drachms = 1 Table-spoonful.	
2 Ounces = 1 Wineglassful.	
3 Ounces = 1 Teacupful.	

Dry or Corn Measure.

Quart.....	= 2 Pints.	Strike ...	= 2 Bushels.
Pottle ...	= 2 Quarts.	Coomb ...	= 4 Bushels.
Gallon ...	= 4 Quarts.	Quarter...	= 8 Bushels.
Peck	= 2 Gallons.	Load	= 5 Quarters.
Bushel ...	= 4 Pecks.	Last	= 10 Quarters.

Boll of Meal = 140 lb.; 2 Bolls = 1 Sack.

Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned:—

Wheat, English, 63 lb.	Foreign, 62 lb.
Barley, English, 52 and 56 lb.	French, 52½ lb.
Mediterranean, 50 lb.	
Oats, English, 40 & 42 lb.	Foreign, 38 & 40 lb.
Rye and Maize, 60 lb.	
Buckwheat, 52 lb. to the bushel.	
Grain of all kinds is frequently sold by the stone of 14 lb.	

Coals were formerly sold by measure: 3 heaped bushels = 1 sack, 12 sacks = 1 chaldron. Coke, apples, potatoes, and some other goods are still sold by heaped measures and the sack of three bushels; of coke, four bushels are usual.

Fruit.—The Covent Garden bushel basket is 17½ inches in diameter at top, 10 inches at the bottom, and is 10 inches deep. The smaller market baskets are said to vary in size according to the season and the supply.

Cubic or Solid Measure.

Cubic Foot	= 1,728 Cubic Inches.
Cubic Yard	= 27 Cubic Feet, 21 ⁰³³ bushels.
Stack of Wood....	= 108 Cubic Feet.
Shipping Ton ...	= 40 Cubic Feet merchandise.
Shipping Ton ...	= 42 Cubic Feet of Timber.
Ton of displacement of a Ship = 35 Cubic Feet.	

Measures of Length.

Male Geographical, Admiralty Knot, or Nautical Mile, 6,080 Feet = 1013½ fathoms = 1 ¹⁵ Mile Statute.	
League = 3 Miles.	
Degree = 60 Geographical, or 69 ¹²¹ Statute Miles.	

Incch, in.	= 72 Points, or 12 Lines.
Nail, 16.....	= 2½ Inches.
Palm.....	= 3 Inches.
Hand.....	= 4 Inches.
Link.....	= 7 ⁹² Inches.
Quarter (or a Span) = 9 Inches.	
Foot	= 12 Inches.
Cubit	= 18 Inches.
Yard	= 36 Inches.
Pace, Military	= 2 Feet 6 Inches.
Pace, Geometrical..	= 5 Feet.
Fathom	= 6 Feet.
Rod, Pole, or Perch = 5½ yards.	
Chain (100 Links) ...	= 22 Yards (4 Poles).
Cable's Length	= 120 Fathoms, 600 Feet.
Furlong	= 40 Rods, 220 Yards.
Mile	= 8 Furlongs, 80 Chains, 320 Rods, 880 Fathoms, 1,760 Yards, 5,280 Feet, 63,360 Inches.

Although no longer sold by that measure, Calicos, &c., are sometimes said to be “Ell wide” — the English Ell being 1½ yard, the Flemish Ell ¾ yard, and the French Ell 1½ yard.

The old *Scottish Mile* was 5,920 feet; ten Scots Miles being about equal to 11¼ Statute Miles. *Irish Mile* is 6,720 feet; eleven Irish Miles being equal to 14 Statute Miles.

Square, Surface, or Land Measure.

The Square Foot contains 144 Square Inches.	
Yard = 9 feet = 1,296 inches.	
Rod, Pole, or Perch = 30¼ yards = 272¼ feet.	
Chain = 16 rods = 484 yards = 4,356 feet.	
Rood = 40 rods = 1,210 yards = 10,890 feet.	
Acre = 4 roods = 160 rods = 4,840 yards.	
Yard of Land = 30 acres = 120 roods.	
Hide = 100 acres = 400 roods.	
Mile = 640 acres = 2,560 roods = 6,400 chains = 102,400 rods, poles, or perches, or 3,097,600 square yards.	

An Acre *roughly* stated has four equal sides of 69½ yards; *accurate* measurement gives each side 208⁷¹ feet.

The sides of a square half-acre would be 147⁵⁸¹ feet, and of a square quarter-acre, 104³⁵⁵ feet.

The above Imperial Measure is now employed in the United Kingdom, in Canada, Australia, and the Colonies generally, also in the United States; but occasionally some older measurements are referred to. Of these—

The Lancashire and Irish Acre, each of 160 perches, contain 7,840 sq. yards, equal to 1⁶⁹835 Statute. 1 Statute = 0⁶¹7347 Lancashire or Irish. The Cheshire Acre of 160 perches, each containing 64 square yards = 10,240 square yards. The Cunningham Acre, equal to 1²⁹322 Statute; or 1 Statute Acre is equal to 0⁷⁷44 Cunningham. The Scottish Acre = 1²⁶183 Statute (nearly 6,104 square yards).

Measures of Time.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Hour.
24 Hours	= 1 Day.
(23h. 56m. 4s. = 1 Sidereal Day.)	
7 Days	= 1 Week.
28 Days	= 1 Lunar Month.
28, 29, 30, or 31 Days	= 1 Calendar Month.
12 Calendar Months.....	= 1 Year.
365½ Days	= 1 Common Year.
366 Days	= 1 Leap Year.
365d. 5h. 48m. 46s.	= 1 Tropical Year.

The Astronomical Day commences at noon, and is computed from 1 to 24 hours.

In 400 years 97 are Leap-years and 303 common, Leap-year being omitted every 100th year, but not omitted every 400th. (1500 was not a Leap year.)

Angular Measure.

60 Seconds	"	= 1 Minute.
60 Minutes	"	= 1 Degree.
30 Degrees	"	= 1 Sign.
90 Degrees	"	= 1 Quadrant.
4 Quadrants, or 360°	"	= 1 Circumference, or Circle.

The Earth rotates at a velocity of 15 degrees an hour (about 17°36 miles a minute at the Equator); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of a Circle $\times 3 \cdot 1416$ gives Circumference.
 Diameter Squared $\times 7854$ gives Area of Circle.
 Diameter Squared $\times 3 \cdot 1416$ gives Surface of Sphere.
 Diameter Cubed $\times \cdot 5236$ gives Solidity of Sphere.
 One Degree of Circumference $\times 57 \cdot 3$ gives Radius.
 Diameter of Cylinder $\times 3 \cdot 1416$, and product by its length, gives the Surface.
 Diameter Squared $\times 7854$, and product by the length, gives Solid Contents.

A Circular Acre is 235'504 feet, a Circular Road 117'752 feet in diameter. The Circumference of the Globe is about 24,855 miles, and the Diameter about 7,900 miles.

Electrical Measures.

It is customary among electricians to express all measurements in terms of the centimeter, gramme, second (C.G.S.) system, either as force or work according to their nature, and, due allowance being made for the effect of gravitation, these units are called "absolute"; but it is fair to mention that the accuracy aimed at has not, and probably never will be, attained.

For practical and commercial purposes the chief units are the—

VOLT..... For the measure of Electromotive force = about 92'56% of that given by one Daniell's battery cell.

OHM..... Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.

AMPÈRE..... Current = the current 1 volt will drive through 1 ohm.

COULOMB..... Quantity = 1 ampère flowing for 1 second of time.

MICROFARAD Capacity = '000,001 coulomb at 1 volt pressure.

WATT..... Power = 44 ft. lb. per minute.

Board of Trade Unit = 1,000 watts 1 hour.

746 watts = 1 horse-power.

In incandescent lamps of 16-candle power (nominal) about four watts are required per candle power to give good economical results for domestic purposes.

One Board of Trade unit will keep a 16-candle incandescent lamp alight for about 16 hours.

Fish Measure.

Herrings are sold by the *Cran*, containing 37½ imperial gallons or *Half Cran* of 18¾ imperial gallons (or *Barrel*, for white herrings, of 26¾ imperial gallons) on the East Coast of Scotland from Shetland to Berwick, also at Castle Bay and Stormoray; but on the West Coast, Isle of Man, and in Ireland, by the *Maze*, which contains 5 long hundreds of 123 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200.

Timber and Wood.

40 cubic feet rough, 50 cubic feet squared = 1 load.
 50 cubic feet of planks = 1 load.
 100 superficial feet = 1 square of flooring
 120 Deals = 100.

Width of Battens, 7 inches; Deals, 9 inches; Planks are 2 to 4 inches thick, and 10 or 11 inches wide. A Cord of Wood is 2½ tons, or 125 cubic feet.

Carpenters', Bricklayers', and Builders' Measurements.

Stock or kiln bricks 8¾ inches $\times 4\frac{1}{2} \times 2\frac{3}{4}$
 Welsh fire-bricks..... 9 " $\times 4\frac{1}{2} \times 2\frac{3}{4}$
 Paving bricks..... 9 " $\times 4\frac{1}{2} \times 2\frac{3}{4}$
 Square tiles 9¾ " $\times 9\frac{1}{4} \times 1$
 " 6 " $\times 6 \times 1$
 Dutch clinker bricks 9¾ " $\times 3 \times 1\frac{1}{2}$
 A Rod of Brickwork 16½ feet $\times 16\frac{1}{2}$ feet $\times 1\frac{1}{2}$ brick thick = 306 cubic feet, or 11¼ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.

A Square of Flooring is 100 square feet.

A Piece of Wall Paper is 12 yd. long $\times 21$ in. wide (English), and 9 yd. $\times 18$ in. (French).

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs over 1½ ton.

Sizes of Slates.

	in. in.		in. in.

Water.

Cubic inch..... = 252'458 grains.
 Gallon (277'274 cub. in.) = 10 lb. (distilled)
 Cubic foot = 62'321 lb.
 35'943 cubic ft. (224 gals.) = 1 ton.

Water for Ships: Ton, 220 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Cisterns: 1 cubic foot is equal to about 6¼ gallons, or 62'321 lb. A cistern 4 feet by 2½ and 3 deep will hold brimful 186'963 gallons, weighing 16 cwt. 2 qrs. 21'6 lb. in addition to its own weight.

A TON WEIGHT OF THE FOLLOWING WILL

AVERAGE IN CUBIC FEET	
Earth.....	21
Clay	18
Chalk	14
Thames Ballast	20
Coarse gravel	19
Coal, Welsh.....	40
A cubic foot of pure gold weighs 1,200 lb., pure silver 655 lb., cast iron 450 lb., copper 550 lb., lead 710 lb., pure platinum 1,220 lb., tin 456 lb., aluminium 163 lb.	

Old Scottish Measures.

LIQUIDS.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER: £19 14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER:—Looking at the Table of Expectation of Life (p. 376), it will be seen that the expectation for age 54 is about 17 years; and

from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 17 27 years' purchase. The present payment required would therefore be £1,727 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

A quire of paper contains 24 perfect sheets; an outside quire 20, some of which may be torn.

ALL Founders cast their type neatly to one uniform height, though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems; he then, doubling that number, charges as so many (3,600) ems.

A very minute type, used only occasionally, is:—*Brilliant*. A column the size of this in the Almanack if set in *Brilliant* would contain 124 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures.

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

750,000 ..	9 0
1,000,000 ..	10 0
* 1,000,000 ..	10 0

In calculating duty the net value of an estate where the death occurred between 2nd August, 1894, and 30th June, 1896, is raised to the next complete £10; on deaths after that date until the 8th April, 1900, any fraction of £100 is ignored, such adjusted value determining both the rate and amount of duty. On deaths on and after 9th of April, 1900, the rate and amount of duty is calculated on the exact net value.

Gifts made by the deceased within a twelvemonth of death are subject to aggregation with the rest of the estate.

In addition to the above, where property liable to Estate Duty is settled by the will of the deceased, or having been settled by some other disposition which took effect since 1 Aug., 1894, passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty (*Settlement Estate Duty*) is payable at the rate of £1 per cent. on the Settled property, but from that payment the *ad valorem* stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.

* Estates exceeding £1,000,000 pay 10 per cent. on first million, with 12 per cent. for next half million, 12 per cent. for a further half million, and so on to a maximum of 15 per cent.

Small estates up to £300 and £500 gross are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 30s. and 50s., and are exempt from all other death duties. Where the net value exceeds £100, but does not exceed £200, the *ad valorem* duty amounts to £1 only, provided that the death occurred on or after 1st July, 1896, and before 9th April, 1900.

Interest at 3 per cent. per annum is also payable on the Estate Duty on personality from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and that on certain annuities may at option be paid in four yearly instalments, and 3 per cent. interest is charged on all unpaid portions of duty in these cases from twelve months after death.

FACULTY OR DISPENSATION.

In England, in all cases

In Scotland or Ireland, in some cases

£20, in others

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

GAME LICENCES, U.K., if taken out after

31st July and before 1st Nov., to expire on 31st July following

After 31st July, to expire following 31st October

After 31st Oct., to expire 31st July

Licence for a continuous period of fourteen days

Gamekeeper's (Great Britain), to expire 31st July

Ditto, Deputation of, Stamp Duty

Gamekeeper's (Ireland), same as Game Licences

Game-Dealer's Licence, U.K., to expire 1st July, annually

GLUCOSE, *Solid*, the cwt.

Do., *Liquid*, "

When the total joint income of a husband and wife does not exceed £500, a wife can separate her claim for exemption or abatement from that of her husband on account of profits derived from any business carried on by means of her own personal labour (60 & 61 Vict. c. 24, s. 5), provided the husband is assessable under Sch. D, and that his income is unconnected with the business of the wife. Under 16 & 17 Vict. c. 34, premiums paid for insurance of self or wife in British, and approved Colonial Companies (4 Edw. VII. c. 7) may be deducted from net personal income, if not exceeding one-sixth of it.

* Of the amount col- lected under the Beer and Spirit Duties so much as would arise from duties of 3d. per barrel and 6d. per gallon respectively, is paid over to Local Taxa- tion Accounts.	

Production and Consumption of Beer and Spirits (U.K.).

THE following table shows the amount of Beer and Spirits produced and consumed in the United Kingdom for the decennial period 1897-1906. The production of beer is given in standard barrels of 36 gallons, calculated at a standard gravity of 1055°. The figures concerning spirits refer to British and Irish spirits distilled in the United Kingdom, in proof gallons.

Year.	BEER.		SPIRITS.

INLAND POSTAL RATES.

To any part of the United Kingdom, including the Orkney and Shetland Islands, the Channel Islands, Isle of Man, and the Scilly Islands.

Letters.

Not exceeding 4 oz. 1d.
For every additional 2 oz. ½d.

Halfpenny Post.

Not exceeding 2 oz. ½d.

Parcels.

Not exceeding.	s.	d.	Not exceeding.	s.	d.
1 lb.	0	8	8 lb.	0	8
2 "	0	4	9 "	0	9
3 "	0	5	10 "	0	10
5 "	0	6	11 "	0	11
7 "	0	7			

Newspapers.

The charge is ½d. for the inland transmission of any daily or weekly registered newspaper, the weight being disregarded. If more than one paper be included in a packet, the charge is as by an insufficiently paid letter, or transferred to the Parcel Post whichever charge is the lower, with a fine of 1d. in addition to any deficient postage.

GENERAL REGULATIONS.

Letters.

NATURE AND WEIGHT.—There is no limit except as to size, and anything may be sent by letter post (except explosive, offensive or obscene matter). The weight is unlimited. Maximum length 2 ft.; width 1 ft.; depth 1 ft. (These limits do not apply to official letters.)

BLIND, LITERATURE FOR THE.—Papers, periodicals, and books impressed in special type for the use of the blind may be sent by post at a specially low rate. 2 oz., ½d.; 2 lb., 1d.; 5 lb., 1½d.; 6 lb., 2½d.

CONVEYANCE OF SINGLE LETTERS BY RAIL.—On payment of 2d. to a servant of the railway, in addition to postage at the ordinary rate, *Inland* letters not exceeding 4 oz. may be forwarded by the next available train or steamship by those companies in agreement with the Post Office, to be called for at the station to which the letter is addressed, or to be transferred thence to the nearest letter-box for postal delivery. The letter must be taken to a passenger station of the railway company. Railway letters may be handed in at any express delivery post office for immediate conveyance to the railway station by special messenger on payment of the express fee of 3d. per mile.

EXPRESS DELIVERY SERVICE.—There are three systems by which any article (except those of a dangerous or offensive nature) may be specially delivered:—(1) By special messenger all the way, on week-days only (charge, which must be prepaid, 3d. per mile, or part of a mile, inclusive of all charges, but with a special weight charge of 3d. on each packet over 1 lb. in weight). (2) By special messenger after transmission by post (charge 3d. as before, exclusive of postage, with special charges as before). (3) In advance of the ordinary deliveries at the request of addressee (3d. per mile for one packet, and 1d. for every ten or less additional packets). For

(1), packets must be handed over the counter with "Express Delivery" clearly marked in left-hand top corner. For (2), may be handed in or, if not to be registered, may be posted, and must be clearly marked as before. No Express Delivery on Sundays (except certain letters specially marked and paid for), Good Friday (except in Scotland), and Christmas Day.

NOTICE OF REMOVAL and for the re-direction of letters must be given on printed forms, to be obtained from the local postmaster or from postmen. Separate forms must be filled in for parcels and telegrams. The notice holds good for twelve months, and may be extended by payment of 1s. for second and third and 5s. for subsequent years.

RE-DIRECTION.—Letters may be re-posted not later than the day after delivery (Sundays and public holidays not being counted), and must not previous to re-direction and posting be opened or tampered with. If re-posted later a charge will be made at the prepaid rate; if opened or tampered with, at the unpaid rate.

REGISTRATION.—Registered letters and parcels must be handed to an agent of the Post Office, and a receipt taken. By prepayment of a fee of 2d. in addition to the postage and registration fee, the sender of a registered letter may obtain an acknowledgment of its due delivery. The latest time for registering for the night mails is usually half an hour before the box closes for letters; in the case of parcels, half an hour before the latest time for posting ordinary parcels. If an inland packet marked "Registered" be put in a letter-box it will be liable on delivery to a charge of 4d., less any amount prepaid for registration. The fees for registration and the limits of compensation are as follows:—Fee 2d., compensation £5; 3d., £20; 4d., £40; 5d., £60; 6d., £80; 7d., £100; 8d., £120; 9d., £140; 10d., £160; 11d., £180; 1s., £200; 1s. 1d., £220; 1s. 2d., £240, and so on, to 1s. 10d. £400. These fees include the ordinary registration fee of 2d. The highest amount of compensation obtainable for any one packet is £400. Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, &c.) will only be given in those cases in which the money is enclosed in one of the Registered Letter envelopes sold by the Post Office and the packet is tendered for transmission by Registered Letter Post. The compensation given in respect of coin will in no case exceed £5. Compensation for damage to a packet sent by Registered Letter Post will only be given in those cases in which the packet is conspicuously marked with the words "Fragile, with Care."

DISPOSAL OF UNDELIVERED letters, packets, post cards, and parcels.—Inland letters undelivered, bearing full name and address of sender, are returned unopened; others are opened and returned if possible to senders, a registration fee of 2d. being charged should anything of value be inside. If without an address, and containing nothing of value, they are at once destroyed. Undelivered foreign letters are returned, unopened, after a short detention, to the countries whence received. If senders of ½d. packets place a request for their return, in the upper left-hand corner of the outside cover, in case of non-delivery, a second postage is charged the sender on their return, otherwise they are disposed of at the Head Office. If an undelivered parcel bears on the cover the name and address of the sender, it is returned to him at once. If the name and

address of the sender are not shown, on the cover, the parcel is sent to the Returned Letter Office of the District, where it is opened and examined. If it is found to contain the name and address of the sender, it is returned to him. No charge is made for the return of an undelivered parcel to the sender. If the name and address of the sender cannot be ascertained from the examination of the parcel, the name of the addressee of the parcel and the Post Office at which it was posted are entered on a list, which is exhibited at the Returned Letter Office, where personal application can be made. In default of proper application and payment of charges, undelivered parcels are liable to be disposed of three months after the date of arrival at the Returned Letter Office. Perishable parcels will be dealt with as may be requisite.

Inquiries for missing letters, &c., should be made at the Secretary's office, G.P.O. (North), St. Martin's-le-Grand, between 10 a.m. and 5 p.m.; Saturdays between 10 a.m. and 1.30 p.m. The Returned Letter Office is at Mount Pleasant, E.C.

POSTE RESTANTE (solely for the accommodation of strangers and travellers).—Letters and parcels may be addressed to the Poste Restante at every Head Post Office in the United Kingdom and to all Branch Post Offices in London. Letters or parcels to be called for should have the words "Poste Restante" included in the address. No initials, or fictitious names, or Christian name only, will be taken in, but are at once sent to the Returned Letter Office for disposal; and all persons applying for "Poste Restante" letters must be able to say from what place or district such letters are expected, and must prove their identity. Foreigners must produce their passports. Poste Restante letters from abroad are not kept more than two months; at Provincial Post Offices only one month; letters posted in London, for one fortnight. After these intervals they are sent up to the Returned Letter Office. When, however, letters addressed "To be called for" bear a request for their return within a specified time, if not delivered, they are dealt with in accordance with such request.

SEAMEN'S AND SOLDIERS' LETTERS.—Letters to or from H.M. ships abroad are 1d. per oz.; to or from non-commissioned officers, private soldiers and seamen serving abroad, the Cape Mounted Rifles, and enrolled pensioners in Canada, not exceeding $\frac{1}{2}$ oz., are forwarded for 1d. If posted for a place abroad unpaid, or insufficiently paid, or the description of the soldier, &c., be not given, it will be detained and returned to sender for payment of the postage.

UNPAID AND UNDERPAID LETTERS.—If the postage of letters, books, or newspapers be not paid in advance, double postage will be demanded on delivery; and if the postage be insufficient, double the deficiency will be charged.

Halfpenny Packets.

Packets not exceeding 2 oz. in weight may be sent for $\frac{1}{2}$ d.; if exceeding 2 oz. they pass unconditionally at the letter rate. The limits of length, width, and depth are the same as those of letters.

Any matter wholly printed on paper (paper sent as stationery not admissible), books and periodicals, manuscript, invoices, deeds and agreements, circulars produced in identical terms by any mechanical process (if type-written they must

be handed in *as such* over the counter, and at least 20 copies must be sent at the same time), prints or photographs (when not on glass, or in cases containing glass, or any like substance), together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, or in an unfastened envelope, or cover easily removed, and must contain no communication in the nature of a letter.

RE-DIRECTION AND UNDER-PAYMENT.—See "Letters."

Newspapers.

WEIGHT.—Newspapers registered at the G.P.O., not over 5 lb. in weight, 2 ft. in length, or 1 ft. in width or depth. No writing in the nature of a letter is permitted, but the wrapper may bear the name and address of the sender, and a reference to any page of its contents to which it is desired to draw attention. Newspapers not registered as such at G.P.O. are treated as printed matter. Duly registered newspapers, magazines, and trade journals may be sent to the *Dominion of Canada* at the rate of 1d. per lb.

RE-DIRECTION AND UNDER-PAYMENT.—See "Letters."

Parcels.

REGULATIONS.—The limit of weight is 11 lb. The parcel must not be more than 3 ft. 6 in. in length, or greatest length and girth combined, 6 ft.; marked in the left-hand top corner "Parcel Post" and handed across the counter of the receiving houses or given to a rural postman. It must not be posted in a letter-box, and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. The name and address of sender should be on the outside of every parcel. A greater weight than 11 lb. must not be accepted from one person by a rural postman on foot, or 21 lb. by a mounted postman, unless he shall have received notice on the day previous that a greater weight would be sent; and either of them may refuse parcels if already loaded.

Particulars as to collection of parcels from sender and for prepayment of postage in money will be furnished on application to post office.

Parcels left "to be called for" are charged 1d. a day after they have lain in the office one clear day, the maximum charge being 1s. 5d.

Parcels addressed to, or sent from, the Channel Islands are liable to customs duty, and the sender must make a declaration of contents at the office of posting. Parcels for the Isle of Man are treated as those for the British Isles generally.

No parcels are received on Sundays, Christmas Day, or (except in Scotland) Good Friday. For Bank Holidays, see page 387.

COMPENSATION.—Compensation to the amount of £2 can be claimed on unregistered parcels for loss or damage. To secure compensation where no insurance fee is paid, a certificate of posting should be filled up and handed in for the signature of the post-office official. The insurance fee in stamps can be paid only at a post office.

No compensation will be granted for loss or damage of parcels containing money, watches, or jewellery, unless registered, or for damage done to a fragile or perishable article.

REGISTRATION.—See "Letters."

RE-DIRECTION.—Parcels may be re-directed free of charge if the original address and the corrected address are both in a delivery from the same office, otherwise they are charged again at the ordinary prepaid rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to 2s. 6d.—for list of latter see p. 456) are sold of the respective values of $\frac{1}{2}$ d., 1d., $1\frac{1}{2}$ d., 2d., $2\frac{1}{2}$ d., 3d., 4d., 5d., 6d., 9d., 10d., 1s., 2s. 6d., 5s., 10s. and 20s. Books of 18 1d. stamps and 11 $\frac{1}{2}$ d. are issued, price 2s. These may be purchased at most offices between 8 a.m. and 8 p.m., and at any office during the hours that attendance is given for telegraph business. Rural postmen are authorised to sell $\frac{1}{2}$ d. and 1d. stamps and registered letter envelopes.

Embossed or impressed postage stamps cut out of envelopes, postcards, letter-cards, newspaper wrappers, or telegram forms may be used as adhesive stamps in payment of postage provided they are not imperfect, mutilated, or defaced in any way. Embossed or impressed Inland Revenue stamps cannot be used in payment of postage, and stamps indicating the payment of a registration fee may only be used for registered correspondence.

Spoiled Stamps.

Payment of postage cannot be made by means of imperfect or defaced postage stamps. Stamps are considered defaced when marked on the face with any written, printed, or stamped characters. Stamps may, however, be perforated with initials or other identifying mark.

Applications for the recovery of the value of spoiled or unused stamps, whether postage or revenue, can be made to the Postmaster at most large Post-Offices in the provinces.

Envelopes.

EMBOSSSED ENVELOPES.—Embossed Halfpenny Envelopes are in two sizes—Commercial, in packets of 16 for 9d., and Foolscap, 10 for 6d.; they are also sold singly. Penny Envelopes of the following sizes are kept in stock:—A, $4\frac{3}{4} \times 3\frac{11}{16}$, in packets of 20 for 1s. 10d.; C, $5\frac{1}{4} \times 3\frac{3}{8}$, 16 for 1s. 6d., and 240 for 21s. 3d.; and Foolscap, 9×4 , 16 for 1s. 6d. and 20 for 1s. 10 $\frac{1}{2}$ d.

REGISTERED LETTER ENVELOPES, for foreign and inland letters, bearing a threepenny stamp embossed on the flap for the payment of the registration 2d. and postage 1d., are of five sizes, and are sold: F, $5\frac{1}{2}$ in. $\times$ $3\frac{3}{4}$ in., $3\frac{1}{2}$ d. each, or 12 for 3s. 3d.; G, 6 in. $\times$ $3\frac{3}{4}$ in., $3\frac{1}{2}$ d. each, or 12 for 3s. 4d.; H, 8 in. $\times$ 5 in., H², 9 in. $\times$ 4 in., $3\frac{3}{4}$ d. each; K, $11\frac{1}{2}$ in. $\times$ 6 in., 4d. each.

Letter Cards.

LETTER CARDS are sold thus:—1 for $1\frac{1}{2}$ d., and 8 for 9d., also in packets of 96 for 9s.

Post Cards.

POST CARDS impressed with a halfpenny stamp are sold at the rate of 10 for $5\frac{1}{2}$ d., or 10s. per parcel of 220; a thicker quality being 11 for 6d., or 5s. per parcel of 110. Impressed with 1d. stamp, 1d. each. Reply Post Cards are about double the rates for single cards.

PRIVATE CARDS bearing an adhesive $\frac{1}{2}$ d. stamp, and corresponding as nearly as possible to the size and weight of official cards, may be used. They are also admissible for foreign and colonial post provided they have "Post Card" printed on them and are in conformity with the official cards in size and weight.

Wrappers.

WRAPPERS bearing a halfpenny stamp may be had at $\frac{3}{4}$ d. each or 7 for 4d.; 5s. $8\frac{1}{2}$ d. per packet of 120. With a penny stamp the price is, singly $1\frac{1}{4}$ d., or 4 for $4\frac{1}{4}$ d.; 3s. $6\frac{1}{2}$ d. per parcel of 40.

LONDON POSTAL ARRANGEMENTS.

FOR the purpose of facilitating the collection and delivery of letters, the Metropolis is divided into eight districts, marked:—

East Central (E.C.)	South Eastern (S.E.)
Eastern (E.)	South Western (S.W.)
Northern (N.)	Western (W.)
North Western (N.W.)	West Central (W.C.)

FOR THE COUNTRY AND ABROAD.—Letters and cards to go the same evening should be posted at chief district offices, branch offices, receiving houses, and pillar boxes before 6; in suburban places, half an hour to an hour and a half earlier.

LATE FEE LETTERS.—Inland letters and post cards bearing an extra $\frac{1}{2}$ d. stamp are forwarded by the night mails if posted at the town branch offices and receiving houses before 7 p.m., and at Mount Pleasant before 7.45, or at St. Martin's-le-Grand before 7.30. At certain district offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters having an extra $\frac{1}{2}$ d. stamp may also be posted at the sorting carriage or platform barrier at the various railway termini up to the time of the departure of the train bearing the mails, varying from 5.15 a.m. to 10 p.m.

Foreign letters with an extra 1d. stamp may be posted in the E.C. District and at Metropolitan District Offices at times varying with the despatch of the mails; with an extra 2d. prepaid the time is extended.

IMPERIAL AND FOREIGN POST.

Letters.

The charge for letters throughout the British Empire and to Egypt is 1d. the ounce, except to a few small islands, to which the charge is $2\frac{1}{2}$ d. for the first ounce and $1\frac{1}{2}$ d. per ounce afterwards.

The charge to all foreign countries is $2\frac{1}{2}$ d. for the first ounce and $1\frac{1}{2}$ d. per ounce afterwards.

Post Cards.

The rate to all places to which Post Cards are available is 1d. single, 2d. return. (See col. 1.)

Reply Coupons.

Coupons exchangeable for stamps of the value of 25 centimes ($2\frac{1}{2}$ d.) each in any country participating in the arrangement can be purchased at any Money Order Office in this country at the price of 3d. each for the purpose of prepaying replies to letters. The coupons can be exchanged by the addressees of such letters at the Post Office of the place of destination for local postage stamps.

Books, Newspapers, Samples, &c.

NEWSPAPERS, BOOKS, PRINTED PAPERS, &c.,
½d. per 2 oz.

PATTERNS AND SAMPLES, ½d. per 2 oz.; but
with a minimum charge of 1d.

COMMERCIAL PAPERS, MSS., &c., ½d. per 2 oz.;
but with a minimum charge of 2½d.

The limits of size to the British Empire or non-
Union countries* are—length 2 ft., width or depth
1 ft., and must not exceed 5 lb. in weight. To
countries in the Postal Union the length is
limited to 18 in.; weight not to exceed 4 lb. If
in the form of a roll, the limits of size in either
case are 30 in. in length and 4 in. in diameter.

The above-named rates should in all cases be
prepaid; no packet can be sent forward wholly
unpaid, but, if by inadvertence the postage is
insufficiently prepaid, double the deficit will be
chargeable on delivery.

Imperial and Foreign Parcels.

The rules and regulations to be observed are
similar to those relating to inland parcels, with
the addition that every parcel must have a
Customs declaration respecting the contents.
This must be on a form obtainable at any Post
Office. The sender may arrange to prepay all
charges to certain parts of the Empire and foreign
countries by paying a fee of 6d., making a deposit
of 1s. for each 10s. value of the parcel, and signing
an undertaking to pay all Customs and other
charges on demand; otherwise they are collected
on delivery. Certain articles are prohibited;
among them letters nearly everywhere; gold,
silver, jewellery, and firearms to many places;
opium to Hong Kong, Siam, and India; and pork
and bacon to some places.

Imperial British Rates.

The "triple system" of 3 lb. 1s., 7 lb. 2s., and
11 lb. 3s., is charged to India and Aden (or *via*
Italy, 3 lb. 2s., 7 lb. 3s., 11 lb. 4s.), Ascension,
Bahamas, Barbados, Bermuda, Brit. East Africa,
Brit. Guiana, Brit. Honduras, Brit. North Borneo
and Sarawak, British Somaliland, Ceylon, Cyprus,
Dominica, Egyptian Sudan, Falkland Islands,
Gambia, Gibraltar, Gold Coast, Grenada, Hong
Kong (or *via* Italy, 2s., 3s., and 4s.), Jamaica,
Labuan, Lagos, Leeward Islands, Malay States,
Malta (or *via* France, 2s., 3s., 4s.), Mauritius (or
via France, 2s., 3s., 4s.), Montserrat, Newfound-
land, New Zealand, Nigeria, St. Helena, St.
Lucia, St. Vincent, Sarawak, Sierra Leone, Straits
Settlements (or *via* France, 2s., 3s. and 4s.),
Tobago, Trinidad, Uganda, Zanzibar. The charges
for other parts of the Empire and for Foreign
Countries are as follow:—

To India and the British Empire generally and to Constantinople, Beyrout, Smyrna, and Egypt the maximum length is 3 feet 6 inches, or length and girth combined 6 feet; Canada, length, breadth or depth, 2 feet 6 inches, length and girth combined, 6 feet; to Italy, Spain, Greece, and parts of Turkey, length 2 feet, length and girth combined 4 feet; other places in Europe, 2 feet in any direction.

INSURANCE.—Insurance may be effected for parcels to almost all countries up to £400, according to destination, at the following rates:—4d. for £12; 6d. for £24; 8d. for £36; 10d. for £48; 1s. for £60; 1s. 2d. for £72; 1s. 4d. for £84; 1s. 6d. for £96; 1s. 8d. for £108; 1s. 10d. for £120; 2s. for £132; and so on to 5s. 10d. for £400. Parcels sent to the U.S. by the semi-official service are insurable up to £120 at about double the above rates.

MONEY AND POSTAL ORDERS.

The sender of a money order (Inland or Abroad) may apply for an advice of payment to consignee at the office of issue at the time of issue or subsequently—fee, 2d.

Inland Ordinary Money Orders.

The highest amount granted in one order is limited to £40. The commission charged is for sums not exceeding £1, 2d.; £3, 3d.; £10, 4d.; £20, 6d.; £30, 8d.; £40, 10d. No order may contain a fractional part of 1d.

Money orders will under no circumstances be paid on the day of issue. The rules and regulations are on the forms issued.

The Chief Money Order Office is at 144A Queen Victoria Street, E.C.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office in

* The parcel post with the United States is carried on by means of two distinct services, namely, an official service with the United States Post Office and a semi-official service maintained through the Agency of the American Express Company. The sender of a parcel forwarded by the semi-official service may, without extra charge, direct that a parcel be sent through the New York Custom House in Bond for Customs examination at any one of the "United States Ports of Entry," or Inland Custom Houses. The addressees of such parcels must, however, make arrangements for the delivery of parcels so treated after they have been cleared at the Custom House of the Inland Port of Entry.

Parcels intended to be forwarded in bond must be plainly marked by the sender, "In bond to naming the Inland Port of Entry chosen; and the same words must also be written by the sender in the same handwriting on the Customs declaration.

the United Kingdom which is also a despatching office for telegrams, and may be made payable at any Money Order office which is also an office for the delivery of telegrams.

Commission at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 2d., and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for portage must be prepaid.

Postal Orders.

British Postal Orders are issued and paid at all Money Order offices in the United Kingdom during the ordinary hours of business on week days. They are also issued and paid in almost all parts of the Empire (except Canada), and at the British Agencies at Constantinople, Panama, Salonica, and Smyrna. They are issued, with a counterfoil to be retained by the sender, for every 6d. up to 19s. and for 20s. and 21s.; those of 6d., 1s., 1s. 6d., 2s. and 2s. 6d., at a charge of ½d.; of 3s., 3s. 6d. &c. up to 15s., 1d.; those of 15s. 6d. &c. up to 21s., 1½d. They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. British Postage Stamps (not perforated and not exceeding 3 in number) to the amount of 5d., but not fractions of 1d., may be affixed to the face of an order.

Imperial and Foreign Ordinary Money Orders.

For sums not exceeding £1, 3d.; £2, 6d.; £4, 9d.; £6, 1s.; £8, 1s. 3d.; £10, 1s. 6d., and for countries on which orders may be issued for more than £10, 3d. for every additional £2 or portion of £2.

Imperial and Foreign Telegraph Orders.

Commission at same rate as for Ordinary Imperial and Foreign Money Orders, plus supplementary fee of 6d., and cost of official Telegram of Advice.

TELEGRAMS.*Inland.*

Inland telegrams may be sent to all parts of the British Isles at the rate of 6d. for the first twelve words, and one halfpenny for every additional word; stamps in payment to be affixed to the form by the sender. Receipt for charges 1d. The address of the receiver is charged for, but not that of the sender when written on the back of the telegram form. Five figures are counted as one word. The charge includes delivery within the town postal limits, or within three miles of a head office—beyond that limit the charge is 3d. per mile from the office door. Portage to be paid by sender. Telegram forms are of two kinds—one issued gratis; the other (A1), embossed with a 6d. stamp, may be purchased singly, or in books of 20, interleaved, and with a sheet of carbonic paper, price 10s. 3d. The usual hours are 8 a.m. to 8 p.m.

SUNDAY TELEGRAMS.—In most provincial towns the Telegraph Offices are open from 8 to 10 a.m. in England and Ireland; in Scotland from 9 to 10 a.m. In London the following offices are always open:—G.P.O., Central; G.N.R., King's Cross; G.C.R., Marylebone (except 11.30 a.m. to 3.30 p.m.); G.E.R., Liverpool Street and Stratford; London Bridge (S.E. & C.R.), St. Pancras (M.R.), Waterloo and Willesden Stations, and West Strand Post Office. The offices at Birmingham, Bradford (except between midnight Saturday and 8 a.m. Sunday), Brighton

(except between midnight Saturday and 7 a.m. Sunday), Bristol, Cardiff Docks (ship telegrams not delivered after dark), Derby, Devonport, Dover, Exeter, Falmouth, Holyhead, Hull, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Norwich, Nottingham, Penzance, Plymouth, Portsmouth, Sheffield, and Southampton are always open; as also are those at Aberdeen, Dundee, Edinburgh, and Glasgow, in Scotland; and Belfast, Cork, Dublin, Londonderry, and Queens-town, in Ireland.

Note.—It is usually possible to get a telegram through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: 1s. for the telegraphist, 1s. for the messenger, and 6d. an hour for the telegraphist if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1s. for the postmaster, 1s. for the telegraphist, and 1s. for a messenger if it be necessary to call the telegraphist.

Imperial and Foreign.

Rates per word are as follows:—Abyssinia, 2s. 3d.; Aden, 2s.; Alaska, 2s. 9d.; Algeria, 2½d.; Angola, 5s. 5d. and 5s. 6d.; Annam, 4s. 2d. and 4s. 5d.; Antigua, 4s. 4d.; Argentine Republic, 3s. 10d. and 4s. 2d.; Ascension, 2s. 6d.; Australia, 2s. 9d. and 3s.; Austria, 3d.; Azores, 9d.; Bahamas, 2s. 5d.; Barbados, 4s. 9d.; Basutoland, 2s. 6d.; Bathurst (W. Wireless Telegraphy.

Telegrams are accepted at any Telegraph Office for transmission to certain of the principal Ocean Liners by Wireless Telegraphy from the stations at Crookhaven, the Lizard, Malin Head, Niton, the North Foreland, and Rosslare, at a charge of 6½d. a word, with a minimum of 6s. 6d. per telegram, and telegrams from ships are received at these stations and are thence transmitted by wire. Telegrams are also accepted at any Telegraph Office for transmission to His Majesty's ships from the same stations at a charge of 3½d. a word, with a minimum of 3s. 6d. per telegram. Such telegrams are only accepted at sender's risk. The name of the wireless station will in each case pass as one word in the address.

POST OFFICE TELEPHONES.

London Exchange.—The office of the General Manager of the Post Office London Telephone System is at the G.P.O., South, Carter Lane, E.C. The annual subscription, including one telephone at the subscriber's premises, £5.

Within a distance of 2 miles from the subscriber's premises, for each call on any exchange in the county of London, 1d.; and on any exchange outside the county of London, 2d. For connection with any exchange outside the county of London within 2 miles, annual subscription, £4; 1d. for each call on same exchange; 2d. on any other exchange. The Call Office Fee, whether for subscribers or others, is 2d. The annual subscription for connection with an Exchange within 2 miles of premises with unlimited number of calls is £17.

Provincial Telephone System.—Applications for terms, &c., should be made to the Sec., G.P.O.

Telephone Trunk Lines.—Where the P.O. Telephone Exchanges in different towns are connected by Trunk lines, such lines may be used by local subscribers and the general public at the following rates: 3d. for 25 miles, 6d. for 50 miles, 9d. for 75 miles, 1s. for 100 miles, and an additional 6d. for every 40 miles over a hundred. Extra charges are levied if the conversation is between a subscriber to the NATIONAL TELEPHONE COMPANY'S System and a subscriber to a P.O. Telephone Exchange as follow: When the Trunk Wire charge does not exceed (for a conversation of 3 minutes) 1s. 6d., the fee is 3d. more; if 3s., 4d. more; and if over 3s., then 6d. more for every 3 minutes the wire is occupied. Such fees are not chargeable on calls to or from the Tunbridge Wells or Hull Exchanges. The ordinary time allowed for a conversation on a trunk line is 3 minutes; but by paying a double fee the line may be engaged for the maximum of 6 minutes continuously.

Anglo-French and Anglo-Belgian Telephone.—Telephonic communication may be obtained through Post Office Exchanges or Call Offices from London and certain provincial towns in England to Paris, Brussels, and certain pro-

vincial towns in France and Belgium. Fee—8s. per conversation of three minutes (10s. for Bordeaux, Lyons, Marseilles and St. Etienne). Two consecutive conversations are permitted. NOTE.—Paris time is 10 minutes in advance of London time (i.e., 12 noon London = 12.10 p.m. Paris), but Greenwich time prevails in Belgium.

SUNDAY AND HOLIDAY ARRANGEMENTS.

At all offices in the PROVINCES which are open on Sunday, postage stamps are sold, and letters may be registered during the time such offices are open. The same regulation applies to CHRISTMAS DAY and GOOD FRIDAY. In LONDON, letters cannot be registered on Sunday, except at certain railway stations, but on Good Friday and Christmas Day postage stamps are sold and letters may be registered at all offices which are open. The hours at which telegraph business is attended to are, as a rule, from 8 to 10 a.m.; but no Money Order, Savings Bank, Insurance, or Annuity Business is transacted on these days, nor in Scotland on Sacramental Fast Days.

BANK HOLIDAYS AND FAST DAYS.—Where Bank Holidays are observed as public holidays, the counters of the head office and branch offices are closed at 12 noon (in some small places they are not even opened) except for telegraph business, the reception of parcels, the sale of postage stamps, and the registration of letters. At no provincial town in England or Ireland is there more than one delivery of letters on Sunday, Christmas Day, or Good Friday; nor in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery so far as relates to himself.

In London the holiday arrangements are of an exceptional character, and due notice of them is given by means of bills at the various offices.

POST OFFICE SAVINGS BANKS.

These are established at all Money Order Offices, and are opened for the receipt of deposits during the hours appointed for the sale of stamps, commencing at 8 a.m. Every such office is also open for the payment of withdrawals on weekdays during certain hours, which are specified in a notice exhibited at the office.

Deposits can be made from 1s. to £50 in one year (ending 31st Dec.). When with interest the total exceeds £200, interest is allowed on £200 only. Interest is at 2½ per cent.

ANNUITIES AND LIFE ASSURANCE.—Immediate or deferred annuities from £1 to £100 may be

purchased through the Post Office on the life of anyone over 5 years old. These are payable by equal half-yearly instalments. (Jan. 5 and July 5, or April 5 and Oct. 10.)

Life insurances, from £5 to £100, are granted to persons between 14 and 65 years of age. Children between 8 and 14 can be insured for £5.

If the amount of the annuity or insurance purchased is less than £100, further amounts may be bought, until the total sum amounts to £100.

The Central Post Office Savings Bank is at Blythe Road, West Kensington, W.

WEEKLY EDITION.

32nd YEAR.

EVERY FRIDAY, PRICE 2d. Or with Financial, Engineering or Literary Supplement, Price 3d.

Contains a careful Epitome of the events of interest during the week, together with the most important Leaders and Special Articles from THE TIMES in extenso.

Ecclesiastical Intelligence. Parliament and Politics. Colonial and Foreign News. Naval and Military Matters. Trade, Money, and Stocks. Reviews of Books. Home and Domestic Events. Correspondence. Chess by Special Expert. And a Serial Story by a well-known and popular Author.

Special Editions are issued for India and Australia, for Canada and the United States, and for South Africa containing matter particularly interesting to dwellers in those countries.

Of all Newsagents, and the Publisher, THE TIMES WEEKLY EDITION, PRINTING HOUSE SQUARE, LONDON, E.C. 1205

DELICIOUS COFFEE.

**RED
WHITE
& BLUE**

For Breakfast & after Dinner.

In making, use less quantity, it being
so much stronger than ordinary COFFEE.

PEATMOOR

OLD SCOTCH

WHISKY.

‘Soft, Mellow, Delightful. Carries the
Wild Rough Scent of the Highland Breeze.’

[206]

NOW READY.—Crown 8vo., Half Bound Blue Leather and Scarlet Cloth, price 3s. 6d. net. Full Dark Blue Morocco, Round Corners, Gilt Edges, 5s. net.

WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE & COMPANIONAGE

FOR THE YEAR 1908

BEING A

Directory of Titled Persons

AND CONTAINING

AN EXTENDED LIST OF THE ROYAL FAMILY;

THE PEERAGE WITH TITLED ISSUE;

PRIVY COUNCILLORS, BARONETS, KNIGHTS, AND COMPANIONS;

DOWAGER LADIES AND HOME AND FOREIGN BISHOPS;

WITH A COMPREHENSIVE

INTRODUCTION AND AN INDEX TO COUNTRY SEATS.

“The Cheapest and Handiest Work on the Peerage ever issued.”

J. WHITAKER & SONS, Ltd., 12, Warwick Lane, Paternoster Row, London, E.C.

LONDON: PRINTED BY WILLIAM CLOWES AND SONS, LIMITED, DUKE STREET, STAMFORD STREET, S.E.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King through the Governor-General of India, or through any officer subordinate to him; while "India" means British India, together with any territories of any native prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or any officer subordinate to him (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government; and within the Indian sphere of influence lie the self-governed States of Afghanistan, Nepal, and Bhutan.

Boundaries and Area.—The political boundary of India marches with Persia from the Gulf of Oman to near Zulfikar on the Harirud; then with the Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab; thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of that lake by the line demarcated in 1895 up to Poval Schveikovski on the Taghdumbash Pamir, where three empires—the British, Russian, and Chinese—meet. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire, mainly along the crests of the Muztagh (Karakoram) and Himalayas, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Calcutta, the capital, lies in 88° E. long. The total area of India is about 1,767,000 square miles, of which 680,000 square miles are under native administration. The British Provinces comprise 61 per cent. of the area, and nearly 79 per cent. of the population, which in 1901 numbered 294,361,056. (For details, see pp. 475-6.)

Physical Features and Products.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush Mountains. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the tropical plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. Of these, two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus; and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the

The principal Government publications relating to India presented to Parliament in 1907 were:—Statistical Abstract, 1896-7 to 1905-6; Moral and Material Progress Report, 1905-6; Tables of the Trade of India, 1901-2 to 1905-6; Review of the Trade of India in 1906-7; Sanitary Measures in India, 1905-6; Indian Financial Statement for 1907-8; Home Accounts, 1905-6, with Estimates 1906-7; Explanatory Memorandum regarding the Accounts and Estimates of 1907-8; Return of Net Income and Expenditure, 1895-6 to 1905-6; Administration Report on Railways in India for 1906; Measures for the Prevention of Plague (Cd. 3516); Report of Textile Factories Labour Committee (Cd. 3617); Papers relating to Advisory and Legislative Councils (Cd. 3710); Convention between Great Britain and Russia regarding Persia, Afghanistan, and Thibet (Cd. 3750).

Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basin of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. So rich is the Indo-Gangetic plain that it supports a population of about 50 millions, almost wholly agricultural. The density of the population is extremely high in this region, averaging in the Bengal delta 552 per square mile, and rising in a few districts to 900. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Behar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. To the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, and many dyes, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, parrots, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India Native States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghats all but complete this caving-in triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie so close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of S. India has shaped its history: the S.W. coast, shut in by the mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, and bamboo abound. The jungles in the E. are very deadly. The elephant, tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chincona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern table-land has furnished considerable supplies of minerals. At present the minerals principally worked are salt, coal, manganese ore, mica, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced in rapidly increasing quantities, and jade and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

The People of India.

Population.—The third general census of India was taken on the 1st March, 1901. The enumeration embraced the whole of the Indian Empire, except a few outlying tracts and certain disturbed areas on the frontier. The final census returns gave a population of 294,361,056, as compared with 287,324,671 in 1891 (for details see p. 476). Deducting for purposes of comparison the population of tracts not enumerated in 1891, the increase in the ten years is only about 1½ per cent., as compared with an increase of over 22 per cent. in the previous decade. These statistics show that long-continued famine in Western India, combined with an abnormal prevalence of cholera, plague, and other diseases, had, during the decade, seriously enhanced mortality. The census total of 1901 is divisible into 231,899,507 (or 79 per cent.) for British India, and 62,461,549 (or 21 per cent.) for Native States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist.

Languages.—India has 147 vernacular languages, of extraordinary variety. The languages spoken by 292,563,771 persons in India are grouped in three families; and twenty-three languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 60,354,137 persons), Bengali (44,624,048), Bihari (37,076,990), Telugu (20,696,872), Marathi (18,237,899), Panjabi (17,070,961), and Tamil (16,525,500), after which come Rajasthani, Kanarese, Gujarati, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and

is the *lingua franca* of India. English is understood by many.

Religions.—The population by religions includes 207,147,026 Hindus (70 per cent. of the total), 62,458,077 Muhammadans (21 per cent.), 9,476,759 Buddhists (3 per cent.), nearly all in Burma, leaving 6 per cent. for all other religions, including 2,923,241 Christians (two-thirds of whom are in Madras and Travancore), 2,195,339 Sikhs, 1,334,148 Jains, 94,190 Parsis, and 8,584,148 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. Christian converts come mainly from the more degraded classes in Bengal and Madras.

Large Towns.—Tables below show the populations of the chief towns and the distribution of the people by occupations. There are 28 towns with a population of over 100,000, and 49 with 50,000 to 100,000. The urban areas of over 5,000 people comprise less than 10 per cent. of the total population.

Occupations.—About two-thirds of the population depend on agriculture. The cotton industry supports over 7,500,000 persons, more than two-thirds of whom depend on hand-weaving. There are 5,500,000 persons in Government service, civil or military.

Sex.—Marriage is almost universal owing to religious obligations. Infant marriage and enforced widowhood are extending through Brahmanical influence and notions of social distinction. There are nearly 26,000,000 widows in India. The males outnumber the females in the proportion of 1,000 to 963.

* Enumerated incompletely prior to 1901. † The North-West Frontier Province was formed in 1901 out of certain Punjab Districts and areas not previously included in India. ‡ Includes South Lushai and Manipur. § Certain areas were imperfectly enumerated owing to tribal disputes. ¶ Includes Shan States, Chin Hills, and Karen. N.B.—Revised figures showing area and population of the provinces of Bengal, the Central Provinces, and Eastern Bengal and Assam as reconstituted in 1905. are now furnished above. The Central Provinces and Berar have been amalgamated for administrative purposes.

A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (327 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts of later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1400 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The people who wrote these books were Aryans, a race which, as their traditions indicate, had come, it may be about 2000 B.C., into India from north of the Hindu Kush. They had found in India a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of the lowest civilisation, in the rest of India. Of both these types there are still survivals in India. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads*; their epics, the *Mahabharata* and *Ramayana*, extol their mythical heroes; while in the *Laws of Manu* we find a picture of Indian society, rather as the priestly caste of the day (say 500 B.C.) wished it to exist, than as it actually then existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste generally prevails, and the life of the people is organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautama, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died at a great age in 543 B.C. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood; and within three centuries from the death of its founder it was the prevailing religion of India. For more than a thousand years it existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, either owing to internal dissensions or through persecution; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in China and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. A branch of Buddhism, however, or a survival of a kindred creed, continues to exist in India in the distinct sect of the Jains. The followers of this creed, of which the antiquity and relations with Buddhism are much disputed, are still very numerous in Gujarat, and are also found in other parts of India.

Herodotus tells us that the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (327 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes, has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, and speaks of the people as brave and truthful, and averse to litigation, and of the women as chaste; and he notes the absence of slavery. Asoka (260-230 B.C.), the grandson of Chandragupta, whose

edicts throw light upon this period, was the great patron of Buddhism, then the State religion. Our last contributors to a knowledge of India before the period of authentic history are the Buddhist pilgrims from China, who visited the country between the fifth and seventh centuries.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between 126 B.C. and 544 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in the N.W. of India they made some temporary acquisitions during the ensuing hundred years; but two centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in the year 990 that Mahmud declared the independence of the kingdom of Ghazni in Afghanistan—a declaration which he followed up by at least twelve expeditions into India between 1000 and 1024, one of which carried him beyond the Jumna, and another ended in the occupation of Gujarat. In 1024 he conquered and annexed the provinces of Lahore and Multan. The succeeding dynasties of Afghan kings held power in India for 500 years; but the advance of their power was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutb-ud-din, with whose memory is connected the Kutb Minar near Delhi. The first Mohammedan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Toghlaq line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 Sultan Babar, a descendant of Genghis Khan and Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Amu river in Central Asia to the borders of the Gangetic delta. His son, Humayun (1530-56), lost the whole of the territory conquered by Babar, but recovered a portion of it shortly before his death. Akbar the Great, his son (1556-1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all Hindustan. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar had been absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms; he was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were Raja Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet. Bairam Khan, Akbar's faithful guardian in his youth, revolted when the young king seized the reins of power, but was

pardoned. The revenue of Akbar's empire is estimated to have been £19,000,000; and this gradually increased till under Aurangzeb, at the close of the 17th century, it is calculated to have reached £40,000,000. *Jehangir* (1605-28) received in 1626 Sir Thomas Roe, the ambassador of James I. His empress was the famous Nur Mahal. Under *Shah Jehan* (1628-1658) the Mogul Empire reached its zenith. Many public works and grand buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jehan's reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658-1707) defeated and killed his brothers; he kept his father a prisoner till death. *Aurangzeb* had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects magnificent, ended in failure. The decline of the empire had begun. Four sons disputed the right of succession, and in 1707 *Bahadur Shah* gained the coveted crown. Dying in 1712, he was succeeded by his son, *Jehandar Shah*, who was murdered by *Parokshit*, a great-grandson of *Aurangzeb*. He in turn was put to death six years later, and *Muhammad Shah*, grandson of *Bahadur*, came to the throne. His viceroys became rebellious, and so contributed to the success of the Mahrattas, who in consequence subdued the Deccan. About 1724 part of the Deccan became practically independent under *Nizam-ul-Mulk* (ancestor of the present *Nizam*), while later on in *Ondh*, *Sadat Khan*, and in *Bengal*, *Ali Vardi Khan*, secured power. In 1738, to avenge an alleged insult, *Nadir Shah* of *Persia* invaded *India*, captured *Delhi*, and gave the city over to the mercy of his terrible followers, slew, it is said, more than 100,000 of the inhabitants, and carried off enormous plunder. All the country west of the *Indus* was lost to the empire. On the death of *Muhammad*, in 1748, the empire was fast going to decay.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country may be roughly defined by drawing two lines from *Nagpur* to *Surat* and *Goa* on the west coast. The founder of their power was *Sivaji* (1627-1680), a chieftain of the family of *Bhonsla*. *Balaji Vishwanath* (1712-1720), *Peishwa*, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family. *Sivaji*'s descendants thenceforth holding a merely nominal position as *Rajas* of *Satara*. Under the *Peishwas*, aided by *Scindia*, *Holkar*, and the *Gaekwar*, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence. In 1760 *Delhi* was in their hands, and though they suffered a disastrous defeat at *Panipat* in 1761, at the hands of *Ahmed Shah*, the Afghan invader, they remained for some time the first power in *India*, and were the most dangerous opponents of the English. Too often their government degenerated into a system of organised plunder. Like the *Pindaris*, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both *Pindaris* and Mahrattas were finally overthrown in 1818 that *India* enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who, at first attracted by love of adventure or hopes of gain, had gradually extended their power in *India*.

THE SIKHS.—The *Punjab* lay beyond the reach of the Mahrattas. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born at *Lahore* in 1469. He preached the One God, purity of life, and abolition of caste. He had ten successors, ending with *Govind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780-1839), who, originally appointed Governor of *Lahore* by the Afghan Amir, founded the kingdom of the *Punjab*. The powerful army he had organised brought on the collision which he himself had carefully avoided, and after two wars with the British power the Sikh kingdom was annexed, and became the province of the *Punjab* (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with *India* and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were *Calicut*, *Ormuz*, *Aden*, and *Malacca*. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to *India*. The sea route round the Cape of Good Hope was discovered by *Vasco da Gama*, who anchored before *Calicut* in May, 1498. From that time until they lost their naval supremacy the Portuguese enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, *Francis of Almeida* (1505-1509), established numerous factories and fortresses, and occupied *Ceylon* and the *Maldivé Islands*; while his successor, *Alfonso de Albuquerque*, captured *Goa* (1510), and extended the Portuguese dominion, notably on the *Malabar* and *Malacca* coasts. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the *Persian Gulf* to *Japan*. When the crowns of *Spain* and *Portugal* were united in 1580 under *Philip II.*, the Asiatic interests of *Portugal* were subordinated to the European interests of *Spain*, and the decline of Portuguese power in *Asia* was rapid. Till then the Portuguese brought Indian products to *Lisbon*, whence the Dutch carried them to the other ports of Europe. But when *Philip II.*, on account of the Dutch revolt, shut *Lisbon* against them, the Dutch were driven to trade directly with the East. In 1602 they formed "The Dutch East India Company" by amalgamating previously existing trading societies, and between 1602 and 1620 the principal Portuguese settlements in the East were captured. In 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch occupied the Cape as a halfway station, and established themselves firmly in *Ceylon* and in *Java* and the neighbouring coasts and islands. In 1796 *Ceylon* was captured by the British and annexed to *Madras*. It was made a crown colony five years later. French and Danish East India Companies were established in 1604 and 1612 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English, like the Dutch, became eager to share in the profits of Indian commerce. After the success of some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 125 shareholders, the capital was £70,000, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." The early voyages were undertaken on joint-stock account, the amount of the capital varying with each venture. The new competitors were resisted by the Portuguese; but a permanent footing was obtained after a great victory off Surat in 1612. In 1615 the British ambassador, Sir Thomas Roe, aided by the influence of the Emperor Jehangir, greatly improved the position and prospects of the Company. In 1639 the English, who had acquired a narrow strip of land, six miles in length and extending one mile inland, on the coast below Masulipatam, built a factory there, surrounded it with a wall, mounted guns, and named it Fort St. George; fourteen years later (1653) this settlement of Madras became an independent Presidency. In Charles I.'s reign rival enterprises led to confusion and to piratical excesses in the East, but in 1657 co-operation and discipline were secured by the charter granted by the Protector Cromwell to a single company comprising the whole body of merchants. When, in 1662, Charles II. was married to Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay; and a year after receiving it (1668) he transferred all his rights and responsibilities connected with it to the East India Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the Western Presidency. Although in 1634 the Company had obtained certain treaty rights in Bengal from the Mogul, and six years afterwards a factory had been established at Hooghly, near the mouth of the Ganges, yet in that part of India they held no territorial possessions as in Bombay and Madras. In 1688 the exactions of the Muhammadan rulers forced them to abandon their settlement, but they were invited to return, and in 1690 were laid, amid swamp and jungle, the foundations of Fort William, which was destined to develop into the modern city of Calcutta. In 1698 a rival company called "The English East India Company," to distinguish it from the old "London Company," was started with a capital of two millions. After a period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708, thanks to the prudence and tact of Lord Godolphin, they were finally amalgamated under the title of "The United Company of Merchants of England Trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix received continuous support from home, he might have succeeded in founding a French Empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army at Wandewash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin

of the French Company. The territory retained by the French in India since that date is insignificant; and in these possessions they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and the victory of Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1763, after his departure, the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). As a result of this battle, they received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Behar, and Orissa, and the jurisdiction over the Northern Circars. Clive returned a second time to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. After an interval of misrule Warren Hastings (1772-85) was appointed Governor, and then Governor-General of Fort William in Bengal in 1774, on the creation of that office under the Regulating Act of 1773. He greatly increased the power and territory of the Company, notwithstanding the opposition of a hostile Council. Hastings was the first great administrative organiser of the British possessions. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Mahrattas, and Hyder Ali, he probably saved British India. The first administration of Lord Cornwallis (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of the Permanent Settlement of the Land Revenue in Bengal, and by the second Mysore War. After the uneventful rule of Sir John Shore, afterwards Lord Teignmouth (1793-98), came the administration of the Marquess Wellesley (1798-1805), which was distinguished by many important events. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. His son and successor, Tippoo, equally courageous and equally hostile to the English, was in 1798 in secret correspondence with the French, who had then the predominant influence in the military councils of the Nizam and of Scindia, were strongly established in the islands of Mauritius and Bourbon, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassem (1802) broke up the Mahratta Confederacy. The campaigns of Lord Lake and Sir Arthur Wellesley, in the Second and Third Mahratta Wars, curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which promised to give greater security than the balance of power attempted by his predecessors. Lord Minto (1807-13) established peaceful relations with the Sikhs, Cabul, and Persia, through the missions of Metcalfe, Mountstuart Elphinstone, and Malcolm respectively, and occupied Mau-

ritius. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished. Under the *Marquess of Hastings* (1814-23) the Bombay Presidency attained its present dimensions, on the annexation in 1818 of the territory of the Mahratta Peishwa, whose power had lasted a little over a century. Lord Hastings also delivered the country from the ravages of the Pindaris of Central India, freebooters who organised bands, sometimes many thousands strong, that devastated the country in all directions; and he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. A war with Nepal also occurred during this period. Lord Amherst (1823-8) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the fertile provinces of Aracan and Tenasserim, and, practically, Assam. While Lord William Bentinck was Governor-General (1838-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various measures were passed affecting education, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and did away with the restrictions on the residence of British subjects in India. The resolution of Lord Auckland (1836-42) to support Shah Shuja against Dost Mohammed brought on the first Afghan Expedition (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of Lord Ellenborough (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). Lord Hardinge (1844-48) conducted in person the first Sikh War, and fought a series of severely-contested battles, ending with Sohraon (1846). Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted in the submission of the Sikhs, who at Chillianwallah and Goojerat gave further proof of their bravery. The annexation of the Punjab (1849) was followed by the second Burmese War (1852), which deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *via* the Red Sea, and opened the Ganges Canal, still one of the largest irrigation works in India. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 Satara, and in 1853 Jhansi, thus became British territory; and on the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical Government of Oudh, that kingdom was also annexed. The proclamation was made in Feb., 1856, and the transfer took place without bloodshed or fighting. Earl Canning (1857-62),

who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened the British Empire in India. A mutiny of sepoys broke out on the 20th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of 40,000 rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, the Central India campaign, and all the heroism of that momentous time will never be forgotten. The Great Mutiny proved the deathblow of the East India Company, whose eventful annals were brought to a close by the transfer of its entire administration to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Lord Canning was succeeded in 1862 by Lord Elgin, who, however, died in Nov., 1863. Sir John (Lord) Lawrence (1864-69) took measures to reform the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War and by the terrible Orissa Famine of 1866. Lord Mayo (1869-72) effected many administrative reforms. He inaugurated the system of provincial finance, which has since been extended. He was assassinated in 1872, while visiting the convict settlement at Port Blair. During the tenure of office of Lord Northbrook (1872-76), H.M. King Edward VII., then Prince of Wales, visited India. Other important events of this viceroyalty were a famine in Bengal, and the deposition of the Gaekwar of Baroda for misrule and disloyalty. Lord Lytton's administration (1876-80) was made eventful by the terrible famine in Southern India, by the Second Afghan War, and by the Queen's assumption of the title of EMPRESS OF INDIA in 1877. He was succeeded by the *Marquess of Ripon* (1880-84), whose peaceful term was marked by the extension of local self-government. His successor was the *Marquess of Dufferin* (1884-88), during whose viceroyalty occurred the Third Burmese War, by which Upper Burma with the Shan States was added to the Empire. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The *Marquess of Lansdowne* (1888-93) continued his predecessor's policy of strengthening the army and extending and consolidating British influence on the frontier. Hunza and Nagar, feudatories of Kashmir, were brought under more direct control; the Indo-Afghan boundary was defined; and a serious outbreak in Manipur was suppressed. As regards domestic policy, he took the first step in currency reform by closing the Indian mints to the free coinage of silver. He also reconstituted the Legislative Councils in 1892 by introducing a more popular element. The viceroyalty of Lord Elgin (1894-98) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Eventually British control was strengthened, and peace for the time established. An earthquake devastated Assam in 1897; plague broke out in 1896 and has

raged more or less severely ever since; and in 1866-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the tribes along the whole border from Chitral to Baluchistan rose against the British garrisons. In suppressing this outbreak over 60,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong; the frontiers of Afghanistan, Persia, and China were also defined. Among the internal proceedings were the abolition of the Presidential army system, the re-imposition of the cotton and other Customs duties, the creation of Legislative Councils for the Punjab and Burma, and the modification of the law against sedition. Lord Elgin was succeeded by Lord Curzon in January, 1899. In that year the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to the sovereign. Lord Curzon was thrice called on to defend Imperial interests by the despatch of troops from India, about 8,000 British troops being sent to South Africa in 1899 and about 20,000 native troops to China in 1900; while in 1903-4 troops from India fought in Somaliland. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. and containing a population of 60 millions, of whom more than a half were in native States. At one time over 6,500,000 were under relief. The loss due to this famine has been estimated at 50 millions sterling, while the expenditure of Government was very heavy. The increasing mortality from plague has been a subject of grave concern to Government. Lord Curzon's term of office was a period of reform and reconstruction. Among his measures for aiding cultivators were the institution of agricultural banks and departments, and reforms in revenue law and administration designed to free the cultivators from the moneylenders. The famine codes were amended. Better arrangements were made for controlling the tribes and for distributing the troops on the frontier, and a new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province. The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. The Viceroy appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. A Railway Board was constituted to administer the railways, and a Commerce and Industry Department, in charge of a new Member of Council, was created. Educational policy was reviewed and reforms introduced. The reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. Indian princes and native troops visited England in 1902 to attend the coronation of H.M. King Edward VII. The Viceroy held a great Imperial Durbar at Delhi on 1st Jan., 1903, to celebrate the coronation of the first British Emperor of India. It was attended by the leading princes and nobles of India. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. Lord Curzon returned to England for a few months in 1904. During his absence Lord Amphil occupied the post of Viceroy. Lord Curzon, having been reappointed for a further period, returned to India

in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, which had become unwieldy for administrative purposes, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. During 1905 (April) a severe earthquake occurred in N.W. India. Lord Curzon carried out great reforms in the organisation of the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter which seemed to menace the supremacy of the civil authority, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905). Lord Minto, his successor, arrived in Nov., 1905. The Prince and Princess of Wales made a tour in India during the winter of 1905-6. There was a considerable agitation among Bengalis in 1905-6 and 1906-7 owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov. 1907. In 1907 also there was unrest in the Punjab, but it was of short duration. In his Budget speech in 1907, the Secretary of State (Mr. Morley) foreshadowed important reforms in Indian administration, designed to bring all classes of the people into closer relations with the Government and its officers. These include the appointment of native members to his Council, the extension of the native element in the Viceregal and Provincial Legislative Councils in India, and the formation of Imperial and Provincial Advisory Councils of Notables. He appointed Royal Commissions to inquire into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour.

IMPERIAL LEGISLATION.—The original charter of the East India Company was granted by Queen Elizabeth at the end of 1600. *The Regulating Act* (1773), which created the first Governor-General and his Council, was the first statute that recognised the East India Company as a ruling body. It was followed, in 1784, by Pitt's *India Act*, which, while leaving the business and most of the patronage to the Court of Directors, gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. The Act of 1784 authorised the historic phrase "The Governor-General in Council." In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while in 1833 the monopoly of the China trade was abolished, and a legal member was added to the Governor-General's Council. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India," 1858, which still regulates Indian affairs, all the territories formerly governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council of 15 members. This Act, as amended by Acts of 1889 and 1907, lays down that at least 9 members of Council must have resided in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 14. The term of office is now 7 years, with power of extension. In 1877 (under the Royal Titles Act, Queen Victoria formally assumed the title of Empress of India.

The Government of India.

EMPEROR OF INDIA—H.I.M. EDWARD VII.

Secretary of State—The Rt. Hon. JOHN MORLEY, O.M., M.P.

H.M. SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is responsible to, and represents the supreme authority of, Parliament. No expenditure from the revenues of India is legal unless sanctioned by him and a majority of his Council. In matters requiring secrecy (e.g., foreign policy and the affairs of native States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. (For constitution of Council, see p. 481.) In all matters the Secretary of State can impose his orders on the Government of India. Indian Government business in England is transacted at the India Office (see p. 170).

The King-Emperor appoints the Governor-General, the Governors of Madras and Bombay, the Commander-in-Chief, the Ordinary Members of the Councils of the Governor-General and of the Governors of Madras and Bombay, and the Judges in the High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the Secretary of State's approval. The term of these appointments, except judgeships, is usually five years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains six ordinary members (of whom three must have served in India ten years), as well as himself and the Commander-in-Chief, who is an extraordinary member. The Governors of Bombay and Madras have each an Executive Council of two members. All acts of the SUPREME GOVERNMENT IN INDIA run in the name of "The Governor-General in Council"; ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority of his Council. The Governor-General's Council, when it meets for purposes of legislation, consists of the above eight members and of not more than 16 "Additional Members for making Laws and Regulations," nominated by the Governor-General. There are similar Legislative Councils in Madras, Bombay, Bengal, Eastern Bengal and Assam, the United Provinces of Agra and Oudh, the Punjab, and Burma. The Indian Councils Act of 1892 increased the number of representative natives, and conferred a limited right of interpellation and of criticism in financial matters. Government proposals for rendering the Councils more representative are now under discussion. Every Indian Act requires the Governor-General's assent, but the Crown may disallow it.

Important changes in administration were introduced during 1905. Business is now conducted by nine Departments—Finance, Foreign, Home, Legislative, Revenue and Agriculture, Public Works, Commerce and Industry (with Railway Board), Army, and Military Supply. Each Department is in charge of a Secretary to Government, and is also the special care of a member of the Supreme Council, who has authority to deal with affairs of routine and minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign Department. The Finance Department

deals with public accounts, loans, taxation, excise, opium, salt, currency, banking, mints, and other financial matters. The Foreign Department conducts relations with Afghanistan, Nepal, and other conterminous countries, and, through its Political Residents and Agents in the various native States, supervises their administration and regulates their relations with the paramount Power. Its Agents in the Persian Gulf, Muscat, and Turkish Arabia look after the commercial and political interests of India in those quarters. The Home Department deals with the civil service, education, public health, ecclesiastical and judicial affairs, municipalities, district local boards, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connection with the Legislative Department. The most important subjects that come before the Revenue and Agriculture Department are land revenue and surveys, forests, agricultural development, famine, and meteorology. The Public Works Department deals with irrigation, roads, buildings, &c. A new department for Commerce and Industry has been created, and placed in charge of a special member, to deal with trade and shipping, customs, ports, post-office, telegraphs, mines, factories, statistics, and certain railway questions, but railway administration is now entrusted to a Railway Board. The Army is under the Army Department, of which the Commander-in-Chief has charge in Council, while a Military Member of Council has charge of the Military Supply Department.

British India is no longer divided into three Presidencies, but into 13 Local Governments and Administrations, viz.:—Under Governors, Madras and Bombay, still termed Presidencies; under Lieutenant-Governors, Bengal, Eastern Bengal and Assam (constituted in Oct., 1905), the United Provinces of Agra and Oudh, the Punjab, and Burma; under Chief Commissioners, the Central Provinces, which since 1902 have included Berar, Ajmer-Merwara, Coorg, British Baluchistan, the North-West Frontier Province, and the Andaman Islands. The chief Local Governments enjoy a large measure of financial and administrative independence. The Governors of Madras and Bombay have greater independence than the others, being alone permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination (in most Provinces) to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of administration, and is the responsible head of his jurisdiction. There are now 267 Districts in British India.

There are separate High Courts for both civil and criminal cases in Madras, Bombay, Bengal (with jurisdiction also over the new province of Eastern Bengal and Assam), and in the Province of Agra. Appeals may be carried to the English Privy Council. The Punjab and Lower Burma have Chief Courts. The Central Provinces, Berar, Oudh, Sind, North-West Frontier Province, and Upper Burma have each a Judicial Commissioner.

THE SUPREME GOVERNMENT, CALCUTTA.

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees per mensem.]

<i>Viceroy and Governor-General</i> , His Excellency the Right Hon. the Earl of Minto, P.C., G.M.S.I., G.M.I.E., G.C.M.G., &c. 1845, assumed charge 18th Nov., 1905.....	per mensem	Rs. 20,833
<i>Private Secretary</i> , Lt.-Col. J. R. Dunlop Smith, C.I.E., I.A.....		Rs. 2,000

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

(1) **MADRAS** (area, 141,726 sq. miles; pop. 38,209,436) was the most important of the three Presidencies before Clive's conquest of Bengal, but it was small in extent until the annexation of the Carnatic in 1802. With a coast-line of 1,730 miles the province has no good natural harbour, though an artificial harbour has been completed at Madras at great expense. Many natives of Madras Presidency emigrate to Burma and Ceylon, some only temporarily. The province is not naturally fertile, but irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and Madras Railways, the latter connecting it with Bengal, while the Southern Mahratta line connects it with Bombay. The people are chiefly Hindus. There are over one million native Christians, mainly Roman Catholics. The languages principally spoken are Tamil and Telugu. The Governor of Madras is assisted by a Council, ordinarily of two members, to whom are added, for legislative business, other members not to exceed 21 (including the Advocate-General *ex officio*), of whom the first seven are appointed on the recommendation of the following bodies: Madras Corporation (1), other Municipal Councils (2), District Boards (2), Chamber of Commerce (1), and University (1); the rest are selected by Government. Madura (105,984) and Trichinopoly (104,721), famous for their Hindu temples, are the chief cities after the capital.

CHIEF CITY, Madras. Population, 509,346.

<i>Governor</i> , Sir Arthur Lawley, G.C.I.E., K.C.M.G. (March, 1906)	Rs. 10,000
<i>Priv. Sec.</i> , A. Y. G. Campbell	Rs. 1,500
<i>Mil. Sec.</i> , Major G. C. Glyn, D.S.O., N. Somerset	
<i>Impl. Yeomanry</i>	Rs. 1,000
<i>Aides-de-Camp</i> , Capt. A. A. Duff, 3rd Gordon	
<i>Highrs.</i> ; Capt. E. L. Popham, 26th Light	
<i>Cavalry.</i>	
<i>Native Aide-de-Camp</i> , Risaldar-Major Shaikh	
<i>Farid</i> , Sardar Bahadur, 26th Light Cavalry	
<i>Medical Officer</i> , Major W. Molesworth, I.M.S.	
	Rs. 1,000

COUNCIL OF THE GOVERNOR.

G. Stokes, C.S.I., and G. S. Forbes, C.S.I.
each Rs. 5,333

SECRETARIES TO GOVERNMENT.

<i>Chief Secretary</i> , Murray Hamnicks, C.I.E.	
	Rs. 3,750
<i>Revenue Dept. Sec.</i> , J. N. Atkinson	Rs. 3,125
<i>Local, Municipal, &c., Sec.</i> , A. G. Cardew	Rs. 2,500
<i>Public Works Secs.</i> , F. J. Wilson (Rs. 2,750); C. A. Smith (Irrigation); G. A. Anderson (Railway)	each Rs. 2,500
<i>Board of Revenue</i> , H. Bradley, C.S.I. (Rs. 3,750); H. A. Sim, C.I.E. (Rs. 3,500); C. J. Weir (Rs. 3,500); A. E. C. Stuart (Rs. 3,000).	

HIGH COURT OF JUDICATURE.

<i>Chief Justice</i> , Sir Chas. A. White, Kt.	Rs. 5,000
<i>Judges</i> , Hons. Sir S. Subramania Aiyar, Kt., C.I.E.; Sir R. S. Benson; H. T. Boddam; L. C. Miller; J. H. Munro; J. E. P. Wallis	Rs. 4,000

* The areas and populations of the separate provinces are for British territory only. The populations are according to the census of 1901.

(2) **BOMBAY**.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including Sind, but not Aden and Perim, which are also attached to it) contains 122,984 square miles (nearly equal in size to Prussia), with a population of 18,515,527; it is 1,050 miles in length. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 77 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. The province has suffered greatly from plague and drought in recent years. Marathi, Gujarati, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (now combined with the Indian Midland system) eastwards; south-eastwards is the Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. The Governor is assisted by a Council similar to that in Madras, except that the first eight of the additional members are appointed on the recommendation of the following bodies: Bombay Corporation (1), other Municipal Corporations (1), District Boards (2), Sardars of the Deccan (1), Jaghirdars and Zamindars of Sind (1), Bombay and Karachi Chambers of Commerce (1), and Bombay University (1). Ahmedabad (185,889), Poona (153,320), Surat (119,306), and Karachi (116,663), the capital and chief port of Sind, are important cities. For Aden and Perim, see p. 492.

CHIEF CITY, Bombay. Population, 977,822 (1906).	
<i>Governor</i> , Sir G. S. Clarke, G.C.I.E., G.C.M.G. (Nov., 1907)	Rs. 10,000
<i>Private Sec.</i> , P. R. Cadell	Rs. 1,500
<i>Military Sec.</i> , Capt. J. G. Greig, 107th Pioneers	Rs. 1,000
<i>Aides-de-Camp</i> , Capt. Drummond, and Goorkhas; Capt. R. E. Solly-Flood, Rifle Brigade.	
<i>Native A.D.C.</i> , Risaldar Bhagwan Singh, H.E. Body Guard.	
<i>Medical Officer</i> , Dr. Coghill	Rs. 1,000

COUNCIL OF THE GOVERNOR.

J. W. P. Muir Mackenzie, C.S.I.; Sir S. W. Edgerley, K.C.V.O., C.I.E. each Rs. 5,333

SECRETARIES TO GOVERNMENT.

<i>Chief Sec.</i> , Revenue, Financial, and Separate Depts., R. A. Lamb, C.I.E.	Rs. 3,750
<i>Political, Judicial, Legislative, &c., Sec.</i> , R. P. Barrow	Rs. 3,125
<i>General, Marine, &c., Sec.</i> , H. O. Quinn	Rs. 2,500
<i>Public Works Secs.</i> , J. S. Brown and W. L. Cameron	each Rs. 2,750
<i>Commr. in Sind</i> , A. D. Younghusband	Rs. 3,750
<i>Revenue Commrs.</i> , W. W. Drew; J. de C. Atkins; A. C. Logan	each Rs. 3,500
<i>Commr. of Customs</i> , W. T. Morison	Rs. 3,000

HIGH COURT OF JUDICATURE.

Chief Justice, Sir L. H. Jenkins, K.C.I.E. Rs. 5,000
Judges, Hons. L. P. Russell; Narayan Ganesh Chandavarkar; S. L. Batchelor; D. D. Davar; F. C. O. Beaman.....each Rs. 4,000
Judicial Commr. in Sind (Karachi), J. J. Heaton Rs. 4,000

(3) BENGAL (reconstituted area, 115,819 sq. miles; pop. 50,722,067) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but the province comprises part of Bengal proper, Behar, Orissa, and Chota Nagpur. Fifteen districts of Eastern Bengal were detached from the province in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. Bengal occupies the Ganges Valley eastward of Benares, and extends from the Himalayas to the mouth of the Mahanuddy. Only 5 per cent. of the population live in towns. Nearly 78 per cent. of the population consists of Hindus. The principal languages are Bengali and Hindi. For the most part the province is a great alluvial plain, producing rice, and is the most populous and productive in all British India. Orissa and Chota Nagpur are ill-watered and liable to drought. The chief products, besides rice, are opium, indigo, oilseeds, sugar, tobacco, silk, tea, and jute. In the hills bordering the great plain coal measures, yielding about six-sevenths of India's coal output, are worked. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running N. from Calcutta, is also important. Other extensive systems are the Bengal and North-Western in the north and the Bengal-Nagpur in the south. The Lieutenant-Governor is assisted by a Legislative Council of not more than 20 members, including 7 members appointed on the recommendation of the following bodies:—Calcutta Corporation (2), other Municipal Corporations (2), District Boards (2), Bengal Chamber of Commerce (1), and Calcutta University (1). Important cities are Patna (134,785) and Howrah (157,594), a great jute-manufacturing centre adjoining Calcutta.

CHIEF CITY, Calcutta. Pop., including suburbs and Howrah, 1,106,738.

Lieutenant-Governor, Sir A. H. Leith Fraser, K.C.S.I. (Nov., 1903).....Rs. 8,333
Private Secy., Capt. J. S. Maidlow, R.F.A. Rs. 374
Aides-de-Camp, Lt. W. B. Rennie, 19 Hrs., and Lt. L. E. McConaghey, 6th King Edward's Own Cavalry.

SECRETARIES TO GOVERNMENT.

Chief Sec., (vacant) Rs. 3,333
Jud. and Gen. Sec., T. W. Richardson.....Rs. 2,750
Financial and Municipal Sec., H. J. McIntosh Rs. 2,750
Public Works (Irrig., Rys., and Marine) Secs., W. A. Inglis (Rs. 2,750); and M. J. Scobie (Bldgs. and Roads) Rs. 2,500
Board of Revenue, K. G. Gupta; F. A. Slacke each Rs. 3,750

HIGH COURT OF JUDICATURE.

Chief Justice, Hon. Sir F. W. Maclean, K.C.I.E. Rs. 6,000
Puisne Judges, Hons. R. F. Rampini; C. M. W. Brett, C.S.I.; H. L. Stephen; Sarada Charan Mitra; B. G. Geidt; J. G. Woodroffe; Dr. A. Mukharji; C. P. Casperz; H. Holmwood; C. W. Chitty; E. E. Fletcher each Rs. 4,000

(4) EASTERN BENGAL AND ASSAM (reconstituted area, 106,130 sq. miles; pop. 30,961,459). In 1905 the new province of Eastern Bengal and Assam was formed by the addition to Assam of 15 districts of Bengal, and was placed under a Lieutenant-Governor, with a Legislative Council of not more than 15 members. Assam had been constituted a separate administration in 1874, out of certain Bengal districts, most of which had been ceded by Burma in 1825. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Gauhati and Sylhet respectively. Rice, tea, jute, oilseeds, sugar, and tobacco are cultivated. About 58 per cent. of the people are Muhammadans, and 37 per cent. Hindus. There is a great variety of languages, Bengali and Assamese being the principal. The Assam-Bengal Railway traverses the province, and terminates at the growing port of Chittagong. The census of 1901 showed that Assam contained 775,844 immigrants from other parts of India, mostly coolies for tea-gardens.

CHIEF CITY, Dacca. Population, 90,542.
Lieutenant-Governor, Sir Lancelot Hare, K.C.S.I., C.I.E. (Aug., 1906).....Rs. 8,333
Private Sec., Capt. L. E. Dening, 33rd Lt. Cav.
Aide-de-Camp, Lt. J. C. Pearse, 4th Cav.
Chief Sec., P. C. Lyon Rs. 3,000
Financial and Munic. Sec., W. J. Reid (offg.) Rs. 1,800
Judicial and Gen. Sec., J. E. Webster.....Rs. 1,800
Public Works Sec., W. Macdonald Rs. 1,350
Board of Revenue, H. Savage, C.S.I.; P. G. Melitus, C.I.E. each Rs. 3,500

(5) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 107,164 sq. miles; pop. 47,691,782), form the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. In population they come next to Bengal. Originally these provinces (excluding Oudh) formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief staple is wheat, while rice, barley, pulse, tobacco, millet, indigo, cotton, sugar, opium, and oilseeds are widely cultivated. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Hindi and Bihari are the chief tongues. The province is well served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. In 1887 a Legislative Council, of not more than 15 members, was established. Six members are appointed on the recommendation of the following bodies:—Municipal Corporations (2), District Boards (2), Chamber of Commerce of Upper India (1), and Allahabad University (1). Among the important cities may be named the ancient city of Agra (188,022), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (209,331), the great manufacturing centre, Cawnpore (197,170), and Meerut (118,129).

CHIEF CITY (Agra), Allahabad. Pop. 172,032.
 " (Oudh), Lucknow. Pop. 264,049.
Lieutenant-Governor, Sir J. P. Hewett, K.C.S.I., C.I.E. (Jan., 1907).....Rs. 8,333
Priv. Sec., Maj. R. Gordon, 15th Lrs. Rs. 991
Aide-de-Camp, Lieut. R. S. Chadwick, 9th Lrs. Rs. 476

<i>Chief Sec. to Govt., J. M. Holmes, C.S.I.</i>	Rs. 3,000
<i>Financial Sec., J. W. Hose</i>	Rs. 2,250
<i>Judicial Sec., E. F. L. Winter</i>	Rs. 2,250
<i>Public Works Dept. Secs. (Irrign.), N. F. McLeod ; A. R. Sutherland (Buildings, Roads, and Rys.)</i> each Rs.	2,500
<i>Board of Revenue, A. W. Cruickshank, C.S.I., and L. A. S. Porter</i>	each Rs. 3,500

HIGH COURT OF JUDICATURE (WITH JURISDICTION IN THE PROVINCE OF AGRA ONLY).

<i>Chief Justice, Sir John Stanley, Kt.</i>	Rs. 5,000
<i>Puisne Judges, Hons. Sir G. E. Knox, Kt. ; Pramad Charan Banarji ; Sir W. R. Burkitt, Kt. ; R. S. Aikman ; H. G. Richards</i> each	Rs. 4,000
<i>Judicial Commr. of Oudh, E. M. D. Chamier</i>	Rs. 3,500
<i>Add. do., L. G. Evans</i>	Rs. 3,500

(6) The PUNJAB (area, 97,209 sq. miles ; pop. 20,330,339) occupies the N.W. angle of the great northern plain of India, and derives its name from "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849, and up to 1853 was under a Board of Administration. This Board was then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being largely extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Wood is scarce. More than half the population are Muhammadans, and more than a third are Hindus. Of the former, the Pathans are found chiefly in the north-western hill districts. The Sikhs number over 2,100,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western Railway serve the Punjab. In 1897 a Legislative Council was constituted, consisting of 9 nominated members (5 official and 4 non-official). The ancient imperial city of Delhi, with 208,575 inhabitants, is the largest city ; while Amritsar, the sacred city of the Sikhs, has 162,429 people.

CHIEF CITY, Lahore. Population, 202,964.

<i>Lieutenant-Governor, Sir Denzil C. J. Ibbetson, K.C.I.E., C.S.I. (March, 1907)</i>	Rs. 8,333
<i>Private Sec. & A.D.C., Major E. C. Bayley, A.D.C., Lieut. D. E. Robertson.</i>	
<i>Chief Sec. to Govt., R. D. MacLagan</i>	Rs. 3,000
<i>Judl. and Genl. Sec., A. B. Kettlewell</i>	Rs. 1,500
<i>Public Wks. Dept. Secs., J. J. Mullaly and E. H. Pargiter (Irrign.), and (vacancy) (Bldgs. and Roads)</i>	each Rs. 2,750
<i>Financial Commissioner, J. Wilson, C.S.I.</i>	Rs. 3,500
<i>Settlement Commissioner, A. H. Diack, C.V.O.</i> Rs.	2,750

CHIEF COURT.

<i>Chief Judge, Sir W. O. Clark</i>	Rs. 4,000
<i>Judges, A. H. S. Reid ; Pratul Chandar Chatterji, Rai Bahadur, C.I.E. ; F. A. Robertson ; A. Kensington ; and 4 temporary Judges</i> each	Rs. 3,500

(7) BURMA is bounded by China, French Indo-China, and Siam on the east, by the province of Eastern Bengal and Assam on the north, and by the Bay of Bengal. It is the largest province of the Indian Empire, having a total area of 236,738 sq. miles, with a population of 10,490,624. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Aracan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States are administered by local sawbwas, or chiefs, under the superintendence of a political officer. The province is thinly peopled ; but, owing to remarkable prosperity, the population is rapidly increasing. The inhabitants—of the common Indo-Chinese stock—belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. About 75 per cent. speak Burmese. Buddhism, now almost confined to Burma, is the religion of nearly 90 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum and jade-stone ; gold and silver are also known to exist. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, supply important navigable waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railway has reached Myitkina on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin. The Lieutenant-Governor of Burma has a Legislative Council of 9 nominated members (5 official and 4 non-official). The present capital, Rangoon, is fast increasing in population owing to commercial prosperity, while the old native capital, Mandalay, tends to decline.

CHIEF CITY, LOWER BURMA, Rangoon. Population, 234,881.

CHIEF CITY, UPPER BURMA, Mandalay. Population, 183,816.

<i>Lieutenant-Governor, Sir H. Thirkell White, K.C.I.E. (May, 1905)</i>	Rs. 8,333
<i>Private Sec., Capt. A. F. S. Hill, R.E.</i>	Rs. 833
<i>Aide-de-Camp, Lt. E. L. Caldecott, R.A.</i>	
<i>Chief Sec., W. F. Rice</i>	Rs. 3,000
<i>Revenue Sec., G. F. Arnold</i>	Rs. 1,500
<i>P.W. Dept. Secs., H. W. V. Colebrook (Rs. 2,750) and G. G. White</i>	Rs. 2,500
<i>Financial Commissioner, F. C. Gates, C.S.I.</i>	Rs. 3,500
<i>Settlement Commissioner, T. C. Wilson</i>	Rs. 2,750
<i>Supt. & Political Offr., S. Shan States, Sir J. G. Scott, K.C.I.E.</i>	Rs. 2,000

CHIEF COURT OF LOWER BURMA.

<i>Chief Judge, Sir C. E. Fox</i>	Rs. 3,750
<i>Judges, W. E. Bigge ; A. M. B. Irwin, C.S.I. ; H. S. Hartnoll</i>	each Rs. 3,500
<i>Judicial Commissioner (Upper Burma), G. W. Shaw</i>	Rs. 3,500

(8) THE CENTRAL PROVINCES and BERAR (reconstituted area, excluding Berar, given below, 82,635 sq. miles; pop. 9,237,654). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. One district was detached and added to Bengal in 1905. The country is hilly and forest-clad, and contains a large population of aboriginal tribes. Much of the waste land is covered with jungle. The people are mostly Hindus, and they speak mainly Hindi and Marathi. Much has been done by constructing roads and railways (belonging to the Indian Midland and Great Indian Peninsula system and the Bengal-Nagpur line) to open up the country, which possesses coalfields and iron-ore, and is an important producer of rice, wheat, millet, pulse, oilseeds, and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,710 sq. miles; pop. 2,754,016), which lies to the north of Hyderabad, was placed in our hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent. In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam, who thus obtains an assured instead of a fluctuating income therefrom. Berar is purely agricultural. It is very fertile, and yields the finest cotton in India, besides millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

There is no Legislative Council for the Central Provinces and Berar, and all legislation is done by the Governor-General's Council.

CHIEF CITY, Nagpur. Population, 127,734.

CENTRAL PROVINCES.

Chief Commissioner, R. H. Craddock, C.S.I. (March, 1907) Rs. 5,166
 Chief Sec. Civil Dept., F. S. A. Slocock Rs. 1,500
 Public Works Sec., J. B. Leventhorpe Rs. 2,500
 Judicial Commissioner, H. V. Drake-Brockman Rs. 3,500
 Do. (addl.), H. J. Stanyon, C.I.E. Rs. 3,500

BERAR.

Commr., B. Robertson Rs. 2,750

(9) THE NORTH-WEST FRONTIER PROVINCE (area, 16,466 sq. miles; pop. 2,125,480) was constituted on November 9, 1901, by the transfer from the Punjab of portions of the district of Hazara, and the Trans-Indus districts of Peshawar, Kohat, Bannu, and Dera Ismail Khan, and by the addition of the following Political Charges—Kurram, Malakand (Dir, Swat, and Chitral), Khaibar, Tochi, Gomal, and Shirani. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

CHIEF CITY, Peshawar. Population, 95,147.

Agent to the Governor-General and Chief Commissioner, Lt.-Col. Sir H. A. Deane, K.C.S.I. Es. 4,500
 Judicial Commr., C. E. F. Bunbury Rs. 2,750
 Revenue Commr., M. F. O'Dwyer Rs. 2,500

(10) AJMER-MERWARA (area, 2,711 sq. miles; pop. 476,922), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is

ex officio Chief Commissioner of Ajmer-Merwara and the chief executive and judicial authority.

CHIEF CITY, Ajmer. Population, 73,839.

Chief Commissioner, E. G. Colvin, C.S.I. Rs. 4,250
 Commr. Major C. H. Pritchard Rs. 1,800

(11) COORG (area, 1,582 sq. miles; pop. 180,607), annexed in 1834. The Resident at Mysore is ex officio Chief Commissioner and the chief executive and judicial authority.

Chief Commissioner, S. M. Fraser, C.I.E. Rs. 4,000
 Commr., L. T. Harris Rs. 1,850

(12) BRITISH BALUCHISTAN (area, 45,804 square miles; pop. 308,246) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the rest of Baluchistan up to the Persian frontier. The districts it comprises were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. British Baluchistan includes the Assigned Districts of Sibi, Pishin, Thal-Chotiali, Quetta, Nushki, Zhob, Chagai, Nasirabad, and the Bolan. The rest of the territory belongs to the native States of Kalat and Las Bela. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. About 44 per cent. of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs through Baluchistan *via* Quetta. A new trade-route between India and Seistan, in Persia, *via* Nushki, in northern Baluchistan, was opened in 1896. A railway from Quetta to Nushki has recently been completed. The Khan of Kalat is the head of a loose confederacy, and is amenable in all important matters to the Governor-General's Agent. He receives about £11,000 for quit-rents and subsidy. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

Chief Commissioner of British Baluchistan, Major Sir A. H. McMahon, K.C.I.E., C.S.I. Rs. 4,000
 Judl. and Rev. Commr., A. Williams Rs. 3,500

(13) THE ANDAMANS and NICOBARS (area, 3,143 square miles; pop. 24,649) form a chain of islands in the eastern part of the Bay of Bengal. The Andamans, in two groups, the Great and Little Andamans, are covered with luxuriant vegetation, and inhabited by a tribe of Negritos. The race is dying out. Since 1858 these islands have been used as a penal settlement by the Indian Government. Port Blair, with its safe and spacious harbour, on South Andaman, is the convict station. The number of convicts in 1906 was 14,700. Much valuable timber, worked by convict labour, is obtained. The Nicobar Islands, which lie almost due south of the Andamans, formerly belonged to Denmark, and were first occupied by the British in 1869. They comprise 19 islands (seven uninhabited), of which the northernmost (Car Nicobar) contains half the total population. The principal products are coco-nuts. The inhabitants, Malay in type, are indolent, and are becoming extinct.

Chief Commissioner and Superintendent (Port Blair), Lt.-Col. H. A. Browning Rs. 2,500

The Laccadive Islands comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,274.)

Aden, Perim, and Protected Chiefships.—From old time Aden, situated on a peninsula of volcanic origin, on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Aden trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of N.E. Africa and S. Arabia. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1837—are legally part of the Bombay Presidency. According to the census of 1901 they had an area of 80 square miles and a population of 43,974. Aden is a free port, except for duties on salt, arms, and intoxicating liquors and drugs. The traffic in arms and ammunition is subject to special regulations. Aden trades with the Arabian and African coasts in cotton goods, grain, coffee, tobacco, coal, salt, hides and skins, sugar, &c. India, the United Kingdom, and the United States have a considerable trade with Aden.

The total of imports and exports in 1906-7 was over £6,632,000. In the same year, 1,469 vessels entered Aden and 414 entered Perim. Aden has a Port Trust and a Chamber of Commerce. In the hinterland of Aden the British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Straits of Babel-Mandeb to Muscat territory at Ras Sair. As the result of an agreement arrived at in 1903-4 with Turkey, a line fixing the boundary of the tribes with which the British Government has treaty relations has been demarcated by a joint British and Turkish Commission from Sheikh Sayad, on the coast opposite Perim, to the river Bana.

The *Kuria Muria* Islands, to the S. of Oman, have been in British possession since 1854. In 1834 the East India Company occupied *Sokotra* (area, 1,400 sq. ms.), 150 miles from Cape Guardafui, which has a primitive, pastoral, Muhammadan population of 12,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy from the British Government in exchange for a pledge not to cede the island to any foreign Power.

Aden: Political Resident, Major-Gen. E. de Brath, C.B., C.I.E.....per mensem Rs. 3,000

INDIAN APPOINTMENTS.

The higher civil administration of British India is recruited from four sources—1. Open competitive examination in England. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—Important changes in the regulations took effect in 1906. The next examination will commence in London on 1st August, 1908, the number of appointments (usually about 50) depending on the requirements of the local Governments. Candidates must be over 22 and under 24 on that date, and of good health and character. Application for admission to compete must be made on or before the 1st July, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. Examination fee, £6. The selected candidates will be on probation in England for one year, and will receive an allowance of £150 if they pass their probation at one of the Universities or Colleges approved by the Secretary of State for India, conduct themselves well, comply with all rules laid down for their guidance, and be certified as entitled to appointment. A final examination is held in Indian law, languages, history, &c. Seniority in the service depends on the order in which candidates stand in the list resulting from the combined marks of the competitive and final examinations. Selected candidates must qualify in riding. Successful candidates are allotted to the various provinces upon a consideration of all the circumstances, including their own wishes, but always subject to the needs of the public service. Within a certain time of the candidate's arrival in India, he must elect to serve in the executive or the judicial branch of the administration, the summit of the profession in one branch being the Lieutenant-Governorship of a Province, in the other a Judgeship of a High Court. The salary of a covenanted civil servant commences usually at Rs. 4,800 (£320) a year. The number of civilians at present in the service

is about 1,100, including a few natives who have attained their position by nomination.

Indian Army.—The Native Army absorbs the larger proportion of the officers; but out of a total of about 3,470 officers some 500 are in civil employment. A certain number of appointments in the Indian Army are offered to cadets of the Royal Military College, and a certain number to candidates from the Universities (regulations obtainable from War Office). All King's Cadets, British and Indian, and Honorary King's Cadets, nominated by the Secretary of State for India (rules on application to Military Department, India Office), are allowed to choose whether they will join the Royal Military College for appointment to the Indian Army or for commissions in the British Cavalry or Infantry. After the claims of these cadets have been satisfied, remaining appointments in the Indian Army are allotted in order of merit to successful candidates at the final examination at Sandhurst. Election is final, no transfer being subsequently possible except by exchange. On receiving his commission a successful candidate is gazetted as second lieutenant on the unattached list of the British Army (receiving the pay of that rank), provided with a passage to India, attached for a year to a British regiment, and then transferred to a native regiment as second lieutenant. Unless he is found fit in every respect and passes certain language and professional tests before the end of the third year from appointment to the Indian Army, he will be removed from the service. Any officers who may from time to time be required to supplement the direct supply from Sandhurst will be drawn from the R. A. and Cavalry and Infantry of the Line serving in India, subject to certain conditions. A lieutenant's pay commences at Rs. 2,700 (£180) a year.

The Public Works Department includes a staff of engineers engaged in the construction and maintenance of State public works. They are recruited from the corps of Royal Engineers or

the Indian Army, from persons appointed by selection in the United Kingdom, and, in respect of natives, from the civil engineering colleges in India. Other qualified persons are occasionally admitted. In 1908 not less than 39 appointments of assistant engineers will be made by a Selection Committee including at least one eminent engineer. Candidates must be between 21 and 24 years of age on 1st July, 1908, must be of good health and character, be able to ride, have passed the A.M.I.C.E. examination, and have obtained a University degree or an equivalent diploma or distinction in engineering, and have had some experience of important work. Intending candidates should apply on a prescribed form to the Secretary, Judicial and Public Department, India Office, S.W., before 1st May, 1908. Assistant engineers in India commence at Rs. 4,200 (or £280) a year, and there is a prospect of pension and also a provident fund.

The Forest Department of India is recruited from this country. The next selection of candidates will be made in the summer of 1908. Candidates must be 18 years of age on 1st July, 1907, and not over 22 on 1st Jan., 1907, and must bring evidence of good general education and of competence in special subjects, for consideration by the Selection Committee. Selected candidates, if they pass a strict medical examination, will spend three years on probation, two at Oxford University in a special course of study, and one in Continental forests for practical work, at their own expense. Assistant Conservators commence at Rs. 4,560 (£304) a year. There is a prospect of pension and a provident fund. The number of appointments in 1908 will be not less than 16. Intending candidates should apply to the Secretary, Judicial and Public Department, India Office.

Indian Police.—An examination is to be held in this country in June, 1908, for 32 appointments: Madras, 4; Bombay, 3; Bengal, 6; United Provinces, 4; Punjab, 6; Burma, 3; Central Provinces and Berar, 3; Eastern Bengal and Assam, 3. Candidates must be between 19 and 21 on 1st June, 1908, and applications must be sent before 1st May, 1908, to the Secretary, Judicial and Public Department, India Office, on a printed form to be obtained from him. There is a strict medical examination, and a test of proficiency in riding. Selected candidates will be allotted as probationers to the various provinces "upon a consideration of all the circumstances, including their own wishes." On passing the prescribed departmental examinations, which must be done within two years of arrival in India, and being found otherwise fit, a probationer is appointed an assistant-superintendent. A general increase of pay has recently been introduced, and a larger number of higher posts created. The initial salary of a probationer is Rs. 3,600 (£240) a year. There is a prospect of pension and a provident fund.

Indian Medical Service.—Examinations are usually held in January and July. The number of appointments offered is about 15. Candidates must be between the ages of 21 and 28 at the date of examination, of good health and good character, and must possess a registrable qualification to practise both medicine and surgery in the United Kingdom. They may be married or not. Successful candidates are required to attend two courses of instruction at Aldershot and at the Royal Army Medical College, Millbank, during which period they receive pay and certain

allowances to cover cost of maintenance. A final examination is then held, and the position on the list of the service depends on the combined results of the preliminary and final examinations. Officers will be liable for military employment in any part of India, but, in view of transfers to civil employment, they will stand posted to one of four civil areas, their allocation being determined on a consideration of all the circumstances, including their own wishes. Officers in one civil area may be transferred elsewhere or recalled to military duty. Private practice is usually permitted. The commencing grade pay of a lieutenant is Rs. 4,200 (£280) a year; the highest medical appointment carries a salary of Rs. 36,000. Full information can be obtained from the Military Secretary, India Office, S.W.

The patronage of the Secretary of State for India is very small, and is chiefly dependent on the uncertain requirements of the Government of India in the Judicial, Educational, or Ecclesiastical Departments.

Appointments, usually of distinguished graduates of the Universities of the United Kingdom, are made by the Secretary of State to the Indian Educational Service, which includes teaching and inspecting posts. The age is usually from 23 to 30. Appointments are in the first instance for two years, the salary beginning at Rs. 500 a month, with annual increments of Rs. 50 a month to Rs. 750 or Rs. 1,000, and with prospects of promotion if service is extended. The number of appointments varies from year to year, and is not large.

The Ecclesiastical Establishment, which forms a civil department, consists of the Bishops of Calcutta, Madras, and Bombay (others whose names are found at page 245 are not Bishops on the Establishment), and 150 Chaplains of the English and Scottish churches. Chaplains (who must be under 34 years of age) are on probation for three years after appointment, and receive a salary of Rs. 5,760 (£384) a year. Applications should be addressed to the Secretary of State, India Office. Certain allowances are also paid from Indian revenues to other clergymen, and to priests and ministers of other denominations when serving in British regiments.

Appointments are also made by the India Office to the Royal Indian Marine (limits of age for officers 17 to 22, for engineers 21 to 75), Bengal Pilot Service (age 18 to 22), Civil Veterinary Dept. (age not over 26), Financial Dept., Enrolled List (age 20 to 25), Geological Survey Dept. (age not over 25), Customs (age 20 to 25), Agricultural Service (age 23 to 30), Telegraph Dept., Public Works Accounts Branch, and Military Nursing Service (age 25 to 35).

The patronage of the Local Governments is considerable, but no one who is not a native, a covenanted civilian, or an officer of the Indian Army can be appointed to a post of over Rs. 200 a month without the sanction of the Government of India—the departments excepted from this rule being: Opium, Salt, Customs, Survey, Mint, Public Works, and Police.

Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a partial summary will be found in the *India List*, published by Messrs. Harrison, 59, Pall Mall, S.W. This volume also contains the full regulations regarding Indian appointments.

THE FINANCES OF INDIA FOR THE YEARS ENDED 31st MARCH, 1905, 1906, AND 1907.

The figures below are given in £, rupees being converted at 1s. 4d. the rupee, or 15 rupees to the £.

Total Expenditure from Revenue* £70,062 £71,236 £74,301

* The net receipts from State Railways, after deducting working expenses, &c., are now shown on the revenue side, instead of, as formerly, gross receipts being shown under revenue, and working expenses, &c., under expenditure. The grand totals of revenue and expenditure are consequently affected.

GROSS AND NET REVENUE AND EXPENDITURE. The statement of Gross Revenue and Expenditure exhibits all revenue receipts and payments therefrom, but as the entries on both sides are swollen by railway, irrigation, post office, telegraph, and mint receipts and payments (except railway working expenses, &c.), a clearer view of the financial position is obtained from the following statement of Net Revenue and Expenditure. In this departmental receipts, which are a set-off against expenditure, have been deducted, as also refunds and assignments, cost of cultivating and manufacturing opium, &c.

In 1904-5 there was a surplus of Revenue over Expenditure of £3,456,000, in 1905-6 of £3,092,000, and in 1906-7 (revised estimate) of £1,326,000.

SURPLUS	£3,456	£2,092	£1,326

CAPITAL EXPENDITURE.—In addition to the expenditure from revenue there was a capital outlay in 1905-6, not charged to revenue, of £9,410,000 on State Railways, and of £556,000 on Irrigation Works, besides £12,981,000 for redemption of liabilities in respect of the purchase of railways.

BURDEN OF TAXATION.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, Customs, and other duties which fall on persons in the native States, the burden in 1906-7 was 1s. 10½d. per head, or, if land revenue (which is equivalent to rent) be added, 3s. 5½d. per head. In 1907 the burden of taxation was lightened by a further reduction of the salt tax.

DEBT AND ASSETS.—On 31st March, 1907, the debt of India amounted to £234,488,000, viz., Sterling Debt, £147,519,000, and Rupee Debt (converted into sterling at 1s. 4d. the rupee), £86,969,000. There was no unfunded debt. Miscellaneous obligations (Savings Bank balances, &c.) amounted in addition to about £19,018,000. Up to the same date the Indian Government had devoted £103,646,000 to the construction of railways, and £27,784,000 to the construction of irrigation works. It had purchased, by cash payments, annuities, or the issue of India stock, eight railways, on which, at the time of purchase, £95,687,000 had been spent. It had lent £11,975,000 to native States, corporations, agriculturists, &c., and had advanced £11,078,000 to railway companies. Other assets were the Gold Standard Reserve of £16,518,500, and the cash balances in India and England, £10,320,000 and £5,607,000 respectively. The assets of India now exceed the liabilities. In 1906-7 a loan of £2,000,000 (3 per cent.) was raised in England, at an average price of about 94½ per cent., and a 3½ per cent. loan of 4½ crores (£3,000,000) in India at about 97½ per cent.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in thirty years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindars*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Sind, Assam, and most of Madras and Bombay) the *raiyatwari* tenure prevails, and each raiyat, or peasant proprietor, holds direct from the State. In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the actual rental, while in temporarily settled raiyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State in 1905-6 amounted to £19,831,000, of which £969,000 was due to irrigation and credited under that head.

THE OPTUM REVENUE.—Poppy may be grown only in parts of Bengal and the United Provinces, in the Punjab (for local consumption), and in the Central Indian (Malwa) native States.

Except in these States the manufacture is a Government monopoly. In 1905-6 49,200 chests of Bengal opium were sold for export. The monthly auction sales at Calcutta realised £4,898,033, the cost of production being £1,720,964, and the net receipts £3,008,457. In addition £567,882 (net) was derived from the duty (Rs. 600 a chest) levied in Bombay on Malwa opium. Most of the opium produced is exported to China and the Straits Settlements. Duty and licence fees on opium consumed in India (credited to Excise) yielded about £911,000. The total opium revenue, therefore, exceeded £4,487,000. It has been announced that a restriction of cultivation will take place in order to reduce exportation to China, if China reduces her own output.

EXCISE.—Licence fees and duties are levied on the sale of intoxicating liquors and drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded since 1897-8, and amounted to £5,632,000 net in 1905-6. Reforms in excise administration are being effected.

CUSTOMS.—The net revenue was £4,258,000 in 1905-6. (For rates of duty see page 499.) The export duty on rice yielded £767,000, and the countervailing Excise duty on Indian cotton goods £180,000.

INCOME TAX. This is levied on non-agricultural incomes of Rs. 1,000 to Rs. 2,000 at about 2 per cent., and on those above Rs. 2,000 at 2½ per cent. It yielded £1,315,000 (net) in 1905-6.

STAMPS.—Stamps yielded £3,876,000 (net) in 1905-6. Most of the revenue is from court fee and commercial stamps.

SALT.—The duty on salt, which was Rs. 2½ a maund (82 lb.) up to March, 1903, in practically the whole of India, was then reduced to Rs. 2. In March, 1905, it was reduced to Rs. 1½, and in March, 1907, to Re. 1. The rate for Burma remains as before at Re. 1. The total consumption of salt in British India in 1905-6 was estimated at 1,518,000 tons, yielding a net revenue of £4,110,000.

FORESTS.—Over 92,000 square miles of forests are reserved and scientifically worked by the State, while about 151,000 square miles are under State management. They yielded in 1905-6 a net revenue of £1,775,000. A third of the revenue comes from Burma.

TELEGRAPHS.—The length of telegraph wires on 31st March, 1906, was 243,840 miles, and the number of messages sent was 10,461,000. They yielded in 1905-6 a revenue of 3'49 per cent. on their capital cost of £6,204,500. In addition the Indo-European Telegraph Department gave a profit of 5'39 per cent. on its capital of £957,500. Owing to reductions in rates there is at present a net loss on telegraphs.

POST OFFICE.—The Post Office, which in 1905-6 conveyed 734 millions of letters, postcards, newspapers, &c., and issued 20½ millions of money orders, was worked at a net profit to Government of £76,000. Reductions in postal rates have recently become operative, and inland letter rates are the lowest in the world.

RAILWAYS.—The number of miles of railway open for traffic on 31st March, 1907, was 29,571, of which 952 were opened in 1906-7. The mileage under construction or sanctioned was 2,873 miles. Of the mileage open or in hand on 1st April, 1907, about 53 per cent. was on the standard gauge (5 ft. 6 in.), and about 41 per cent. on the metre gauge. Up to the end of 1906

there was a capital outlay of £256,759,000. The net earnings of the Indian railways in 1906 were £14,740,000, or a return of nearly 6 per cent. on the capital, against receipts of £14,494,000 in 1905. The number of passengers increased to 271 millions, and the goods traffic to 59 million tons. The net gain to the State on the working of the railways in India was £2,105,000 in 1904-5 and £2,002,000 in 1905-6. Moreover, these results were arrived at after charging to expenditure interest on capital outlay and sums on account of the redemption of capital through annuities. The total capital expenditure on railways in India was £7,189,000 in 1904-5 and £9,000,000 in 1905-6. Rates are very low, third-class passengers travelling on the average five miles for a penny. A Railway Board was constituted in 1905 to manage the construction and working of the railways, and in 1907 a special committee of inquiry into the railways was appointed. In 1906 the State purchased the Kalka-Simla Railway, and decided to purchase the Madras Railway, the last of the old guaranteed lines.

IRRIGATION.—On irrigation works the Government up to 31st March, 1906, have laid out a total sum of £32,000,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State of about 7 per cent. The area irrigated was nearly 23 million acres, while the annual value of the crops raised is estimated at about 108 per cent. of the capital outlay. The Irrigation Commission of 1913 recommended the construction of further works estimated to cost eventually nearly £30,000,000. Three large canals in the Punjab, besides less important works, have been put in hand. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1905-6 to £17,666,000:—Railway Revenue Account, including Railway Debt, £6,774,000; Interest and Management of Debt, other than that for Railways, £3,031,000; Stores, £2,253,000, of which £1,697,000 were Marine and Military; payments for British forces, troop service, &c., £942,000; Army non-effective charges, £2,385,000; Civil annuities, pensions, &c., £2,029,000. Furlough payments, civil and military, amounted to £645,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use in India is the silver rupee, which contains 165 grains of fine silver and 15 grains of alloy. Until June, 1893, the Indian Mints were open by law for the unrestricted coinage of silver into rupees, and the rupee circulated at nearly its intrinsic value. Owing, however, to the fall in the value of the rupee, legislation of that date closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and since January, 1898, has been practically stable at 1s. 4d. This rate has now a legal sanction, since an Act of 1899 makes the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount. At the present low price of silver, the rupee at 1s. 4d. is worth much more than the value of the silver which it contains. For some years after 1893 the coinage of Indian rupees almost ceased, but in recent years there have been large coinages.

From 1900-1 to 1906-7, the whole, and subsequently one-half, of the profit on silver coinage has been held as a special reserve—now called the Gold Standard Reserve—which is mostly invested in England in sterling securities, for the purpose of maintaining the rate of exchange between England and India. On 31st March, 1907, the investments of this fund in sterling Government stocks amounted to a nominal value of over £12,500,000, while £4,000,000 was held in India in rupees. India has a paper currency, and the 5-rupee note is legal tender everywhere in India proper. Other notes are a legal tender only within the circles of issue. A nickel currency was adopted in 1906 for annas.

ARMY.—The Army in India consists, first, of British troops, about 75,300; and, secondly, of the native troops (largely Muhammadans), about 158,000 (for details see page 487). In addition, the native Army Reserves number 32,240 men, and the Imperial Service Troops furnished by native States contribute 19,900, including cavalry, transport corps, and sappers. Further, there are 33,140 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. The Army was re-numbered and renamed in 1903. In 1902 Lord Kitchener (whose term has been extended till 1909) became Commander-in-Chief, and considerable changes have since been effected in the organisation, &c., of the Army. An Army Order of May, 1907, provided for a redistribution on 1st June, 1907, of the Army of India, which now consists of the Northern and Southern Armies, each under a general officer and staff. The Northern Army includes five divisions and the three independent frontier brigades, while the Southern comprises four divisions and the Burma and Aden garrisons. Factories for making rifles, cordite, and gun carriages have been erected. The transport service is being improved. A Staff College has been established at Quetta. Additions to soldiers' pay and enlarged expenditure on quick-firing guns, coast defences, stores, transport, factories, &c., have increased the net military expenditure from £14,968,000 in 1899-1900 to £19,934,000 in 1906-7. During 1907-8 there will be increased expenditure for artillery, reserves of arms and ammunition, telephone equipment, and improvements in general efficiency. The health of the Army has improved in recent years.

The ROYAL INDIAN MARINE consists of the four troopships of over 1,500 tons given below, three other steamers of about 1,000 tons each, and smaller craft for harbour and river navigation, surveying, and submarine mining. The trooping service between England and India is carried out by hired steamers, under the superintendence of the Director of Transports at the Admiralty. The principal officers and troopships of the R.I.M. are as follows:—

Director R.I.M., and Resident Transport Officer, Bombay, Capt. G. H. Hewett, R.N., A.D.C.

Rs. 2,500
Deputy ditto (Calcutta), Capt. W. Chandler.

Assist. ditto (Bombay), Capt. F. H. Elderton, D.S.O.

[The figures denote gross tonnage and indicated horse-power.]

Dufferin, 629½ (10,190). Comm. H. S. Black.

Hardinge, 5434 (9366). Comm. G. A. Rose.

Northbrook, 5038 (7429). Comm. (vacant).

Dalhousie, 1524 (2202). Comm. S. D. Vale.

For INDIAN DOCKYARDS, see page 205.

EDUCATION during 1906 benefited by increased grants for primary education. Reforms in university education are in progress, and increased attention is now being given to the development of primary, commercial, agricultural, and technical education. In State institutions education is secular. The institutions in 1905-6 numbered 160,434 and the scholars 5,242,040, of whom only 604,050 were females. Of the institutions, about 70 per cent. are maintained by the State or aided by grants, the remainder being private and unaided. There are five Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, and the Punjab. The Indian Universities Act of 1904 provides for a teaching system. Of the total expenditure on education in 1905-6, £3,528,560, £965,250 came from fees, and £1,825,570 from provincial revenues or local and municipal funds. The census of 1901 showed that only 1 male in 10 and 1 female in 144 can read and write.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities in 1905-6 were 749 in number, controlling a total population of 16,670,770, and receiving an income of £2,638,360 from taxation (octroi, taxes on houses and lands, water, lighting, conservancy rates, &c.), of £2,662,370 from loans, &c., and £967,700 from other sources. The members of municipal bodies are chiefly natives and non-official. In almost all districts in British India there are local district boards, partly representative. Nearly one-half of their total expenditure of £2,814,440 in 1905-6 was devoted to civil works, over one-fifth to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are about 7,000 officers exercising civil and criminal jurisdiction. Many of the superior and by far the majority of the inferior officers are natives. In 1905 about 2,869,560 civil cases were decided; while 1,767,000 persons were tried, and 862,000 convicted, in criminal cases, and of these 455 were sentenced to death, 1,822 to penal servitude, and 157,740 to imprisonment. The strength of the police in 1905 was 23,844 officers and 137,688 men. There were 741 prisons, with a daily average of 97,282 prisoners, in 1905. At the convict settlement of Port Blair (Andamans) there were 14,696 prisoners on 31 March, 1906.

VITAL STATISTICS.—The statistics of births and deaths are defective. The recorded death rate for British India in the decennium ended 1905 ranged from 26¼ per 1,000 in 1898 to 38½ in 1900. In 1905 it was 36¼. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoea, small-pox, and (since 1896) plague, being other chief causes. The deaths from plague up to the end of 1906 were about 4,692,400 in India as a whole. About 22,000 people are killed by snakes every year. In 2,411 hospitals and dispensaries, maintained mostly from public funds, 23,370,000 patients were treated in 1905. According to the census of 1901 there were 97,340 lepers in India.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, and botanical surveys are in operation, while the archaeological survey has been recently extended. The Meteorological Department is of great service in forecasting rainfall.

Trade of India.

SEA-BORNE TRADE.	1902-3.	1903-4.	1904-5.	1905-6.	1906-7.

Arms, &c. 794	and Cloth... 278
Metals..... 757	Metals..... 198
Machinery, &c. 221	Wool (raw)... 197

Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of its sea-borne trade, which is greater than that of Canada and Australia combined. The ordinary course of Indian trade shows a large yearly net export of merchandise and a net import of treasure. The above table exhibits the leading figures for the last five years in thousands of pounds sterling. It will be observed that the year 1906-7, like the four preceding years, was remarkably prosperous. During the three years ended 1906-7 India absorbed over £52,000,000 of gold and silver.

As will be seen, the great bulk of the imports consist of manufactured articles, while nearly 70 per cent. of the exports consist of food and raw materials. Of the imports in 1906-7, cotton goods and yarn constituted about 38 per cent. (nearly all from the United Kingdom), and metals and metal manufactures 20 per cent. The imports of cotton goods in 1906-7 were again of great magnitude. Large imports of machinery were a sign of industrial activity. Sugar imports continue to grow, but mineral oil tends to decline owing to the output in Burma. The imports of Government stores are mainly railway materials and army stores. In the export trade there was a decline in rice, in wheat and other grains, coffee, and cotton goods; but in jute and jute goods the trade was unprecedentedly great, while tea, hides and skins, raw wool and lac increased. Jute, raw and manufactured, was sold at a high price. The exports of indigo have fallen rapidly in recent years.

The following table shows the distribution of Indian sea-borne trade in 1906-7:—

COUNTRIES	PRIVATE MERCHANDISE ONLY.	
	Imports.	Exports.
Total Value (000 omitted) ...	£72,205	£115,388
	Percent.	Percent.
United Kingdom	66·8	26·9
Germany	5·3	11·0
China (including Hong Kong)	1·4	10·9
United States	2·3	9·0
Belgium	4·0	4·1
France	1·4	6·4
Straits Settlements	2·6	3·8
Austria-Hungary	2·8	3·3
Japan	1·5	4·1
Ceylon	0·8	3·7
Italy	1·0	3·3
Mauritius	2·0	0·7
Russia	0·1	0·4
All other countries	8·0	12·4

In imports, the United Kingdom comes easily first with nearly two-thirds of the total, and Germany alone of others sends more than 5 per cent. In exports, the United Kingdom is much less prominent, on account of the wide demand for India's raw produce for food and manufactures.

About 67 per cent. of India's total trade is with Europe, and about 21 per cent. with Asia.

CUSTOMS DUTIES.—Under the Indian Tariff Act, most goods imported pay a duty of 5 per cent. *ad valorem*. Cotton yarn and thread are exempted from duty; but the tax on other cotton goods is ½ per cent., a corresponding Excise duty being levied on those woven in Indian mills. There are special duties on arms and ammunition, which are taxed mainly for police purposes. Spirits pay generally Rs. 7 a gallon; and salt now pays Re. 1 a maund (82 lb.). Refined petroleum pays one anna a gallon. Iron and steel goods pay one per cent. Machinery, coal, raw cotton and wool, grain, oilcake, manures, living animals, unmanufactured tobacco, quinine, gold, precious stones and pearls, and a few other articles are duty-free. Bounty-fed sugars pay countervailing duties varying with the amount of the bounty given. There is an export duty of 3 annas per maund on rice. The Government of India have adopted an attitude of strong opposition to preferential tariff proposals. They point out that two-thirds of India's imports come from the United Kingdom, while among the remainder are many articles which this country cannot produce. The exports are chiefly commodities that are untaxed or lightly taxed in foreign countries, and if retaliatory imposts were levied on these India's trade would decline and her capacity to meet her financial obligations abroad would be impaired.

SHIPPING.—In 1906-7 the number of vessels which entered from and cleared to foreign countries was 9,329, with a tonnage of 13,775,436 tons. Of this tonnage, approximately 64 per cent. was from or to the United Kingdom and British possessions; and 80 per cent. of the total trade of India was under the British flag.

PORTS.—The chief ports are Calcutta and Bombay, which together do about 75 per cent. of the total trade. Next come Rangoon, Karachi, Madras, and Chittagong. These ports are administered by port trusts having wide powers, but subject to Government supervision.

FOREIGN LAND TRADE OF INDIA.—As registration is difficult, the statistics are of doubtful accuracy, and they include much that is really trade with border tracts administered by, or States subject to, the Indian Government. The most important countries are Afghanistan, Nepal, Kashmir, and the Shan States. The total frontier trade in merchandise and treasure has been as follows:—

	Imports.	Exports.	Total.
	000 omitted.	000 omitted.	000 omitted.
1904-5	£5,712	£4,501	£10,213
1905-6	6,266	4,904	11,170
1906-7	6,609	5,779	12,388

AGRICULTURE is by far the most important occupation of the people of India. Out of a surveyed area of 556 million acres in British territory in 1905-6, 249 millions were cropped or fallow, 105 millions cultivable, 135 millions not cultivable, and 68 millions under forests. The total area cropped was 238 million acres, of which nearly 10 per cent. was under wheat, 31 per cent. under rice, and 37 per cent. under other food-grains and pulses, 6 per cent. under oilseeds, and 7 per cent. under cotton, jute, and other fibres. The area under wheat has been considerably increased by the aid of irrigation in the Punjab and United Provinces. The cultivation of jute has been extraordinarily profitable. Sugar, spices, tea, opium, and tobacco are other important crops. The cultivation of indigo has greatly declined. The agricultural departments (central and provincial), which were greatly developed in 1906-7, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c., and distribute seeds. Owing to the increasing world demand for raw cotton, great efforts are being made to cultivate a superior long-stapled cotton in India.

MINERALS.—The output of the coal mines in India in 1906 was 9,783,000 tons. The production has much increased in recent years. Six-sevenths of the total comes from Bengal. The production of crude petroleum in India (chiefly Burma) has increased from 13 million gallons in 1896 to 142 millions in 1906. The production of salt in 1906 was 1,158,000 tons. The output of manganese ore has been much increased, and amounted in 1906 to 496,000 tons. About 20,000 tons of salt-petre are produced annually, mostly for export. The yield of gold (nearly all from Mysore) was 581,500 oz. in 1906. There is an increasing output and export of mica, and a fluctuating output of rubies and jade.

MANUFACTURES.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 210 cotton mills at work in 1906-7, mostly in Bombay and Ahmedabad, representing a capital of about £12,000,000, contained 5,545,000 spindles and 59,500 looms. Up-country cotton mills have increased. The production in 1906-7 was 654 million lb. of yarn (mostly of low counts) and 266 million lb. of woven goods. There is a tendency to produce finer yarns, and to pay more attention to weaving. The 39 jute mills, nearly all in Calcutta and its vicinity, with a capital of £5,396,000, contained 491,500 spindles and 24,000 looms. There were, in 1905, 6 woollen and 7 paper mills, 27 breweries, and various other factories. Complaints are made of the long hours worked in some Bombay mills. Reforms in the Indian Factory Act are under discussion.

NATIVE STATES OF INDIA.

THE Native or Feudatory States, whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only one-fifth of the population of India. The administration of these States, with a few temporary or unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the control of the Supreme Government. The chiefs are entitled to protection by the British, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misgovernment the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. Since 1858 six native chiefs have been deposed. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Generally speaking, the States are governed by their native Princes, Ministers, and Councils, with the help and advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta and Pishin), and Berar are still technically Native States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these countries, the native States have a combined area of 679,393 square miles, and a population of 62,461,549. The aggregate revenues of the chiefs are about £15,000,000, out of which a tribute of £597,430 (£333,000 from Mysore) was paid to the Government of India in 1905-6. They maintain troops of inferior military organisation to the aggregate number of 85,000 men in addition to their Imperial Service troops, numbering 19,900 in 1907. In many treaties it is provided that States shall furnish troops on the requisition of the Supreme Government, and troops of native States served in almost every Indian campaign of the 19th century. The States vary greatly in size and importance. Hyderabad, for instance, is as large as Italy, and the Nizam enjoys a gross revenue of nearly £2,500,000. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute subdivision, there are many chiefs of single villages. In the case of such petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over a native State in its internal affairs depends upon a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connection with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan,

but most of his people are Hindus. Although the native States, large and small, number as many as 680, only about 200 are of any real importance. The majority of these States represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. Thus the rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. Lord Curzon reformed the Chiefs' Colleges and inaugurated an Imperial Cadet Corps of Indian princes and nobles.

The salutes enjoyed by the native princes may be taken to indicate their relative importance. Those with eleven guns or more are addressed by the title of His Highness. Some of the chiefs, who by their enlightened administration or for other reasons have earned the special approbation of Government, have had their salutes increased, but such increase is personal and lapses at death. On page 501 is a list of 44 chiefs who have salutes of thirteen guns or more, with some particulars as to their States. In each group the States are given in alphabetical order. In addition there are 35 chiefs having salutes of eleven guns, and 26 chiefs with salutes of nine guns.

The native States may be classed under fifteen heads:—1. The Indo-Chinese group of States, and the numerous hill tribes of the North-East Frontier. 2. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 3. The Himalayan Hill States, west of Nepal (including Kashmir). 4. The numerous Afghan and Baluch tribes of the north-west frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of many of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the frequent expeditions against them in recent years. 5. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. 7. The three northern Muhammadan States of Khairpur in Sind, Bahawalpur to the north-east of it, and Rampur, from which Warren Hastings expelled the Rohillas in 1774. 8. The ancient sovereignties of Rajputana, lying between Sind and the United Provinces. 9. The States of Central India, lying to the north of the Nerbudda, and to the south and east of Rajputana. 10. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 11. Baroda. 12. The Southern Mahratta States. 13. Hyderabad. 14. Mysore. 15. The Malayalam States of Travancore and Cochin, lying together in the far south-west. The States of Hyderabad, Mysore, Baroda, Kashmir, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. Other States are under the various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Kashmir, Jaipur, Udaipur, Gwalior, Indore, Baroda, and Travancore and Cochin. Hyderabad is the premier State in India. The present Nizam was installed in 1884. Its capital, Hyderabad (448,466), is the fourth city in India in population.

TABLE OF PRINCIPAL INDIAN CHIEFS, SHOWING SALUTES TO WHICH THEY ARE ENTITLED, AND AREA, POPULATION, AND REVENUE OF THEIR STATES.

SALUTE AND TITLE OF CHIEF.	Date of Succession.	Area in sq. miles.	Population in 1901.	Prevailing Religion.	Revenue for last year recorded or approximate.
Salutes of 21 Guns.					
Baroda, The Maharaja (Gaekwar) of, G.C.S.I.	1875	8,099	1,952,692	Hindus	£ 812,000
Hyderabad, The Nizam of, G.C.B., G.C.S.I. &c.	1869	82,698	11,141,142	Hindus and Muhammadans	2,370,000
Mysore, The Maharaja of.....	1895	29,444	5,539,399	Hindus	1,672,000
Salutes of 19 Guns.					
*Bhopal, The Begum (or Nawab) of	1901	6,997	665,961	Hindus	191,000
*Gwalior, The Maharaja (Sindhia) of, G.C.S.I., G.C.V.O., A.D.C.	1886	29,047	2,933,001	"	1,076,000
*Indore, The Maharaja (Holkar) of	1903	9,500	850,690	"	475,000
*Jammu and Kashmir, The Maharaja of, G.C.S.I.	1885	80,900	2,905,578	Muhammadans	575,000
Kalat, The Khan of, G.C.I.E.	1893	90,000	507,472	"	53,000
Kothapur, The Maharaja of, G.C.S.I., G.C.V.O.	1884	2,855	910,011	Hindus	317,000
†Mewar (Udaipur), The Maharana of, G.C.S.I.	1884	12,753	1,018,805	"	176,000
†Travancore, The Maharaja of, G.C.S.I., G.C.I.E.	1885	6,730	2,951,038	{ Hindus and Christians }	666,000
Salutes of 17 Guns.					
Bahawalpur, The Nawab of.....	1899	15,000	720,877	Muhammadans	158,000
Bharatpur, The Maharaja of	1900	1,982	626,665	Hindus	231,000
Bikaner, The Maharaja of, G.C.I.E., K.C.S.I.	1887	23,311	504,627	"	199,000
Bundi, The Maharao Raja of, G.C.I.E., K.C.S.I.	1889	2,220	171,227	"	19,000
Cochin, The Raja of, G.C.S.I.	1895	1,362	812,025	{ Hindus and Christians }	178,000
†Jaipur, The Maharaja of, G.C.S.I., G.C.I.E., G.C.V.O.	1880	15,579	2,658,666	Hindus	410,000
Karauli, The Maharaja of, G.C.I.E.	1886	1,242	156,786	"	33,000
Kota, The Maharao of, K.C.S.I.	1889	5,684	544,879	"	186,000
Kutch, The Rao of, G.C.I.E.	1876	6,500	488,022	"	132,000
Marwar (Jodhpur), The Maharaja of	1895	34,963	1,935,565	"	337,000
Patiala, The Maharaja of	1900	5,412	1,596,692	{ Hindus and Sikhs }	376,000
Rewa, The Maharaja of, G.C.S.I.	1880	12,676	1,325,307	Hindus	191,000
Tonk, The Nawab of, G.C.I.E.	1867	2,553	273,201	"	95,000
Salutes of 15 Guns.					
Alwar, The Maharaja of	1892	3,141	828,487	Hindus	198,000
Banswara, The Maharawal of	1905	1,946	165,350	Animists	10,000
Datia, The Maharaja of.....	1907	912	173,759	Hindus	60,000
Dewas, The Senior Raja of	1900	446	62,312	"	4,000
Dewas, The Junior Raja of	1892	440	54,904	"	4,000
Dhar, The Raja of	1898	1,739	142,715	"	73,000
Dholpur, The Maharaj Rana of	1901	1,155	270,973	"	44,000
Dungarpur, The Maharawal of	1868	1,447	100,103	"	15,000
Idar, The Maharaja of, G.C.S.I., K.C.B., A.D.C.	1902	1,900	168,557	"	33,000
Jaisalmer, The Maharawal of	1891	16,662	73,370	"	9,000
†Khairpur, The Mir of, G.C.I.E.	1864	6,109	199,313	Muhammadans	86,000
Kishangarh, The Maharaja of	1900	858	90,970	Hindus	30,000
Orchha, The Maharaja of, G.C.I.E., G.C.S.I.	1874	2,080	321,634	"	40,000
Partabgarh, The Maharawal of	1890	886	52,025	"	15,000
Sikkim, The Maharaja of	1874	2,818	59,014	{ Buddhists and Hindus }	12,000
Sirohi, The Maharao of, G.C.I.E., K.C.S.I. ...	1875	1,964	154,544	Hindus	20,000
Salutes of 13 Guns.					
Jaora, The Nawab of	1895	606	84,185	Hindus	60,000
Kuch Behar, The Maharaja of, G.C.I.E., C.B.	1863	1,307	566,974	{ Hindus and Muhammadans }	150,000
Rampur, The Nawab of.....	1889	893	533,212	"	218,000
Tipperah, The Raja of	1896	4,086	173,325	" Hindus "	47,000

* Within their own territories these chiefs have salutes of 21 guns permanently.

† The present chief has a personal salute of two additional guns, or, in the case of Jaipur, of four additional guns.

The important frontier State of *Kashmir* (capital, Srinagar, 122,618) was granted to Gholab Sing by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. The present Maharaja came to the throne in 1885, since which date the administration of the State has been much improved under the advice of the British Resident. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. Of the Sikh States the most important is *Patiala*. *Rajputana* (pop. 9,723,302) extends some 460 miles from north to south, and is 530 miles in breadth. About half of the area is desert. It comprises 19 States of varying size and importance. Of these 16 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur* (capital, Jaipur, 160,157). The Rajput dynasties, which are the most ancient in India, go back before the Moghul Empire, and resemble feudal monarchies. A large part of the area of Jodhpur, Bikaner, and Jaisalmer is desert. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to overlook the administration, and give advice when it is required. The *Central*

India States, which are one-third less in extent than Rajputana, are split up into nearly four times as many States, of which all but 17 are petty chiefships. The two most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. In Jan., 1903, the Maharaja Holkar of Indore abdicated in favour of his son, a lad of twelve. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. In 1875 the reigning Gaekwar of *Bavda* was deposed, but the native administration was continued under an adopted heir. In 1881 *Mysore*, which had been administered by the Indian Government since 1831, was restored to native rule. The present Maharaja attained his majority in 1902, and was formally installed by the Viceroy. Numerous minor States are under the supervision or control of the adjacent British Provinces of Bengal, the Punjab, United Provinces, Central Provinces, Bombay, and Madras. The important States of *Travancore* and *Cochin*, attached to Madras, represent ancient Hindu dynasties. Their Christian population numbers about 900,000. The former stands third in population among the native States, and is exceedingly prosperous. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention.

Countries within the Indian Sphere of Influence.

THE native States of Nepal and Bhutan, though in India, enjoy a large measure of independence, and may be more conveniently treated as within the Indian sphere of influence than under the heading of Native States. Outside India, but within its sphere of influence, is Afghanistan. For French and Portuguese possessions in India, see pages 587 and 614.

NEPAL.

Sovereign, H.H. Maharaja Dhiraj Prithvi Bir Bikram Jang Bahadur Shah Bahadur Shamsher Jang, b. 1875; suc. 1881. Salute in British territory, 21 guns.

Prime Minister, H.H. Maharaja Sir Chandra Shamsher Jang, G.C.S.I., Rani Bahadur (1901).

Nepal (500 miles long by 100 miles broad; area, about 54,000 sq. miles; pop. about 4,000,000, chiefly Hindus and Buddhists), lying between British India and Tibet, occupies the S. slopes of the Himalayas, and includes, among other lofty peaks, Mt. Everest (29,141 ft.). Amid the wild, sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces and fifteen districts. It trades with British India, to which its exports in 1906-7 were £1,982,000, while its imports amounted to £923,000. The principal trade route is that between Katmandu and the Bengal frontier (76 miles). Nepal exports rice and other grains, oilseeds, ghi, cattle, jute, hides, spices, &c., and imports cotton goods, sugar, spices, tobacco, provisions, salt, petroleum, metals, &c. The revenue, realised chiefly from land rent, forests, and Customs duties, is over £1,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who claim to be Rajputs

and are Hindus in religion. The Maharaja is a Sisodia Rajput (Hindu). Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly, and in the recent difficulties with Tibet Nepal co-operated with the Indian Government. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister. The British Political Resident at the capital does not interfere in internal affairs, but foreign relations are controlled by the Indian Government. The army numbers about 45,000. Complimentary missions are sent quinquennially to China. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

CAPITAL, Katmandu (pop. 75,000) - *British Resident*, Maj. J. Manners Smith, C.I.E. & C. Rs. 2,500

BHUTAN.

Bhutan (area, about 20,000 sq. miles; pop. about 250,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance of £3,333 being now paid by the Indian Government as compensation. The government is dual in form, with a spiritual chief, the Dharma Raja who is an incarnation of the founder of the State, and a temporal chief, the Deb Raja, who governs. The chief councillor and virtual ruler, known as the Tongsa Penlop, created a K.C.I.E. in 1905, was chosen hereditary Raja in 1907. The relations between Bhutan and India are friendly, and, like Nepal, Bhutan cordially co-operated with the Indian Government in recent difficulties with Tibet. Its trade with India in 1906-7 was £93,000. There is no British Resident.

CAPITAL, Punakha.

AFGHANISTAN.

Amir of Afghanistan and its Dependencies, His Majesty Siraj-ul-millat-wad-din Amir Habibullah Khan, G.C.M.G.; b. 1872, succ. October 7, 1901. Salute in British territory, 21 guns.

Afghanistan (called Khorassan by the natives) lies on the N.W. frontier of India. Its area is estimated at 245,000 sq. miles, and its population at 5,000,000. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the Punjab and N.W. Frontier Province (boundary fixed in 1895). The northern boundary runs from Zulfikar on the Persian frontier, about 35 miles N. of the Paropamisus range, as far as Kushk, the Russian railway terminus on the branch line from Merv. It then runs N.E. to the Oxus, which forms the boundary from Khamiah to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled in accordance with the Durand agreement made with the Amir in 1903. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, the Helmand, and the Kabul. The climate is dry, with extreme temperatures in winter and summer. The population is very mixed. The Afghans (or Duranis) have been predominant since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashs, who belong to the Shiite sect. The national tongue is Pushtu.

The late Amir (1880-1901) established a strong central government, and introduced a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. Afghanistan is divided into six provinces, Kabul, Kandahar, Herat, Turkestan, Farrah, and Badakshan (with Kafiristan and Wakhan), which are under governors, with subordinate nobles and judges, police, and revenue officers. The late Amir first formed a national army, paid and controlled by himself, with transport services, &c. It comprises about 70,000 regulars and 20,000 irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for guns, rifles and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. There is bribery and evasion of the law. The only education is by the Mullahs. Most of the people are industrious cultivators, and the country has become more settled, peaceful, and prosperous. There is excellent irrigation and all profitable soil is utilised. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woolen, and hair cloths and carpets are manufactured.

Salt, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but have lately been improved, particularly where they may serve military purposes. Goods are conveyed by pack-animals. The trade of Afghanistan with India in 1906-7 was over £1,330,000. The exports to India are mainly fruits, raw wool, living animals, hides and skins, *ghi*, and drugs; while the imports therefrom are chiefly cotton yarn and piece goods, metals, tea, and sugar. Heavy import and export duties were imposed by the late Amir. The chief trade routes to India are the Khaibar Pass, from Kabul to Peshawar (191 miles), and the road from Kandahar to Quetta (125 miles). The Sind-Pishin railway terminates at Chaman, on the frontier, 65 miles from Kandahar, from which a fine road of 318 miles runs to Kabul. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. Russia gives bounties and rebates. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £500,000, including the subsidy of £120,000 a year from the Government of India. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties. There is a native British Agent (a Muhammadan) at Kabul. The Amir has an agent with the Government of India, and an agent at Peshawar, and also commercial agents in England and India.

By agreement with the Amir, the "buffer State" of Afghanistan has no foreign relations with any Power except the Government of India. In all other respects it is independent, and the rule of the Amir despotic. The modern history of Afghanistan may be said to date from 1881, when Abdurrahman, the late Amir, was recognised as ruler. As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the late Amir since 1880 were renewed by the treaty of 21 March, 1905. Under this treaty the British Government engaged to refrain from interference in internal affairs, but promised to preserve the safety and integrity of Afghanistan against any unprovoked attack, provided that the Amir acted as a friend and ally, and followed unreservedly the British Government's advice in all his external relations. The Amir visited India in 1907. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence, and engaged to conduct all her political relations with Afghanistan through the intermediary of Great Britain. Great Britain declared her intention not to change the political status of Afghanistan, to exercise only a pacific influence, and not to take or encourage measures that might threaten Russia. After reciting the treaty with the Amir in 1905 Great Britain engaged not to annex or occupy any part of Afghanistan in contravention of that treaty. It was agreed that specially designated Russian and Afghan frontier officials might establish direct relations for settling local non-political questions, and that Great Britain and Russia should enjoy equality of commercial facilities.

CAPITAL, *Kabul* (about 150,000). The chief commercial centre is *Kandahar* (30,000). Other provincial capitals are *Herat* (12,000) and *Tashkurgan* (27,000).

British Agent (Kabul), Malik Khuda Bakhsa Tiwana.

Foreign Countries Contiguous to India.

PERSIA borders on Baluchistan, through which a new trade route runs *via* Nushki to Persian Seistan, but traffic is small (£36,000 in 1906-7). A railway was opened in 1905 from Quetta to Nushki, whence there is a caravan route, with wells, rest-houses, telegraph, &c. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905 by Col. McMahon, who, under the treaty of 1857, was deputed to examine a Perso-Afghan dispute arising from a change in the course of the Helmand. In Persia officers representing British and Indian interests work side by side. By the Anglo-Russian Convention of August, 1907, S.E. Persia, east of a line drawn from the Afghan frontier, *via* Gazik, Brijand, Kerman, and Bunder Abbas, is assigned as a region in which Russia will not seek political or commercial concessions (for railways, &c.), or oppose similar concessions supported by the British Government (see also p. 610). In the negotiations Russia did not deny the special interests of Great Britain in the Persian Gulf, in which the policy of Great Britain was declared to be the preservation of the *status quo* and the maintenance of British trade.

The Persian Gulf.—For three centuries England has taken the lead in Persian Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, laid down buoys and cables. England and India still have the lion's share of the trade, 97 per cent. being carried in British vessels. The bulk of it is done by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; while at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. The southern shores are Turkish from Katif Town up to the vicinity of Koweit, and beyond those limits as far as Basra.

Bahrein (capital, Manama), governed by Sheikh Isa and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Katr). It is the head-quarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export; rice, cotton goods, dates, and spices the chief imports. In 1906 the exports were £1,517,500, and the imports £1,637,000. The people (about 75,000) are Muhammadans. The Sheikh has been in treaty relations since 1861 with the Government of India, which has a Political Agent at Bahrein. In 1880 he engaged not to make treaties with any other State.

The independent tribes on the *Pirate* (Arab) Coast from Ras-el-Kheima to Oseid are bound together under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf, stationed at Bushire, is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. The trade of the Arab coast ports in 1905 was £670,000, mostly exports of pearls to India *via* Lingah and Bahrein. Important caravan routes converge at Koweit, the proposed terminus of the Baghdad railway, which has an excellent harbour, recently buoyed by the British India Steam Navigation

Company, whose steamers call fortnightly. The Sheikh of Koweit (Mubarak bin Sabah) is under treaty obligations with the Indian Government in respect of Koweit and its vicinity. The Sultan of Oman (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court (see page 609).

Political Resident, Persian Gulf (Bushire), A. L. P. Tucker, C.I.E. per mensem Rs. 2,750
Do., Turkish Arabia (Baghdad), Maj. J. Ramsay, C.I.E. Rs. 2,267
Political Agent, Muscat, Maj. W. G. Grey, Rs. 1,440
Pol. Agent, Bahrein, Capt. F. B. Prideaux Rs. 1,440
 (For Persia, see pp. 610-612).

ASIATIC RUSSIA.—The pressure of Russia is felt politically and commercially through Persia and Afghanistan. The Anglo-Russian Convention of Aug., 1907, recognises N.W. Persia as a region in which Russia, and S.E. Persia and Afghanistan as regions in which Great Britain, have special interests.

Russian Turkestan (capital, Tashkent) comprises the province of Trans-Caspia, the Khanate of Bokhara, and part of the Pamir Region.

Trans-Caspia (area, about 220,000 sq. miles; pop. in 1897, 372,000, chiefly Turcomans).—The principal towns are Ashkhabad (19,500) and Merv (8,750). The Trans-Caspian Railway runs from Krasnovodsk, on the Caspian, *via* Merv, to Samarkand (pop. 59,000) and Tashkent (pop. 164,000). The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with the main Russian system at Orenburg. The railways have much increased Russian trade. The soil, which is irrigated and highly cultivated in the oases, produces cotton on a large scale.

Bokhara (area, 92,300 sq. miles; pop. 2,500,000) has been a vassal State since 1868. By the treaty of 1873 no foreigner can enter Bokhara without a Russian passport. The Amir, Syed Abdul Ahad (*succeeded* 1885), is autocratic. There is a native army of 15,000. The Uzbeqs, fanatical Sunni Muhammadans of Turkish extraction, are the dominant race, but Turcomans, Kirghiz, Tajiks, and Sarts are numerous. The people are largely nomadic. The country consists mainly of mountains and deserts, but a portion is well irrigated and produces cotton, silk, cattle, &c. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers. The capital, Bokhara (pop. about 200,000) is a great commercial city. Karshi (60,000) and Charkui (7,600) are other busy trade centres.

Russian territory stretches into the *Pamir Region*—the "Roof of the World"—a wind-swept, icy mountain-land, snow-bound for half the year. Its southern boundary was fixed in 1895 by the Anglo-Russian Pamir agreement.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province of China proper, Yunnan.

Chinese Turkestan or *Sin-chiang* (area, about 550,000 sq. miles; pop. about 2,000,000) consists of oases and expanses of desert, surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three routes into China, three difficult passes into Russian Turkestan, and two still more difficult ones into India. The

boundary between Kashmir and Chinese Turkestan has not been officially defined. The country is poor. Yarkand, Khotan, Aksu, and Kashgar are the chief towns. Russia has special treaty rights in the dependency. There are British and Russian consuls at Kashgar. Trade with India has to be carried over the Karakoram Pass (18,500 feet) *via* Ladakh, in Kashmir, or over the Kilik Pass (15,800 feet) in the Hindu Kush *via* Hunza. This trade was valued in 1906-7 at £158,000.

Consul, Kashgar, G. Macartney, C.I.E....Rs. 1,400

Tibet, called Bodul by the natives (estimated pop. 1,500,000) is a dependency of China. It forms the northern frontier of India, from Kashmir to Burma, but is separated therefrom by the Himalayas. Tibet is a plateau seldom lower than 10,000 feet, protected by the Kuenlun on the north and the Himalayas on the south. In Tibet rise almost all the great rivers of India and China. Much of the country is still unexplored. Tibet possesses gold, turquoises, and other minerals. Northern Tibet is arid, but in the south there are fertile tracts in the valley of the Tsan-po. There is a large trade with China, in spite of the difficulties of transport over long, mountainous routes. India imports from Tibet wool, borax, salt, living animals, and musk, in exchange for cotton and woollen goods, coral, and grain. The total trade in 1906-7 was about £234,000. Trade passes from Bengal through Sikkim or direct from the Punjab and the United Provinces. The trade routes from Simla and from Siliguri to the Tibet-Sikkim frontier are being improved. A new road has been made over the Natch Pass. The once mysterious capital, Lhasa (11,830 ft.), is 333 miles from Darjiling (Bengal). It is the religious centre of Lamaism, a special form of Buddhism, with about 30 great monasteries, and contains an estimated population of 30,000 (of whom 20,000 are monks), closely packed in dirty, irregular streets. Owing to the opposition of the Lamas, or monks, who control the country, access was denied to European travellers after 1846. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung, beyond the Sikkim frontier. Owing to the failure of the Tibetans to observe this Convention, and to their violation of the frontier, a political mission was despatched from India, with a military escort, under Colonels Younghusband and Macdonald. After a very arduous march and several sharp fights, Lhasa was reached on 3 August, 1904. A new convention having been signed (7 Sept.), the mission left Lhasa on 23 Sept. This convention provided for the erection of boundary pillars between Sikkim and Tibet; for the establishment of trade marts at Gyantse and Gartok as well as at Yatung, and for unrestricted traffic by existing routes according to a tariff to be agreed upon; for the appointment of British and Tibetan agents at the trade marts; and for payment, in three annual instalments, of an indemnity of £500,000 (reduced to £166,667), the Chumbi Valley to be occupied till the marts had been properly open for three years and the indemnity paid. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (27 April, 1906) China agreed to the terms of the Conventions of 1890 and 1904 (including telegraph lines to the trade marts), and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet

or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognise the suzerain rights of China in Tibet, agree to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. The new trade marts have been opened. The Chinese Emperor appointed the Tashi Lama to succeed to the dignities of the former ruler, the Dalai Lama, who fled to Mongolia before the arrival of the British Mission at Lhasa. In Dec., 1905, the Tashi Lama visited the chief cities in Northern India. In 1906 the Chinese High Commissioner to Tibet initiated a series of reforms in the administration. A conference regarding regulations for trade between India and Tibet was held in 1907.

Yunnan (area about 146,000 sq. miles; pop. about 12,500,000), a Chinese province to the N.E. of Burma, is a plateau of about 5,000 feet, intersected by broad but unnavigable rivers and high mountains, and dotted with fertile plains. Large tracts are sparsely peopled and uncultivated. The chief crops are opium, of which the production is large, and rice. Tin, copper, and salt are worked. The roads in Yunnan are bad, and transport, which is by pack-animals, is expensive. By the Anglo-Chinese agreements 1894 and 1897, a boundary was fixed between Burma and Yunnan, and arrangements were made about trade, extradition, &c. The boundary towards Assam and Tibet is undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. The W. part of Yunnan, with its trade centres of Hsiakuan and Tali-fu, is reached by a difficult but much-frequented route from Bhamo, in Upper Burma, and the direct trade was about £356,000 in 1906-7. Burma imports from Yunnan raw silk, living animals, &c., and exports raw cotton, cotton goods, and jade. A railway from Bhamo to Têng-yueh (120 miles) is under survey. A railway from Loakai, on the French Tonkin frontier, to Yunnan-fu is well advanced. There are treaty "ports" at Têng-yueh, near the Burma frontier, at Ssumao, and at Mengtzu, near the Tonkin frontier. Opium and tin, the only important exports through Tonkin, are exchanged for cotton yarn and piece-goods, petroleum, &c. British consuls are stationed at Têng-yueh and Yunnan-fu (see p. 577).

CAPITAL, *Yunnan-fu* (pop. 70,000).

FRENCH LAOS.—Through the cession of a portion of Laos by China in 1894, France obtained access to the left bank of the Mekong at a point where this river forms the boundary of the Shan States of Burma. The territory forms part of French Indo-China (see pp. 587-8).

SIAM (see pp. 619-620) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier. In 1906-7 the value of the total trade was £771,000. The boundary of Burma and N. W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

Imperial British Dominions.

THE following accounts of the Imperial Dominions have been revised by the various Governments, to whom the Editor begs to return his warmest thanks. He is also indebted to the "Colonial Office List," which contains information upon every subject connected with the Imperial Dominions.

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between $5^{\circ} 53\frac{1}{2}'$ – $9^{\circ} 50'$ N. lat. and $79^{\circ} 48'$ – $82^{\circ} 52'$ E. long. Its area is (with outlying islands) 25,481 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. There are no great extremes of temperature, and throughout the low country the thermometer varies little in the course of the year, the mean temperature at Colombo being nearly 81° F. The coolest months are December and January; the hottest are April and May.

The estimated population on December 31, 1906, was 3,984,985, the most important element being the Singhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. (Census, 1901: Singhalese, 2,330,807; Tamils, a race of Southern India, 951,740; Moormen and "other races," 253,625; Burghers and Eurasians, 23,482; and Europeans, 9,211, including the military and shipping. "Other races" include a sprinkling of Veddahs, who are perhaps the aboriginal race of the island, and of Afghans and Malays.) In 1507 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but five years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of padi and dry grain. The principal exports are tea, coffee, and products of the coco-nut palm, cinchona, rubber, cocoa, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fourth of the island is under cultivation, and the leading areas in 1906, in acres, were:—Rice, 634,567; other grain, 137,007; tea, 461,260; coffee, 3,174; coco-nuts, 987,020; rubber, 50,472; cinchona, 1,172; cinnamon, &c., 43,383; cocoa, 40,498; and tobacco, 39,000. Among the more important native industries are gold, silver, ivory and tortoise-shell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and the pearl fishery in the Gulf of Mannar, off the N.W. of the island, yielded a revenue of Rs. 2,405,645 in 1905. The manufacture of salt is a Government monopoly, and yielded in 1906 a revenue of Rs. 1,342,597.

There are 562 miles of railway open, 495 being 5 ft. 6 in. gauge and 67 miles 2 ft. 6 in.; and in 1904 the post and telegraph offices numbered 375, there being 3,197 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of 5

members, and a Legislative Council of 18 members, including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Mohammedans. The islands are unhealthy, and the main exports are dried fish, cowry shells, coco-nut oil, and tortoiseshell.

Colombo, distant 6,300 miles; transit, 16 days.

STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements are Singapore, Penang, or Prince of Wales's Island (with Province Wellesley and the Dindings), and Malacca; the name being derived from the Straits of Malacca, on which the Settlements are situated. The Cocos or Keeling Islands, a coral group in the Indian Ocean, on the route from Ceylon to Australia, have since 1886 been a dependency of the Straits Settlements. Christmas Island, also in the Indian Ocean, was formally annexed to the Settlement of Singapore in 1900, and the Cocos Islands in 1903. The colony has an entire area of about 1,500 square miles. The population in 1901 was 572,249 (Singapore, 228,555; Penang, Prov. Wellesley and Dindings, 248,207; Malacca, 95,487). The great bulk of the population consists of Chinese and Malays.

The Government consists of a Governor, assisted by an Executive Council of 8 members, and a Legislative Council of 8 official and 7 unofficial members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang. The Resident Councillors of Penang and Malacca have seats in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and three puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. There is also in Singapore and Penang a Vice-Admiralty Court; and in each settlement there are ordinary magistrates' courts, together with Courts of Requests.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1906 amounted in Singapore to 118.38 inches, in Penang to 102.21 inches, and in Malacca to 80.57 inches.

The exports comprise—gutta-percha, gambier, pepper, india-rubber, horns, hides, canes, sugar, rice, sago, tapioca, spices, dye-stuffs, copra, rattans, coffee, tobacco, gums, tin, &c.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 206 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16' N. and long. 103° 53' E., with 228,500 inhabitants in 1901. The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and the Netherlands Indies. For its defence several batteries to carry heavy guns have been constructed, at a cost of nearly £100,000, paid by the colony, for which the Imperial Government has furnished guns. The trade returns for 1905 (including inter-settlement trade) amounted to \$481,707,219, the value of exported tin being \$46,332,623.

The number of merchant vessels entered and cleared in 1906, exclusive of native craft, was 10,571, with a tonnage of 13,334,338. The total for the whole colony was 18,279, with a tonnage of 19,711,498. The total native craft entered at all three ports during the same year was 15,649 (tonnage, 737,921). The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. It is a free port; no duties are levied upon anything except opium, spirits, wines, and beer consumed in the colony. The opium and spirit trades are farmed out to Chinese, and the Chinese element is conspicuous among the trading classes.

PENANG is the northernmost of the Settlements. It includes Pulo Penang or Prince of Wales's Island (on the eastern side of which is Georgetown, the port and capital—population 1901, 128,230); and the strip of mainland opposite, known as Province Wellesley (population 1901, 115,264).

The DINDINGS, 80 miles to the south of Penang, have also been included in the Settlements for administrative purposes under the Resident Councillor, who also has consular authority over the Siamese Tributary States on the west coast of the peninsula between Province Wellesley and British Burma (population 1901, 4,113). Penang island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 28' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kédah. Area, 107 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1906 (including inter-settlement trade) amounted to \$85,255,337; the export of tin from the port being \$42,516,714 in 1906.

PROVINCE WELLESLEY is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kédah in 1798, with some land S. of the Krian river acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, sugar, spices and tapioca plantations.

The Dindings are at present little developed; but they contain what is considered the best port on the western side of the peninsula, named Lumut, where a District Officer is stationed, and steamers call regularly at Pulo Pangkor. They comprise a group of islands (of which Pulo Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula cut out of the State of Pérak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N. W. of Singapore, comprises an area of about 659 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, 17 March, 1824, being exchanged for the British settlements in Sumatra.

Revenue (1875, \$118,000), 1906 \$707,880
Aggregate trade, 1906 \$10,018,119

(Including tapioca, \$1,852,194, and including rail statistics \$1,878,143, now given for first time.)

Singapore, distant 8,700 miles; transit, 22 days.
Penang, 20 days; and Malacca, 24 days.

THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Pérak, Sélángor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a British Resident General, who controls the Residents subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed

by their native rulers under the above-mentioned control.

There are 428 miles of railway open, and a line connecting Penang with Singapore is under construction, all constructed from revenue, 1,860 miles of first-class roads, and 687 miles of bridle-paths, while the principal rivers are navigable for small boats. The chief export and source of revenue is tin, of which about seven-tenths of the world's supply is produced. Coffee, coco-nuts, sugar, rice, and rubber are extensively cultivated. The climate is very uniform, and may be described as hot and moist. There is no well-marked dry season, and the rainfall in the low country is about 95 inches. The average maximum temperature is 90°, and the minimum 70°.

The States maintain a highly efficient regiment of Sikh troops (the Malay States Guides), and are policed by a mixed force of Indians and Malays, officered by Europeans.

HONG KONG.

The Crown Colony of Hong Kong consists of an island situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10'—22° 17' N. lat. and 114° 6'—114° 18' E. long., and of a portion of the mainland.

Hong Kong was first taken possession of by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842, British

Kowloon being subsequently acquired by the Peking Convention of 1860; and the "New Territories," being the southern part of the Kwangtung province, by a lease signed June 9, 1898. It is a military and naval station for the protection of British commerce. The island is about 11 miles long and from 2 to 5 miles broad, with an area of 30½ square miles; the whole colony comprises an area of about 400 square miles. The island lies close to the mainland, being separated at one point by a narrow strait (Lyemmoon) not more than a quarter-mile wide. The city of Victoria lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. The port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered (1905) 17,147,393 tons; (1906) 16,394,508 tons.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 2,000 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The thermometer ranges from a minimum of 32° in February to a maximum of 93° in August. The average annual rainfall is 85 in., of which not less than 70 in. are received between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly opium, sugar, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, &c.

The population of the colony in 1906 was 411,972, of whom 391,141 were Chinese. The white residents, including naval and military, numbered 20,831.

Much encouragement is given by the Government to education in the colony. In 1906 there were 85 schools subject to Government supervision, attended by 5,496 pupils.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 8 members, together with a Legislative Council of 14 members, including himself and a representative from the Chamber of Commerce. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

WEI HAI WEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on the 1st day of July, 1898, and lies in latitude 37° 30' N., longitude 122° 30' E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and an estimated population of 150,000, in which are included 4,000 resident on the island of Liu Kung. In addition to the leased territory there is a sphere of influence which comprises that portion of the province of Shantung lying east of the meridian 121° 40'—an area of 1,500 square miles. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The Government is administered by a Commissioner, who discharges his functions under the Weihaiwei Order in Council of 24th July, 1901, by which he is empowered to make ordinances, subject to the approval of the Secretary of State for the Colonies, for the administration of the territory, and provision is made for a High Court, in which all jurisdiction, civil and criminal, is vested, subject to an appeal to the Supreme Court of Hong Kong, and for District Magistrates Courts. The village communities are administered through their headmen. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the port of Shanghai.

Commissioner, J. H. Stewart Lockhart, C.M.G. Sec. to Government and Magistrate, R. Walter. District Officer and Magistrate, R. F. Johnston. Medical Officers, H. Hickin, M.B.; W. M. Muat.

BORNEO.

Borneo was discovered by the Portuguese in 1521, and is situated in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S., and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malaya, Kyans, Papus or Negritos, Chinese, and Bugis (the aboriginal Celebes). Rather more than two-thirds of the island is now included within the Dutch possessions in the East Indies. The remainder of the island is under British protection.

THE BRITISH NORTH BORNEO COMPANY.

The territory of British North Borneo occupies the northern part of the island of Borneo, with a total area of about 31,000 square miles, and a coast line of over 900 miles. The population is about 175,000, consisting mainly of Mohammedan

settlers on the coast, and aboriginal tribes inland, with some Chinese traders and artisans. The interior is mountainous, Mount Kinabalu being 13,700 feet high, and is densely timbered.

The chief town is Sandakan, on the north-east coast. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole district is divided into ten provinces. The laws are based on the Indian codes of criminal and civil procedure, by local proclamations. There is an Imam's Court for Mohammedan law.

	1904.	1905.	1906.
Revenue	\$24,655	\$959,539	\$836,186
Expenditure ...	549,854	535,965	497,745
Exports	4,272,674	4,537,486	4,857,943
Imports	2,896,271	2,836,676	2,988,976

The principal sources of revenue are opium, spirit farms, birds'-nests, court fees, stamp duties, licences, import duties, royalties, land sales, &c. The chief products are timber, tobacco, sago, rice, gums, gutta-percha, coco-nuts, rattans, and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper, and gambier on a large scale. Coal and gold have been found. Exports of leaf tobacco, (1905) \$2,652,689; (1906) \$2,943,645.

Borneo is now connected by cable with the outer world by a branch of the cable between Labuan and Singapore, and between Labuan and Hong Kong. A telegraph line has been constructed from Mampakol, where the cable reaches land, to Sandakan, where there is also a telephone exchange. A railway has been constructed from Weston to Beaufort (20 miles) where it connects with the line from Jesselton (55 miles), which has been extended to Tenom (33 miles). A further extension is under construction.

There is a native military force of 600 men under European officers, with one machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

List of Officers (British North Borneo).

Governor and Commander-in-Chief, E. P. Gueritz, and entertainment allowance	\$10,200
Finance Commissioner, A. Cook	6,324

BRUNEL

Sultan, H.H. Mohamed Jemal-ul-alam, *succ.* 11 May, 1906.

A native State on the west coast of the island of Borneo. The total area exceeds 3,000 square miles. The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunel, has a population of nearly 10,000, and is built entirely on the water, communication being possible only by boat.

British Resident, Brunei, M. S. H. McArthur. Brunei is 5 hours by steamer from Labuan.

SARAWAK.

Raja, H. H. Sir Charles Johnson Brooke, G.C.M.G., born 3 June, 1829; <i>succ.</i> his uncle, the Raja Sir James Brooke, 11 June, 1863; m. 1869, Margaret Alice Lily de Windt, of Highworth, Wilts.	
Heir, Charles Vyner Brooke (H. H. the Raja Muda), b. 26 Sept., 1874 (administering the Government during the absence of H. H. the Raja).	
Resident, 1st Div., Hon. Sir Percy Cunyng-hame, Bart.	\$7,200
Resident, 3rd Division, H. H. the Raja Muda (<i>acting</i>)	5,400
Commandant, Stuart Cunyngchame	2,400
Treasurer, Hon. F. H. Dallas	5,760
Postmaster-General, C. C. Robison	4,200
Commissioner of Public Works and Surveys, &c., H. F. Carew-Gibson, A.M.I.C.E.	£600
Principal Medical Officer, A. J. G. Barker	\$4,800

The Sarawak territory lies on the west coast of Borneo, with a seaboard of 400 miles, an area of about 50,000 square miles, and a population of about 600,000, composed of various races. The government of this district was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Raja Brooke of Sarawak, and was uncle of the present Raja. Other concessions have been made in 1861, 1882, 1885, 1890, and 1904, when the Limbang River was obtained. The Lawas River was purchased from the B. N. Borneo Co. in 1906. The country produces sago, gutta-percha, india-rubber, beeswax, birds'-nests, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. Gold exports, (1904) \$1,789,773; (1905) \$1,824,320; (1906) \$415,470.

	1904.	1905.	1906.
Revenue	\$1,321,879	\$1,353,477	\$1,327,800
Expenditure	1,225,384	1,240,523	1,262,169
Imports	5,476,770	5,881,116	5,174,280
Exports	7,573,289	7,541,101	6,883,704

CHIEF TOWN, Kuching. Distance from London, 8,700 miles; transit, 25 to 30 days. Telegrams sent by post from Singapore; steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday arriving on Thursdays.

LABUAN

is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16' N. lat. and 115° 15' E. long. Its area is about 31 square miles; and its population is 8,411. It was ceded to Great Britain by the Sultan of Borneo in 1846, being at that time uninhabited. The island has a fine harbour, and possesses extensive coal-mines, which are now being developed, the annual export being nearly 50,000 tons. The exports consist of cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage; a rifle range is often utilised by passing ships of the Royal Navy; there is a cable station of the E.E. A. and China Telegraph Company on the island. Revenue (1905), \$47,055; expenditure, \$61,854; imports, \$1,087,664; exports, \$1,301,349.

The government is administered by the Governor of the Straits Settlements.

Governor, Sir J. Anderson, K.C.M.G.
Resident, M. S. H. McArthur.

THE Imperial Dominions in North America include the whole of the northern part of that continent, excepting Alaska, and the small islands of St. Pierre and Miquelon, in the Gulf of St. Lawrence, and extend from the United States northern boundary to the Arctic Ocean. From a physical point of view the whole region may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The country possesses great mineral wealth, and coal, gold, silver, copper, nickel, lead, petroleum, and asbestos are produced, while iron, phosphates, salt, graphite, &c., occur; the total value of the minerals produced in 1906 was about \$80,000,000. The soil is generally fertile; all the products of the temperate zone are cultivated, and Canada, with its vast wheat-growing belt in Manitoba and the North-West, justifies its claim to be "Britain's Granary."

THE DOMINION OF CANADA.

The Dominion of Canada includes the various Provinces of North America formerly known as Upper and Lower Canada (now Ontario and Quebec respectively), New Brunswick, Nova Scotia, Prince Edward Island, British Columbia, and the territories of the Hudson Bay Company, now styled Manitoba, Saskatchewan, Alberta, the North-West Territories, and the Yukon Territories; in fact, the whole of British North America except Newfoundland and Labrador. This territory, nearly as large as Europe, stretches from the Atlantic to the Pacific Ocean, and is estimated to contain a total area of 3,745,574 square miles, and a population of 5,766,606, which, notwithstanding its diversity of origin, is fast being welded into one harmonious and homogeneous whole. The descendants of the French colonists reside chiefly in the Province of Quebec, where, out of a total population (1901) of 1,648,898, 1,429,260 are Roman Catholics, the majority of whom still very generally use the French language. A Religious Census of Canada was taken in 1901, and the numbers were:—Roman Catholics 2,229,600, Methodists 916,886, Presbyterians 842,442, Church of England 680,620, Baptists 316,477, Congregationalists 28,293, and Lutherans 92,524. Canada possesses an Active Militia numbering 54,097 men (including infantry, cavalry, and artillery), and a reserve estimated at 1,030,000. The table on page 513 shows the expansion of the revenue, particulars being given for 1868, 1878, and 1888-1907. The revenue has increased from \$13,687,928 in 1867-8 to \$88,983,255 in 1906-7, and there has been a total net surplus since Confederation of \$139,137,190. The population has increased from 1,538,500 in 1841 to 5,371,315 in 1901, and 6,504,900 (*estimated*) in 1907, the intermediate enumerations being (1851), 2,380,988; (1861), 3,182,418; (1871), 3,635,024; (1881), 4,324,810; and (1891), 4,833,239. In 1881 there were 35 cities and towns of 5,000 inhabitants and upwards, having a total population of 660,040; in 1901 there were 62 of such cities and towns, and their total population was about 1,330,000. Montreal has a population of 267,730 (or with suburbs, over 350,000), and Toronto, the capital of Ontario, has over 272,600 inhabitants. Ottawa, the political capital, has in 1907 69,756 inhabitants; Winnipeg, in Manitoba, from 241 in 1871, has grown to 42,300 in 1901, and the census of 1906 gives 90,234. Vancouver, in British

Columbia, which had no existence in 1885, numbers over 26,000. The city of Dawson, the "business centre" of the Klondyke gold region, was a barren waste in 1897, and in 1901 had a population of 9,142. The general rate of increase throughout the Dominion in the last decade was a little over 11 per cent.

Canada was originally discovered by Sebastian Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1865. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America. In 1870 the Province of Manitoba was formed, and, with the remainder of the Hudson Bay Territory, then known as the North-West Territories, admitted into the Dominion. In 1905 the Provinces of Saskatchewan and Alberta were created, having previously formed part of the North-West Territories. British Columbia was admitted to the Dominion in 1871, and Prince Edward Island in 1873. By chaps 3 and 27 of the Acts of 1905, the four provisional districts of Alberta, Assiniboia, Saskatchewan, and Athabaska were formed into the two Provinces of Alberta and Saskatchewan, and were admitted into the Dominion on the 1st Sept. 1905, and in 1907 the territory of Yukon was annexed to the Province of Quebec. Newfoundland remains a separate colony.

OTTAWA is 3,540 miles from London; letters are nine to ten days in transit. Telegraph charges, from 1s. to 3s. 2d. per word.

GOVERNMENT.

Governor-General and Commander-in-Chief, Right Hon. the Earl Grey, G.C.M.G. (appointed 1904 for five years)	£10,000
Aides-de-Camp, Capt. D. O. C. Newton, Middx. Regt.; Lieut. F. A. U. Pickering, 2 Dns., each	205
Governor-General's Secretary & Military Sec., Col. J. Hanbury-Williams, C.V.O., C.M.G.	750
Comptroller of the Household, Clement Edward Gresham Leveson-Gower.	
Private Secretary, Arthur F. Sladen.	

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council. The legislative power is a Parliament, consisting of an Upper House, styled the Senate, and a House of Commons. The Senate consists at present of 87 members, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 3 for British Columbia, 4 for Manitoba, 4 for Alberta, and 4 for Saskatchewan. The members of the Senate are appointed for life by the Crown on the nomination of the Ministry for the time being; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the owner of a property qualification amounting to \$4,000. The House of Commons is chosen every five years at longest, and consists at present of 214 members; 86 being elected for Ontario, 65 for Quebec, 18 for Nova Scotia, 13 for New Brunswick, 10 for Manitoba, 7 for British Columbia, 4

for Prince Edward Island, 4 for Alberta, 6 for Saskatchewan, and 1 for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, each of which returns a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Each province has also a separate Legislature and administration, with a Lieutenant-Governor, appointed by the Governor-General, at the head of the Executive. Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other

Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

TRADE WITH UNITED KINGDOM.

The principal articles of trade between Canada and the U.K. in 1905 were as follows :

Domestic Exports to United Kingdom :

Animals.....	\$11,795,495	Fish.....	\$2,524,495
Bacon.....	12,180,817	Fruit (Apples)...	2,513,599
Butter.....	5,568,999	Hams.....	397,355
Cheese.....	20,174,211	Leather.....	1,942,144
Corn: Wheat ...	9,474,870	Pulp for Paper...	680,199
Oats.....	563,866	Skins & Furs ...	1,407,560
Pease.....	310,397	Wood & Timber ..	12,214,007
Flour.....	2,424,116		

Domestic Imports from United Kingdom :

Cottons.....	\$5,740,305	Flax, Hemp & Jute Manufs. ...	\$2,106,996
Farther & China Ware.....	1,409,335	Jute Cloth.....	894,152
Hats.....	1,022,502	Leather Manufs. ...	407,717
Iron and Steel Manufactures ..	6,568,374	Spirits.....	982,720
		Woolens.....	13,137,483

<i>Prime Minister and President of Privy Council</i> , Rt. Hon. Sir Wilfrid Laurier, G.C.M.G., P.C., D.C.L.	*\$12,000
<i>Clerk of the Privy Council</i> , Rodolphe Boudreau	4,000
<i>Min. Trade and Commerce</i> , Rt. Hon. Sir Richard John Cartwright, G.C.M.G. ...	7,000

THE PROVINCE OF ONTARIO contains a total area of 222,000 sq. miles, and a population of 2,167,978, according to the census of 1901.

The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 98 members elected for four years (no property qualification being necessary), representing 97 electoral districts into which the Province is divided, but which differ from those sending members to the Dominion Parliament. The Executive Council consists of eight members, acting as the Ministry of the Province; the legislature meets every year at Toronto. The principal cities are Toronto, the capital of the Province, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity (population, 207,971); Hamilton, the "Birmingham of Canada" (52,550); Ottawa, the Federal capital, with a large lumber trade and woodenware manufactories (59,902); London (37,983); Kingston (18,043); Belleville (9,117); Chatham (9,075); Stratford (9,959); Guelph (11,496); St. Catharines (9,946); Brantford (16,613); St. Thomas (11,485); Windsor (12,154).

In 1906 the total area of cleared land was 14,102,323 acres, of which 8,962,925 acres were under crops, the total value of the land being \$661,199,920. The total area under pasture was 3,349,101 acres, with 352,306 acres of orchards and gardens. Average production in bushels per acre: Fall wheat, 23'9; spring wheat, 19'0; barley, 33'4; oats, 39'9; rye, 16'6; peas, 18'0; corn, 82'9; buckwheat, 16'8; beans, 18'5; potatoes, 110'0; mangolds, 474'0; carrots, 321'0; turnips, 431'0; hay (tons), 1'94. The total wool clip amounted to 4,543,981 lb., the average weight of the fleeces being 6'64 lb. 1,108 cheese factories produced 164,866,223 lb. of cheese, valued at \$17,417,757, and 248 creameries made 10,142,289 lb. of butter (\$2,131,584). There were 688,147 horses, 2,963,618 cattle, 1,304,809 sheep, 1,819,778 pigs, and 10,254,834 poultry in 1906, the total value of the live stock being \$183,307,394, and the value of animals sold or slaughtered in the year was \$61,528,288. Fruit is grown on an extensive scale; there are vineyards and peach orchards of 50 or 60 acres in extent, and innumerable apple orchards. The Ontario Agricultural College at Guelph supplies a general education, together with a technical training in agriculture. The students meet part of their expenses by labouring on the experimental farm, the annual balance of cost for board, washing, and tuition being from £10 to £15 for natives and from £20 to £30 for students from other parts. Free grants of land are obtainable in this Province, and improved farms can also be bought at advantageous rates.

Lieutenant-Governor, Hon. Sir William Mortimer Clark, Kt., K.C.	£2,000
Official Sec., Maj. J. F. Macdonald	325
Asst. Sec., Capt. D. D. Young	120
Premier and President of the Council, Hon. J. P. Whitney, LL.D.	\$5,000
Attorney-Gen., Hon. J. J. Foy, LL.D., K.C.	6,000
Deputy, J. R. Cartwright, M.A., K.C.	3,500
Treasurer, Col. A. J. Matheson	6,000
Asst. Treas., C. H. Sproule	3,000
Education, Hon. R. A. Pyne, M.D.	6,000
Deputy, A. H. M. Colquhoun, LL.D.	3,000
Agriculture, Hon. Nelson Monteith	6,000
Deputy, C. C. James, M.A.	3,000
Lands, Forests & Mines, Hon. F. Cochrane	6,000
Deputy, Lands, A. White	3,500
Deputy, Mines, T. W. Gibson	3,000

Provincial Secretary, Hon. W. J. Hanna	\$6,000
Assistant, Thomas Mulvey, K.C.	3,000
Public Works, Hon. J. O. Reaume, M.D.	6,000
Assistant, A. W. Campbell	3,000
Without Portfolio, Hons. W. A. Willoughby, M.D., Col. J. S. Hendrie, Adam Beck.	

Chief Justice of Ontario, Hon. Charles Moss	£1,600
Puisne Judges, Court of Appeal, Hons. F. Osler, J. T. Garrow, J. J. McLaren, and R. M. Meredith	each 1,400
C.J., King's Bench, Hon. William G. Falconbridge	1,600
Puisne Judges, K.B., Hons. B. M. Britton and W. B. Riddell	each 1,400
Chief Justice Common Pleas, Hon. Sir W. R. Meredith	1,600
Puisne Judges, Com. Pleas, Hon. Hugh MacMahon and J. V. Teetzel	each 1,400
Chancellor, Hon. Sir John Alexander Boyd, K.C.M.G.	1,400
Puisne Judges, Hon. James Magee and Hon. J. P. Mabey	each 1,400
Chief Justice, Exchequer, Hon. Sir William Mulock, K.C.M.G.	1,600
Puisne Judges, Hon. F. A. Auglin and Hon. R. C. Clute	each 800
Master in Ordinary, Thomas Hodgins, K.C.	
Registrar Supreme Ct., Ct. of Appeal, J. A. Andrew	450
Master in Chambers, J. S. Cartwright	620

Emigration Agent in England, P. Byrne, James Street, Liverpool.

THE PROVINCE OF QUEBEC contains an area estimated at 246,928 square miles, and a population (census 1901) of 1,620,974 (exclusive of Yukon).

The Government of the Province is vested in a Lieutenant-Governor and a Legislative Council, consisting of 24 members appointed for life, and a Legislative Assembly of 74 members elected for five years to represent the same number of electoral districts in the Province. The principal cities are Quebec (population, 68,824), the capital of the Province, with a large export timber trade, and the great seaport town of Canada; and Montreal (population, 300,000), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Other important cities are Three Rivers (8,334), Hull (11,265), Sherbrooke (10,110), St. Hyacinthe (10,016), Lévis (7,301). Ocean-going steamers ascend the St. Lawrence as far as Montreal. In 1905 1,228,200 tons of ocean-going shipping entered, and 1,256,930 tons cleared at Montreal.

The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of 100,000,000 acres, of which 40,000,000 are under licence to cut timber. The wood-pulp industry is assuming great importance; several large factories have recently been built, and the value of the output, which was only \$800,000 at the last census, is now probably ten times that amount. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6

per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on 30 June, 1904, was 6,537,464 acres. In 1906 there were 1,392 cheese factories, 627 butter factories, and 736 butter and cheese factories combined, forming a total of 2,806.

Lieutenant-Governor, Hon. Sir Louis A. Jetté, K.C.M.G., LL.D.	£2,000
Aide-de-Camp, Captain Sheppard, C.A.	hon.
Private Sec., A. Genereux	250
Prime Minister and Attorney-Gen., Hon. Lomer Gouin	1,000

Colonisation, Mines, and Fisheries, Hon. Charles R. Devlin.....	800
Without Portfolio, Hon. John C. Kaine.	
Chief Justice, K.B., Hon. H. T. Taschereau	\$8,000
Puisne Judges, Hons. J. G. Bossé, LL.D.; Jean Blanchet, LL.D.; J. A. Ouimet; N. W. Trenholme	each £1,000
Ch. Just. Sup. Court, Sir M. M. Tait.....	\$8,000
Do. (acting), Hon. Sir François Langelier	8,000
Puisne Judges, M. Mathieu; E. Cimon; J. E. La Rue, LL.D.; L. O. Lorange; C. H. Pelletier, LL.D.; C. P. Davidson, LL.D.; Ch. C. de Lorimier; LL.D.; S. Pagnuelo; Louis Tellier; W. Lynch; J. A. Gagné; C. J. Doherty, D.C.L.; J. S. Archibald; W. White; J. J. Curran; F. X. Lemieux, LL.D.; Joseph Lavergne; J. E. Robidoux; A. Rochon; H. C. St. Pierre; Thomas Fortin; N. Charbonneau; H. G. Carrol; John Dunlop; M. Hutchinson; A. Malouin; Sir A. Pelletier; L. J. Cannon; J. C. McCorkill; and A. A. Bruneau	each \$5,000 to \$7,000

Quebec is 2,634 nautical miles from London.

NOVA SCOTIA, a Province of the Dominion, is a peninsula between 43° 30'—46° N. lat. and 61°—66° 15' W. long., and is connected with New Brunswick by a low fertile isthmus about sixteen miles wide. It comprises an area (with Cape Breton Island) of 20,600 square miles, one-fifth part of which consists of lakes, rivers, and inlets of the sea; of the whole, about 5,000,000 acres are fit for tillage—that is, nearly half the entire area—and the soil in the western half of the Province, particularly in the Annapolis Valley and around the Basin of Minas, is unsurpassed for fertility, owing to the rich marine deposits left on the shore-land by the tides of the Bay of Fundy. The climate is delightful, and the winter is not so cold as in other parts of the Dominion. The population of the entire Province in 1901 was 459,116. In 1891 there were 6,080,695 acres of land occupied (1,993,697 improved), of which 969,548 acres were under crop, 994,113 acres in pasture, and 30,036 acres in gardens and orchards, the remainder being woodland. Hay is the most important crop of the Province, occupying one-fourth of all the improved land, and yielding 600,000 to 700,000 tons. Fruit is extensively cultivated, and Nova Scotia apples are claimed to be the best in the world (2,065,000 bushels in 1901), the principal district being the Annapolis Valley. Halifax, the capital, is one of the

terminals of the Inter-Colonial Railway, and has a magnificent harbour covering ten square miles, which is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America, with a dockyard and a dry dock which can accommodate the largest vessels afloat.

The coal deposits are extensive and of good quality (5,245,247 tons in 1903); iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney, Cape Breton; gold mines are being profitably worked. The principal fisheries are upon the eastern coast, and the largest catches in value made are cod, halibut, haddock, mackerel, herring, salmon, and lobsters. The manufacturing interest is growing. There is a Government agricultural college and experimental farm near Truro for men and women. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at \$80 per 100 acres, and 80 cents per acre for any additional quantity. Hunting, shooting and fishing abound; among wild animals there are bears, foxes, moose-deer, otter, mink, sable, musquash, hares, racoons, and squirrels; and among the feathered game are the woodcock, plover, snipe, partridges, ducks, geese, and curlew.

Nova Scotia has a Provincial Government, administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 38 members.

CAPITAL, Halifax (population, 40,822). Other towns—Dartmouth (4,806), Truro (6,430), Windsor (3,398), Sydney (9,908), Sydney Mines (3,191), N. Sydney (4,646), Annapolis Royal (1,018), Yarmouth (6,430), Amherst (4,963), Pictou (3,235), New Glasgow (4,447), and Lunenburg (2,916).

Lieutenant-Governor, His Hon. Duncan Cameron Fraser	\$9,000
Private Sec., Alister Fraser	1,400
Provincial Secretary, Hon. G. H. Murray (Premier)	6,000
Deputy Sec. and Clerk of the Executive Council, F. F. Mathers	2,400
Commissioner, Public Works and Mines, Hon. C. P. Chisholm	5,000
Deputy Comm. of Mines, &c., Hiram Donkin	2,400
Attorney-Gen., Hon. William T. Pipes, K.C. Without Office, Hons. David McPherson, B. F. Pearson, J. M. Mack, O. T. Daniels, James Macdonald, and S. Le Blanc.	
Chief Justice, Hon. Chas. J. Townshend.....	£1,000
Judge in Equity, Hon. Wallace Graham.....	1,000
Puisne Judges, Hons. N. H. Meagher, Benjamin Russell, J. W. Longley, A. Drysdale, and R. A. Lawrence.....	each 800
Judge, Vice-Admiralty Court, Hon. James McDonald	123
Sec. of Immigration, A. S. Barnstead	

Agent-General for Nova Scotia in London, John Howard, 52A Pall Mall, S. W.

Halifax is 2,463 miles from Liverpool.

CAPE BRETON ISLAND, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,125 square miles, with a population of 97,190 inhabitants. The chief town is Sydney, on the eastern coast, having valuable collieries in the neighbourhood, other towns being North Sydney, Sydney Mines, and Port Hawkesbury. The Intercolonial Railway connects the island with the mainland.

NEW BRUNSWICK is situated between 45° — 48° N. lat. and 63° $47'$ — 69° W. long., and comprises an area of 27,985 square miles, with a population in 1901 of 331,120. It was first colonised by British subjects in 1761, and in 1783 by disbanded troops from New England. The chief industrial pursuits arise from the produce of the forests and the fisheries. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities. According to the census of 1891 the occupied land amounted to 4,471,250 acres, of which 1,509,790 acres were improved, 1,018,704 acres being under crop, 479,607 acres in pasture, and 11,479 acres devoted to gardens and orchards. The value of agricultural produce in 1900 was \$12,873,480. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. Sport of all kinds is abundant. The fisheries include salmon, cod, mackerel, herring, and shad, and were in 1905 of the value of \$4,671,084, ranking second in importance to those of Nova Scotia. St. John is one of the principal winter ports of Canada, and is connected by the Intercolonial Railway with Montreal.

The Provincial Government of New Brunswick is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 46 members elected by the people.

CAPITAL, Fredericton. Pop. (1901) 7,117; chief cities, St. John (40,711) and Moncton (9,026).

Lieutenant-Governor, Lemuel John Tweedie, K.C., LL.D.	\$7,000
Premier, Provincial Sec., and Receiver-General, Hon. Clifford W. Robinson	2,100

Puisne Judges, Daniel L. Hanington, Pierre A. Landry, Ezekiel McLeod, George F. Gregory, Fred. E. Parker.	

Agent-General in London, Hon. Charles A. Duff Miller, 17 Leather Market, Bermondsey, S.E.

Fredericton is 2,748 miles from Liverpool *via* Cape Race, or 2,535 miles *via* Bellefleur and Chatham, N.B.

MANITOBA, formerly the Red River Settlement, was formed into a distinct Province in 1870, and admitted into the Confederation on 15th July in the same year. It is situated in about the centre of the continent, between 49° — 53° N. lat. and 95° — 101° W. long. (these parallels and meridians forming its boundaries). Its area is 72,864 square miles. Its population, census 1906, was 365,688. The Assiniboine and Red Rivers intersect the Province, and the soil is fertile and productive; emigration is invited and encouraged, and liberal grants of land are made to settlers. In 1906 4,921,435 acres were cultivated, of which 3,141,537 acres were under wheat, and the crops were 61,250,413 bushels of wheat, 50,692,977 oats, 17,532,553 barley, and 31,790 flax, rye, and peas.

The main line of the Canadian Pacific and the Canadian Northern Railways traverse Manitoba, and there are several other lines in operation. The Red and Assiniboine Rivers are also navigable for a considerable course in the Province.

The Government of the Province is administered by a Lieutenant-Governor, assisted by an Executive Council of 6 members and a Legislative Assembly of 41 members.

CAPITAL, Winnipeg. Population (1907), 120,000.	
Other towns, Portage la Prairie, pop. 5,500; and Brandon, pop. 11,000; Neepawa, Minnedosa, Morden, Deloraine, Virden, Carberry, Boissevain, Carman, Dauphin, Emerson, Gretna, Killarney, Manitou, St. Boniface, Selkirk, and Souris.	
Lieut.-Gov., Hon. Sir Daniel Hunter McMillan, K.C.M.G.	£2,000

THE PROVINCE OF SASKATCHEWAN was formed, by an enactment of the Parliament of Canada taking effect September 1, 1905, out of the territory formerly known as the North-West Territories. Saskatchewan covers the area included between longitude 102° and 110° W. of Greenwich, with a small extension east of 102° at the south-eastern corner, and between latitude 49° and 60° N. The Surveyor-General of Canada estimates the Province to contain over 250,000 square miles, of which 86,000 square miles are land suited for grain-growing, 32,000 are land requiring irrigation, 106,387 are land suitable for ranches or other description of farming, and 27,000 square miles are water.

The census of 1901 showed the number of people within the area as 91,460, whilst the quinquennial census taken on June 24, 1906, showed the population to have increased to 257,763. The Province is being rapidly opened up by the means of railways, and is now traversed by the C.P.R. and the Canadian Northern Railway, while the Grand Trunk Pacific will cross the Province from east to west, with a network of branches. Several other railway projects are under consideration for opening up communication between the Province and the deep-water ports on Hudson's Bay, by which it is expected that for a number of months in each year the distance between Saskatchewan and European markets will be reduced almost to that of New York, the greater part of which will be by water.

The principal products of Saskatchewan are grain and cattle, and Government encouragement is being given to the dairy industry. In 1898 there were but 276,253 acres under wheat, whilst in 1906 there were 1,730,586. In 1898 4,780,440 bushels (17.3 per acre) were produced; in 1906 the yield increased to 37,040,098 bushels—an

average of 21.4 per acre. The average yield of wheat in bushels per acre over the nine-year period 1898-1906 was 20.28. In 1906, 23,965,528 bushels of oats, 1,316,415 bushels of barley, 730,689 bushels of flax were also produced.

The range country in the Provinces of limited extent, being almost entirely confined to the south-western corner, adjoining the range country of Southern Alberta. In 1906 15,920 head of stock were exported. The northern two-thirds of the Province is known only to the traders of the Hudson's Bay Company and the Indian missionary.

The Government is vested in the Lieutenant-Governor, aided and advised by an Executive Council of four members chosen from time to time by the Lieutenant-Governor. Following the regular procedure of similar British institutions, the members of the Executive Council seek reelection to the Legislative Assembly, in which manner the fullest responsibility to the people is secured. The Province is divided into twenty-five electoral districts, each of which is represented in the Legislative Assembly by one member.

The Supreme Court consist of a Chief Justice and 4 puisne judges; it has original and appellate jurisdiction. There are 8 judicial districts, each presided over by a District Court Judge, who also acts as Surrogate Court Judge for his district.

Rural educational areas, approximating twenty-five square miles in extent, are established as school districts, and their affairs each managed by an elective board of trustees.

The climate has a wide range—from 90° to -40° at its greatest extremes. Rainfall is not excessive, and there is an unusual amount of sunshine at all periods of the year.

Lieutenant-Governor, His Honour Amedée Emmanuel Forget	\$3,000
Premier, President of Council, and Commissioner of Public Works, Hon. Walter Scott	6,000
Attorney-General, Hon. W. F. A. Turgeon	5,000
Provincial Treasurer and Commissioner of Education, Hon. J. A. Calder	5,000
Provincial Secretary and Commissioner of Agriculture, Hon. W. R. Motherwell	5,000
Clerk of the Executive Council, J. A. Reid	3,000
Clerk of the Legislative Assembly, S. S. Page	750
Chief Justice, Hon. E. V. Wetmore.	
Puisne Judges, Hons. H. W. Newlands, C. Johnstone, J. E. P. Prendergast, and J. H. Lamont.	

THE NORTH-WEST TERRITORIES of Canada comprise the present unorganised part of British North America lying to the north of the Provinces of Quebec, Ontario, Manitoba, Saskatchewan, and Alberta. Their administration is entrusted to the officers of the Royal North-West Mounted Police, the Comptroller of the Force, Lieut.-Col. Fred. White, C.M.G., being also Commissioner of the Territories, with full executive, legislative, and administrative authority. The Territories for nearly 250 years have been under the almost absolute control of the Hudson's Bay Company, but of recent years the Dominion of Canada has taken an increasingly active part in the administration of the affairs of the country. Several expeditions to Hudson's Bay with a view to ascertaining the feasibility of the navigation of the Bay and Straits have been made, and at several points on the shores of the Bay police posts are maintained, being visited from time to time by an exploring ship sent into the Bay for that purpose.

THE PROVINCE OF ALBERTA was erected into a Province by an enactment of the Parliament of Canada, taking effect Sept. 1, 1905, out of the territory acquired from the Hudson's Bay Company, and until the date above mentioned it formed part of the North-West Territories. The total area of the Province is about 253,000 square miles, including about 2,500 square miles of water, and the population (1906) is estimated at 185,000. The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of twenty-five (25) members, elected for four years, representing 25 electoral districts into which the Province is divided. The Executive Council consists of four members.

Alberta is rapidly developing into a grain-producing territory, and where, twenty years ago, there existed a wilderness with scattered bands of primitive Indians and strong detachments of North-West Mounted Police for the sole inhabitants, there is now a succession of wheat fields, homesteads, villages, and towns. The soil is remarkably productive, and settlers from the United States, Eastern Canada, and the British Isles arrive in annually increasing numbers. The total area in crops, year 1906, 540,000 acres. Spring wheat, 97,760 acres, yielding 3,322,202 bushels; winter wheat, 43,661 acres, yielding 907,421 bushels; oats, 322,923 acres, yielding 13,192,150 bushels; barley, 75,678 acres, yielding 2,201,179 bushels. The Provincial Government operate 18 creameries, where they manufacture butter. This season they have disbursed \$250,000 to patrons. Free homesteads are available for thousands of settlers in desirable localities.

The principal cities are Edmonton, Wetaskiwin, Calgary, Medicine Hat, Lethbridge, and Strathcona.

CAPITAL, Edmonton.	
Lieut.-Governor, His Hon. G. H. V. Bulyea	\$9,000
Premier and President of the Council, Provincial Treasurer, and Minister of Education, Hon. A. C. Rutherford	6,000
Public Works, Hon. W. H. Cushing	5,000
Attorney-General, Hon. C. W. Cross	5,000
Provincial Secretary and Minister of Agriculture, Hon. W. T. Finlay	5,000
Clerk of the Executive Council, M. J. Macleod	3,000
Chief Justice, Hon. Arthur L. Sifton.	
Puisne Judges, Hons. Horace Harvey, D. L. Scott, and C. A. Stuart.	

THE PROVINCE OF PRINCE EDWARD ISLAND lies in the southern part of the Gulf of St. Lawrence, between New Brunswick and Cape Breton, that is to say, between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth; its area is 2,000 square miles (about equal to that of the English county of Norfolk), and its population (census 1901) 103,259. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763), and compelled the greater part of the French inhabitants to leave, and from that time it has remained British. The island is divided into three counties (King's, Queen's, and Prince), each of which elects 10 representatives. Its inhabitants are almost exclusively engaged in agriculture, considerable attention, however, being devoted to the fisheries and to the breeding of horses and sheep. There were (1881) 718,092 acres of improved land, of

which 536,175 acres are under crops, 178,072 acres of pasture land, and 3,845 acres of gardens and orchards. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at about 20 dollars an acre.

The Provincial Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

CAPITAL, Charlottetown, on the shore of Hillsborough Bay, which forms a good harbour, is distant from Liverpool 2,630 miles, transit about 8 days. Population, 12,080. Summerside (pop. 2,875) and Georgetown (pop. 1,060), on the east coast, are also ports of considerable size, and the centres of shipbuilding trade.

BRITISH COLUMBIA occupies the western frontier of the Dominion of Canada, extending from the summit of the Rocky Mountains and the 120th meridian of longitude west by the 60th parallel of north latitude to the boundary of Alaska; thence southward and along the Pacific coast (including QUEEN CHARLOTTE ISLANDS and VANCOUVER ISLAND) to the Strait of Fuca; thence easterly along the 49th parallel of latitude to the summit of the Rockies. The area of the mainland is calculated at 383,300 square miles, including Queen Charlotte Islands and Vancouver Island. Coal (output, 1906, 1,517,393 tons) is obtained from the latter, and in the south-eastern parts of Kootenay district near the Crow's Nest Pass; there are also extensive deposits in the Queen Charlotte Islands, in Southern Yale, and in the Skeena River district. The main line of the Canadian Pacific Railway runs through the Province, and several branch lines have been constructed, while the Esquimalt and Nanaimo Railway runs from Victoria to Wellington on Vancouver Island, and the Nelson and Fort Sheppard runs south from Nelson; the Red Mountain Railway from Rossland to the American boundary; the Kaslo and Slocan Railway connects the mines of the Slocan district with Kaslo on Kootenay Lake;

the Nakusp and Slocan line connects with the C.P.R. at Arrow Lakes. The Columbia and Western Railway has been built from Trail to Rossland in the Trail Creek mining district, and thence to Midway, in the Yale district, and a short line runs from Victoria to Sidney on Haro Strait. The Grand Trunk, Pacific, C. P. R., and Canadian Northern are preparing to build trunk lines through the Province. Vancouver and New Westminster cities are connected by an electric tramway. There is a very extensive reserve of timber on the coast, consisting of Douglas fir, spruce, red and yellow cedar, and hemlock; some 150 mills are in operation, with a daily capacity of about 3,400,000 feet. The principal centres of the mines are Rossland, Slocan, Nelson, and Lardeau in West Kootenay, Fernie in East Kootenay, Boundary in Yale, Alberni, Cowichan, and Clayoquot on Vancouver and Texada Islands, and the old placer diggings in Cariboo. The output of the mines was valued at \$24,980,546 in 1906, and that of the fisheries at about \$9,850,000. Salmon canning (total pack, 1905, 1,167,460 cases) on the Fraser River and the coast inlets is the principal branch of the fishing industry, but deep-sea fishing is rapidly growing in importance.

The population of the Province, now estimated at 250,000, was in 1901 178,657, classified as follows:—Whites, 133,599 (including half-breeds); Indians, 29,000; half-breeds, 3,356; Chinese, 13,000; Japanese, 6,000; negroes, 500. Several lines of steamships ply to and from the Orient, Great Britain, Australia, San Francisco, and Mexico.

CAPITAL of the Province, Victoria; population (1907), 30,000. Vancouver City, population, 60,000. New Westminster, 8,000; Nanaimo, 7,000; Rossland, 6,100; and Nelson, 6,500.

	1903-1904.	1904-1905.	1905-1906.

Agent-General, John Herbert Turner, Salisbury House, Finsbury Circus, E.C. \$2,000

CANADIAN RAILWAYS.

The CANADIAN PACIFIC stretches across the entire continent, from Montreal to Vancouver on

the coast of British Columbia, a total distance of 2,909 miles. (*Headquarters*, Montreal.)—The share capital amounts to \$165,616,666 and \$106,045,411 Debenture Stock. *Chairman*, Sir William C. Van Horne. *President*, Sir Thos. G. Shaughnessy, K.C.V.O. *Secretary*, Charles Drinkwater. The total length of the Canadian Pacific Railway system is 9,154 miles, 300 of which are out through the solid rock. The last spike was driven on the 7th November, 1885, and the road was opened for general traffic on 28th June, 1886, since which time there has been a daily mail service between the Atlantic and Pacific coasts. The time occupied in making the road was four years six months, an average of 2.6 miles per day. The distance from China, Japan, and the Pacific coast generally to Liverpool is from 1,000 to 1,200 miles less by the Canadian Pacific Railway than by other routes.

THE GRAND TRUNK was originally formed in 1853 by an Act of the Legislature, and in 1893 a number of lines were consolidated, forming a continuous line through the Provinces of Quebec and Ontario. The total loan and share capital of the company amounts to over £71,000,000 sterling. The mileage of the lines owned and leased is 4,640 miles, including 1,060 miles in the States of Maine, New Hampshire, Vermont, New York, Michigan, Indiana, and Illinois; in addition to which the company controls the Central Vermont Railway, 536 miles, making the mileage of the entire system 5,176 miles. The eastern extremities of the line are Quebec and Portland, Maine, and it extends westward to Detroit, Chicago, Grand Haven, and Muskegon, supplying the means of communication with Montreal, Toronto, Hamilton, Niagara, Buffalo, Detroit, and all the principal cities and towns in the Provinces of Quebec and Ontario.

President, Sir Charles Rivers Wilson, G.C.M.G., C.B.; *Vice-President*, Alfred W. Smithers; *Secretary*, H. H. Norman. *London office*, Dashwood House, New Broad Street, E.C.

THE INTERCOLONIAL RAILWAY of Canada and the PRINCE EDWARD ISLAND RAILWAY, owned and operated by the Dominion Government of Canada, are the great thoroughfares for travel through the Provinces of Quebec, New Brunswick, Nova Scotia, and Prince Edward Island. The mileage of the Intercolonial is 1,449 miles, and of the Prince Edward Island Railway 267 miles. The building of an inter-provincial railway was one of the stipulations embodied in the British North America Act, 1867; and in November, 1872, the already partly-constructed Intercolonial Railway, together with the Nova Scotia Railway and the European and North American Railway, were consolidated under the name of the "Intercolonial Railway of Canada." The railway was extended to Montreal on March 1, 1898. It is the only railway connecting Nova Scotia and the greater part of New Brunswick with the rest of the Dominion of Canada, and connecting Montreal, Levis, Riviere du Loup, Campbellton, Moncton, St. John, Halifax, Sydney, and North Sydney. At North Sydney connection is made with the Reid Newfoundland Company's Steamship Line for all points in Newfoundland. Between Prince Edward Island and the mainland there is connection throughout the year by steamship service.

THE CANADIAN NORTHERN RAILWAY was founded in 1897, has an aggregate mileage of

3,961 miles, and stretches from Port Arthur on Lake Superior to Edmonton, the capital of Alberta, with many extensions in existence and in contemplation. It runs principally in the wheat-growing and lumbering districts of Manitoba, Saskatchewan and Alberta. *Headquarters*, Toronto; *London Office*, Bond Court, Walbrook, E.C.

Newfoundland.

This island, situated between 46° 37'—51° 39' N. lat. and 52° 35'—59° 25' W. long., on the northeast side of the Gulf of St. Lawrence, is about 317 miles long and 316 miles broad, and contains about 40,200 square miles, and at the census of 1901 it had a population of 217,037, not including those resident in the portion of Labrador (3,947) within the jurisdiction of Newfoundland. Of these 75,989 are Roman Catholics, 73,008 Church of England, 61,388 Methodists, 1,497 Presbyterians, and 9,099 various. At the end of the year 1905 the estimated population was as follows:—

Newfoundland	225,533
Labrador	3,994

This is the oldest English colony, for it was discovered by John Cabot in 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bona Vista. The inhabitants are chiefly located on the coast-line of the shore and bays, and the greater part are engaged in fishing—for cod in summer, and seal fishing in winter and spring; agriculture, mining, and lumbering are also engaging attention and affording means of employment. Lakes and rivers abound; it is estimated that about one-third of the surface is covered with water. The interior is practically in a state of Nature; but 638 miles of railway have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. The trans-insular line runs to Port-aux-Basques, via Exploits River and Bay of Islands, with branch connections to Placentia, the principal settlements in Conception Bay, and to Burnt Bay (in Notre Dame Bay). The climate is salubrious, and the people are a strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

The principal exports of the Colony are codfish, value \$7,907,480; cod, whale, and seal oil, value \$909,538; sealskins, \$334,048; tinned lobsters, \$376,490; copper, copper ore, iron pyrites and other minerals, \$1,535,428. The total value of the fishery products in 1903 was \$10,117,446.

LABRADOR, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon, in the Straits of Belleisle, on the south, to Cape Chudleigh, at the entrance of Hudson's Straits, on the north; it possesses valuable cod, herring, trout, and salmon fisheries. There are a few Moravian missionary settlements on the coast, and also some posts of the Hudson's Bay Company.

The Government is administered by a Governor appointed by the Crown, a responsible executive of nine, a legislative council of not over eighteen, appointed for life, and a House of Assembly of thirty-six, elected by the people every four years. In 1890 the franchise was given to all males of twenty-one years and over.

St. John's, 2,500 miles; transit, seven days.

BRITISH GUIANA,

which includes the settlements of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America. The boundaries have recently been definitely determined by the awards of the arbitrators in the Venezuela-British Guiana and Brazil-British Guiana boundary cases. It has a total area of 90,277 square miles, and a seaboard of more than 300 miles. The Essequibo River intersects the country in its entire length, the Corentyne River separates it from Dutch Guiana, and the Cuyuni is the great waterway on the west. The colony is bounded on the south by Brazil, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The two towns are Georgetown (estimated population, Dec. 31, 1906, 48,550) and New Amsterdam (estimated population, Dec. 31, 1906, 9,141). The climate is hot, but not generally unhealthy. The cultivated portion of the country, amounting to 189,457 acres (of which 78,370 acres are in sugar-cane), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like Holland, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potwa River is the Kaitew Falls, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The temperature ranges between 75° and 90° F. The birth-rate in 1906 was 32.9 and the death-rate 28.8 per 1,000. The chief product is sugar, which forms 66 per cent. of the export trade. The leading exports for the year 1906-1907 were as follow:—Sugar, value £1,059,503; rum, £108,460; gold, 86,125 oz.,

valued at £319,522; diamonds, 4,113 carats, valued at £6,797; timber, £15,556; and balata, £50,106. The population, 31 Dec., 1904, was 301,923, of whom about one-third were Indian immigrants. There are about 10,000 aboriginal Indians, belonging chiefly to Arawak, Acawai, Carib, and Warau tribes; they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected by the direct vote of the people, in which the Governor has an original and a casting vote, and a veto on any measure at any stage. The Court of Policy discharges the functions of a Legislative Council, except as to levying taxes, which is the prerogative of what is called the Combined Court, composed of the Court of Policy and of 6 Financial Representatives elected directly by the people. There is, besides, the Executive Council, consisting of the Governor, 6 official and 3 unofficial members nominated by the Crown, which exercises all the executive and administrative functions of government other than those before mentioned. There are 1,395 miles of post-office telephone wire, with 4 miles of aerial cable and 535 of telegraph lines, 93 miles for railway signals and 24 miles submarine cables, and 72 post-offices; also post-office telephone exchanges in Georgetown and New Amsterdam, with over 470 subscribers. There is a line of railway along the east sea-coast from Georgetown to Rosignol, Berbice, 60½ miles in length, owned by the Demerara Railway Company, and another line has been opened along the west coast of Demerara, extending from Vreed-en-Hoop to Greenwich Park, 15 miles in length. There is another line connecting the Essequibo and Demerara Rivers, 19 miles in length, and an electric tramway service in the capital.

Georgetown, 3,963 miles; transit, 16 days by Royal Mail steamer on alternate Wednesdays from Southampton.

BRITISH HONDURAS.

This colony comprises about 7,562 square miles of territory in Central America, extending from 18° 29' 5" to 15° 53' 55" N. latitude, and from 89° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it abuts on the Atlantic, and is bounded on the north by Yucatan and Mexico, on the west and south by Guatemala, and on the east by the Caribbean Sea. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary. The census (1901) gives the population at 37,497 (males, 19,140; females, 18,339); the 1906 estimate is 41,007 (20,942 males, 20,065 females).

The staple products are the natural woods of the colony, principally mahogany and logwood; the export of mahogany, of which the cost ready for shipment is \$40 to \$50 per 1,000 ft., amounted in the year 1906 to 11,037,480 ft., that of logwood (\$10 to \$15 per ton) being 9,335 tons. Sugar is grown, and cacao plantations have been started. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes, grow well, while inland there are extensive regions of good pasturage, and there are indications that gold and other minerals exist. Other exports are cedar-wood, india-rubber, chewing-gum, and bananas. The latest returns show that about 50,000 acres are under cultivation. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at \$1 per acre, or leased at an annual rental of 10c. to 30c. per acre. There are 43 public elementary schools in the colony, of which 41 are denominational, and 39 in receipt of Government aid; there are 3 denominational secondary schools in Belize.

British Honduras is governed as a Crown colony. The Executive Council consists of the Colonial Secretary, the Treasurer, the Attorney-General, and two unofficial members appointed by the Sovereign. The Legislative Council includes the following members:—The Colonial Secretary, the Treasurer, the Attorney-General, and not less than five unofficial members appointed by the Sovereign. The Governor is President of both councils.

Belize is distant about 5,701 miles; transit, 16 days.

THE BERMUDAS.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long, comprising an area of about 19 square miles, and containing (1901) an estimated population of 17,535, of whom 6,383 are white, exclusive of army and navy. These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly fortified dockyard, where the British squadron refits.

The Government is administered by a Governor, who is also commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 1,318 electors, whose individual qualifications are the possession of freehold property of not less value than £60. Hamilton is the chief town and the seat of government; population (1901), 2,246.

The Commonwealth of Australia, &c.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area; the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, often below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in the eastern portion of the island, is a rich grazing country, admirably adapted to the rearing of sheep. The seasons commence about March 21 (Autumn), June 21 (Winter), September 23 (Spring), and December 22 (Summer). The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast; on the east coast, the Hunter, Hawkesbury, Clarence, Richmond, Macleay, Brisbane, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, the Fortescue, De Grey, and Fitzroy; and the Victoria, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria, on the north. The most extensive mountain system on the Australian continent takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The chief ranges of the system are the Australian Alps in Victoria and New South Wales, the Blue Mountains and the Liverpool Range in New South Wales, and the Craig Range in Queensland, the highest point being Mount Kosciusko (7,328 ft.), 327 miles from Sydney, N.S.W. Lakes are numerous, but nearly all are salt, and they depend for their supplies of water upon the rivers and floods, and alternating from immense reedy swamps to areas of submerged levels, with broad mud-banks for shores that render the water absolutely unapproachable. But the scarcity of the natural water supply has been, to a great measure, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

HISTORICAL EPITOME.

"The Great South Land" is believed to have been first seen by De Gonville, a French navigator, in 1503, and was inserted in a map constructed by Le Testu, of Dieppe, about the year 1542. About 1605 De Quiros, a Spaniard, sailed, with De Torres as his lieutenant, from Lima, Peru, for the Great South Land, and touching land, named it *Tierra Austral*. The expedition was split up by a storm, and De Torres sailed through the straits which bear his name, and also discovered land near Cape York. About twelve years later a Dutch venturer, with two ships, *Peru* and *Arnhem*, explored the northern coast of Queensland, where Jan Carstensen, in 1623, also penetrated the great northern gulf, and named it *Carpentaria*, after the Governor of the Dutch Indies. Further desultory exploration of the coast-line was carried on by the Dutch, who visited the southern and western shores from 1620 to 1630, and in 1642 Abel Jansen Tasman sailed to the islands of New Zealand and Tasmania, which he named *Van Diemen's Land*, after the Governor of Batavia. In 1688 Dampier visited and explored nearly 1,000 miles of the north-west coast of Australia, which he revisited in 1699 in H.M.S. *Roeluck*, but no further efforts of importance were made for seventy years, when Captain Cook, of H.M.S. *Endeavour*, with members of an astronomical expedition, landed at Poverty Bay, New Zealand, on October 8, 1769, and afterwards sailed round the islands and explored the south-eastern coast of Australia,

which he named *New South Wales*. Botany Bay and Moreton Bay were also named, the latter after the President of the Royal Society. In his subsequent voyages round the world Captain Cook revisited New Zealand, and from his reports an English fleet anchored in Botany Bay (1788) and effected a settlement at Port Jackson, which was reinforced by free settlers in 1795, when Governor Hunter arrived at Sydney to take over the administration of New South Wales. In 1798 Bass and Flinders explored the coast of Victoria and sailed round Tasmania, while Port Phillip was discovered in 1802. Hobart was founded in 1804, and in 1805 sheep were introduced into New South Wales. The misadventures of Captain Bligh, of the *Bounty*, occurred in 1806, but in 1810 New South Wales was already on the road to prosperity, which was further enhanced by the discovery of the fertile plains westward of the Blue Mountains. Tasmania was made a separate colony in 1825. Western Australia was founded in 1829, and in 1835 a permanent settlement was made at Melbourne, whence the colony of Victoria sprang in 1837, the same year seeing Adelaide founded by the colonists of South Australia. In 1840 the transportation of convicts to New South Wales was discontinued, and in 1841 New Zealand was constituted a separate colony, the towns of New Plymouth and Nelson being founded in that year. In 1842 Brisbane was founded, the population of the mainland colonies being over 145,000 at that date. In 1851 the Port Phillip district of New South Wales, with a population exceeding

75,000, was proclaimed a separate colony, to be thenceforth known as Victoria. A great impetus to immigration was given in that year by the discovery of auriferous districts in New South Wales and Victoria. In 1854 the electric telegraph brought the Australian colonies into closer touch with home, and in 1856-7 responsible government was inaugurated in Tasmania and South Australia. In 1859 the Moreton Bay settlement was erected into the colony of Queensland. In 1861 the population of the various colonies was estimated at over 1,000,000, of which number Victoria contained 541,000, New South Wales 360,000, and Tasmania 90,000. In 1871 the population numbered nearly 1,700,000 (Victoria 730,000, New South Wales 500,000, South Australia 185,000, Queensland 120,000, Tasmania 100,000, and Western Australia 100,000). In 1879-80 international exhibitions were held at Sydney and Melbourne, and in 1881 the population of the colonies was taken at 3,000,000, the most notable increases being New South Wales to 750,000, Victoria 860,000, South Australia 280,000, and Queensland 213,000. In 1884-5 motions embodying the spirit of federation were successfully proposed in various legislatures. In 1885 the Government of New South Wales inaugurated the sharing of Imperial burdens by sending troops to help the "Old Country" in the Soudan. In 1890 further steps were taken towards the adoption of the federation, and in that year the Western Australian Constitution was promulgated. At a conference of Premiers at Sydney on March 2, the present name of the federation was first mooted. From that date schemes embodying the idea were debated in the several colonies, and in 1897 the Diamond Jubilee of Queen Victoria presented an opportunity for a meeting of the Premiers in London, and the free interchange of views between Colonial and Imperial statesmen. On March 16, 1898, the Commonwealth Bill was adopted by the Federal Convention at Melbourne, and after ratification by the several colonies the Act was ratified by the Imperial Parliament on July 9, 1900, the inauguration of the Commonwealth of Australia taking place at Sydney on Jan. 1, 1901, a message from the Queen to the people of Australia being read by the *Earl of Hopetoun*, Governor-General. H. R. H. the Prince of Wales (then H. R. H. the Duke of Cornwall and York) was designated by Queen Victoria for the purpose of opening the Commonwealth Parliament, and bidden to undertake the duty by King Edward VII., in spite of the lamented death of the Queen in 1901. The Prince and Princess sailed from Portsmouth, and declared Parlia-

ment open at Melbourne on May 9. The *Earl of Hopetoun* (now Marquess of Linlithgow) resigned his post in 1902, and was succeeded in turn, 22 Jan., 1904, by *Lord Northcote*. The area of the Commonwealth is estimated at 2,972,575 square miles, containing a population of 3,774,282 at the census of 1901, including 6,851 half-caste aborigines. Of this total 1,933,500 were ascertained to be of English descent, 413,700 Scottish, 651,000 Irish, 18,400 Aborigines, 36,000 Chinese, and 130,600 foreigners. By religious there were in 1891 1,256,673 members of the Church of England, 351,882 Presbyterians, 397,334 Methodists, 291,073 other Protestants, 713,823 Roman Catholics, and 13,805 Jews. The capitals of the various States are Sydney (pop. 526,180), Melbourne (pop. 502,610), Adelaide (pop. 165,723), Brisbane (pop. 162,094), Perth (pop. 44,373), and Hobart (pop. 34,809).

The Commonwealth of Australia is a confederation of the six "Original States" of New South Wales, Victoria, Queensland, South Australia, Tasmania, and Western Australia, the executive power being vested in the Sovereign (through the Governor-General), assisted by an Executive Council of seven members.

Legislative power is vested in a Federal Parliament, consisting of the Sovereign (represented by the Governor-General), a Senate of 36 (six from each of the Original States) and a House of Representatives elected on a population basis in such a manner that no Original State has less than five representatives. Such powers as are not vested in the Federal Parliament are regarded as remaining in the Legislatures of the several States, in which particular the Commonwealth differs from the Dominion of Canada, where the residuum of Legislative capacity is in the Dominion Parliament. The difference may be briefly stated in the following way:—In the Dominion the Central Parliament may legislate on all present matters, and such as may occur hereafter, except where its power is expressly delegated to the Provincial Legislatures. In the Commonwealth the Federal Parliament may only legislate on certain matters, or to the degree, surrendered to it by the federating States.

Commonwealth Capital.—The question of site for the Commonwealth capital has proved itself a stumbling-block. The decision was left over when the Commonwealth was inaugurated, and has been frequently postponed. Meanwhile the seat of Government is at Melbourne.

THE COMMONWEALTH BALANCE SHEET, 1906-7.

ACTUAL REVENUE.

Balance brought forward	£1,957
Customs and Excise	£9,648,662
Post Office, Telegraph, and Telephone	3,129,074
Miscellaneous Revenue	54,53
[Estimated Revenue 1907-8 £13,745,200.	
Expenditure £5,967,992, for distribution among States £7,779,290, including balance of £2,082.]	

Total Revenue, 1906-7 £12,834,223

* Compiled mainly from census results of succeeding year.

† Including Revenue collected by Commonwealth Government.

‡ Figures given for years prior to 1904 are aggregates of entries and clearances for the six States and include Interstate Shipping. For the three years 1904 to 1906 the figures relate to Oversea Shipping only, and comprise one entry and one clearance only for each voyage.

I. NEW SOUTH WALES.

The State of New South Wales is situated between the 29th and 37th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 310,367 square miles—i.e., more than six times the area of England, and nearly three times the size of Great Britain and Ireland—with a population (census March 31, 1901) of 1,359,133, and 1,555,253 on 30th June, 1907, made up (census 1901) of 712,456 males and 646,677 females. The births for the year 1906 were 40,948, deaths 14,975, and marriages 11,551. The number of aborigines in the State is 4,287, of whom 2,451 are males and 1,836 females (census 1901).

The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, were introduced in 1813. In 1792 there were but 23 head of cattle, 11 horses, 105 sheep, and 43 pigs. On the 31st December, 1906, there were 537,762 horses, 2,549,944 cattle, 44,132,421 sheep, and 243,370 pigs. In 1906, 325,442,000 lb. (stated as in the grease) of wool, valued at £13,792,000, were produced.

Minerals.—The goldfields were discovered in 1851. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum, alunite, cobalt, and kerosene shale are also found; and in small quantities, diamonds, rubies, opals, and other precious stones. The total value of minerals raised up to the end of 1906 was £170,809,313, coal accounting for £50,356,743; £7,912,716 being the value of all minerals won in 1906.

Agriculture is one of the principal industries of the State; 2,824,211 acres are under cultivation (excluding 697,631 under permanent artificial grasses), producing during the year ended 31 March, 1907, 21,817,938 bushels of wheat, 5,763,000 bushels of maize, 1,404,554 bushels of oats, besides other kinds of grain, with 114,856 tons of potatoes, and 5,371 cwt. of tobacco. Sugar-cane to the extent of 221,560 tons was produced; also 1,100,000 gallons of wine, and 7,837,488 dozens of oranges, lemons, &c. (all citrus fruit); and almost every kind of fruit and vegetable may be grown. The total extent of land alienated or in process of alienation on June 30, 1906, was 49,970,335 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 124,237,031 acres. At Sydney the mean temperature in the shade for 48 years averaged 53°; the mean temperature in the shade for the north coast is 68°4', Hunter and Manning district 64°4', south coast 59°8', northern tableland 56°4', central tableland 57°2', southern tableland 56°4', north-western slope 66°2', central western slope 63°6', south-western slope 61°6', north-western plain 68°7', central western plain 65°8', and Riverina district 61°0'.

The western portion of the country is not well watered. The Darling and the Murrumbidgee, both tributaries of the Murray, which divides the State from Victoria, are only navigable for part of the year. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy.

Government.—"Responsible government" was established by the Constitution Act, 18 & 19 Vict. c. 54, and is vested in a Governor appointed by the Crown, and a Legislative Council con-

sisting of not less than 21 members; the Council in July, 1907, consisted of 53 members. The Legislative Assembly consists of 90 members, representing 90 electoral districts (as reduced by the Act of 1904, the first election on that basis taking place on 6 Aug., 1904). Each member of the Legislative Assembly receives £300 per annum, and members of both Houses travel free over the Government railways and trainways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. With few exceptions all natural-born or naturalised persons, 21 years of age, who have resided 12 months in the State and three months in the district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904.

Religion.—All religions are free. There is no establishment, and all payments are voluntary, with the exception of such as remain due by the State under former arrangements (£1,954 in 1906-7). About two-thirds of the people are Protestants, the members of the Church of England in New South Wales, according to the census of 1901, numbering 623,131; Roman Catholics numbering 347,286, Presbyterians 132,617, and Methodists 137,638. The places of worship in the State number about 5,850.

Education.—Education is compulsory and free, school fees in State, primary, and superior schools being abolished in October, 1906. The total enrolment in 1906 in 2,885 State schools being 237,493, and the average daily attendance 152,646. The State expenditure on Education, Science, and Art was £978,033, including £26,147 received from Government by university affiliated colleges and Sydney Grammar School. The University of Sydney, with which 4 colleges are affiliated, including the Women's College, was incorporated in 1851. In addition to the State schools there are 852 private colleges and schools, with 58,707 scholars.

Manufactories and Works.—In 1906 there were 3,828 manufactories and works, employing 77,758 hands, 59,888 being males and 17,870 females.

Old Age Pensions.—Since July, 1901, Old Age Pensions amounting to £26 a year have been granted under certain conditions to persons over 65 years of age, who have been resident in the State 25 years, and are in receipt of an income of not more than £52 per annum.

Hospitals.—There are (31 Dec., 1906) 134 hospitals in the State, 21 of them being in the Metropolitan district, and 113 in the country.

Communications.—There were open on 30 June, 1907, 3,452 $\frac{3}{4}$ miles of Government railway, upon the construction of which £44,700,230 have been spent (the working expenses amounted to 53'08 of the gross revenue, leaving £2,209,665 as net profit in 1906-1907); and 81'5 miles of private railway lines. There are also 128 $\frac{1}{2}$ miles of Government tramways (upon which £3,669,524 were spent, the working expenses 80'11, leaving a net profit in 1906-1907 of £180,754), and 6 $\frac{3}{4}$ miles of private tramways. Of telegraphs there are 15,417 miles open, with 74,754 miles of wire and 1,122 stations; messages transmitted outside New South Wales numbering 719,280, inland 2,645,749, total 3,365,029; those received from outside New South Wales numbering 777,852, inland 2,645,749, total 3,423,601 (exclusive of 309,625 transit messages). The Post Offices and receiving offices numbered 2,288, the number of letters and postcards conveyed being 127,683,844; news-

papers, 47,144,094; packets and book parcels, 24,201,131; and parcels, 1,162,185.

Shipping.—In 1906 the number of vessels entered and cleared was 5,776, with a total tonnage of 10,558,750.

Banking, &c.—There were (30 June, 1907) 13 banks of issue, with a paid-up capital of £14,179,916, assets £46,222,008, within N.S.W., and liabilities £44,138,178. The savings bank deposits on 1 Jan., 1907, amounted to £5,997,609, in addition to 652 Post Office savings banks, with deposits amounting to £9,322,913.

Crime.—The number of prisoners of all kinds in gaol on 31 December, 1906, was 1,523, a decrease of 152 compared with the same day of 1905.

Defences.—On 30 June, 1907, the strength of the military and naval forces in the State was as follows:—*Military:* Permanent 505, militia 4,929, volunteers 2,067, rifle clubs 10,450, cadets 5,038, unattached list of officers, reserve of officers and chaplains 236, total, 23,275. *Naval Forces:* 417. The total expenditure on defence in N.S.W. for the year ended 30 June, 1907, was £349,513.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 205 miles, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The city extends four miles north and south by three miles east and west; and contains (1906) 116½ miles of streets, with 22,296 dwellings and a population of 118,400; or, including suburbs, 1,608½ miles of streets, 107,922 houses, and 4,464 acres of park, &c., with a population of 538,800. In addition to the Government buildings, there are the Branch Royal Mint, the University, National Art Gallery, museums, free public library, observatory, two cathedrals, and numerous churches. Other towns are Newcastle (with incorporated suburbs), 61,400; Broken Hill, 28,110; Bathurst, 9,400; Goulburn, 10,500; Granville, 7,500; Parramatta, 13,000; Lismore, 5,300; Maitland, E. and W., 11,100; Grafton and South Grafton, 5,370; Albury, 6,780; Tamworth, 6,250; Lithgow, 7,360; Wagga Wagga, 5,720; and Orange and E. Orange, 6,830.

	1905-1906.	1906-1907.

[NORFOLK ISLAND, the residence of the descendants of the Mutineers of the *Bounty*, removed from Pitcairn Island, is attached to New South Wales, the office of the administration being at the Chief Secretary's Department, Sydney.—*Dep. Administrator*, W. Houston, C.M.G.; *Officer in charge*, M. V. Murphy. It was given a constitution with a resident magistrate and elective council in 1866. This was dissolved in 1903, when an executive council of a President, two elected and four appointed members, was constituted. Pop. (1905), males 537, females 430, total 967, including Melanesians. *Resident Magistrate*, Captain C. S. Elliot, R.N.]

Lord Howe Island (450 miles north-east of Sydney). Pop. (1902), males 68, females 52, total 120. *Visiting Magistrate*, Frank Farnell, J.P.

Sydney, via Suez Canal, is 12,043 miles from London; transit, from 31 to 42 days.

II. VICTORIA.

This territory originally formed part of New South Wales (known as the Port Phillip district), from which it was severed, and erected into a separate colony in the year 1851. It comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes: it lies between the 34th and 39th parallels of south latitude, and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles. The entire area comprises 87,884 square miles, or 56,245,760 acres, of which 4,293,264 were under cultivation in 1906-7.

Population.—Its population at the census on 31 March, 1901, was 1,201,341 (603,883 males and 597,458 females), including about 7,349 Chinese and 652 aborigines. At the census of 1901 the native Victorians numbered 876,003; natives of other Australian States, 65,094; English, 113,432; Irish, 61,512; Scottish, 35,751; Welsh,

3,676; Chinese, 6,230; and other nationalities about 39,643. The Victorian aborigines at the time of the first colonisation of the district were about 15,000 in number; in 1851 the official return gave 2,693, and in 1901 652 (367 males and 285 females). The birth-rate of Victoria for 1906 was 25·14 per 1,000; the death-rate was 12·42 per 1,000.

Religion.—Members of the Church of England numbered 424,011, "Protestants" 8,693, Presbyterians 191,503, Methodists 180,272, Baptists 32,648, and Roman Catholics 263,710.

Minerals.—Victoria is one of the leading gold-producing States in Australia. From the discovery of gold in 1851 to the end of the year 1906, the quantity raised—69,202,178 oz.—amounted in value to £276,516,978, the amount produced in 1906 being 834,775 oz. The value of other minerals raised to the end of 1906, consisting principally of tin, copper, coal, and antimony, is estimated at about £6,324,482 (including building stone, &c., £3,290,027).

Communications.—There were 3,446 miles of railway completed at the end of June, 1906, all of which belonged to the Government, the capital cost amounting to £41,404,947. The gross receipts were £3,789,068, and the working expenses £2,217,343, leaving a net income of £1,571,725, or 3·8 per cent.

There were 1,055 stations for electric telegraphs, extending over 6,954 miles (poles), which produced a revenue of £133,536 in 1906, the total mileage of wire being 14,950, and the telegrams transmitted numbering 2,488,719. There were also 32,956 miles of telephone wire.

Trade and Industry.—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (4,360 factories, &c., employing 85,229 hands in 1906) are mainly for home consumption. In 1906 the chief exports were: Wool, £6,154,382; gold (including specie), £4,910,187; butter, £2,069,596; wheat, flour, and biscuit, £2,925,529; oats, £122,627; leather, £396,408; skins and hides, £1,001,720; and live stock, £1,378,977. A trade is also springing up in preserved and frozen meats, the value of the exports (excluding bacon and hams) being £689,837 in 1906. The principal imports of the State in 1906 were wool (from across the border), £3,578,056; live stock, £1,876,751; sugar and molasses, £783,918; gold (including specie), £918,907; cottons, £1,248,709; woollens, £921,532; and timber, £703,958.

Agriculture.—Agriculture has of late years much improved, wheat and oats chiefly being cultivated; the dairy industry has also made marked progress. Of the 4,293,264 acres under cultivation in 1906-7, 2,031,893 were wheat crops, and 380,493 oats, and 621,139 acres were cut for hay. In 1906-7, 2,044,833 gallons of wine were produced. There were in 1906 701,309 milch cows, producing 68,088,168 lb. of butter and 4,877,593 lb. of cheese.

Shipping.—The shipping statistics of the State furnish abundant evidence of the magnitude and value of its trade. In 1906 4,675 vessels, of 8,136,991 tons, entered and cleared.

MELBOURNE, the chief city and seat of government, is an episcopal see, and is distinguished for its University, Museum, Mint, Public Gardens, Observatory, Public Library, Hospital, its churches and other institutions. With its suburbs it contained on 31 December, 1906, a population of 526,400 inhabitants. Other towns are Ballarat, 48,565; Bendigo (Sandhurst), 44,140; Geelong, 27,416; Castlemaine, 8,580; Warrnambool, 6,450; Maryborough, 5,791; and Stawell, 5,200.

The government is vested in a Governor appointed by the Crown, aided by an Executive Ministry consisting of 11 members, and a Parliament consisting of a Legislative Council of 34 members elected for 17 provinces, and a Legislative Assembly of 65 members for 65 districts.

Governor and Commander-in-Chief, H.E.

Maj.-Gen. Hon. Sir Reginald Arthur James Talbot, K.C.B. (25 April, 1904) ... £5,000

Private Sec., Hon. Victor Nelson Hood.

III. SOUTH AUSTRALIA.

South Australia was established as a British Province by 4 & 5 Will. IV., cap. 95, but not proclaimed until 28 Dec., 1836, so that its history falls within Queen Victoria's reign. It is situated between 11° and 37° S. lat. and 129° and 141° E. long., and covers 12° of longitude and 27° of latitude. The total length is 1,850 miles, the extreme breadth 650 miles, with about 2,000 miles of sea-board, the total area being 903,690 sq. miles.

Population.—The population at the 1901 census was 362,604 (males, 184,422; females, 178,182); on 31 December, 1906, 380,245 (males, 200,451; females, 179,794); birth rate (1906) 23.70 death rate 10.29, and marriage rate 7.12 per 1,000.

Meteorology.—The mean temperature of the original colony is 74°, with a mean rainfall of 16 inches on the plains and 42 inches in the hills, the 63 years' average at Adelaide being 20 inches. The winter temperature averages 53°, with 100° for summer, but the climate is so dry that the inconvenience is comparatively slight.

Government.—The government is administered by a Governor, the Legislative Council with 18 members, and the House of Assembly with 42 members. There are 4 Cabinet Ministers, members of the Legislature and *ex officio* members of the Executive Council, of which the Governor is president. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 55,068 (14,549 women) in 1906, those for the Assembly numbering 191,311 (94,124 women).

Local Government.—There are 32 Municipalities and 142 District Councils, the aggregate assessment of property within their boundaries being £2,858,545, and the revenue (1906) £268,183, and expenditure (1906), chiefly on roads, £290,683.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and two Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 112 annually, which is at the rate of 1 in every 3,360 of the population. The Real Property Act (1858) simplifies the transfer of land, and since the passing of the Act land to the value of £17,148,760 has been dealt with.

Religion.—In 1905 accommodation was provided for 32,811 members of the Church of England, 79,445 Methodists, 12,990 Congregationalists, 14,256 Baptists, 22,018 German Lutherans, in addition to about 50,000 Roman Catholics, in 1,122 places of worship.

Education.—There is an endowed university at Adelaide, founded in 1881, with 360 undergraduates; all classes are open to women. A State school of mines and industries has also been established. Primary education is provided by the State, and controlled by a responsible minister; it is secular, compulsory, and free; there are 711 State schools, with 1,429 teachers and 62,822 scholars; the expenditure in 1906 was £157,828, the total capital outlay on school buildings amounting to £525,670. Private schools number 217 (1906), with 725 teachers and 10,570 scholars. The Public Library, Museum, Art Gallery and local institutes are supported or assisted by the State, the sum expended for 1906-7 was £12,205.

Banking.—There are 7 banking institutions in Adelaide, with 96 branches, having a total liability of £8,291,952 (including £313,751 Perpetual Inscribed Stock) and assets £7,760,674 in 1906; their note issue amounted to £418,072. The Government Savings Bank on 30th June, 1907, had 163 agencies, with 161,855 depositors (£5,320,872, bearing interest at 3½ per cent.), and 22,185 depositors with £16,168 not bearing interest.

Commerce in 1906.—Total value, £21,635,435.

	Imports from.	Exports to.
United Kingdom	£2,513,376	£3,550,935
British Colonies	6,225,353	6,286,592
Foreign Countries	993,535	2,095,644

£9,702,264 £11,933,171

Shipping.—The total tonnage inwards and outwards in 1906 was 5,564,308 tons; 4,866,699 tons were British, and 679,609 tons foreign.

Railways.—The length of Government lines open in 1906 was 1,978 miles. The total cost to 31 Dec., 1906, was £13,752,031, or £7,505 per mile; the working expenses in 1906 were £800,006 and the receipts £1,418,198, the net revenue being 4¼ per cent. on the cost.

Agriculture.—Of the total area about two-thirds are farmed or grazed, and 3,246,824 acres cultivated—under wheat 1,686,374 acres, hay 298,396, oats 57,000, barley 28,122, and potatoes 9,894 acres, with 1,065,921 acres lying fallow. The quantity of wheat produced in 1906-7 was 17,466,501 bushels. English fruit, oranges, lemons, almonds, and olives are successfully grown, and fruit drying is profitable. There were 22,575 acres of vines, the export of wine being 562,819 gallons in 1906, of which 228,165 gals. (value £34,488) were sent

to the United Kingdom in 1906. Brandy and other spirits are also produced. There were 6,624,941 sheep in 1906, and 41,771,682 lb. of wool (valued at £1,561,564) were exported; cattle number 325,724, and horses 206,663.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron, and coal are found.

	1904.	1905.
Revenue	£2,725,724	£3,155,285
Expenditure	2,650,020	2,897,612
Debt (30 June)	28,727,895	27,691,112
Total imports	8,439,609	9,702,264
Total exports	5,490,667	11,933,171
Imports from U.K.	2,033,359	2,513,376
Exports to U.K.	2,555,118	3,550,935

IV. QUEENSLAND.

This State, situated in lat. $10^{\circ} 40'$ — 29° S., and long. 138° — $153^{\circ} 30'$ E., comprises the whole north-eastern portion of the Australian continent.

Queensland proper possesses an area of 670,500 square miles (i.e., equal to more than $5\frac{1}{2}$ times the area of the United Kingdom), of which the Government have parted with the fee simple of 14,585,560 acres; under a system of deferred payment, 3,737,083 more are in process of alienation out of the total of 429,120,000 acres, but an additional area of 246,700,135 acres has been leased out for sheep and cattle runs and grazing-farms, 252,603 acres as scrub selections, 102,686 acres under gold-mining and mineral lease, and 3,789 for special purposes, leaving 163,738,144 practically unoccupied. The estimated population, Dec. 31, 1906, numbered 535,113, of whom 292,609 were males and 242,504 females. Wheat, oats, and barley flourish on the Darling downs; while a still larger area is devoted to maize, which yields an average crop of about 22 bushels per acre. Both English and sweet potatoes are cultivated; as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, coconuts, mangoes, plums, and various English fruits. In the year 1906, 184,577 tons of sugar were produced. The chief articles of export the produce of the State in 1906 were: Wool, £3,388,929; gold, £2,199,276; silver, £85,883; tin, £430,407; copper, £763,328; pearl and tortoise-shell, £52,347; meat, including extract, £675,160; green fruit, £119,357; sugar, £1,615,689; hides and skins, £458,016; tallow, £181,388; live stock, £1,122,138. At Brisbane the average temperature for 1906 was 69° ; the maximum in the shade was 98° , and the minimum $36^{\circ} 5'$. Wool, gold, meat, and sugar are at present the staple productions; rich gold, copper, tin, lead, quicksilver, antimony, and coal deposits are found in several districts; timber also, of fine quality for cabinet manufacture, the Moreton Bay pine and the *Damara robusta*, together with the cedar of Queensland, forming valuable products for export. At the end of 1906 the horses numbered 452,916, cattle 3,413,919, sheep 14,886,438, and pigs 138,282.

At the end of 1906 there were 3,137 miles of railway open. In 1906 there were 1,089 State schools in operation, with 2,401 teachers and an average daily attendance of 69,771 children; and 177 private and grammar schools, with an average attendance of 12,833.

The banking deposits on the 31st Dec., 1906, were £13,924,391, apart from the 4,292,066 in the hands of the Government Savings Bank.

The number of sea-going vessels entered inwards during 1906 was 793 (tonnage 1,309,934), and the number outwards 796 (tonnage 1,313,001).

	1905.	1906.
Public revenue	£3,737,691	£4,004,514
Public expenditure	3,627,529	3,807,067
Public debt, 31 Dec.	39,068,827	39,068,827
Gold output	02. 592,620	02. 544,636
Total imports	£6,999,345	£8,311,466
Total exports	11,939,594	12,754,289

Domestic imports from U.K., 1906 (B. of Trade):—

Apparel, &c.	£107,849	Machinery	£85,292
Cottons	382,984	Iron	453,502
Woolens	254,613	Spirits	70,640
			£2,104,796

Domestic exports to U.K., 1906 (B. of Trade):—

Butter	£404,980	Silver Ore	£106,389
Copper Reg.	380,938	Tallow and	
Meat, Fresh	02. 752	Stearine	151,304
Do. Preserved	55,826	Wool	1,151,615
Shells	118,627		£2,664,477

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane (pop. 132,468), Rockhampton (19,692), Maryborough (12,900), Townsville (15,506), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg. Other places of importance are Ipswich (15,246), Toowoomba (14,087), Charters Towers (20,976), and Gympie (14,430).

The Constitution comprises a Governor, Legislative Council of 44 members nominated for life by the Crown, and Assembly of 72 members elected by the people. There is a Supreme Court, with a Chief Justice, and three Puisne Judges; and inferior courts, as in New South Wales.

CAPITAL, Brisbane. Population within 10-mile radius (1906), 132,468.

V.—TASMANIA

is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, in which are situated the Furneaux Group and King Island, included within the colony. It lies between $40^{\circ} 33' - 43^{\circ} 39'$ S. lat. and $144^{\circ} 39' - 148^{\circ} 23'$ E. long., and contains an area of 26,215 square miles, or 16,778,000 acres of land, of which, on 1st March, 1905, 226,228 acres were under crop, and 378,346 under artificially-sown grass; wheat, 43,091; while 1,345,302 acres (exclusive of mineral land) were leased from the Crown principally for pastoral purposes, the terms of purchase being £1 an acre for cash, or £1 6s. 8d. in 14 yearly instalments. The population (31 Dec., 1904) was 180,200, of whom 89,345 belonged to the Church of England, 32,355 were Roman Catholics, 26,952 Methodists, and 12,285 Presbyterians. The aborigines have become quite extinct, the last—a female, "Truganini"—having died in 1876. The island was first discovered by Tasman, in December, 1642, and named by him "Van Diemen's Land," in honour of his patron, the then governor of the Dutch possessions in India. It was subsequently partially explored by Captain Cook, and in 1803 Lieut. Bowen, despatched from Sydney with a few soldiers and convicts to form a penal settlement, fixed upon the spot where Hobart now stands. In 1825 it was severed from New South Wales and formed into a distinct colony. Transportation of criminals was abolished in 1853, and the name officially changed from Van Diemen's Land to Tasmania. The climate is fine and salubrious, and well suited to European constitutions, and the hot winds of Australia do not reach the island. At Hobart in 1902 the mean annual temperature was $53^{\circ} 2'$, the mean summer temperature being $58^{\circ} 6'$, and that of winter $45^{\circ} 6'$; the average rainfall for Hobart, 1904, was 22.08 inches. The surface of the country is generally undulating forest land with mountains from 1,500 to 5,000 feet in height, and wide expanses of level,

open plains. The chief products of the State are wool, gold, silver, copper, timber, tin, and fruit, and sheep; the two latter being among the principal industries. The amount of stock on 1 March, 1905, was sheep (and lambs), 1,556,460; cattle, 202,206; horses, 36,565; and pigs, 77,943. The forests of Tasmania abound in the most beautiful cabinet woods and the largest size timbers, adapted for every variety of purpose. The fauna include the Tasmanian devil and native tiger, and the curious duck-billed platypus; while the wombat, the wallaby, and the opossum supply valuable skins. There are silver and copper fields on the west coast; over 45,000 acres have been taken on mineral leases, and mines of both lode and stream tin are being worked in the north. The value of tin exported in 1904 was £281,541; of silver £276,522, and of copper £568,982; iron-ore exists, and the value of gold exported in 1904 was £187,703. Coal of a good quality, and in easily accessible positions, is very generally distributed over the island. There are in all 620 miles of railway open, including the main line running from Hobart to Launceston, through the island; and 321 telegraph stations, with 3,432 miles of wire, including a submarine cable (432 miles) communicating with the Universal Telegraph System; 1,450 miles of telephone wire; 383 post-stations, and 3,231 miles of post roads. On Dec. 31, 1904, the total registered shipping for the year was 55 steamers and 158 sailing vessels, with a total tonnage of 24,717 tons. The inward entries during 1904 were 957 (tonnage, 1,043,425), and the outward entries 944 (tonnage, 1,050,182).

A Department of Agriculture was formed in 1902. Primary education is administered by a Department, and there are 356 State schools.

	1903-4.	1904-5.
Public revenue	£857,668	£852,094
Public expenditure	879,356	842,469
Public debt, 31 December	9,228,963	9,724,732
Total imports	2,593,810	2,554,454
Total exports	2,843,108	2,989,600
Imports from U.K. (1905-6)	576,011	406,407
Exports to U.K. (1905-6)	439,668	430,870

The Constitution of Tasmania was settled by Local Acts (18 Vic., No. 17; 49 Vic., No. 8; 1 Edwd. VII, No. 8; and 3 Edwd. VII, No. 17). By the Act of 1855 the Legislative Council and House of Assembly are constituted "The Parliament." The former consists of 18 members, elected for six years; and the latter of 35 members, elected for three years. The Governor, who is appointed by the Crown, is aided by a Cabinet of responsible Ministers. The franchise has been extended to women. For local purposes the island is divided into municipal, police, road district, and town boards, which elect their own councillors and trustees.

CAPITAL, City of Hobart. Population, with suburbs, 34,949. Other towns are Launceston (pop. 21,650), Zeehan, Ulverstone, E. Devonport, Latrobe, Waratah, Westbury, Longford, Burnie, and Queenstown.

Commissioner of Courts, Launceston, E. L. Hall	400

Agent-General in London, Hon. Alfred Dobson, C.M.G., 5 Victoria Street, S.W.
Secy., Herbert W. Ely.

Hobart, 13,250 miles; transit, 36 to 40 days.

VI. WESTERN AUSTRALIA

includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is, from north to south, 1,480 miles, and 1,000 from east to west, and its total area 975,920 square miles. The jarrah (*Eucalyptus marginata*), sometimes erroneously called mahogany, covers immense tracts of land in the S.W. portion of the State; its timber is extraordinarily durable, and as it resists the white ant and the *Teredo navalis* it is admirably adapted for railway sleepers, and for piles for bridges and harbour works. The sandalwood (*Santalum cygnorum*) has long been an article of export; the tuart (*Eucalyptus gomphocephala*) and karri (*Eucalyptus diversicolor*), eucalypti of enormous size, are valuable timber trees. The occupied portion of the State extends along the western coast for about 1,200 miles, while the mining population has penetrated over 500 miles into the interior, and the population on June 30, 1906, was 260,738. The average temperature of Perth (lat. 32° S.) for the past

20 years was 65°, while the mean for the barometer for 20 years was 30.05 inches. The climate is one of the healthiest and most enjoyable in the world. There are two seasons, the wet and the dry, the former lasting from May to October. The total rainfall at Perth during 1905 was 34.6, the average for the past 30 years being 33.08. The chief products are gold, wool, timber, pearls and pearl-shells, silver, lead, copper, tin, coal, iron, sandal wood, cereals, fruit, wine, horses, and cattle. 195,071 acres were under cultivation for wheat in 1905. Magnetic iron, lead, copper, and tin ores exist in large quantities.

Gold Statistics.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being rapidly developed, the production of gold being 207,111 fine oz. in 1895, 251,618 oz. in 1896, 603,847 oz. in 1897, 939,490 oz. in 1898, 1,470,605 oz. in 1899, 1,414,311 oz. in 1900, 1,703,416 oz. in 1901, 1,871,038 oz. in 1902, 2,064,801 oz. in 1903, 1,983,230 oz. in 1904, 1,955,316 oz. in 1905, and 1,054,726 oz. in the first seven months of 1906. To the Coolgardie group belong the following goldfields: North Coolgardie, Broad Arrow, North-East Coolgardie, East Coolgardie, and Coolgardie. The largest amounts have been obtained from the East Coolgardie field, Murchison being next in productiveness. Gold is also found in the Kimberley, Pilbara, West Pilbara, Ashburton, Gascoyne, East Murchison, Dundas, Donnybrook, Peak Hill, Yalgoo, Mt. Margaret, Yilgarn, and Phillips River districts. The total amount produced in the State from 1886 to 31 July, 1906, is 15,926,413 fine oz.; of this amount 7,080,800 oz. were received at the Royal Mint, Perth.

There are 2,312 miles of railway open; and there is direct telegraphic communication with England by the Eastern Extension Telegraph Co.'s cable from Roebuck Bay on the N.W. coast, in addition to the line through Eucla to Adelaide, and with South Africa by Cocos Island. The principal ports are Fremantle, Albany, and Bunbury. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The exports are of wool, gold, jarrah and karri timber, tin, copper ore, sandalwood, pearls and pearl-shells, kangaroo skins, &c. The estimated value of the exports for 1905 was:—Wool, £594,872; timber, £689,960; sandalwood, £38,817; pearls, £120,000 (estimated); shell, £146,832; gold, £3,300,402; gold specie, £4,245,244; hides and skins, £168,280. The stock returns of the State are as follows:—Horses, 97,397; cattle, 631,825; sheep, 3,200,793; and pigs, 74,567. In 1905 the vessels entered inwards numbered 662 (tonnage, 1,839,227), and those outwards 656 (tonnage, 1,828,256).

	1904-5.	1905-6.
Revenue	£4,019,066	£3,972,778
Expenditure	4,145,625	4,046,828

	1904.	1905.
Imports	6,672,480	6,481,874
Exports	10,271,489	9,871,019
Raw Gold exports	3,965,095	3,300,402
Imports from U.K.	2,565,302	2,278,933
Exports to U.K.	4,440,817	4,210,201

Under an Act of the Imperial Parliament, 53 & 54 Vict. c. 26, the State is ruled by a Governor appointed by the Crown, a Legislative Council, and a Legislative Assembly. This Act

was proclaimed and came into operation 21st Oct., 1890.

Religious Statistics.—At the census of 1901, 75,617 belonged to the Church of England, and 40,584 were Roman Catholics.

The educational system is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There is a training college, a technical school, a school of mines at Kalgoolie, and a school in Perth for the higher education of boys. The foundation of a University is under consideration. The total amount expended on education during the year ended 30 June, 1906, was £163,010.

The principal towns in the State are:—Perth (pop., including suburbs, 52,300), on the right bank of the Swan River estuary, 12 miles from Fremantle; Fremantle (including suburbs, 27,100), and the following municipalities:—Albany (3,435), Coolgardie (3,830), Kalgoolie (6,780), and Boulder (5,658).

Governor, H.E. Admiral Sir Frederick George Denham Bedford, G.C.B. £4,000

Transit from London to Perth, 27 days.

Dominion of New Zealand.

The Dominion of New Zealand consists of three main islands in the South Pacific Ocean, known as the North, South and Stewart Islands, situate about 1,200 miles E. of New South Wales, between 33°–53° S. lat. and 162° E. long.—173° W. long., with several groups of smaller islands lying at some distance from the principal group. Portions of New Zealand were explored by Tasman, under the direction of the Dutch East India Company, in 1642, and visited at various times during the 18th century, and in 1777 by Captain Cook. The first settlement of Europeans was made in 1814, but no colonisation took place until 1839. In 1841 New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The entire area (inclusive of the Chatham, Auckland, Kermadec, Cook, and other islands) is stated at 104,751 square miles, or 67,400,640 acres (being a little smaller than Great Britain and Ireland), of which two-thirds are fitted for agriculture and grazing. The North Island comprises about 44,468 sq. miles; South Island, 58,525; Stewart Island, 665, with only 288 inhabitants. An adjacent group, named the Chatham Islands, contain 375 sq. miles; and the Cook and other Pacific islands recently included within the boundaries of the colony, 280 sq. miles. Kermaduc and other Islands 438 sq. miles.

The European population at the census of April 29, 1906, was 888,578 (471,008 males and 417,570 females). The native population (Maoris) in 1906, was 47,731 (25,538 males and 22,193 females), chiefly in the North Island, and 12,340, excluding 776 absent from the islands (6,224 males and 6,116 females) in the Cook and other Pacific islands, making the total population of the colony, including Maoris, &c., 948,649 persons. Since the census the estimated population of the Colony on Dec. 31, 1906, is ascertained to have been 968,797 persons. In 1840 a treaty was concluded at Waitangi with the native chiefs, whereby the sovereignty of the islands was ceded to Great Britain, while the chiefs were guaranteed the possession of their lands, forests, &c., the right of pre-emption, being reserved to the Crown if they wished to alienate any portion. This right was abolished by legislation in 1862, when the Crown relinquished its right of pre-emption, whilst at the same time the purchase of native lands for the Crown did not abate, but continued side by side with the private purchases until 1894, when the right of private purchase was withdrawn. The Maori Lands Administration Act of 1900 with its amendment 1905 restrains natives from pauperising themselves by parting with the freehold of the balance of their lands.

New Zealand in many parts is very mountainous; a mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The extremes of daily temperature vary throughout the year only by an average of 20°; London is 7° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole colony for the different seasons is:—Spring, 55°; Summer, 63°; Autumn, 57°; and Winter, 48°; and the climate is admirably adapted for raising every fruit, flower, and edible that flourishes in Great Britain. Amongst the productions are the Kauri pine (found only at the northern extremity of the islands), much

valued for shipbuilding, and for its resin (Kauri gum); and the native flax, which is used for the manufacture of ropes and twine. The principal exports in 1906 were wool (£6,765,655), frozen meat (£2,877,031), gold (£2,270,904), butter and cheese (£1,901,237), agricultural products, tallow, Kauri gum and timber. Coal-mining is one of the largest industries, the output in 1906 being 1,792,536 tons, the approximate total output to the end of 1906 being 23,416,533 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and a rich iron ore, in the form of ironsand, has been found in Taranaki; copper is also found.

The total extent of land under all kinds of crop (excluding lands in artificial grasses), and of land broken up but not under crop, is (1907) 1,612,137 acres, while there are 12,718,531 acres of land in sown grass, of which 7,903,374 acres had not been previously ploughed. In 1906 the number of sheep was 20,108,471; horned cattle, 1,851,750; and horses, 342,608. In March, 1907, there were 2,458 miles of Government railway lines in working order, and more under construction; and 113 miles of private lines, together with an excellent coaching system. During 1906 the vessels entered inwards numbered 629 (tonnage, 1,243,652), and those entered outwards 631 (tonnage, 1,238,214), exclusive of coasting vessels.

The general government consists of a Governor aided by a Ministry, a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for seven years only), at present consisting of 45 members, and a House of Representatives, consisting of 80 members elected for three years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election nor for appointment to the Legislative Council.

* This amount, however, includes Debitants redeemed and advances repaid £2,254,550 in 1904-5, £341,300 in 1905-6, and £1,685,456 in 1906-7, besides monies spent under "Land for Settlements Act" or purchase of private estates for settlement £603,322 in 1904-5, £990,815 in 1905-6, and £432,343 in 1906-7.

The State system of education is free, secular, and compulsory. There were (December, 1906) 1,847 public primary schools, with 3,872 teachers and 139,302 scholars; there are also 308 private schools, with 17,131 scholars, and, in addition, 100 village schools for the Maoris. The higher education of boys and girls in the cities and large towns is carried on in 26 endowed colleges and grammar schools. The University of New Zealand has power to confer degrees. The annual postal circulation of the colony was (1906) 84,877,374 letters and post-cards, 23,716,431 newspapers, and 24,342,380 books and packets, and the work is effected by 1,584 post-offices. There are 8,953 miles of telegraph line with 27,031 miles of wire.

Defences.—New Zealand has torpedo-boats and submarine mining steamers; the Calliope Dock, capable of docking two warships, was subsidised by the Imperial Government in 1898.

CAPITAL, Wellington, in the North Island.

The population of the chief cities and towns at the census of 29 April, 1906, was as follows:—Wellington (and suburbs), 63,807; Auckland (and suburbs), 82,101; Dunedin (and suburbs), 56,020; Christchurch (and suburbs), 67,878; Invercargill (and suburbs), 12,507; Napier, 9,454; Nelson, 8,164; and Oamaru, 5,071.

Governor and Commander-in-Chief, H.E.

Cook Islands Administration.—The Cook and other islands, annexed to the British Empire in October, 1900, and included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitjaro, Penrhyn, Manihiki, Rakahanga, and Niue or Savage Island, together with a few smaller islands, and are situated in the South Pacific, between 8° to 23° S. lat. and 156° to 170° W. long. The population consists of about 13,000 natives, and 150 Europeans and other nationalities. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The exports average about £44,000, and the imports about £42,000. Rarotonga is the chief island, with a native population of 2,300, and a European population of 107. The government is administered locally under the direction of New Zealand. The Federal Council of the Cook Islands, under the direction of the Resident Commissioner at Rarotonga, legislates for all the islands except Niue, which has a Resident Commissioner and an Island Council of its own. Makea Ariki still remains as the head native chief of the Cook Islands, and receives an allowance from the Government.

Resident Commissioner and Chief Judge, Rarotonga, Lt.-Col. Gudgeon, C.M.G.	£500
Resident Commissioner and Magistrate, Niue, C. F. Maxwell	300
Wellington, 16,000 miles; transit, 38 days.	

Fiji.

This is a group of 200 to 250 islands in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,451 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), cocoanut, sugar-cane, tea, cotton, maize, tobacco, and arrowroot. Sugar, pearl-shells, maize, beche-de-mer, copra, and cocoanut oil were for some time the chief exports, but the principal exports in 1906 were sugar, green fruit, copra, vanilla, beche-de-mer, pea-nuts, and turtle-shell. The Governor is appointed by the Crown, and is assisted by an Executive Council, consisting of five official members. Laws are passed by a Legislative Council, of which the Governor is president, and which contains ten official and eight unofficial members, of whom six are elected and two (natives) nominated by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (31 March, 1901) was 120,124 (94,397 native Fijians, 17,105 Indian immigrants, 2,459 Europeans, and some Polynesians and others).

Suva is 11,000 miles from London; transit from London, *via* San Francisco, about 33 days; *via* Vancouver, about 30 days; and *via* Sydney, about 44 days.

* £65,815 to Imperial Government, bearing no interest.

Papua.

The territory of Papua, formerly known as British New Guinea, comprises the southern and south-eastern shores of the island, from the 141st meridian of east longitude eastward as far as East Cape, and thence north-westward as far as the 8th parallel of south latitude in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8th parallel to the 147th degree of east longitude, then in a straight line in a north-westerly direction to the point of intersection of the 6th parallel of south latitude and of the 144th degree of east longitude, and continuing in a west-north-westerly direction to the point of intersection of the 5th parallel of south latitude and of the 141st degree of east longitude, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between the 8th and the 12th parallels of south latitude, and between the 141st and the 155th degrees of east longitude, and not forming part of the Colony of Queensland; and, furthermore, including all islands and reefs lying in the Gulf of Papua to the northward of the 8th parallel of south latitude. The ports of entry are Samarai, Port Moresby, Daru, and Bonagri.

There is an Executive Council of 6 members, who, with 3 non-official members, form also the Legislative Council.

CAPITAL, Port Moresby. Pop., about 1,500 natives and 100 Europeans.

Port Moresby is 12,000 miles from London.

Pacific Islands.

(1) The British Solomon Islands, protected since 1893, and consisting of Guadalcanar, Malaita, San Cristoval, New Georgia, and other islands situated in about 8° S. and 160° E., with a total area of about 8,500 square miles. The Santa Cruz Group and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1906-7 was £4,618, and the expenditure, £2,855; exports, 1906, £50,273; imports, £41,821. European residents, 230; native pop., 150,000. The seat of government is Tulagi.

Resident Commissioner, Charles M. Woodford, £800

(2) The Gilbert and Ellice Islands Protectorate. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 58' W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52' S. and long. 169° 35' E., was included in the Protectorate in 1900. Total area, 166 square miles; population, about 35,000 and 80 Europeans. Revenue, 1906, £4,345; expenditure, £3,385; imports (1900), £20,369; exports (chiefly copra), £21,532.

Resident Commissioner, W. Telfer Campbell, £650

(3) The Tonga or Friendly Islands.—A protectorate over the Tonga Islands was proclaimed 19 May, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and a population on Jan. 1, 1905, of 21,103 natives of Tonga, 300 other natives, 151 British subjects, 89 foreigners, and 120 half-castes. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Tongatabu is the seat of government, the king being Jioaji Tubou II. Soil generally is fertile; the principal exports are copra, fungus, green fruit, kava, and candle-nuts. Revenue, 1906, £32,466; expenditure, £29,284; imports, £70,868; exports, £110,728. Of the total shipping, 93,994 (1905), 77,340 tons were British.

Agent and Consul, Hamilton Hunter, C.M.G. £850

(4) The Phoenix Islands (Wilkes, Gardner, Birnie, Hull, Enderbury, Phoenix, and Sidney), between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) The Union, or Tokelau, Group of six islands and some islets (Quiros, Fakaafo (3), Nukunono, and Atafu).

Deputy Commissioner, H. M. Agent, Tonga.

(6) Pitcairn Island, situate in lat. 25° 3' 30" S., long. 130° 3' 30" W. Pop. (April, 1907) 144, descendants of the mutineers of H. M. S. Bounty. Arrowroot is manufactured and exported.

Deputy Commissioner, R. T. Simons (H. M. Consul for the Society Islands).

Chief Magistrate, Arthur H. Young.

(7) Fanning Island, in lat. 3° 51' 23' N., long. 159° 21' 50" W. Pop., 21 Europeans in connection with Pacific cable station, and about 200 Gilbert Islanders in copra industry.

Deputy Commissioner, Alfred Smith.

(8) The New Hebrides Group lies between the 12th and 20th degrees of south latitude and the 165th and 170th of east longitude. A joint commission consisting of British and French naval officers has been appointed to protect the lives and property of British and French subjects, and to maintain order. British and French Residents were appointed in 1902. Nat. pop. about 100,000, European 677. Principal exports, maize, copra, and bananas, also coffee, timber, and sulphur. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia. Imports, 1905, £52,943; exports, 1905, £44,046; shipping, 1904, 64,900 tons.

Deputy Commr. New Hebrides, Capt. Ernest

Goldfinch Rason, R.N. £700

(9) There are also a large number of scattered groups and isolated islands.

High Commissioner, The Governor of Fiji... £300

Chief Judicial do., The Chief Justice of Fiji 300

Sec. to High Commission, M. King 450

Registrar, R. Green..... 50

THE West Indies are an immense number of islands and islets, some of them mere rocks, extending from 10° to 27° North, and from $59^{\circ} 30'$ to 85° West. They are divided by geographers into (1) the Bahamas, (2) the Greater Antilles, and (3) the Lesser Antilles, of which the last-named are subdivided into the Leeward and Windward Islands. The islands lying off the coasts of South America and Central America respectively form two separate groups in addition to those already mentioned. The total area of the West Indies is probably about 95,000 square miles, of which the Greater Antilles occupy not less than 83,000 square miles. The prevalent character of the islands is bold and mountainous. The highest points are about 8,000 feet above the sea-level, and several of the islands contain active volcanoes, while nearly all of them show signs of volcanic action. The mean yearly temperature of the islands is about 78° , but that of the higher lands is often much less. The seasons alternate from drought to moisture, and in most parts of the archipelago there are two wet and two dry seasons. On the whole it may be said that the climate is generally healthy, and between the months of November and May in many of the islands it is delightful. The vegetable productions are both varied and abundant, the principal articles of commerce including sugar, bananas, oranges, coffee, cocoa, cotton, pimento, nutmegs, indigo, tobacco, maize, guava, ginger, coconuts, annatto, aloes, sassafras, the castor-oil tree, cabbage-tree, and medicinal drugs. Of the more common fruits there are the pineapple, pomegranate, cocoa-nut, oranges, lemons, limes, citrons, the mango, shaddock, papaw, banana, and plantain. Yams, sweet potatoes, and manioc also grow freely. The mountains in the greater islands furnish a varied abundance of timber, including mahogany, cedar, lignum-vitæ, iron-wood, Indian-fig, well adapted for cabinet-work, shipbuilding, and other arts. Indian corn yields abundant crops almost everywhere, and rice in the island of Trinidad. The total population is nearly 4,000,000, of whom above half are negroes, while the remainder are chiefly mulattoes. The islands at the time of their discovery were inhabited partly by the Caribs, a fierce and warlike race, and partly by a less savage race known as the Arrowauks; but both these native Indian races are now practically extinct. By far the largest of the West Indies are the magnificent islands of Cuba and Hispaniola.

The first spot on which Columbus landed in the New World in 1492 was San Salvador, one of the Bahamas. On the same voyage Cuba and Hispaniola were discovered, and the other islands very shortly afterwards. For some time the West Indies remained in the undisputed possession of Spain, subject only to occasional visits from French and English ships. At the commencement of the 17th century, however, the English, French, and Dutch began to form settlements, and to import negroes from West Africa to work the plantations; and whenever war broke out in Europe it spread to the West Indies. They are now divided as follows:—*British*: Jamaica, Turks and Caicos Is.; all the Bahamas; Antigua, Montserrat, Nevis, St. Christopher, Dominica, the Virgin and the Cayman Islands, Grenada, St. Vincent, St. Lucia, Barbados, Trinidad and Tobago; and the islands off the coast of British Honduras. *French*: Martinique, Guadeloupe, Desade, Marie Galante, Les Saintes, St. Bartholomew, and St. Martin (the last partly Dutch). *Dutch*: St. Eustatius, Saba, Bonaire, Curaçao, Aruba. *Danish*: Santa Cruz, St. Thomas, St. John. *U.S.A.*: Puerto Rico. *Venezuelan*: Coche Cuagua, Tortuga, and Margarita. *Independent*: Hispaniola, divided into Hayti and San Domingo and Cuba. The British Islands have an area of about 13,750 square miles, and a population of 1,350,000. In 1898 a most disastrous hurricane swept over the group of islands, almost all of which were affected, while St. Vincent, Barbados, and St. Lucia were practically devastated. On August 7th, 1899, a further hurricane devastated the island of Montserrat, doing damage also to St. Kitts, Nevis, and Antigua. The island of Puerto Rico (U.S.A.), Guadeloupe (French), and Santa Cruz (Danish) also suffered severely. Further disaster befell St. Vincent in 1902 by the eruption of "La Soufrière," one-third of the island being devastated, and Mont Pelée, in Martinique, entirely destroyed the town of St. Pierre. On the 14th January, 1907, nearly the entire city of Kingston, Jamaica, and many of the principal residences in the suburbs and adjoining parishes of St. Andrew and St. Catherine were destroyed by an earthquake, causing great loss of life and property. The British Islands have still a future in store for them when cane-sugar growing can again profitably be carried on, and in the fruit, cotton, and wool industries, which are now rapidly increasing.

Domestic Imports from United Kingdom, 1906:

Apparel, &c.	£239,634	Machinery	£115,704
Beer and Ale	58,845	Manure	76,792

Bananas	283,747	Rum	138,488
Cocoa	346,137	Spices	73,306
Cotton, Raw	78,366	Sugar	665,809
			£2,086,344

JAMAICA.*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43'—18° 33' North lat. and 76° 11'—78° 21' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,193 square miles, and a population, in April, 1897, of 639,421, showing an increase during the previous decade of 58,687; in 1891 the whites numbered 14,692; coloured, 121,955; blacks, 488,624, and there were a number of coolies and Chinese. The estimated population on March 31, 1905, was 806,690.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,423 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 185 miles of railway open. Telegraph stations and post-offices are established in every town and in very many villages; the number of accounts open in the savings banks was 37,630 (1907). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage; while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the senior military officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), and of such other persons, not exceeding 10, as the King or the Governor may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. 46,542; the next in importance are Spanish Town, pop. 5,019, and Montego Bay, 4,803.

The chief articles of export are: Fruit, 537; coffee, 47; sugar, 63; dye-woods, 44; pimento, 42; rum, 71; and minor products, 196. The chief customers are the U.S.A., 572, and the U.K., 276; the imports being from the U.K. 286, U.S.A. 480.

* The Government of Jamaica publishes annually a Handbook of the Island, full of information respecting the history and personnel of the island.

TURK'S AND CAICOS ISLANDS.

These islands geographically form a sort of annex of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-west of which they are distant about 420 miles. They have an area of about 170 square miles. The population in 1901 was 5,287, of which the principal island, Grand Turk, contains 1,751. Salt is the principal industry of the islands, and Sisal hemp is grown and exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turk's and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes.

46,446, and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 78° to 85°.

St. Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,711 feet (Mount Misery). The capital, Basseterre, pop. (1901) 9,962, is a port of registry, and had 58 sailing vessels of 1,041 tons in 1905.

Nevis (separated from *St. Kitts* by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1901 of 12,774. Sugar-cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town, Charlestown. Pop. (1901), 1,050.

Anguilla is about 60 miles N.W. of *St. Kitts*, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1901) 3,890. Salt is the principal production, besides cattle, ponies, and garden stock, while cotton is extensively cultivated.

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situated between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 13 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coffee, and fruit. The population numbered 29,000 in 1901. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is a Legislative Council, consisting of the Administrator, who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population (1901) about 6,000, and Portsmouth, population about 2,500.

(4) MONTSERRAT

is situated in 16° 45' N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 12 miles in length and 7 in breadth, comprising an area of 32½ square miles, and in 1904 a population of 13,127 (6,087 males, 7,040 females). Discovered by Columbus in 1493, it was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered the most healthy and beautiful of the Antilles; it contains three active Soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The lime-tree is largely grown, the Montserrat Company having the principal plantation; the trees suffered severely in the hurricane of Aug. 1899, but they have now been replanted and their cultivation extended to the southern part of the island. Sugar was formerly the crop of greatest importance, but limes and cotton now claim first place. A flourishing fruit and vegetable preserving industry has been started—jams, preserves and pickles, of various sorts, being made in considerable quantities, and shipped to the U.K. and Canada. The chief town is Plymouth, with a population (1901) of 1,461.

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and Denmark, form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1901 was 4,908. There is good pasturage for cows, sheep, and goats. Sugar and cotton are raised in small quantities, and fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Road Town, on the south-east of Tortola; population (1901), 352.

	1904-5.	1905-6.	1906-7.

Commissioner and Treasurer, R. S. Earl, M.B. £300

THE WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian islands includes Barbados, St. Lucia, St.

Vincent, the Grenadines, Grenada, and Tobago. Of these, Barbados is a separate colony with its own governor, and Tobago is attached to Trinidad. The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. There is one governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. There is a Court of Appeal, consisting of the judges of the three colonies and of Barbados, a common Audit, and a common Lunatic Asylum; but, with this exception, each island retains its own institutions, and in the governor's absence is governed by an Administrator subordinate to him. The aggregate population (1906) was 174,027, and the total area 508 square miles.

Governor and Commander-in-Chief, H.E.

Ralph Champneys Williams, C.M.G. £2,500

Private Secretary, T. C. Fitzherbert 200

Transit, about 14 days.

GRENADA (AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 66 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. It contains about 85,120 acres, of which 30,239 acres are cultivated, and a population (including some of the Grenadines) of 69,784 (1906). The country is mountainous and very picturesque, and the climate is healthy. The Grand Etang, a lake on the summit of a mountain ridge about 1,740 feet above the level of the sea, and Lake Antoine, are the most remarkable natural curiosities; near the former a sanatorium, under Government auspices, has been established. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers, particularly bullet wood, locust, mahogany, white cedar, and galba, and vanilla and several varieties of gum-yielding trees are indigenous. Turtles are caught and exported, and whales are met with, especially among the Grenadines. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

Postmaster, T. B. C. Musgrave	300

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1906) 7,430.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N. lat. and 60° 58' W. long., at a distance of about 60 miles W. N. W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (in 1906) of 54,773. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are sugar (5,671 tons in 1906), molasses, cocoa (1,579,200 lb. in 1906)—which is now being extensively cultivated—fuel, and sticks. The chief places are Castries, the capital (pop. 1901, 8,000), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1906, 617 steamers (tonnage 1,055,473) entered Port Castries, and many British and foreign warships coaled.

Treasurer, H. A. Smallwood.....	500		

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area of 140 sq. miles, and an estimated population (1907), including dependencies, of 51,009. In 1846 a large number of Portuguese labourers, amounting to 2,400, immigrated hither, and proved a valuable acquisition to the island. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are sugar, molasses, rum, arrowroot, cassava, cocoa, coffee, cotton (for which a factory has been built by the Government), and spices. The St. Vincent arrowroot has a specially good name in London, and its Sea-island cotton is of particularly fine quality. Its chief imports are linen, cotton and woollen manufactures, American flour, &c. The upset price of Crown lands is 20s. per acre, cash, or £2 if spread over 5 years, and steps have been taken to settle the labouring classes on lands specially acquired for the purpose. On May 7, 1902, there was an eruption of the volcano known as "La Soufrière," causing many deaths, and completely destroying all crops and the majority of the buildings in an area of (roughly) one-third of the island. CAPITAL, Kingstown (pop., 1891, 4,547).

BARBADOS.

the most windward of the West India Islands, is situated in $13^{\circ} 4' N.$, and longitude $59^{\circ} 37' W.$ It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population in 1906 was estimated at 196,287, being about 1,200 to the square mile. The principal exports are sugar, molasses, rum and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal.

The deposits in the savings bank on March 31, 1907, were £262,502. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of nine members appointed by the Sovereign, and a House of Assembly of twenty-four members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1906, about 27,000), on the shores of an open roadstead (Carlisle Bay).

Barbados, distant 3,635 miles; transit, 11 days.

TRINIDAD AND TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between $10^{\circ} 3' - 10^{\circ} 50' N.$ lat. and $61^{\circ} 39' - 62^{\circ} W.$ long., and is about 55 miles in length by 40 in breadth, with an area of 1,750 square miles (200,000 acres cultivated), and an estimated population (1906) of 320,000. The island was discovered by Columbus in 1498, was colonized in 1588 by the

Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 56,100), is one of the finest towns in the West Indies, with electric lighting, tram, and telephone services. Other towns of importance are San Fernando (pop. 7,610), about 30 miles south of the capital; Princetown (pop. 4,497), and Arima (pop. 4,076). A remarkable phenomenon is the pitch lake near the village of La Brea, 120 acres in extent, containing an apparently inexhaustible supply; in 1906, 115,875 tons (£136,812) were exported. The soil is rich and productive, the most important products being sugar, cocoa, molasses, rum, and coco-nuts, and various kinds of timber and fruits. The chief exports (1905) were:—Sugar, 45,004 tons; rum, 219,271 gals.; molasses, 426,652 gals.; bitters, 34,889 gals.; and cocoa, 27,570,928 lb. Coal is found in Manzaniella, and is indicated in other parts of the island. There are 89 miles of railway open, and harbour improvements, water-works and sewage operations are in course of construction. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. Thirty-eight steamers from Europe arrive every month, and six from the United States and Canada. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

	1904-5.	1905-6.	1906-7.

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between $11^{\circ} 9' N.$ lat. and $60^{\circ} 43' W.$ long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long, and from 6 to $7\frac{1}{2}$ broad, and has an area of 114 square miles, with an estimated population (1904) of 19,000. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88° .

There are two towns in the island, viz., Scarborough (pop. 1,370) and Plymouth.

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner, and by a similar Commission, dated 15th March, 1905, in Lord Selborne. The High Commission is empowered to invite Conferences of representatives of the South African Colonial Governments to meet for the discussion of matters of common interest. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate, and he exercises the control provided by Order-in-Council over the Administration of the British South Africa Company in Southern Rhodesia (*i.e.*, south of the Zambesi). The Southern Rhodesia Order in Council, 1898, provides for a control by the High Commissioner over legislation, important appointments, and Native affairs in Rhodesia, and for the appointment of an Imperial Resident Commissioner, who is the subordinate of the High Commissioner, and is also Commandant of the armed forces, the control of which was taken away from the Company after Dr. Jameson's raid into the Transvaal, and placed under the High Commissioner. The Administration of Barotsiland (North-Western Rhodesia) is placed under the control of the High Commissioner by Order-in-Council. Lord Selborne is also Governor of the Transvaal and of the Orange River Colony, and according to a statement made in Parliament on July 31, 1906, relative to the grant of a Constitution to the Transvaal, Swaziland, which has hitherto been administered by the Governor of the Transvaal, is to be placed under the direct control of the High Commissioner.

The Inter-Colonial Council of the Transvaal and Orange River Colony.—The Inter-Colonial Council was established by Order-in-Council dated 20th May, 1903. It was created principally in order to avoid again breaking up the Central South African Railways, which are composed of the Netherlands Railway, the Pretoria-Pietersburg, and the Orange Free State Railways into two systems, one controlled by the Legislative Council of the Transvaal and the other by the Legislative Council of the Orange River Colony. The system had been worked as one during the war, and to split it in two was obviously a retrograde step. There were other reasons which made the existence of some council common to the two Colonies necessary, such as the problem which would otherwise have arisen in apportioning exactly the proceeds of the Guaranteed Loan of £35,000,000 between the two Colonies. In addition, the Council forms a starting point for any schemes of amalgamation, whether they concern only the Transvaal and Orange River Colony or the other Colonies of British South Africa as well. Broadly the Council's functions are to advise the High Commissioner and Governor of the Transvaal and Orange River Colony as to the administration of the Central South African Railways, of the South African Constabulary, and of certain other smaller services common to both Colonies, such as the Geodetic Survey, the Permit Office, &c. The Council has also the power to authorise the construction of any new railway in the Transvaal and Orange River Colony out of public funds and by private enterprise. The Council's revenue is composed principally of the gross receipts of the Central South African Railways. Any other revenues which the Legislative Councils of the Transvaal and Orange River Colony may, with the consent of the Secretary of State, from time to time devote to meeting expenditure common to both these Colonies, are also payable to the Council. The Guaranteed Loan of £35,000,000 has been handed over to the Council to be spent on the purposes for which it was raised. The principal expenditure of the Council is incurred in working the Central South African Railways, in paying interest and Sinking Fund on the Guaranteed Loan, and in the upkeep of the South African Constabulary. Any shortfall which may occur on the Council's Budget must be made up from the Revenues of the two Colonies in

proportion to their respective Customs Revenue, or in such other proportion as the Secretary of State may decide. The Council consists of the High Commissioner and Governor (President), the Lieutenant-Governors of the Transvaal and Orange River Colony, the Inspector-General of the S.A.C., with eighteen other members representing the Governments of the two Colonies, and three more, two of whom are nominated by the Secretary of State and one by the High Commissioner and Governor. The Council administers the Railways through a Standing Committee of nine members, known as the Railway Committee. Of this Committee two are appointed from among the Members of the Council by the High Commissioner and Governor, viz., the Chairman of the Railway Committee and the Treasurer to the Council. The remaining seven are elected at the Ordinary Annual Meeting of the Council, and of them at least three must be representatives of the Orange River Colony. Three members of the Committee, of whom one must be a member of the Orange River Colony, form a quorum. The Committee meets ordinarily once a week.

Central South African Railways.—The Central South African Railways are under the direct control and authority of the High Commissioner. They are administered by the Inter-Colonial Council of the Transvaal and Orange River Colony through a Standing Committee of nine, known as the Railway Committee. The system consisted at 30th June, 1906, of:—1,824½ open miles, 331¼ miles actually under construction, and 101½ miles the construction of which had been decided upon. 88¼ miles of the open mileage, from Van Reenen's Pass to Bethlehem in the Orange River Colony, are worked by the Natal Government, which also owns and works 87 miles of line connecting Bethlehem with the Central South African Railways' main line at Kroonstad. On the other hand, since April, 1906, the Central South African Railways have worked 136¾ miles of line, the property of the Klerksdorp-Fourteen Streams Railway Company, connecting Klerksdorp with the Cape Government Railways' system. The following figures for the year ending 31st Dec., 1905, show the results of working for the year:—Gross earnings, £5,364,619; working expenses, £2,817,928; surplus earnings, £2,546,691; ratio of working expenses to earnings, 52·5 per cent.; total expenditure on capital account to 31st Dec., 1905, £22,100,506. The white employees at the end of 1905 numbered 6,723; natives, 7,653.

South African Constabulary.—The South African Constabulary, which is under the control of the High Commissioner, was established as a Police and Military Force by Proclamation on 22nd October, 1900, for the better protection of life and property in the Transvaal and Orange River Colony. The nominal strength of the Force is 3,700 men. Besides Police work the Force performs various miscellaneous services, such as carrying mails, guarding the borders of the Colonies in order to keep out cattle disease, Customs preventive work, locust destruction, registration of deaths, fire brigade work, &c. The expenditure on the Force for the year ended 30th June, 1904, was £1,300,000. The estimated expenditure for 1906-7 is £889,000. The Headquarters of the Force are at Auckland Park, Johannesburg.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Dutch East India Company took possession of the shores of Table Bay, established a fort, and occupied the lands adjacent, in order to be always ready with supplies for their passing ships. Until 1796 the Cape remained in the hands of the Dutch, when it was captured by an English force; but in 1803 it was restored to the Batavian Government. In 1806 it was for the second time occupied by a British force, and at the general peace of 1814 it was formally ceded to the British Crown.

The main geographical feature of South Africa is the great mountain range which begins near the Orange River, and stretches for more than 1,000 miles, right through the Cape Colony and Natal, towards the north-east. Its direction coincides with that of the sea-coast, from which it is never more than from 100 to 150 miles distant. Viewed from the seaward side it is a veritable mountain range, rising in places to the height of 10,000 ft.; but when surmounted it is seen to be properly but the broken edge of the great table-land, between 3,000 and 4,000 ft. high, which occupies the whole of the interior of South Africa. From the mountains to the sea the ground descends, not regularly, but by a series of terraces or steps; and as the British possessions also extend for some miles from south to north, the differences of elevation and latitude produce in them many varieties of climate. As a general rule, South Africa is dry and well suited to Europeans. The immigration of British subjects was 9,090 in 1891; 23,143 in 1901; 50,206 in 1903; 26,818 in 1904; and 26,307 in 1905.

* The population of Cape Colony consisted in 1861 of 922 Europeans, 405 other nationalities, 44 children, and a garrison of 489 officers and men. In 1867 the figures were 376,720 Europeans and 46,943 others. In 1868 there were 376,987 Europeans and 45,927 others. Census 17th April, 1904. Total 2,469,864 (579,741 were Europeans or whites). Estimated population 31 Dec., 1906, 2,487,690.

† The Cape Colony statistics are extracted from the "Statistical Register" of the Cape Colony for 1905.
‡ The statistics of Natal are extracted from the "Colony of Natal Statistical Year Book, 1905."

CAPE COLONY.

The CAPE OF GOOD HOPE, strictly speaking, is a small promontory near the S. W. extremity of the continent of Africa; but the extensive colony of that name, in which are now included the Diamond Fields, the Transkei territories, Bechuanaland, and Pondoland, is washed by the Atlantic and Indian Oceans on the west and south and south-east, while upon the north and north-east it is bounded by the German Protectorate and each of the other colonies and states of South Africa. It reaches in S. lat. from 26° to $34^{\circ} 50'$, and in E. long. from $16^{\circ} 25'$ to 30° . Its extreme length from E. to W. is nearly 600 miles, and its breadth 450 miles, with a coast-line of nearly 1,200 miles, and an area of 276,995 square miles, or 177,375,660 acres, according to the latest estimate (1906), of which 44,844,411 acres were not disposed of in 1906. The territory of Walvis Bay, on the west coast, is also a portion of the Colony.

Cape Colony is divided, geographically, into two parts by the main range of mountains, which, as already mentioned, follows the line of the South African coast at a distance of 100 to 150 miles from the sea; and the southern portion is divided again by two other ranges which run across from W. to E., and are not quite so high as the first. Between the mountains and the sea, in the south-western portion of the Colony, are the chief grain and wine producing districts; in the south there are extensive forests; and along the south-eastern coast, where there are summer rains, tobacco and maize are successfully cultivated. Between the two upper ranges of mountains is an elevated tract known as the Great Karroo, which extends from W. to E. for 300 miles, and has a breadth of 70 miles. During a great portion of the year the Karroo is, as its name implies, a dry and barren district, but after rain it is covered with luxuriant vegetation, and supports countless flocks of sheep and many cattle and horses. It is here also that the important industry of ostrich-farming is carried on. The country to the north of the mountains is still more elevated, forming part of the great South African table-land. It supports, like the rest of the Colony, large numbers of sheep, and contains the chief mineral districts. The rivers of South Africa are numerous, but practically useless for either irrigation or navigation. Most of them flow in deep and precipitous ravines, and, except when swollen by the rains, are merely shallow torrents, even the largest having only sufficient water for the smallest craft, or bars at their mouths which render entrance both difficult and dangerous. The climate is healthy, and its peculiar dryness and the uniformity of the temperature cause it to be much favoured by Europeans suffering from pulmonary complaints. The vegetation of South Africa has a peculiar and distinctive character; flowers of great variety abound everywhere. The principal native flora are heaths, proteas, and stapelias (or carrion flowers), and dense thorny thickets of what is called *bush*, in which are several species of aloes. The native animals are either disappearing altogether or retreating northward owing to the rapid spread of civilization. But elephants and buffaloes are still found on the south coast, and springbok abound.

The Population of the whole Colony numbered 2,409,804 when the census was taken on 17 April, 1904, inclusive of the native territories, Griqualand West and Pondoland, the European popula-

tion then being 579,741 (318,544 males and 261,197 females). The births registered in the ten years 1897-1906 were 51,327, 53,589, 54,548, 53,127, 53,468, 53,900, 56,278, 56,802, 53,028, and 57,870; the deaths in the same period amounting to 33,838, 40,996, 37,247, 47,604, 41,043, 41,207, 40,826, 40,695, 36,699, and 35,609. The Dutch preponderate in the western and the English in the eastern districts.

Education.—The number of schools in operation (June 30, 1907) was 3,750, attended by 178,116 children. There are also five colleges, with 700 students, and a University (*Chancellor*, H. R. H. the Prince of Wales, K.G.), where 7,296 students have matriculated and 927 have taken direct degrees. The expenditure under the Education Vote in the year ended 30 June, 1906, was £481,410.

Commerce and Industry.—The principal industries are the production of wool and wine, and the rearing of horses, cattle, and ostriches, but great attention is paid to the culture of wheat, barley, and oats. The principal imports (1906) were manufactured articles, £11,007,146; food-stuffs, £4,488,055; unmanufactured and raw materials, £1,159,556. The principal exports (1906) were diamonds, £9,257,531; gold, £24,409,140; and other produce, £5,963,008.

Minerals, &c.—There are important mines of copper in Namaqualand, the ores being of the richest kind, and yielding a percentage of from 32 to 36. Gold is found in the Knysna division, and manganese in the Paarl. Coal of considerable value is also raised, the output in 1906 being 142,877 tons. The value of diamonds found at Kimberley in 1906 was £6,600,297.

Railways.—The railways are mostly the property of the Government, which on Dec. 31, 1906, owned and worked 3,191 miles. There were also 617 miles of privately owned railways in Cape Colony, Bechuanaland Protectorate, and Rhodesia, worked by Government, and 373 miles privately owned and worked in Cape Colony. The Cape to Cairo Railway scheme places Capetown in communication with Bulawayo, the commercial centre of Rhodesia; Salisbury, the capital of Rhodesia; Beira, and the Victoria Falls. To the 31st Dec., 1906, the capital expended by Government was £31,276,196. The returns for 1906 show a profit of £2 11s. 8d. per cent. per annum on the capital expended. There are 8,189 miles of telegraph open, carrying 31,741 miles of wire.

Defence.—The Colonial Forces in time of peace consist of Cape Mounted Rifemen (698 officers and men), and horse and foot volunteers (9,113 officers and men). There is also a body of Mounted Police, with about 1,718 officers and men. In cases of emergency every able-bodied man between 18 and 50 years of age may be called upon to defend the Colony, and there is a large Imperial garrison stationed at Wynberg. For external purposes a Cape and West African Squadron is stationed in these waters, having a naval depot in the Colony at Simon's Bay, where large naval works are being carried out.

Extensive harbour works have been constructed at Table Bay (Cape Town), Port Elizabeth, and East London under the direction of local boards, composed of elective and nominee members.

At Table Bay the expenditure upon construction works up to December 31, 1906, amounted to £4,172,407. The docks consist of an outer basin, area 64 acres, and an inner basin, area 8½ acres. Depth of water from 20 to 30 ft., L.W.O.S.T.

Length of berthage $2\frac{1}{2}$ miles. Good anchorage in bay, protected by breakwater 3,640 ft. long. Graving dock, 520 ft. long, 68 ft. broad, $24\frac{1}{2}$ ft. depth on sill. Patent slip for vessels up to 500 tons. Sheer legs to lift 50 tons. Electric cranes, transporters, etc. Well-organised fire brigade maintained by Board.

The works at Port Elizabeth consist of two jetties 1,160 ft. long, which cost £260,000, and a third jetty 1,460 ft. in length, which cost £185,000. In addition, there is a jetty, 1,380 ft. from the shore, with an aerial ropeway communication capable of landing 150 tons per day. This is principally used for explosives traffic. There is also a slipway for vessels up to 400 tons dead-weight. The Harbour Board has an electrical plant, with an output of 236 kilowatts, for lighting and power purposes. The plant includes one 10-ton and two 5-ton overhead gantries, and a 20-ton crane.

The Board's hydraulic plant consists of three pumping engines, each of 200 horse-power, working twenty-nine wharf cranes, twelve capstans, four wool hoists, and a pump for street watering.

The total storage area of the Board's warehouses is about 35,000 square yards.

At East London, situated on the Buffalo River, extensive harbour works have been carried out, costing, to December 31, 1906, £2,194,327, and the improvements are still proceeding. The dock area is 100 acres. The length of quay space is 5,601 ft., and this is constantly being added to. Discharging appliances include electric, hydraulic, and steam cranes, lifting power up to 50 tons. There is a patent slip, capacity 1,000 tons dead-weight, and workshops fitted with modern machinery and tools.

East London, which is connected by rail with all the railway systems of Cape Colony and other South African States, is the shortest Cape Colonial route to the Transvaal Gold Fields.

There are electric tramways in Capetown, Port Elizabeth, East London, and Kimberley.

 Capetown is 5,979 miles from Southampton; transit, 16 days.

BASUTOLAND.

Basutoland is an inland colony, being completely hemmed in by the Cape Colony, the Orange River Colony and Natal. It lies between 28° 45' and 30° 40' South latitude and 27° and 29° 30' East longitude, and has a computed area of 10,293 square miles. The census of 1904 showed 347,731 natives and 895 whites.

The territory is well watered, and enjoys a delicious climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basutos to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue arises from the Customs dues, the Post-office, native hut-tax, and the sale of licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mhales' Hoek, Quthing and Peka in connection with the Cape Colonial system. There are 250 schools, with 12,275 scholars, a large proportion being in the schools of the French Protestant Mission. There are two small Government schools, and grants-in-aid to the extent of £14,000 were made in 1906-1907. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware and groceries.

	1904-5.	1905-6.	1906-7.
Revenue	£97,934	£98,515	£111,903
Expenditure	78,837	93,333	108,832

Maseru is distant from London 7,668 miles; transit, through the Cape, about 20 days.	

THE BECHUANALAND PROTECTORATE.

The Protectorate is bounded on the south by Cape Colony, on the east by the Transvaal, on the north by Rhodesia and the Zambesi, and

on the west by German South-West Africa. It is about 400 miles long and 450 miles broad; area about 275,000 square miles, and population about 120,000, of whom 1,000 are whites.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April, and there is a great scarcity of water, while much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Litchwe (Bakathla), of Sebele (Bakweni), of Bathoen (Bangwaketsi), of Mokgosi (Bamalete), and of Batawana (Sekkoma).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Colony through from Mafeking, *via* Gaborone, and Francistown to Bulawayo and Salisbury. The chief European centres are Gaborone, Francistown, and Serowe, whither the Chief (Khama) and all his people recently moved from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Colony.

Serowe is distant from London about 7,000 miles; transit, <i>via</i> Capetown, about 23 days.	

THE TRANSVAAL.

The Transvaal has a total area of 111,196 square miles (deducting the area of Vryheid and Utrecht, chiefly districts annexed to Natal), and consists of certain districts bounded on the east by Portuguese possessions, but touching Natal at the south-east corner; on the south by Natal and the Orange River Colony; on the west by Cape Colony and the Bechuanaland Protectorate; and on the north by Rhodesia; about 20,000 sq. miles lying within the tropics.

The larger portion lies to the west of the Drakensberg (Mt. Mauch, 8,725 feet) and slopes down to the Limpopo River and Bechuanaland; a smaller section lies to the east of that range towards the Indian Ocean, and along the greater part of its eastern frontier is closed in by Portuguese territory from having direct access to the sea.

Steppes and bush predominate and favour pastoral industries, whilst agriculture labours under many drawbacks. Gold, first discovered in 1871, constitutes the wealth of the country; diamonds, coal and silver are also found, whilst iron ores and other metals are known to exist. The Central South African Railways, which include the lines of the late Netherlands South African Railway, the late Orange Free State Government Railways, and the line known as the Pretoria Pietersburg Railway, connect the colony with Delagoa Bay, Durban, and the Cape; the total length open for traffic at the end of 1906 was 2,159 miles, and 406 miles were under construction. Of the commerce about 70 per cent. was

with Cape Colony up to 1899. In 1905, 44.54 per cent. was with Natal, 31 per cent. was with Cape Colony, and 24.46 per cent. was with Delagoa Bay.

The population according to the census of 1904 was 1,268,716, of whom 299,327 were whites, 945,498 aboriginal, and 23,891 other natives.

In 1882 the revenue only amounted to £177,407; in 1893 this had increased to £1,702,685, and in 1897 to £4,480,218, owing to the increased prosperity of the gold-bearing districts; the expenditure was £4,394,066 in 1897, and the debt £2,675,690 in 1898. At June 30, 1906, the public debt was £35,000,000; municipal borrowings at the same date amounted to £5,900,000 (approximately). The trade of the country amounted in 1897 to about £24,500,000, of which £13,563,827 represented the value of imports. The output of gold in the year 1897 was valued at £11,653,727; in 1898, 4,555,022 oz. (£16,044,135); 1901, 231,076 oz. (£981,549); 1902, 1,718,920 oz. (£7,301,501); 1903, 2,972,897 oz. (£12,628,057); 1904, 3,773,517 oz. (£16,028,883); 1905, 4,909,540 oz. (£20,854,440); 1906, 5,786,617 oz. 1907 (6 months) 3,142,740 oz. The total value of the diamonds produced in the Transvaal since the war is as follows:—1902, 1,065 carats (£2,402); 1903, 174,976 carats (£239,782); 1904, 884,331 carats (£1,150,893); 1905, 802,174 carats (£922,330); 1906, 1,069,392 carats (£1,563,141). The coal output was:—1898, 1,907,808 tons—of 2,000 lb.— (£668,346); 1899, 1,735,282 tons (£619,406); 1900, 506,074 tons (£197,127); 1901, 797,144 tons (£329,113); 1902, 1,590,333 tons (£637,640); 1903, 2,253,677 tons (£877,976); 1904, 2,409,033 tons (£883,891); 1905, 2,606,799 tons (£846,272); 1906, 2,892,404 tons (£832,315); 1907 (6 months) 1,427,947 (£376,344).

The new Constitution, which was provided for by Letters Patent issued on Dec. 6, 1906, consists of a Legislative Council of 15 members elected by the Governor, and a Legislative Assembly of 69 members elected by the registered voters of the Transvaal. The Legislative is elected for a term of five years but may be prorogued or dismissed by the Governor. The executive is vested in the Ministers, not more than six, who are appointed by the Governor. Municipalities have already been created in all the most important towns.

The Capital is PRETORIA, pop. 1904, 36,700 (21,161 whites), the principal town being JOHANNESBURG (the centre of the Witwatersrand gold-fields), population in 1904, 158,580 (83,902 whites).

THE ORANGE RIVER COLONY.

The Orange River Colony is bounded on the east by Basutoland and Natal, on the north by the Transvaal Colony, and on the west and south by the Cape Colony. It was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854, to be lost when thrown into the cause of its Boer neighbour in the war of 1899-1902. The total area is 50,392 square miles, with a population at the census of 1904 of 387,315, of whom 142,679 were whites (males, 81,571, females 61,108).

It is essentially a pastoral country, but the eastern part is also admirably adapted for the cultivation of grain. Diamonds, garnets, and other precious stones are found, and rich coal-mines exist, while there are indications of gold. The chief exports are wool, ostrich feathers, hides, diamonds, grain, &c.

BLOEMFONTEIN, the Capital and seat of Government, had a population of 13,512 whites, 3,487 troops, and 16,033 natives in 1905. A new sewerage system and an additional water supply are in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904.

† And quarters.

Other towns are Kroonstad (2,454 whites, and 3,343 natives), Ladybrand (2,333 whites, 547 troops, 1,515 natives), and Harrismith (2,238 whites, 1,921 troops, and 3,068 natives).

Under the Constitution of 23rd June, 1902, the Government consisted of a Governor and a Lieutenant-Governor, assisted by an Executive and a Legislative Council. By Letters Patent, dated the 5th June, 1907, a Responsible Government has been constituted for the Colony, and was promulgated on the 1st July, 1907, on which date also the Lieutenant-Governorship was abolished and Sir Hamilton Goold-Adams, who had held that office, was appointed Governor. The new Constitution provides for a Legislative Council of 11 members and a Legislative Assembly of 38 members. At the time of going to press the first general election was in progress, and the results appear to indicate a large majority for the "Orange Unie" party, whose leader (Mr. Fischer), will probably be the first Prime Minister.

	1904-5.	1905-6.	1906-7.
Revenue	£786,049	£769,306	£787,328

NATAL.

Natal derives its name from the fact of its discovery by the celebrated Portuguese navigator, Vasco da Gama, on Christmas Day, 1497. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1825 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony, and settled in the northern districts, where to this day the Boers preponderate, although the bulk of the whole white population of the colony is British. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government. It lies on the south-east coast of Africa, Durban or Port Natal being about 800 miles from Capetown. Speaking roughly, it is in 30° E. long. and 30° S. lat. It comprises an area of 35,371 square miles, with a seaboard of 376 miles. No less than 35 distinct rivers run through it into the Indian Ocean, but not one of them is navigable. On the N.W., Natal is bounded by the Transvaal Colony; and, as in the Cape Colony, the country rises from the sea to the mountains by a series of terraces.

Population.—The estimated population at the census of Dec. 31, 1905 (exclusive of military), was: Europeans or whites, 94,370; mixed and others, 6,939; Indians and Asiatics, 112,126; natives, 938,472—a total of 1,151,907.

Production, etc.—The coast region, extending about 15 miles inland, is highly fertile, and has a semi-tropical climate. Maize is the most generally cultivated crop throughout the colony, and sugar, coffee, arrowroot, ginger, tobacco, bananas, vegetables, and pepper thrive in the coast region, and the pineapple ripens in the open air. Tea is also

grown, and its cultivation has become a thriving industry. The midland district is more adapted for cereals and other European crops. The upper district is chiefly grazing land, and sheep-farming is the principal occupation of the inhabitants; horses and cattle are also reared in large numbers. The coalfields of the colony are of large extent, and are connected by rail with the seaport of Durban; the output for 1905 was 1,129,407 tons, and for 1906, 1,238,713 tons; there is a considerable export trade in coal, 486,892 tons being bunkered and 362,118 tons exported in 1906, in addition to 216,368 tons consumed by the railway department. Asbestos, copper, fireclay, gold, graphite, gypsum, iron, lead and silver, limestone and marble, manganese, molybdenum, nickel, nitre and tin are also found. Large forests of valuable timber abound in the kloofs of all the mountain ranges, and many tracts along the coast are also well wooded. Cotton growing is being tried. The chief exports are coal, wool, mohair, wattle bark, tea, sugar, tobacco, maize, fruit and preserves, hides and skins.

There are 2 Government high schools, at Pietermaritzburg and Durban; 34 primary schools, 2 art schools, 5 Indian schools, and 2 Government schools for coloured children; there are also 469 private Government-aided European, native, Indian and coloured schools.

In Durban (pop. 69,903, including 32,926 Europeans, 2,041 mixed and others, 19,879 natives, and 15,857 Asiatics at the census of 1904), or Port Natal, the colony has the only harbour of any importance on the south-east coast. The bar, which formerly prevented large vessels from entering no longer exists, and the entrance is now safe and navigable for any vessel at any time; the average low-water depth on the bar for 1906 being 31 ft.

Government Railways, Dec. 31, 1906.—There are 935 miles of railway open, all constructed and worked by the Government, with the exception of the North Coast Extension between Verulam and Tugela (50 miles), which was constructed by the Natal-Zululand Railway Company, and is worked by the Government on behalf of the constructors in accordance with working agreement. The main line extends from the Port of Durban to Pietermaritzburg (the capital of the Colony, 70 miles inland), and thence to Charles-town, on the border of the Transvaal (306 miles distant from the port), where it connects with the line to Johannesburg and Pretoria. Branch lines run from Thornville Junction (59½ miles from the port) to Richmond (17 miles), and from Pietermaritzburg a branch connects Greytown with the city (64½ miles); to Harrismith in the Orange River Colony, from the main line at the 190¾ mile-post, was opened on July 12, 1892, with a mileage of 59½ miles, 35½ of which are in Natal, terminating at Van Reenen. This branch was extended to Bethlehem on May 1, 1905, a distance of 64½ miles from Harrismith, and a further section of 88½ miles to Kroonstad in the Orange River Colony, which place is also served by the C.S.A.R. main line, was opened for traffic on June 21, 1906. The line from Van Reenen to Bethlehem is owned by the C.S.A.R. Administration, and is worked by Natal on its behalf; from Glencoe Junction (231½ miles from the port) to Vryheid, a distance of 59½ miles. An extension therefrom to Hloane (17 miles) and to Parijs (37 miles) was being surveyed at the end of the year, in terms of an agreement; northwards from Durban to Somkele (167¾ miles)

in the Province of Zululand; from South Coast Junction to North Shepstone (77½ miles), and places in touch with the town of Durban a portion of the Colony which has large natural resources. This line is now being extended to Beach Terminus, on the south side of the Umzimkulu River, a distance of 5½ miles; from the South Coast branch at Alexandra Junction to Umzinto, 6½ miles distant, and serves an important sugar-growing area; connecting the main line with the Bluff side (West) goes out from Clairmont on the South Coast line, and is 6½ miles in length; from Pietermaritzburg (the Natal trunk line junction) to Creighton, a distance of 95 miles. It is then proposed to continue the line to Riverside on the Giqualand East boundary, and when completed will form a new connection with Cape Colony; from Ennersdale on the main line to Los Kop, 13¼ miles, and is being extended to Winterton, a further distance of 24 miles. A 2 feet light railway is being built between Estcourt on the main line and Weenen, a distance of 28¾ miles, and another between Esperanza, on the Umzinto branch, to Donnybrook, on the Natal-Cape line, passing through Stuartstown, and when completed will be about 100 miles in length. The work of railway construction was begun in January, 1876, and the sections then authorised were completed in December, 1880. Two subsequent extensions of 119 and 114 miles respectively were sanctioned, and the last, which completed the main line to Charlestown on the border of the Transvaal, was opened for passenger traffic on April 7, 1891, and for goods traffic on August 1, 1891. Connection with Johannesburg and Pretoria was opened on December 1, 1895. The total cost of construction of the railways up to the end of 1906 was £13,892,969. The receipts for 1906 were £1,836,916, and the expenditure £1,774,548. The net receipts were equal to £4 8s. 8 3/4d. per cent. upon the capital expended on open lines.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vryheid districts of the Transvaal) and Swaziland. The Amputaland Protectorate, created by proclamation of 22 Nov., 1897, was annexed to Zululand on 27 Dec., 1897, and now forms part of the Province. The Northern Districts, so-called, territory (consisting of the Magisterial Divisions of Vryheid, Utrecht, Paulpietersburg, Ngotshe, and Babanango) was annexed to Natal on 27 January, 1903.

Defence.—On 31 Dec., 1906, the total defence force of Natal consisted of the Natal Police (mounted), 967 all ranks, exclusive of native and Indian constables, and an active militia force of about 2,854 (1,653 mounted and 325 artillery). The Militia Act, which came into force during 1904, remodelled the Volunteer Force, and changed the title to Militia, giving the government power to call out all males between 18 and 60. There were also, at the same date, 119 rifle associations, with a total strength of 5,774, excluding Natal Police and Militiamen; besides 453 senior cadets, and 3,018 school cadets.

The Government of the Colony consists of a Governor, a Legislative Council, and a Legislative Assembly. The former consists of 13 members, nominated by the Governor in Council, one half of whom retire every 5 years. The latter consists

of 43 members, including 2 each for the new districts of Vryheid and Utrecht, elected by popular vote. There are 23,795 electors on the register, and there is a property qualification.

PIETERMARITZBURG, the capital and seat of government, is situated about 54 miles inland from Port Natal. Population, exclusive of military (1904 census), 21,199.

Capetown Agency, J. A. Stevens.	

NORTHERN RHODESIA.

This territory, first opened to British influence by Dr. Livingstone, is divided into North-Eastern and North-Western Rhodesia, which are still occupied by the native tribes living under their own chiefs. Extensive mineral deposits, copper in particular, have been discovered. Indigenous india-rubber is found in large areas. Timber, cattle, and all agricultural produce abound.

SOUTHERN RHODESIA.

Railways.—The main arteries of communication are the Mashonaland and the Rhodesia Railways. The latter is a continuation of the line from Cape Town to Vryburg, *via* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,360

miles. A line to connect Salisbury with Bulawayo (300 miles) was completed in Oct., 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and thence to the port of Beira (Portuguese), a distance of 375 miles. The section from Bulawayo *via* the Wankie coal-fields to the Victoria Falls (281 miles) was completed in June, 1904. The line crosses the Zambesi at the Falls, and has been opened to Broken Hill in N.W. Rhodesia; it is being carried through North-Eastern Rhodesia to the south end of Lake Tanganyika. A light railway (2 ft. gauge) has been completed between Salisbury and the Ayrshire Mine (75 miles). A line connects Gwelo with Selukwe (about 23 miles); a line from Bulawayo *via* Gwanda to West Nicholson (119 miles), opens up the gold and coal areas lying to the south-east; and a branch to the Matoppos, where the founder of Rhodesia is buried, was opened on Nov. 1, 1903.

The African Transcontinental Telegraph Line ("Cape to Cairo") has reached Ujiji in German East Africa, about 3,250 miles from the Cape.

The Natives, enumerated in April, 1907, at 639,418, have now settled down, apparently content with their unwonted prosperity and immunity from tyranny and pillage.

Industrial Progress.—Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. Though the climate is sub-tropical, the average altitude makes it well suited to European fruit-trees, cereals, and vegetables, in addition to the indigenous products of the country—*e.g.*, tobacco, rubber, cotton, and all kinds of grain. The country is being re-stocked, and inoculation upon a large scale is stamping out various descriptions of veterinary disease.

Gold.—The first regular crushing returns began with 2,346 oz. from three mines in September, 1898. The output for the twelve months ended 31 March, 1907, amounted to 560,750 oz., an increase of 125,731 oz. over any previous year; silver, copper, iron, coal, tin, plumbago, chrome ore, antimony, scheelite, and precious stones have also been produced.

Constitution.—Southern Rhodesia is administered by the Company under the Charter of 1889, as amended by the Orders in Council of 1894, 1898, and 1903. The Administrator is advised by an Executive Council of not less than four members, and there is a Legislative Council, consisting of the Administrator, the Resident Commissioner (*ex officio*), and 14 members, seven of whom are elected by the registered voters of Mashonaland and Matabeleland, and seven nominated by the Company with approval of Secretary of State.

The laws in force in the Cape Colony up to June 10th, 1891, have continued in force in Southern Rhodesia, so far as they are applicable; whilst from 1891 to 1899, when the Legislative Council was first convened, laws were amended or enacted by the ordinances of the Directors, the regulations of the Administrator in Council, and the proclamations of the High Commissioner. Municipal self-government has been established for Bulawayo and Salisbury. Rev., 1906-7, £544,937; exp., £501,473.

The total white population of Southern Rhodesia at the census of 1904 was 12,596.

The political capital is SALISBURY, 4,880 ft. above sea-level, the chief town of Mashonaland (white population in 1904, 1726). BULAWAYO, 4,469 ft. above the sea-level, the chief town of Matabeleland, is the commercial centre, with a white population of 3,840 in 1904.

British West Africa.

THE partition of West Africa among the various European Powers is now complete, and the British Dominions therein consist of the Colonies and Protectorates of the Gambia, Sierra Leone, the Gold Coast, and Southern Nigeria, which are all situated upon the coast of North-Western Africa, between the mouth of the river Senegal and the Cameroons, and of the Protectorate of Northern Nigeria. These Dominions were not originally colonies in the strict sense of the word, but merely trading settlements in which the products of the neighbouring countries were collected and exchanged for European goods with as little outlay as possible; but of late years a great part of the revenue has been expended on the development of the territories, the advancement of the education of the natives, and on the encouragement of the cultivation of natural produce. The climate is such that Europeans cannot live there permanently, and even the inhabitants suffer greatly from malarial fever. The West Coast of Africa has, however, been eagerly frequented by European traders since it was first explored by the Portuguese in the latter part of the 15th century, just before the discovery of America by Columbus. In the 17th century all the chief maritime nations of Europe, except the Spaniards, had forts or factories established on the coast, from which they used to supply slaves to their plantations in the West Indies and on the mainland of America. The importance of the coast was much diminished when these same nations agreed, at the commencement of the nineteenth century, to join in putting down the slave trade, and the Dutch and the Danes relinquished their possessions; but a healthier interest in the West Coast has since arisen in the development of a legitimate trade in tropical products, of which palm oil is the most important, to take the place of the trade in slaves. The Germans possess the territory of the Cameroons and Togoland, in the immediate neighbourhood of the British possessions; and, more to the south, the Congo Free State has been founded by the King of the Belgians. British authority has been extended, by means of the Colonies and Protectorates, and by the action of the Royal Niger Company, which exercised all the functions of government until the territories under its control were incorporated with Southern Nigeria in 1900.

GAMBIA.

The river Gambia was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the Treaty of Versailles, as British. It had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. The colony now consists of the Island of St. Mary, British Combo Albreda, the Ceded Mile, McCarthy's Island, and various other islands and territories on the banks of the river. The population (1 April, 1901) was 13,456 (excluding Protectorate, 140,000). The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is fairly healthy. The chief export is ground nuts, which form nearly nine-tenths of the total exports. They are sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil. Beeswax, rubber, and hides are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities for export. The chief imports are cotton goods, kola nuts, rice, and tobacco. A Company of the W.A.F.F. (3 officers and 120 non-commissioned officers and men) is stationed in the Colony,

and there is an armed police force in the settlement (numbering 72 men), which performs both civil and military duties. The government, which is that of a Crown Colony, is now vested in a Governor, assisted by an Executive Council, consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 4 unofficial members, nominated by the Crown.

THE GOLD COAST COLONY.

This colony comprises the coast of the Gulf of Guinea from about 3° W. to 14° E. of Greenwich, with a protectorate extending inland to an average distance of 440 miles, or to the 12° of N. latitude, bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by the German colony of Togoland. The population of the colony is estimated at 895,350 (exclusive of Ashanti and the Northern Territories), of whom about 1,000 are Europeans. The natives are almost all Pagans, but the number of Mohammedans and Christians is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Kormantyn, and subsequently many forts and factories were established, not only by the English and Dutch, but also by the French, the Danes, and the Germans, for the purpose of supplying slaves to their West Indian and American possessions. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the coast, and also built forts at Dixcove, Sekondi, Kommenda, Anamabo, Winneba, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1867, when an exchange was effected which gave all those on the west of the Sweet River to Holland and those on the east to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the Ashanti war of 1813-4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea. In this war, as in those of 1806 and 1800-1, the British arms were completely victorious, and the kingdom of Ashanti has now been added to the dominions of the British Crown.

The produce of the Gold Coast is chiefly sent to Great Britain. Gold is found in considerable quantities, and rubber, ivory, gum-copal, cocoa, cotton, lumber, Guinea grains, and oil are also exported to England. The principal exports in 1906 were: Gold £822,025, rubber £334,505, palm oil £125,008, palm kernels £80,834, and cocoa £336,269. The chief imports are textiles, alcohol, and hardware. The climate is damp, hot, malarious, and unhealthy. The Government assists the Roman Catholic, Wesleyan, and German missionaries in educational matters, and great efforts are being made to improve the sanitary condition of the coast towns. The Government has established schools of its own; the principal towns are lighted and policed, 1,129 miles of telegraphs have been established in the colony, of which 290 miles are in Ashanti and 135 miles in the Northern Territories. The Government railway from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi (168 miles), has been completed and opened for traffic.

The seat of government is Accra (population 17,892). The other principal towns are Cape Coast (28,948), Ada (13,240), Elmina (7,100), Sekondi (4,095), Kwitta (3,078), and Axim (2,186). The Legislative Council consists of 6 official and 4 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone (Lion Mountain) was ceded to Great Britain in 1787 by the native chiefs, to be used as an asylum for the many destitute negroes then in England; and great numbers of liberated Africans from North America and the West Indies, besides those taken in slavers on the coast, have from time to time been settled there. In this respect Sierra Leone is really a colony, while it is also of commercial importance. The extreme length is about 185 miles, with an estimated area of 4,000 sq. miles. The population in 1901 amounted to 76,655, of whom 493 were resident Europeans. Of the rest, more than half were liberated Africans and their descendants, while the remainder belonged to the neighbouring tribes. The liberated Africans were brought from all parts of Africa,

and as the result no less than 60 different languages are said to be spoken in Freetown. Almost every Christian denomination is represented in Freetown, and there are also many Pagans and Mohammedans. Education, though not compulsory, is in an advanced state. The climate is humid and enervating to Europeans, and malarial fevers are prevalent, especially at the beginning and end of the rains, which last from May to October. The peninsula itself produces hardly anything. The inhabitants are almost all employed in exchanging the products of the interior for European goods. The exports consist chiefly of palm-oil, palm-kernels and kola nuts; but benni-seed, cocoa-nuts, ginger, ground nuts, india-rubber, gum-copal, hides, beeswax, and rice are also exported. The principal imports are cotton goods, coal, apparel, hardware, provisions and tobacco. The taxation consists of specific duties on wine, spirits, ale and porter, tobacco, gunpowder, guns, kerosene oil, lumber, hardware, salt and sugar; and of a 10 per cent. *ad valorem* duty on other goods.

A Protectorate was proclaimed on August 31, 1896, over territory between 7° and 10° N., and 11° and 13° W., being bounded on the N. and N.E. by French Guinea, and on the S. and S.E. by Liberia. It has an area of about 30,000 square miles and a population estimated at 1,000,000. For administrative purposes it is divided into 6 districts under District Commissioners; the principal peoples being the Limbas and Kurankos in the north, the Timinis in the centre, and the Mendis in the south. The principal products are rubber, gum, palm-oil and palm-kernels, benni-seed, rice, ground and kola nuts.

The Governor is aided by Executive and Legislative Councils, the latter consisting of 6 official and 4 unofficial members.

Freetown, the capital and seat of government, is the greatest seaport and has the finest harbour in West Africa.

Freetown, 3,078 miles from Liverpool; transit, 10 to 14 days.

SOUTHERN NIGERIA.

The Colony and Protectorate of Southern Nigeria now includes the territories situated on the Bight of Benin, between Dahomey on the West to the Cameroons on the East, the amalgamation of the administrations of Lagos and of the Protectorate previously styled "Southern Nigeria" having been carried out on May 1, 1906. The whole territory is now divided into three Provinces, of which the Western coincides with the former Colony and Protectorate of Lagos, and the Central and Eastern with the former Protectorate of Southern Nigeria. The headquarters of the Government are at Lagos, and the area of the whole territory is 77,260 sq. miles.

Governor, Sir Walter Egerton, K.C.M.G. (and duty allowance £1,000)	£3,000
Lieut. Gov. and Col. Sec., J. J. Thorburn, C.M.G.	1,500
Provincial Commissioners, W. Fosbery, C.M.G., F. S. James, C.M.G., H. Bedwell	1,000
Assistant Prov. Commrs., A. B. Harcourt W. E. B. Copland-Crawford	

£700 to £900 and £600 to 800	
Senior District Commrs., W. G. Ambrose, F. P. Pinkett, C. H. Elgee, A. A. Whitehouse, R. A. Roberts, H. M. Douglas, E. A. Simpson-Gray	£600 to 700
Financial Commrs., C. E. Dale	1,100
Ch. Justices, Sir W. Nicoll, Sir H. G. Kelly	1,200
Puisne Judges, J. Winkfield, W. H. Stoker	1,000
Attorney-General, E. A. Speed	1,100
Solicitor-General, J. E. Green	£700 to 900
Principal Medical Officer, H. Strachan, C.M.G.	£1,000 to 1,200
Commandant of S. Nigeria Regt. West African Frontier Force, Lt.-Col. H. C. Moorhouse, R.A.	900
Director of Public Works, C. V. Bellamy	1,100
Do. Marine, Lt. H. A. Child, R.N. £800 to 1,000	
Conservator of Forests, H. N. Thompson	1,000
Director of Education, J. A. Douglas, M.A.	£500 to 600

The chief industry is agriculture, and crops consist of maize, plantains, earth-nuts, yams and cassava, while cocoa, coffee, and cotton are also grown. The natural products exported are palm oil and kernels, ivory, gum copal and rubber, and the export of cotton and maize is steadily increasing. A railway has been constructed from Iddo Island to Oshogbo on the mainland, a distance of 185 miles, and is now being extended to the Niger, at Jebba, whence it will run to a point near Zungeru in Northern Nigeria, thus connecting with the railway from Kano in that Protectorate, which has also been authorized. Centres of trade are Lagos, Calabar, Opobo, Bonny, New Calabar, Brass, Benin, Warri, Sapele, Akassa, and Forcados, the two last named being situated at the Forcados and Nun mouths of the Niger, which, with the rest of the territories south of Idah on the Niger, passed on January 1, 1906, from the administrative control of the Royal Niger Company to that of Southern Nigeria.

556 Imperial British Dominions—Southern and Northern Nigeria.

The principal imports are cotton goods, cooper's stores, hardware, cutlery, and spirits.

	1905.	1906.

Director of Public Works, J. E. Eaglesome, C.M.G.	£800 to £1,000

Chief Commissioner of Constabulary, Maj.

A. Bain £600 to 700

This Protectorate was established on January 1, 1900, and includes the northern portion of the territories formerly administered by the Royal Niger Company. It is bounded on the south by Southern Nigeria, to the west and north by the French possessions in the hinterland of Dahomey and the Soudan, and on the east by Lake Chad and the German territory of the Cameroons.

Since the occupation of Kano and Sokoto in February and March, 1903, steps have been taken for the establishment of administrative control over the whole of the Protectorate, of which the area is about 256,400 square miles. The population has been estimated at about 8,000,000. The centre of administration is Zungeru, near the Kaduna River, a tributary of the Niger, and the Protectorate is divided for administrative purposes into 17 Provinces. The frontiers to the North and East were delimited during 1903 by Anglo-French and Anglo-German Boundary Commissions, and a further Boundary Commission is at present engaged in delimiting the frontier in accordance with the Anglo-French Convention of May 29, 1906. The frontier with the German possessions is now settled, and demarcation is in progress. The imports are much the same as in Southern Nigeria, and the principal exports are shea butter and shea nuts. The importation of spirits is prohibited. There is telegraphic communication from Lagos to Jebba, Zungeru, and Lokoja, and the line has been continued along the Benue, as well as in other directions. The construction of a railway from Baro on the Niger to Kano, *via* Zaria, has been sanctioned and has been commenced. Steam communication with England *via* Forcados.

The grant-in-aid from Imperial funds to N. Nigeria amounted to £315,000 in 1906-7, and to £295,000 in 1907-8.

Trade and Products of the British Empire (1905).

THE following table shows the amount of certain raw materials produced within the British Empire. In addition to the articles given below, 398,184,000 lb. of Tea (India 221,488,120 lb., Ceylon 175,000,000 lb., and Natal 1,633,178 lb.), 41,994,000 lb. of Coffee (India 31,178,716 lb., Ceylon 1,008,000 lb., British Central Africa 635,600 lb., West Indies 6,046,464 lb.), and 9,253,000 lb. of rubber (mainly in West Africa) were produced in 1905. Where the production is estimated the figures are printed in italics. THE TOTAL TRADE OF THE EMPIRE in 1905 amounted to £1,366,708,000, of which £1,012,141,000 (74·1 per cent.) was Foreign, and £354,567,000 (25·9 per cent.) Inter-Imperial.

THERE are no British Colonies on the East Coast of Africa to the north of Natal (already treated of under the head of "South Africa"). But a large portion of the Continent, both on the coast and inland, is under British protection and is administered directly by the Imperial Government, through the Colonial Office, which took over the administration of the E. Africa, Uganda, and Somaliland Protectorates on April 1, 1905. British Central Africa, now styled Nyasaland, was similarly transferred on April 1, 1904. The only Protectorate in Africa now under the control of the Foreign Office is Zanzibar and Pemba. Just as on the West Coast, the rivalry of European Powers has resulted in the division of the territory on the East into "spheres of influence," the definition of whose boundaries has given rise to much diplomatic negotiation, and is not yet finally completed. From the boundary of Amatongaland northward to Cape Delgado is *Portuguese*; from Cape Delgado to the river Umba is *German East Africa*; the islands of Zanzibar and Pemba form a British Protectorate; and the East Africa Protectorate extends from the Umba to the river Juba, which forms the southern boundary of the *Italian Sphere* extending northward as far as the British Protectorate on the Somali Coast. It will be observed that on this portion of the African Continent the French have made no acquisitions, but their annexation of the great island of Madagascar places them in a position of importance on the East Coast, although their influence does not extend to the mainland. The history of the European occupation of East Africa may be briefly stated thus:—The Portuguese acquired their rights by discovery and conquest. The Germans obtained a footing on the mainland opposite Zanzibar between 1880 and 1885, at which latter date the Sultan of Zanzibar recognised their Protectorate over Usagara, and in the same year the Germans declared a Protectorate over Witu. In 1888 the Imperial British East Africa Company received a Royal Charter, having been granted a few years previously by Seyyid Barghash, Sultan of Zanzibar, administrative rights over his mainland possessions. In 1890 the respective spheres of Great Britain and Germany were settled by agreement. Zanzibar became a British Protectorate, and Germany withdrew from her Protectorate over Witu in favour of Great Britain. The boundaries of the *Italian Sphere* were agreed upon in 1891. The Imperial British East Africa Company transferred the administration of their territories to the Imperial Government in 1895, having done much to promote the advance of civilisation in the large tract of country now known as the "East Africa Protectorate."

THE SOMALILAND PROTECTORATE.

In 1884 a Protectorate was declared over part of Somaliland, a country now subject (except where reserved by Great Britain and Italy) to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Mohammedan tribe, is estimated at 300,000. The boundaries are defined by treaty with Abyssinia and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south.

The PRINCIPAL TOWNS are Berbera, Bulhar, and Zeila.

The Protectorate was transferred in 1898 from the administration of the India Office to that of the Foreign Office, and on April 1, 1905, to that of the Colonial Office.

<i>Commr. of Works</i> , G. K. Wells	1,200

The Imperial British East Africa Company was incorporated by Royal Charter, dated September 3, 1888; and under the control of the Secretary of State for Foreign Affairs, exercised sovereign jurisdiction over the territories leased to it by the Sultan of Zanzibar, or acquired by treaties entered into with native Chiefs. A British Protectorate was announced over these territories on June 18, 1895, and the Company handed over the administration on July 1, 1895.

These territories are now comprised under the name of "The East Africa Protectorate," and include the whole of the coast from the Umba to the Juba River, granted on a 50 years' lease by the Sultan of Zanzibar, as also the vast territories in the interior bounded in part by international conventional lines. The southern boundary was defined by the Anglo-German conventions of 1886, 1890, and 1893; that on the east (along the Juba) and north-east, by an agreement with Italy (1892). On the west the Protectorate adjoins that of Uganda. The administration of the Protectorate is carried on under the Colonial Office.

The title of "Commissioner" was changed to

"Governor" in 1907, and Legislative and Executive Councils were instituted.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Protectorate is divided for administrative purposes into seven provinces, which are subdivided into districts and sub-districts: (2) Seyidie, (3) Ukamba, (3) Tanaland, (4) Jubaland, (5) Kenya, (6) Naivasha, (7) Kisumu, of which the centres of administration are respectively Mombasa, Nairobi, Lamu, Kismayu, Fort Hall, Naivasha, and Kisumu. Of the seven provinces Ukamba and Naivasha are best suitable to colonization by Europeans. There is also a considerable region within the boundaries of the Protectorate which is still undeveloped, and has not yet been included in any administrative district. The population of the Protectorate has been estimated lately at 4,000,000.

The East Africa Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the river Tana. The British Protectorate was proclaimed Nov. 19, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew on July 31, 1893. Witu is now regarded for administrative purposes as part of *Tanaland*.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population, about 30,000, of whom 200 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Kiambu and Nandi. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length. Nairobi, the capital of the Protectorate, and central station of the Uganda Railway, has a population of about 13,500, of whom 579 are Europeans. There are also some 400 European farmers in the immediate neighbourhood of Nairobi.

The principal exports are ivory, grain, rubber, and copra; the principal imports are piece-goods, rice, grain and flour, building materials, European provisions, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

	1904-5.	1905-6.	1906-7.
Imports	£741,785	£974,402	£753,647
Exports	234,664	332,832	440,705

Shipping entered, 1905-6, 787,045 tons.

CAPITAL, Nairobi; transit, about 21 days.

Agents in London, The Crown Agents for the Colonies, Whitehall Gardens, S.W.

A British Protectorate over the territory of Uganda was proclaimed in the "London Gazette" of June 19, 1894, and included only the country subject to King Mwanga, known as Uganda proper, bounded by the territories known as Usoga, Unyoro, Ankole and Koki. This Protectorate has since been extended over Unyoro and Usoga (see notice in "London Gazette," July 3, 1896). *Uganda proper* lies on the N.W. shore of Lake Victoria, between 500 and 600 miles in a direct line from the nearest point on the East Coast of Africa. It is situated on and to the N. of the Equator. *Usoga* lies further to the East, on the N. shore of the Lake. *Unyoro* is to the N.W. of Uganda and extends to Lake Albert. *Koki* is to the S.W. of Uganda. The Protectorate is now divided into five provinces. The total population of the Protectorate may be roughly estimated at between 2 and 3 millions.

The capital town of Uganda is Kampala, but the centre of the Protectorate Administration is the neighbouring settlement of Entebbe. The population of the Uganda Protectorate is estimated at over 2,000,000. The principal exports are ivory, skins, and chillies. Some cotton and coffee is also exported. Principal imports are cotton cloths, prints, beads, &c. Uganda is connected by telegraph with Mombasa (E. Africa Protectorate), and there are three Government steamers on Lake Victoria, two of them of 600 and one of about 1,000 tons displacement. Another steamer is being constructed.

In July, 1897, Mwanga left Uganda and headed an insurrectionary movement in Buddu, which was suppressed. He then fled to the neighbouring German territory, and his infant son was declared King of Uganda, with a native council of regency. King Mwanga died in May, 1903. In Sept., 1897, a mutiny broke out among the Sudanese troops in the Protectorate, which was only suppressed after several months' fighting, in circumstances of great difficulty and danger, in which several British officers lost their lives (Parly. Paper, Africa, No. 10, 1898). The military forces have since been completely reorganised.

The Uganda Railway.—A survey of the route to be followed by a railway to connect Uganda with the coast at Mombasa was made in 1892. In 1895 H.M. Government decided to proceed with the construction of the railway, and in September of that year a Committee was formed, with the late Sir Percy Anderson, Assistant Under-Secretary of State for Foreign Affairs, as Chairman, to supervise the undertaking and organise details, under the authority of the Secretary of State for Foreign Affairs. On the completion of the railway, its management was transferred from the Committee to the East Africa Protectorate Administration.

The gauge of the railway is one metre. The chief engineer, Sir G. Whitehouse, and staff arrived at Mombasa in December, 1895, and a large number of labourers were imported from India for the work of construction, in addition to such local labour as could be engaged. The

rails were laid to the terminus on Victoria Nyanza (584 miles) on December 20, 1901, on which date the first locomotive completed the journey from the sea to the lake. A three-wire telegraph line has been erected along the railway, and there is also telegraphic communication from the terminus on the lake to Nimule, on the Nile (a distance of about 500 miles), and will shortly be extended to Gondokoro on the frontier of the Sudan. Messages are accepted for Nimule, and sent thence to stations further inland by post. A volunteer corps has been organised.

Parcels may be addressed direct to any place in the Uganda Protectorate, the rates being the same as for Mombasa, and no additional charge is made for delivery in Uganda.

Letters, 1d. per $\frac{1}{2}$ oz.

THE ZANZIBAR PROTECTORATE.

Sultan, H. H. Ali bin Hamud, succeeded his father, Hamud, July, 1902.

Agent & Consul-General, Basil S. Cave, C.B. £1,800
Judges of H.B.M. Court, Lindsey Smith,
J. W. Murison, L. F. Buszard (*acting*)

£600 to 1,000
H.B.M. Consul, J. H. Sinclair 600

Vice-Consuls, H. A. Richards, E. Bristowe
£350 to 450

First Minister and Officer in Command of

Troops, Brigadier-General A. E. Raikes.

Secretary for Finance & Trade, A. R. Becher.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tughli Bay and north as War-sheikh; but since the cession of the coast-line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa, together with the port of Kismayu, with a radius of 10 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Commissioner and Commander-in-Chief in the East Africa Protectorate (see p. 557). Zanzibar has been a British Protectorate since November, 1890.

By a decree of Sultan Hamud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

The City of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar is about 170,000.

The principal imports are piece-goods, ivory, hides, rice, and coal; the exports are piece-goods, ivory, cloves, copra, rubber, gum-copal, and many minor articles. The largest proportion of imports (£369,968 in 1906) comes from British India, £131,945 from the United Kingdom, £73,520 from German East Africa, £53,427 from the United States, and £42,993 from Germany. The largest exports are made to German East Africa, which in 1906 accounted for £155,264, the principal other participants being British India (£145,236), France (£132,509), and the United Kingdom (£110,390). These

figures refer to the port of Zanzibar, and not to the trade of the Zanzibar dominions. The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. With the exception of a monthly cargo vessel from London, there is no direct steam communication with the United Kingdom, passengers, mails, and goods having to tranship at Aden. There are through steamers to and from Europe of the Austrian Lloyd, the German East Africa Line, and the Messageries Maritimes.

The number of ocean-going steamers which entered the port in 1906 was—German 110, British 64, French 25, Austrian 24, and other nationalities 4, the total tonnage being 473,018. This does not include the coasting and dhows traffic, which is a very large one, extending to Bombay, Arabia, the Comoro Islands, and Madagascar.

NYASALAND PROTECTORATE (BRITISH CENTRAL AFRICA).

Governor and Commander-in-Chief, Sir

Alfred Sharpe, K.C.M.G., C.B. £2,000

Deputy Commr., Maj. F. B. Pearce, C.M.G. 900

Assist. Dep. Commissioner, H. R. Wallis... 700

Commandant of 2nd Bn. King's African

Rifles, Capt. E. H. R. Llewellyn, D.S.O. 900

Judge of High Court, C. J. Griffin ... £600 to 800

Sec. to Administration, A. Jay Williams,

£450 to 600

Treasurer, W. Wheeler, C.M.G. 450 to 700

Principal Med. Officer, Dr. H. Hearsey 450 to 600

Supt. of Native Affairs, J. C. Casson 450 to 600

Agents in London, The Crown Agents for the Colonies, Downing Street, W.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the eastern portion of British Central Africa, and the control of the administration was transferred from the Foreign Office to the Colonial Office on the 1st of April, 1904. The remainder of the territory is administered by the British South Africa Company.

The native population of the Protectorate is estimated at 900,000, and 600 Europeans.

The principal exports are coffee, cotton, chillies, and tobacco. The cultivation and export of cotton is considerable, and there are prospects of a steady development of this industry. Ivory, tea, ground nuts, and rubber are also exported. The principal imports are soft goods, provisions, and hardware. On Lake Nyassa there are eight steamers. There are also twenty steamers on the Zambesi and Shire rivers. At Chinde, situated in Portuguese territory at the mouth of the Zambesi, is a piece of land leased from the Portuguese Government, where goods intended for the Protectorate may be transhipped free of duty.

Chief towns:—Blantyre (population about 180

Europeans and 6,000 natives) and Zomba, the headquarters of the administration. Communication is maintained between Chiromo (at the junction of the rivers Ruu and Shire), and Chinde by the African Lakes Company's steamers and the British Central Africa Co.

Between Chinde and Europe, the means of communication are Messrs. Rennie's line *via* Natal, the British India Steam Navigation Co., and the German East Africa S.S. Co.

The construction of a railway to connect Port Herald with Blantyre is in progress, and will probably be open for traffic by the end of 1907. The Protectorate is connected by telegraph overland with the Cape, *via* Fort Salisbury; and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

	1905-6.	1906-7.
Imports (excluding goods in transit)	£222,581	£242,934
Exports (excluding goods in transit)	56,778	50,247

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 500 miles east of Madagascar, between 57° 18'—57° 45' E. long. and S. lat. 19° 58'—20° 32', and comprising an area of 705 square miles. The population at the census of 1901 was 375,385, of whom 261,191 were Indians (the majority originally Coolies imported for working the sugar estates), and the remainder mainly of French or mixed descent. The whole island is practically given up to producing sugar for export, and the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

Mauritius was discovered about the year 1507 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prins de Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 or 1712 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored. There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. In 1906 there were 131½ miles of railway (121½ of 4 ft. 8½ in. gauge and 10 of 2 ft. 6 in.), 60 post-offices, 57 telegraph and 9 telephone offices in the island, with 347 miles of telegraph and 31½ miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of 5 official and 2 elected members, and a Legislative Council of

27 members, 8 being ex-officio, 9 nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has 2 members, and each of the country districts 1.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College with its Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1905-1906 amounted to Rs. 584,350. Of the pupils in the Government and aided schools, 66·35 per cent. are Roman Catholics, 28·5 per cent. Church of England, and 1·8 per cent. other Christian denominations; 8·7 per cent. being Mohammedans and 21·3 per cent. Hindoos, to whom no assistance is given. The troops in the Colony on 31 December, 1906, numbered 1,394.

DEPENDENCIES OF MAURITIUS.

(1.) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1901) 3,162. Area, between 80 and 90 square miles. Cattle, beans, salt fish and goats are the principal exports. The island is under the administration of a magistrate who takes his orders from the Governor of Mauritius.

Magistrate, E. Rouillard

(2.) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to enquire into the condition of the labourers, and

settle any disputes which may be referred to them. The chief product is cocoa-nut oil. The most important is Diego Garcia (pop. 1901, 489), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1901) is 1,697.

Transit, Mauritius, 27 days.

THE SEYCHELLES ISLANDS.

By letters patent of Sept., 1903, these islands, which number altogether 89, were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 148½ square miles, of which, according to a recent survey, Mahé occupies nearly 56 square miles. The seat of government is at Victoria, the capital, on the N.E. side of Mahé, which has an excellent harbour, and is constantly visited by men-of-war of all nations. The Admiralty have made Victoria a coaling station, and a dépôt for patent fuel; quarantine regulations are on a reasonable footing, and the harbour dues light. The Seychelles Islands were originally discovered by the Portuguese, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1906 being 16·41 per 1,000. The population of all the islands on May 31, 1901, was 19,237 (Mahé 15,166, Praslin 1,621, and La Digue 1,074), an increase since the census of 1891 of 2,526. The estimated population, Dec. 31, 1906, was 21,781. There are 24 Roman Catholic and Church of England primary schools, and a grant-in-aid of Rs. 10,000 was voted for 1901. In addition there is a Government school (the "Victoria School"), maintained at an annual cost of nearly Rs. 14,000, where education of a higher class is provided. This school prepares pupils for the Cambridge local examinations, for which Seychelles was created a centre in 1902.

The principal exports are vanilla, cocoa-nuts, cocoa-nut oil, tortoise-shell, cacao, soap, and guano. The export of vanilla in 1906 was 17,118 kilos, valued at Rs. 100,257. A botanic station was established in Victoria in 1901, and promises to be a great success. Aldabra, one of the dependencies of the Seychelles, and about 680

miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double cocoa-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. Mahé is in telegraphic communication with all important parts of the world *via* Mauritius and Zanzibar. The Messageries Maritimes Company runs a monthly service of steamers between Marseilles, Aden, Seychelles, Madagascar, Bourbon, and Mauritius, and British India steamers also call occasionally. The Government, which is that of a Crown Colony, is vested in the Governor, assisted by an Executive Council composed of 3 *ex-officio* members, and by a Legislative Council consisting of 3 official and 3 unofficial members. The Governor is President of both Councils.

In the Southern Atlantic.

ASCENSION.

an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat., and 14° 25' 5" W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with a circumference of 22 miles and an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited

till 1815, when the English took possession of it. It now possesses a steam factory, while there is also an excellent hospital and sanatorium. Partridges are being preserved for sporting purposes, and steps are being taken to exterminate the rabbits, which were formerly preserved and now prove a pest. The island is visited by the sea-turtle from January to May, which lay their eggs in the sand, 106 being "turned" during the season of 1907, their weight being from 500 to 800 lb. The sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month, their eggs being much appreciated by the inhabitants. In 1907 there were about 15 acres of ground under cultivation, producing vegetables and a small quantity of fruit, and there is also a small amount of

pasturage for sheep and cattle. The island is under the Board of Admiralty, by whom an officer is appointed as commandant. The inhabitants consist of officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being about 90, with about 25 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island has recently been fortified, and is connected by the Eastern Telegraph Co. with St. Vincent, St. Helena, and Sierra Leone. The complement has lately been reduced in consequence of the redistribution of the Fleet.

Domestic imports from U.K. ^{1905.} £3,144 ^{1905.} £5,344

TRISTAN D'ACUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral, after whom they are named. The population numbers about 100, and the inhabitants are said to be very long-lived.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{3}{4}$ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'—53° S. lat. and 57° 40'—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1906 of about 2,065. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Republic of Buenos Aires established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonised, and from that time to the present have so continued, being, as a whole, the most southerly organised colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep; kitchen-gardens occupy the only cultivated part. The population is mainly British, and is principally engaged in sheep-farming and seafaring industries. The

chief exports in 1906 were wool (£162,158), sheepskins, and tallow. The total tonnage of vessels entered and cleared in 1903 was 278,018. There are three places of worship (one Church of England, one Roman Catholic, and one Baptist). The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

There is a volunteer force of about 112 men.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, and several other small uninhabited islands, are comprised within this colony.

CHIEF TOWN, Port Stanley.

Port Stanley is distant about 8,130 miles; transit, 27 days, monthly from Liverpool. Telegrams sent by post from Monte Video or Punta Arena.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the American Continent, and 1,800 from the coast of S. America, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population in 1905 of 3,512. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trade" keeps the temperature mild and equable. The thermometer goes up to 84° in the town at the sea-level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day; the lowest temperature in winter is 51°, and the total rainfall (1906) 49½ inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on 21 May, 1501 (St. Helena's Day), and remained unknown to other European nations until 1588, when it was visited by Captain Cavendish on his return from his voyage round the world. It remained uninhabited until the Dutch colonized it *circa* 1645. The English East India Company

seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch by Capt. Munden, of the English Navy, and was held by the East India Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there 5 May, 1821), when it was ceded by them to the Crown. In 1900 the island was used as a place of internment for prisoners of war from South Africa, the first detachment (consisting of General Cronje and 2,000 officers and men) arriving in April of that year. It was formerly an important station on the route to India, but its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by a few sailing ships homeward bound from the East Indies. The tonnage dues on calling ships were abolished in 1882, and the port is now free to all ships except when bringing or taking cargo to and from the port; the number which called in 1906 was 86. It is of strategical importance as a coaling station, and has recently been fortified by the Imperial Government. St.

James's Bay, on the north-west of the island, possesses a good anchorage. The garrison was withdrawn in October, 1906.

The government is administered by a Governor, with the aid of an Executive Council of 3 members, the Governor alone making all ordinances.

In the Mediterranean.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 30' and 35° 41', and E. long. 32° 15' and 34° 35'. It is about 60 miles distant from the nearest point of Asia Minor; and 41 miles from Latakia on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is about 3,584 square miles. The population in 1901 numbered 237,022, of whom 21·64 per cent. were Mohammedans, and the remainder mostly members of the Orthodox Greek Church. Estimated population (1907) 249,250. The principal productions are grain of various kinds, sesame, linseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, aniseed, sponges, sumac leaves, terra mmbra, gypsum, and salt. The fertility of the soil has for centuries been proverbial. In 1906 the wine export was 924,340 gals., and that of spirits 59,063 gals., the bulk of wine going to Egypt and the spirits to Turkey. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus still forms part of the Ottoman Empire; but by virtue of a treaty made between England and the Porte, dated 4 June, 1878, the government is administered by England for so long a time as Batoum and Kars may be kept by Russia. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of

eighteen members, six being official and twelve elected. The island is divided into three electoral districts, each returning one Mohammedan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English judge, who is assisted by two native judges, one being a Christian and the other a Mohammedan. There is also a Supreme Court for the whole island, consisting of two English judges.

The amount payable to the Sublime Porte yearly is £87,800 for revenue, £5,000 in compensation for State lands, and 4,166,220 oke of salt in kind (an oke = 28 lb.). This sum is not actually paid to the Sultan, but is retained as part payment of the loss sustained by England and France in paying the deficiency on the Guaranteed Turkish Loan of 1855.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 14,752 in 1901; the other principal towns are Larnaca (population 7,964), Limassol (8,298), Famagusta (3,825), Kyrenia (1,336), and Papho (3,134).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and has been extended westwards to Morphou, a total of 60 miles. There is a regular service of steamers from Egypt, leaving Port Said every Wednesday.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of $9\frac{1}{2}$ square miles. The colony includes also the adjoining island of GOZO, with an area of $2\frac{3}{4}$ square miles; COMINO—the site of the Sultan's disaster in 1889 and now a sanitary station—and several islets. The civil population of the whole group, 1 April, 1906, was estimated at 206,690. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility consisting of 29 families. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. It was estimated that in 1906-7 the area under cultivation in Malta and Gozo was about 40,951 acres. On census day, 1901, 5,497 females were employed in making lace. The principal occupation of the people is in connection with shipping. In 1901 there were 30,768 persons living in Valletta, but the total population of the colony was 1,671 to the square mile. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard,

Malta being the headquarters of the Mediterranean Fleet; and an additional graving dock was opened on Feb. 12, 1892. There is also a hydraulic dock, originally constructed by private enterprise, which has been taken over by the Admiralty. Two new dry docks and one arm of the breakwater at the mouth of the principal harbour have now been completed. The island is strongly fortified, and has a garrison which, on 31 March, 1907, consisted of 8,709 officers and men (including 538 Royal Malta Artillery and The King's Own Malta Regiment of militia 1,732 strong). The military expenditure for 1906-7 amounted to £494,439, of which £5,000 was contributed by the colony. The climate, although not tropical, is very hot in summer. The mean temperature for the summer months (June, July, August and September) is $75^{\circ}2'$. In winter the range is from $51^{\circ}3'$ to 58° . In 1907 the highest temperature in the shade was $92^{\circ}3'$, and the lowest 40° . Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 300, but its suburb, Rabato, had 7,194 inhabitants in 1901. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. Malta possesses a University and Lyceum; 99 elementary schools, 2 secondary schools, and 38 night schools, maintained at a total cost to the Government of £36,561; in addition to which there are garrison schools, a Dockyard school, and 119 private schools which receive no grants-in-aid from the Government.

In ancient times, Malta was occupied in succession by Phoenicians, Greeks, Carthaginians, Romans, and Byzantine Greeks, as each nation secured the command of the Mediterranean Sea. It attained to a high degree of commercial prosperity, being, especially noted in Roman times for its textile fabrics. It is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council consisting of 11 official members, and by a Legislative Council, called the Council of Government—10 official and 8 elected members. The Governor is President in both.

In 1906-7 the Port of Valletta was entered by 3,334 vessels (tonnage, 3,645,906).

GIBRALTAR,

a rocky promontory, 3 miles in length and $\frac{3}{4}$ of a mile in breadth, and 1,439 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty

of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1906 3,729 vessels entered, with a total tonnage of 4,695,287. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. An enclosed harbour with three graving docks, capable of accommodating the largest battleships in the British Navy, is being built at an estimated cost of about £4,000,000; the works include a commercial and coaling mole. The civilian population (1901) was 20,355, and the actual strength of the troops 5,532.

The Governor is in command of the garrison, and exercises all the functions both of government and legislation; there being no executive or legislative council.

THE following articles provide, in a more or less permanent form, statistics concerning the Area, Population, Production, Finance, General Development and Commerce (stating the amount of Trade with the United Kingdom), with particulars of Government and Diplomatic and Consular Representation of the Principal Countries of the World.

Special Articles deal with *Armies*, pp. 630-638, *Education*, pp. 639-645 and *Exploration*, pp. 646-649.

Many of the following Articles have been revised under the direction of the various Governments. The Editor is also greatly indebted to His Majesty's representatives at Foreign Courts, to His Majesty's Consuls, and to several of the Foreign Ministers and Consuls in London. In statistics of trade the term "Domestic" Exports signifies the produce and manufactures of the country whence they come, and does not include articles re-exported after having been already received there from abroad.

POSTAGE, PARCEL AND TELEGRAPH RATES will be found in the Postal Guide, pp. 464-470.

ABYSSINIA OR ETHIOPIA.

Emperor (Negus Negusti or King of Kings),
Menelek of Shoa, G.C.B., G.C.M.G., b. 1843.
procl. 12 March, 1889.

Governors.

Equatorial Provinces, Fitaurari Habta Georgis.

Biginider, Ras Guksa.

Yebu, Ras Wolé.

Godjam, Dejazmach Siyum.

Abyssinia proper consists of four provinces—Tigré, Amhara, Godjam, and Shoa. The total area of Abyssinia and its dependencies may be reckoned at 350,000 square miles, with a population of three or four millions of Abyssinians. The boundaries of the empire are defined on the W., N., and N.E., where they touch, in order, the Sudan; the Italian colony of Massowah (Eritrea), the French colony of Djibuti; and the British Somaliland Protectorate. Northwards the boundary is about 15° 30' N. lat., falling just south of Kassala. By the Treaty between the U.K. and Ethiopia of 15 May, 1902, the frontier between Ethiopia and the Sudan was fixed as a line drawn from Khor Um Hagar on the river Setit to Gallabat, thence to the Blue Nile, Baro, Fibor, and Akobo Rivers to Mellé, and onwards to the intersection of the 6° N. lat. with 35° E. long. The southern frontier is still undefined.

Abyssinia proper is volcanic and mountainous. It contains little mineral wealth, though iron and coal are not uncommon. Gold is washed in various streams, and salt, saltpetre, sulphur, copper, and silver are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered and have a genial climate. In the hotter regions, sugar-cane, cotton, coffee, indigo, banana, &c., flourish; in the middle zone the vine, palm, maize, wheat, barley, orange, peach, and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 9,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, camels, oxen, goats, and sheep form a large portion of the wealth of the people. The wild game consists of elephant, rhinoceros, hippopotamus, zebra, giraffe, antelope, ibex,

buffalo, hyena, lynx, &c. To the north-east the people are more akin to the Caucasian and the Semitic, to the south-east more akin to the negro; on the west are the plain-dwellers who talk Amharac; on the east the mountaineers speaking Tigré, which is akin to ancient Arabic. Of the Galla tribes to the south, some are Pagan, some Mahomedan, and some Christian; the Somalis are Mahomedan, but the Abyssinians are Christian and their kings claim descent from Menelek, the son of Solomon by the Queen of Sheba. They themselves were converted to Christianity probably about 600 A.D. by monks from Egypt, but have long been isolated from the rest of the Christian world. There is no popular literature, and no education; there is a legal code said to be derived from Constantine, but practically government is autocratic, qualified by the power of revolt. There is no standing army, but the Emperor's potential army probably numbers 200,000, armed with rifles. The principal pursuits are war, agriculture, cattle breeding and hunting; industry is looked down upon; the chief exports are coffee, honey, civet, wax, gums, spices, hides, ivory, and gold. The currency is the Maria Theresa (Austrian) dollar, but Indian rupees also find some circulation in Harrar, and a Menelik dollar (value 2s.) is in circulation. In 1905 a charter was obtained for a State bank, which was inaugurated at the end of that year. The import duty on all goods at Harrar is 8 per cent. *ad valorem*; in the interior the duty is variable. The imports were valued at about £350,000 for 1901, the exports being about £230,000. England came into conflict with Abyssinia in 1867-8, when the then capital, Magdala, was occupied by a British Army under Gen. Napier (Lord Napier of Magdala). The Italian settlement is now confined to a mere strip, 180 miles wide, along the coast, with possession of, and access to, Lugh, on the Juba River. A railway is being built under French auspices from Jibuti to the capital, of which the first stage is completed and open for goods and passenger traffic to Dire-Dawa, about 185 miles from Jibuti and 25 miles from Harrar, to which place a carriage-road has been built. A line of telegraph connects Jibuti and Harrar. Harrar and Adis Ababa are connected with the telegraph and telephone, and a new telegraph line was opened in 1904 between Adis Ababa and Massowah, the port of Eritrea. There is a telephone line from the capital to Goré. The principal towns of Abyssinia, besides Adis Ababa, are Adowa, the capital of Tigré, Gondar, Debra-Markos, Basso, Aksum, Antalo, Ankober, Goré, Demebecha, Ijube, and Harrar, which is a dependency of Shoa. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

Imports from U.K.	1903. £10,402	1904. £14,161	1905. £14,056
Exports to U.K.	80	960	1,045
CAPITAL, Adis Ababa (population fluctuates, but is ordinarily about 20,000).

Adis Ababa is 500 miles from Zaila, via Harrar; letters from London are from 22 to 23 days in transit if the mail connects with steamer service from Aden; caravans take from 35 to 45 days.			

AFGHANISTAN. (See p. 503.)

ALGERIA. (See "France.")

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 6,000; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed in turn by France and the Bishop of Urgel.

ARGENTINE REPUBLIC.

President, Dr. José Figueroa Alcorta, until Oct. 12, 1910 £36,000
Vice-Pres. Dr. B. Villanueva 18,000
Minister of the Interior, Dr. Marco Avellanedo.
Foreign Affairs, Dr. Estanislao S. Zeballos.
Finance, Dr. Manuel de Iriondo.
Justice and Public Instruction, Dr. Juan Antonio Bibliotti.
Agriculture, Señor E. Ramos Mexia.
Public Works, C. Maschwitz.
War, General R. M. Aguirre.
Navy, Rear-Admiral Onofre Betbeder.

Minister in London, Florencio L. Dominguez, 2 Palace Gate, W.
1st Sec. of Legation, Vicente J. Dominguez.
2nd Secretary, Luis H. Dominguez.
Attaché, Carlos Dominguez.
Naval Attaché, Capt. V. E. Montes.
Consul-Gen., Dr. Sergio Garcia Uriburu, 3 Budge Row, Cannon Street, E.C.
Vice-Consul, Capt. Don Estevan de Loqui.

There are also Consulates at Liverpool, Southampton, Cardiff, Manchester, Newport and Glasgow.

The Republic is composed of 14 provinces and 9 territories, with a large seaboard on the east coast of South America. It is estimated to contain 1,212,000 square miles, with a population of over 6,000,000. In 1906 there were 197,861 births and 103,451 deaths, the latter being at the rate of 33 and the former 17 per 1000. In the same period there were 36,964 marriages. By the treaty of 23rd July, 1881, with Chile, Terra del Fuego has been divided between these two Republics. The country was discovered in 1517, and settled by the Spaniards in 1535. The principal productions are wool, hides, linseed, maize, wheat, tobacco, and sugar. In 1906 17,297,000 acres were under grain, of the produce of which about 2,400,000 tons were available for export, with about 2,500,000 tons of maize and 523,000 tons of linseed. The other products are tallow, butter, quebracho extract (for tanning), Paraguay tea, and excellent European and indigenous fruits. The mineral

products are copper, silver, manganese, wolfram, borate of lime, and salt. The export of frozen sheep, lambs, and beef to Europe has become of great importance: there are at present 7 factories in working operation. The chief articles of export are pastoral or agricultural and forest products.

The principal imports from the United Kingdom are coal, machinery, hardware, and cotton, woollen, and linen goods.

In 1907 there were about 12,925 miles of railways in working order, connecting the principal cities of the Republic with the capital. Telegraphs (1905) 32,355 miles, mostly Government lines. Immigration is encouraged, the arrivals in 1906 amounting to 366,309, of whom more than half were Italians; against this total 164,145 are set down as having emigrated. The language in ordinary use is Spanish. The climate is temperate and healthy. There are fine docks at Buenos Aires and the Ensenada (La Plata), port works are in progress at Rosario and Santa Fé, and others are projected, while two graving docks have been constructed at Buenos Aires and a naval port, graving dock, and extensive wharves at Bahia Blanca; 1,168 British ships (2,580,592 tons) entered Buenos Aires port in 1904.

Defence (for Army, see p. 636)—*Navy:* 58 vessels, including 9 armoured vessels, 4 cruisers, 2 torpedo gunboats, 3 torpedo boat destroyers, 20 torpedo boats, and 42 miscellaneous and auxiliary vessels. The naval school has 70 cadets, the school of gunners 80, and the torpedo school 16.

Education (see p. 639).

* These figures have all been reduced to their approximate values in £ sterling. † Estimated.
£22,352,233 fully secured by gold stored in the Casa de Conversion.

‡ These figures are in reality very much larger, as probably the greater portion of the exports "for orders," amounting in 1906 to £19,323,000, go to the United Kingdom.

AUSTRIA-HUNGARY.

I.—THE JOINT MONARCHY.

Reigning Sovereign, Francis Joseph I. Emperor of Austria, &c., and Apostolic King of Hungary, born 18 August, 1830; succeeded (as Emperor of Austria) 2 Dec., 1848; crowned King of Hungary at Ofen, June 8, 1867; married 24 April, 1854, Elizabeth, daughter of Maximilian Joseph, Duke in Bavaria (born 24 Dec., 1837, assassinated in Geneva 10 Sept., 1898), and has issue 2 daughters.

Heir Presumptive, his nephew (son of the late Archduke Charles Louis), Archduke Francis Ferdinand of Este, born 18 Dec., 1863.

Minister of Foreign Affairs and of the Imperial and Royal House, Baron Alois von Aehrenthal. *Minister of Finance*, Baron Stephan Burian. *Minr. of War*, Feldzeugmeister Franz Schönaich. *Navy* (department of War Office), *Commander*, Vice-Admiral Count Montecuccoli.

Ambassador to Germany, L. de Szögyény-Marich; *Italy*, Count Lützow; *France*, Count Khevenhüller-Metsch; *Papal*, Count Szécsen; *Russia*, Count Leopold Berchtold; *Spain*, Count Welsersheimb; *Turkey*, Markgraf von Pallavicini; *U.S.A.*, Ladislaus Hengelmüller von Hengervár.

Ambassador in London, Count Albert Mensdorff-Pouilly-Dietrichstein. *Embassy*, 18 Belgrave Square, S.W.

Councillor and First Sec., Count L. Szechenyi.

Councillor, Baron Erich Zwienedeck.

Secretary, Prince Emil Fürstenberg.

Attachés, M. de Masirevich; Prince Rudolf Esterházy.

Secretary of Chancery, Karl Pollack.

Military Attaché, Prince Frederick von und zu Liechtenstein.

Naval Attaché, Capt. Louis Napoleon von Wawel.

Director, Commercial Dept., M. von Maurig.

Consul-General, Baron Alfred de Rothschild; M. von Maurig.

Vice-Consuls, Edgar Spiegel von Thurnsee, Theophil von Jaeger.

Office of Consulate, 22 and 23 Laurence Pountney Lane, E.C.

The largest Empire, next to Russia, on the continent of Europe, situated between 42°—51° N. lat. and 9° 30'—26° 20' E. long. It embraces an area of 675,887 sq. kilometers, and a population (1902) of nearly 48,141,961.

Austria-Hungary, or according to the official denomination, the Austro-Hungarian Monarchy (Oesterreichisch-Ungarische Monarchie), consists of two states, the Empire of Austria and the Kingdom of Hungary. Each of the States has its own Constitution and Parliament, and for most branches of State affairs, its own Ministry and Administration, but they are closely bound together by the identity of the Ruler and by a permanent Constitutional Union, which, upon the common principle of possession and defence, was first proclaimed by the Pragmatic Sanction of 1723, and has since been regulated by the so-called "Compromise" (Ausgleich-Kiegyezés) of 1867. According to the Constitutional Union foreign affairs and the greater part of war affairs (Army and Navy), together with the finances concerning them, are dealt with by common ministries. The control of the official actions of these ministers and the voting of the common budget is exercised by Delegations consisting of 60 members chosen from the Upper House of Austria (Herrenhaus) and Hungary

(Förendház) and from each Lower House (Abgeordnetenhaus und Képviselőház). In every other respect legislation concerning the common affairs belongs to the two Parliaments, and each State provides separately for its contribution to the common expenses. The proportion to be contributed by each State is fixed by mutual agreement, renewable every 10 years, and the last so made and renewed expired in 1897. No new proportion having been agreed the quota (65·6 per cent. for Austria and 34·4 per cent. for Hungary) is at present fixed by the Emperor-King's decision.

Common expenses were estimated at £17,697,500.

In connection with the "Ausgleich" the two States also entered into a commercial and customs union in 1867, by which the two States form one commercial and customs territory, and possess the same system of coinage, weights and measures, and a joint bank of issue. In the same way as the quota agreement, this union is renewable every ten years, and failing a renewal each State provides separately for these matters. The Union was so renewed in 1877 and 1887, but formally dissolved when the further decennial period, 1887—97, elapsed. It is, however, provisionally maintained in fact under reciprocal conditions, until the end of 1907.

Defence (for Army, see p. 636).—The navy consists of 154 vessels, including 9 battle ships, 10 cruisers, 13 torpedo boat destroyers, and 66 torpedo boats, with 13 vessels on the Danube. Pola is the naval arsenal.

The principal articles exported from Austria-Hungary in 1904, 1905 and 1906 were (in thousands of crowns):—

	1904.	1905.	1906
Cereals, &c.	£98,816	£129,521	£120,415
Eggs	105,566	97,175	111,347
Skinore	48,739	59,826	56,002
Sugar	151,887	189,222	197,373
Raw Material	850,615	911,578	866,201
Foodstuffs	584,583	656,911	281,781
Manufactures	914,410	999,350	1,066,328
Semi-manufactures	313,644	332,852	380,383

Commerce is carried on principally with Germany, Italy, Russia, France, and Switzerland, and through the ports of Trieste and Fiume, also direct with the transmarine world, including England. In 1904, 38,761 kilometers of railway were open for traffic, in addition to 2,777 kilometers for industrial purposes, and 1,093 kilometers in Bosnia-Herzegovina.

	1904.	1905.
Total exports, A. & H.	£87,027,850	£93,490,833
Total imports, A. & H.	85,329,208	89,786,375
From U.K.	6,453,583	6,545,458
To U.K.	7,563,500	8,312,583

[In calculating the above amounts the *krone* is reckoned at the rate of 24 to the £.]

Railways, Dr. Julius Derschatta von Standhalt.
Works, Dr. Albert Gessmann.
Defence, Julius Latscher von Lauendorf.
Without Portfolio, Graf Adalbert Dieduszyski;
 Franz Peschka; Karl Praschek.

Austria contains an area of 300,008 sq. kilometres, and a population of 27,011,760 (1904). The Central Government of the Empire is conducted by the Reichsrath, consisting of an Upper (Herrenhaus) and Lower House (Abgeordnetenhaus). There are 17 provinces, viz.:—Lower Austria, Upper Austria, Salzburg, Styria or Steiermark, Carinthia or Kärnten, Carniola or Krain, Coast Districts (Istria, Görz and Gradisca, Trieste), Tyrol, Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukowina and Dalmatia, each possessing a separate Diet (Landtage) and also sending representatives to the Reichsrath. Of the inhabitants, there were in 1900, 9,171,614 Germans, 5,955,397 Bohemians and Moravians, 4,252,483 Poles, 3,381,570 Ruthenians, and 1,192,780 Slovenes. In addition to Vienna there are five cities with over 100,000 inhabitants and nine in addition with over 50,000. There are 23,797,000 Roman, Greek and Armenian Catholics, 607,000 Orthodox Greek, 494,062 Protestants and 1,225,000 Jews in the country.

The principal industry is agriculture, in which 13,700,000 were employed in 1900; trade and manufactures accounting for about 9,600,000, while mining occupied 538,819. The chief products are grain, cereals, wine (5,337,264 hectolitres in 1905), and minerals (coal, iron, lead, zinc, silver, quicksilver and copper); the manufactures being woollens, cottons and glass.

III.—HUNGARY.

President of the Ministry and Finance, Dr. Alexander Wekerle.
Minister a latere, Count Aladar Zichy.
Interior, Count Julius Andrássy.
Instruction and Religion, Count Albert Apponyi.
Commerce, Franz Kossuth.
Agriculture, Dr. Ignaz Darányi.
Justice, Dr. Josef Guenther.
National Defence, Ludwig von Iekelfalussy.
Minister for Croatia, Dr. Alexander von Rakodeczay.

Hungary, with its dependent states, has an area of 324,851 sq. kilometres, about 125,430 sq. miles, and is rather larger than the United Kingdom, with a population of 19,254,559 at the census of 1900: to this Croatia and Slavonia contribute 2,416,304. The country is divided into 71 counties with 474 districts for those of Hungary. Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. Croatia and Slavonia form an annexe of the Crown of Hungary, with autonomy in home affairs, justice and public instruction. At the head of the Croatian Government is the *Ban* (Viceroy), Count Th. Pejachevich, who is responsible to both the Diet of Croatia and to the Hungarian Prime Minister. The Croatian Diet sends 43 members to the Hungarian Parliament, and the Hungarian Ministry contains a Croatian member. Parliament consists of a Lower House of 453 members, elected for five years; of these Croatia sends 40, but they have no vote on matters connected with justice, education, and home affairs. There is also an Upper House, consisting of the male members of the dynasty, the *Barones regni*, prelates, such members of the magnate families who contribute more than 3,000 florins to the land-tax, the *Ban*, with three members of Croatia sent by the Diet, and fifty members nominated by the Crown.

Of the inhabitants in 1900, 8,742,000 were Hungarians, 2,799,000 Roumanians, 2,135,000 Germans, 2,020,000 Slovaks, 1,682,000 Croats and 1,049,000 Servians, the Hungarian-speaking population numbering 10,176,000. By religions (1900) there were 9,920,000 Roman Catholics, 1,854,000 Greek Catholics, 2,816,000 Orthodox Greeks, 1,289,000 Lutherans, 2,441,000 Calvinists, and 851,000 Jews. In addition to Budapest, which has 732,322 inhabitants, there are ten cities with over 50,000 inhabitants.

All the great plains produce grain of excellent quality. The returns for 1903 (including Croatia and Slavonia) give 61,804,937 hectolitres of wheat, 17,917,130 of rye, 22,746,273 of barley, 30,025,413 of oats, and 55,067,879 of Indian corn. The cattle number 6,738,000, sheep 8,123,000, horses 2,308,000, and swine 7,330,000. The exports are chiefly cereals, live stock, and raw materials. Wheat figures for £3,492,000, barley £2,327,000, rye £1,663,000, and wheat flour £7,617,000. The imports are chiefly manufactured goods, textile fabrics alone being valued at £15,211,000. The chief mineral products are gold, silver, copper, lead, quicksilver, antimony, iron, coal, and sulphur. The mines, however, are not well worked, and might be made a much greater source of income. Salt, which is a Government monopoly, was produced to the value of £1,175,000 in 1903.

Defence (for Army, see p. 636).*Education* (see p. 639).

	1902.	1903.
Revenue (ordinary).....	£45,148,000	£43,202,000
Expenditure (do.).....	45,959,000	47,620,000
*Special Debt:—		
Consolidated	£95,190,828	£140,986,000
Annuities	89,853,197	46,337,000

IV.—OCCUPIED PROVINCES.

By mandate received from the Berlin Congress (1878), Austria and Hungary occupy and administer the Turkish Provinces of Bosnia and Herzegovina. These are situated between 42° 40' to 40° 15' N. lat. and 33° 22' to 38° 45' E. long, and contain a total area of 51,028 sq. kilometres, and a population of 1,591,036 (1895). The seat of administration is Sarajevo. The local Revenue (1903: £1,921,825) suffices for the cost of administration (£1,893,721), but not for the maintenance of the army of occupation.

CAPITAL, Sarajevo (Bosna-Seraï). Population (1895), 38,083.

British Consul, Fred G. Freeman £600

BELGIUM.

King, Leopold II., born 9 April, 1835; suc. 10 Dec., 1865; mar. 22 August, 1853, Marie Henriette, daughter of the late Archduke Joseph of Austria, b. 23 Aug., 1836, d. 19 Sept., 1902; issue three daughters.

Heir Presumptive, his nephew, Albert, Prince of Belgium, born April 8, 1875 (mar. Oct., 1900, the Duchess Elizabeth in Bavaria, who has issue two sons, Leopold, b. 3 Nov., 1901, Charles Theodore, b. 10 Oct., 1903, and a daughter, Marie-José, b. 4 Aug., 1906).

Public Works, M. Auguste Delbecq.

Science & Arts, Baron Edouard Descamps-David.

Minister in London, Comte de Lalaing, 15 West Haikin Street, Belgrave Square, S.W.

Councillor, E. de Cartier de Marchienne.

First Secretary, P. May.

2nd Sec., Baron II. de Woelmont.

Consul-Gen., François H. Lenders, 29 Great St. Melens, E.C.

A Kingdom of Central Europe, anciently inhabited by the Belgæ (a Celtic-speaking German tribe), and part of the *Gallia Belgica* of the Romans. In 1815 the country was joined to the Kingdom of the Netherlands, an arrangement which was upset by the Revolution of 1830. On Oct. 4, 1830, a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Saxe-Coburg was chosen hereditary King.

Belgium has a frontier of 831 miles, and is bounded on the north and east by the Netherlands (268 miles), on the south and west by France (381 miles), on the east by Germany (60 miles), and the Grand Duchy of Luxemburg

(80 miles), with a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The total area is 11,373 square miles, about equal to the four counties of Hertford, Lancashire, York, and Lincoln; its great harbour and commercial *entrepôt* is Antwerp, a strongly fortified city on the Schelde. The other harbours are Ostend, Nieuport, and Blankenberg.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

The population was 7,074,910 on 31 Dec., 1904, or 622 to the square mile; it is consequently one of the most densely peopled countries of the world. The decennial increase is about 10 per cent., and since 1861 there has been an annual excess of immigrants over emigrants, the totals in 1904 being emigrants 27,302; immigrants, 35,615. There were (1904) 3,560,419 females to 3,514,491 males; and annually 27 births and 17 deaths to every 1,000 inhabitants. There are nine provinces: Antwerp, Brabant, Flanders (E. and W.), Hainaut, Liège, Limburg, Luxemburg, and Namur. BRUSSELS (with suburbs, 598,600 inhabitants) is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (292,000 exclusive of suburbs), Ghent (162,500), and Liège (168,550).

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders and Brabant, including Antwerp. In 1900, 42 per cent. spoke Flemish, 38 per cent. French, and 12 per cent. both tongues, the latter being a rapidly increasing class (423,752 in 1880 and 801,587 in 1900). Nearly all the inhabitants are at least nominally Roman Catholics, and in 1900 there existed 2,500 convents, inhabited by 6,237 monks and 31,668 nuns.

Education (see p. 639).

Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The soil was divided (1895) among 829,625 proprietors. The mineral kingdom yields coal (1904, 22,761,430 tons), iron (1904, 206,630 tons), zinc, lead, and copper. The leading industries are collieries, quarries and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, and Brabant), glass, textiles (Verriers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.). The following table shows the distribution of Belgian commerce in millions of francs, 1905 and 1906:—

	Imports from		Exports to	
	1905.	1906.	1905.	1906.
Germany	409	465	509	642
France	517	604	371	548

“ Manufacts. .	2,228,301	“ &c. Yarn	190,423
Fish	214,383	“ Manufacts.	877,785

Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1905) of 71 vessels (99,733 tons), in addition to which there were about 400 fishing boats. In 1905 a new port was inaugurated at Zeebrugge with a sea lock and inside dry dock. In 1906, 8,361 foreign vessels entered at Belgian ports (tonnage 11,554,169). In 1907 there were 4,702 miles of railway (including branch lines and private lines rented by the State); the telegraphs had a length of 4,443 miles (1907), and the post-office carried 1,111,915,450 letters, post-cards, &c., in 1902. The navigable rivers and canals have a length of 3,238 miles (1905).

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 110 senators (with the exception of 26 elected by the provincial councils) and 166 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. And the united constituencies numbered 1,472,953 voters, with 2,269,414 votes, in 1900. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

Defence (for Army, see p. 636). Antwerp is the principal fortress, and Liège and Namur are also fortified, forming “*Têtes-de-pont*” on the line of the Meuse against a violation of neutrality by either France or Germany. Belgium has neither a navy nor colonies; but the King of the Belgians is at the same time “*Sovereign*” of the Congo Independent State.

Offices of Legation, 74 Compayne Gardens, N.W.

Consul-General and Charge d’Affaires, Col. Don Pedro Suarez, 12 Fenchurch Street, E.C.

This and Paraguay are the only States of South America without a seaboard, Antofagasta, its former port, having been ceded to Chile. It was formerly comprised in the Spanish Vice-royalty of Colombia under the name of “*Alto Peru*,” and derives its present name from its great liberator, Simon Bolivar. It extends between lat. 8° and 23° S. and long. 57° 30’ and 73° W., and its area is said to be 570,000 square miles. The estimated population in 1907 was 2,180,710. The peace army amounts to about 3,000 men, the war effective being about 90,000. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible; while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes: tin, copper, lead, antimony, wolfram, bismuth, salt and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which with tin, gold, silver and copper are its principal exports; its

chief imports being iron, cotton and woollen goods, hardware, and silks. There were (Oct. 1902) about 1,051 miles of railway and 4,565 miles of telegraph wire. The only seaport is on the coast strip seized by Chile after the war of 1879; in 1905 a treaty was concluded under which Chile retained the port in return for an indemnity of £300,000 and railway and tariff concessions. A railway is under construction to connect Oruro with La Paz.

Consul-Gen. in Liverpool, Capt. J. C. da F. Pereira Pinto.

The Republic of the United States of Brazil was founded on the 15th of November, 1889, by a bloodless revolution which drove Dom Pedro from the throne. On February 24, 1891, a new Constitution was voted by the Constituent Assembly by which the President's term of office was fixed at four years; Church and State were separated, civil marriages only made valid, and education secularised.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, Guiana, and Venezuela; on the west by Ecuador, Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. This immense country extends between lat. 4° 22' N. and 33° 45' S. and long. 34° 40' and 73° 15' W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. It comprises an area of 3,218,166 square miles, and contained a population (31 Dec., 1890) of 14,333,913, the greater part of mixed blood. There are about 1,000,000 "wild" Indians and other uncivilised tribes;

76,292 immigrants arrived in 1898. The active army consists of about 20,000 men, and the navy (1906) of 6 cruisers, 4 torpedo gunboats, and 8 torpedo-boats. 3 first-class battleships and 4 cruisers are under construction. Brazil contains 20 states, 16 of which lie along the coast, and 4 in the interior. There are 42 ports along the coast, of which the principal is Rio, with a shore line of 123 miles. Brazil is unequalled for the number and extent of its rivers: the Amazon, the largest, though not the longest, in the world, with its immediate tributaries, and the Tocantins, San Francisco, and others. The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. Its forests are immense, abounding in the greatest variety of useful and beautiful woods adapted for dyeing, cabinet work, or ship-building; among these are mahogany, logwood, rosewood, brazilwood, &c. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea, and in those regions European fruits and grain are reared in abundance, while the intermediate valleys are found extremely favourable for the raising of sugar, coffee, cotton, cocoa, india-rubber, tobacco, and tropical products. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cotton also is being largely cultivated for export. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially Pará; and coffee, though also grown in the north, comes chiefly from the central portions of the country, Rio de Janeiro, Minas, and São Paulo. Tobacco is grown largely, especially in Bahia. The exports consist solely of the raw produce of the soil, and owing to the vast extent of the country, and the consequent very different peculiarities of the soil and climate, their nature varies considerably. The imports consist of every description of manufactured articles, but there are 149 cotton-mills, giving employment to 30,000 hands, and representing an invested capital of 200,000 of contos of reis. The enormous protective duties were again increased in 1887, 1893, 1896 and 1906. In 1902 there were 9,370 miles of railway open, and about 3,000 miles in course of construction. Length of telegraph wires in 1897 about 11,376 miles; number of post offices, 2,862.

The Principality of Bulgaria is under the suzerainty of Turkey. It was created by the Treaty of Berlin, 13th of July, 1878, and is governed by a Prince elected by the National Assembly or Sobranjé, with a popular legislature and constitutional government.

Eastern Roumelia, likewise a creation of the Berlin Treaty of 1878, has an area of 13,862 square miles, and 998,431 inhabitants; it was intended to form an autonomous province, but since the successful revolution at Philippopolis of September 18th, 1885, it has been incorporated with the principality, under the name of Southern Bulgaria, and the accomplished fact was recognised by the arrangement of April 5, 1886, at Constantinople, whereby the Prince of Bulgaria was appointed at the same time Governor-General of Eastern Roumelia. This Province, under the name of South Bulgaria, now forms an integral portion of the Principality, with the same ruler, laws, and mode of administration.

By modification of the Constitution, 1893, there is now one deputy to each 20,000 inhabitants, 115 for the northern, and 51 for the southern province. Prince Ferdinand was elected on July 7, 1887, and is now recognised by the six Great Powers as ruler.

Defence (for Army, see p. 636). The navy consists of a torpedo gunboat and a few small steamers.

Education (see p. 639).

United Bulgaria is bounded on the north by Roumania, from which it is separated by the Danube; on the west by Servia and Macedonia; on the east by the Black Sea; and on the south by the Turkish province of Adrianople. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woolens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal. The principal towns, with their populations in 1905, are Sofia (82,000), Philippopolis (45,572), Varna (37,155), Rustchuk (33,552), Sliven (25,049), and Shumla (22,290). The great ports are Varna (2,338 vessels of 776,938 tons in 1906) and Bourgas (1,514 vessels of 552,324 tons). There are (1902) 1,000 miles of railway open; 3,270 miles of telegraph and 1,228 miles of telephone wires. North Bulgaria has an area of 24,237 square miles, and South Bulgaria an area of 12,706 square miles. Population according to language or nationality and religion (census of 1 January, 1900):—

Consul, Julio Pérez Canto, Finsbury Pavement House, E. C.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 18° 28' and 56° 35' S., and long. 66° 30' and 75° 40' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 10,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest, Aconcagua, an extinct volcano, being 22,422 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 21 provinces and 3 territories, the aggregate area of which is estimated at 290,741 square miles, with a population (1900) of about 3,110,000, exclusive of Araucanians, Bolivian and American Indians, numbering about 50,000. The principal towns, with their estimated populations (1900), are:—Santiago (320,000), Valparaíso (143,000), Concepción (55,400), Talca (43,000), Iquique (34,300), Chillán (34,000), and Antofagasta (20,000). The natural increase in the population is slow, but immigration, freely encouraged in 1907 by the grant of free passages, is redressing the balance, the majority of incomers hailing from Spain. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The chief feature of 1904 was the large number of native and foreign companies raised for sheep and cattle industries in the south, the climate and conditions for which are said to be unsurpassed. The mineral wealth is considerable, the country being extremely rich in copper-ore, and some rich gold mines have been discovered. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying

from 40 days. There are (1902) about 3,000 miles of railway open, nearly 15,000 miles of telegraph, over 750 post-offices, and 5,800 miles of telephone, the last worked by an English company. In 1904 a contract was signed for the completion of the Chilian section of the trans-Andean line, which it is hoped to complete in 1910. The commercial marine numbers 191 vessels (40 steamers), of 90,738 tons. In 1902, vessels of a total tonnage of 3,721,161 entered, and vessels of a total tonnage of 3,310,551 cleared at Chilian ports. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery. About 40 per cent. of the foreign trade is carried on with England. The paper currency was worth about 12½d. in 1907, conversion to 18d. is stipulated by law to take place on Jan. 1, 1910.

Defence (for Army, see p. 636).—The navy consists of about 12 large and 10 small ships of war; an important naval programme was adopted in 1906, but is still under consideration.

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,520 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000. On the north of the 18 provinces lie the vast regions of Mongolia and Manchuria, and on the west are Tibet and Turkestan, all of which are integral parts of the Chinese Empire; the area of these dependencies is over 2,500,000 square miles, with a scattered population of 19,000,000. The civil government of the 18 provinces is entrusted to viceroys and governors, and under them each province is subdivided into circuits superintended by tao-tais or intendants, and again into prefectures and districts. All the territorial officials are appointed by the Imperial Government, and the provincial viceroys and governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The administration of Mongolia and Turkestan is entrusted to Military Lieutenant Governors, who, with the Chinese officials in Tibet, are under the direction of the *Mongolian Superintendent*, or Colonial Office, in Peking.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence in the State, and had made many converts to Christianity; but their power aroused jealousy, and they were expelled from the country.

The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, which established "factories" at Canton.

When the Company's monopoly was withdrawn, in 1833, the position of British merchants in Canton became a national question, and the restrictions placed in their way by the Chinese authorities, and the attitude of the Imperial Court at Peking in refusing to treat with Great Britain on terms of equality, all contributed towards the first war against China in 1840. A treaty was signed at Nanking, as the result of these operations, ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. For this reason, and for the general protection of their interests, consuls were appointed to reside in these "treaty ports" to watch over their national trade and interests.

The continued exclusiveness and conservatism of the Chinese Government led by a long chain

of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. This war was closed by the ratification of the Treaty of Tientsin, which improved the commercial situation and opened more ports to foreign trade and residence, besides providing for the establishment of Legations in Peking. From this date the development of foreign trade began to be most important, and for many years Great Britain's share of it was greatly predominant.

Meanwhile, China has suffered largely for her own conservatism and ignorance. In 1885 the loss of her suzerainty over Upper Burma to Great Britain was followed by the cession of Tongking to France. In 1894 she fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Corea as an independent state. In 1897 Germany seized Kiaochow Bay as a reprisal for the murder of missionaries. Then Russia occupied Port Arthur as a naval station, and Great Britain leased Weihaiwei for the same purpose, besides improving her position at Hong Kong by occupying the mainland opposite, round the city of Kowloon. During the whole period, also, Russia had been extending her frontiers on the north.

An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners; and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ch'ing and the late Li Hung Chang. This provides for an indemnity of £65,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties—(1) between the U.K. and China (5 Sept., 1902); (2) U.S. and China (8 Oct., 1903); and (3) Japan and China (9 Oct., 1903). Under the two last Mukden, Tatungkow, Chang-sha, and Antung in Manchuria, were made Treaty ports.

Initiatory measures have been taken by China, under the first of these Treaties, to introduce two important reforms—namely, the protection of trade-marks and the establishment of a uniform national coinage. As regards the former, provisional regulations have already been framed, and the latter was the subject of investigation by a joint American and Mexican Commission, which submitted a scheme to the Chinese Government for the adoption of a gold standard.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and the latter provides, *inter alia*, for the speedy opening by China of the following cities and towns in Manchuria as places of international residence and trade:—Feng-huang-ch'eng, Liao-yang, Hsinmintun, Tung-chiang-tzu (on the Liao River), and Fa-ku.

men in Fengtien Province; Ch'ang-ch'ün, Kirin, Harbin, Ninguta, Hunch'un, and Sansing in the Kirin Province; and Tsitsihar, Hailar, Aihun, and Manchuli in the Heilungchiang Province.

Latest estimates of the foreign residents at the open ports of China are as follows:—British, 9,256; Japanese, 15,548; Americans, 3,447; Russians, 273; Germans, 1,939; French, 2,189; Portuguese, 3,184; Italian, 786; other countries, 1,975. Total, 38,597. Out of a total of 1,837 foreign firms in China, 492 are British, 739 Japanese, 199 German, 112 American, 94 French, 51 Portuguese, and 40 Spanish.

Defence (for Army, see p. 636).—The navy has not recovered from the effects of the Chino-Japanese war, when more than ten important war vessels were sunk or captured. China now possesses 2 second-class cruisers (4,300 tons), and 11 third-class cruisers (875–2,500 tons); 3 torpedo gunboats (349–1,000 tons), 4 gunboats (215–411 tons), 32 first-class torpedo boats, and 12 second-class torpedo boats. Most of these were launched between 1885 and 1902. Of the torpedo boats about half only are fit for action. Four destroyers, built in 1898–9, were captured by the Allied Forces in 1900, and were appropriated by Great Britain, France, Germany and Russia respectively. Full complement of the navy is about 2,500.

SHIPPING.—The mercantile marine (1901) consisted of 46 steam vessels over 100 tons register, with a total net tonnage of 40,178 tons; in 1906 the total tonnage of vessels entered and cleared at the treaty ports was 75,819,888; of these 44 per cent. were British, 21 per cent. Chinese, 10 per cent. German, 15 per cent. Japanese, 4 per cent. French, 2 per cent. Norwegian, 1 per cent. American, and 7 per cent. other countries.

COMMERCE.—The total foreign trade of China in 1906 amounted to £106,440,455 (imports £67,523,617, exports £38,916,838), the highest total yet recorded; and an increase of £4,920,861 over the previous highest total (1905). It was shared by the nations of the world as under in 1906:—

British.	%	Foreign.	%
Great Britain	24	Japan	24.5
Hong Kong	35	U.S.A.	20.8
India	5	Europe (exc. Russia) ..	22.7
Other British Territories	2	Russia	2
		Other countries	5
% British	56	% Foreign	44

The principal exports to this country from China in 1906 were tea (£458,879), silk (£531,261), skins and furs of all kinds (£597,967), straw for plaiting purposes (£230,516), hair (£240,069), and bristles (£205,100); while the chief domestic imports from the United Kingdom were cottons (£9,438,526), woollens and worsteds (£1,071,655), iron, wrought and unwrought (£1,075,277), machinery (£533,953), candles (£110,943), chemicals (£156,766), cotton yarn (£243,106), tobacco (£247,320), and soap (£111,441).

EDUCATION (see p. 640).

RAILWAYS.—About 3,700 miles are open inclusive of the Manchurian lines. The following are the lines completed and working:—*Manchurian Railway* (Chinese Eastern Railway Co.).—(a) Manchuria station via Harbin to Dalny and Port Arthur (1,200 miles). A short branch runs from Tashihch'iao to Newchwang (25 miles). (b) Harbin to Pogranichnaya on the East Manchurian frontier. *Imperial Railways of North China*.—Earnings of intra-mural section mortgaged to British bondholders. (a) Peking to

Newchwang (470 miles), via Tientsin, Tangku, and Shanhaikuan. Short branch from Peking to Tugchow (12 miles). (b) Koupangste to Mukden (102 miles), via Hsinmintun. (c) Chin-chou-fu to the Naup'iao coal mines (30 miles). (d) Kao-p'ien (on the Peihai line) to Hsiling Western Tombs, 30 miles. *Peihai Railway*, from Peking to Hankow (750 miles). French and Belgian capital. A short branch runs from Chingchow to Kiefeng Fu (35 miles). *Tsingtao—Chinanfu Railway* (250 miles). German direction. A branch line runs to Poshan (30 miles). *Taok'ou—Ch'ing-hua Railway* (Honan), 90 miles, crossing the Peihai line. Constructed by the Peking syndicate (British), and taken over by China under Loan Agreement of 3 July, 1905. *Shanghai Woosung Railway* (12 miles), forming part of the Shanghai-Nanking Railway in course of construction. *Canton-Samsui Railway* (30 miles). *P'inghsiang to Lihng* borders of Kiangsi-Hunan (56 miles). *Swatow-Chaochowfu Railway* (32 miles).

The following lines are under construction:—*Canton to Hankow* (650 miles). Concession originally granted to an American syndicate has now been redeemed by the Chinese. About 12 miles already constructed from Canton. *Shanghai to Nanking* (200 miles). Concession granted to British and Chinese Corporation by Loan Agreement of 9 July, 1903. About 90 miles completed from Shanghai. *Laokai to Yunnan-Fu* (390 miles). About 19 miles already complete. *Chengting-Fu to Taiyuan-Fu* (150 miles), 87 miles completed. Russian capital. *Kaifeng-Fu to Honan-Fu* (120 miles), 41 miles completed. Belgian capital. *Peking to Kalgan* (125 miles). Open to Nankow (33 miles). *Kungrik (Kuangtung), via Sunning, to Sankahoi* (55 miles). 10 to 15 miles completed. *Wahu to Kuangtchow* (90 miles). *Mukden to Antung* (287 miles).

The following lines are contemplated:—*British Capital*.—Suchow to Ningpo, via Hangchow (170 miles); Canton to Kowloon (100 miles). *British and German Capital*.—Tientsin to Chinkiang, via Chinan and Hsüchow (560 miles). *German Capital*.—Tchow to Chengting (100 miles); Yenchow to Kaifeng-fu (150 miles). *French Capital*.—Longsan to Nanning, via Lungchow (150 miles). *Japanese Capital*.—Amoy to Foochow (150 miles). There are also projects for lines from Hankow to Ch'engtu (Szechuan); Canton to Amoy; Kalgan to Kulun (Manchuria); and Lanchowfu to Hl (Kansu); Kiukiang to Nanchang; and Shanghai to Kashing.

TELEGRAPHS are being rapidly constructed by the Imperial Government, and Peking is in communication overland with Europe. The total length of line in operation at end of 1905 was 21,379 miles.

CUSTOMS AND POSTS.—The Imperial Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of Sir Robert Hart, G.C.M.G. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. It is not yet exactly known how far this change will affect the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations; it also manages the Imperial Post Office, whose operations have been much developed in

the last two years. Already letters can be sent all over the 18 provinces at a uniform rate of 2 cents (or less than one halfpenny) per half-ounce.

FINANCES.—Sir R. Hart, in 1901, estimated the annual revenue as follows: Land tax, 26,500,000 taels; provincial duties and receipts, 2,600,000 taels; grain commutation, 3,100,000 taels; salt gabelle, 13,500,000; likin, 16,000,000; customs (maritime), 23,800,000, (native) 2,700,000; total, 88,200,000 taels. The expenditure was estimated at 101,120,000 taels.

COLOMBIA, REPUBLIC OF.

President, General Rafael Reyes, elected 7 August, 1904 (for 10 years).

Foreign Affairs, General Vasquez Cobo.

Envoy Extraordinary and Minister Plenipotentiary in England, Dr. Ignacio Gutiérrez-Ponce, 42 Holland Road, W.

Secretary of Legation, Domingo Esguerra.

Consul-General, Guillermo R. Calderon, 6 Holborn Viaduct, E.C.

Consul in Liverpool, Dr. Carlos Arturo Torres.

Consul at Southampton, Jaime Gutierrez.

Formerly New Granada—a Republic with Constitution, 5 August, 1836—consisting of the Capital District of Bogotá and 15 Departments—Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Santander, Tolima, Nariño, Huila, Caldas, Galan, Quesada, Tundama and Atlantico—in the most N. W. part of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., comprising an area of 473,000 square miles, and possessing an estimated population (1895) of about 4,000,000, of whom more than one-half are whites and half-castes. It has been frequently subjected to revolutionary changes and civil wars, and in December, 1903, the Department of Panama proclaimed its independence and now exists as a separate republic. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are gold, silver, platinum, copper, iron, lead, coal, and emeralds. Its principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The plains yield large quantities of hides, and jerked beef is obtained from the cattle feeding there. The chief exports are coffee, precious metals, and india-rubber. All religions are tolerated. The standing army consists of about 6,000 men, and the navy of 3 small gunboats. Railroads are in their infancy, about 410 miles being open in 1907, with 8,680 (1907) miles of telegraph. The rate of exchange is about \$100 paper = \$1 gold; \$500 paper = £1 (approximately).

CONGO, INDEPENDENT STATE OF THE.

Sovereign, Leopold II., King of the Belgians.
Governor-General, Baron Wahis.
Vice-Governors-General, M. Wangermée; M. Fuchs; M. Lantanoins.
Secretary of State, Baron van Eetvelde.

Consul-General in London, Monsieur J. Houdret,
 130 London Wall, E.C.
Consul, J. T. Grein, 21 Mincing Lane, E.C.

The Independent State of the Congo has sprung out of the discoveries of Sir H. M. Stanley, and the explorations carried on subsequently by an International Association founded at Brussels under the presidency of the King of the Belgians in 1876. The territory of this State includes the right bank of the Congo from Manyanga to the sea, and 16 miles of sea-coast north of the estuary; the left bank from Noki (80 miles from the sea); and thenceforth both banks.

In the east it extends to Lake Tanganyika. The total area included within its limits amounts to 802,000 square miles, with a native population estimated at 14,000,000 to 15,000,000. The total European population (Jan., 1903) was 2,365, of whom 121 were British, 41 Americans, 149 Italians, 108 Portuguese, 136 Swedes, 67 Germans, and 1,417 Belgians (mostly Government officials). The mighty Congo, with its numerous navigable tributaries, constitutes the leading feature of this so-called State. It is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 240 miles in length. The railway was opened for traffic in July, 1898, to Stanley Pool, the first-class fare from Matadi being £8 and freight 10d. per kilo; there is also a second line, 60-centimetre gauge, under construction from Boma to the Mayumbe country, with about 40 miles completed at end of 1901. The Great Lakes Railway is completed as far as Ponthierville, about 75½ miles (1906). The railway receipts, 1902-3, amounted to 9,053,755 fr. (8,253,343 fr. goods traffic), and the expenditure, 3,417,824 frs.; during that period 2,508,364 fr. were paid to share and debenture holders. The accounts for 1903-4 show receipts, 11,279,014 fr. A line of telegraph is open to Coquilhatville. There is telegraphic communication with Europe *via* Leopoldville and Brazzaville (a cable goes across the river between these two places)—by land lines from Brazzaville to Libreville, and thence by submarine cable to Europe. In the rainy seasons this route is not to be relied upon owing to the damage done by lightning, and to the telegraph posts being washed down by the rains. Above Leopoldville the river is navigable as far as the Stanley Falls, a distance of over 900 miles. The population of this vast territory consists of numerous negro tribes,

of whom none have as yet attained a superior degree of civilization, whilst many still practise cannibalism. A terrible disease, called "Sleeping Sickness," for which no remedy has yet been discovered, has of late years made increasing ravages upon the native population, and threatens to depopulate large districts (especially in the Lower Congo) of a country in other respects capable of supporting with ease a large population. There are undoubtedly many fertile tracts, more especially along the rivers; but the barren mountain-land, which shuts out the coast from the more productive interior, necessitating as it does considerable expense for the transportation of articles of commerce ill able to bear it, must always present a difficulty in developing the resources of the country. The exports consist mainly of rubber (three-fifths of whole), palm-kernels, palm-oil, ivory, and a few minor articles. The coffee plant and cotton grow wild, and coffee, cocoa, and tobacco have been planted with success. Iron, copper, and other minerals have been found. There is a special import duty on spirits; 10 per cent. *ad valorem* is charged on salt, arms and all other goods. In 1907 a bill for the annexation of the State to the Government of Belgium was under consideration at Brussels.

COSTA RICA, REPUBLIC OF.

President, Cleto Gonzalez Viquez, *assumed office* 8 May, 1906, for 4 years.

Minister of Foreign Affairs, Luis Anderson.

Commerce & Finance, O. F. Rohrmoser.

Interior, José A. Aguilar.

War and Marine, Vidal Quiros.

Consul-Gen. for U.K., W. de la Guardia, 58 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1906) of 341,590. The chief exports are coffee (225,053 bags, value £690,649, 1906), bananas (7,283,000 bunches in 1905, value £748,510), cacao, cedarwood, fustic, and hides. The imports are dry goods, hardware, provisions, railway material, machinery, paints, and general merchandise (in 1906, 50·19 per cent. from United States, 22·48 from United Kingdom, 11·58 from Germany, 5·16 from France, and 10·59 from other countries).

The chief ports are Limon, on the Atlantic coast, through which the whole of the important banana trade with the United States and

England is done, as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast.

The Costa Rica Railway runs from Limon to the capital, San José (103 miles), and is continued 13 miles to Alajuela (Costa Rica branch lines 57 miles). The Northern Railway runs from Limon as terminus, and comprises 100 miles of main line and branches, running through the banana districts on the Atlantic coast; the services of the above two lines were amalgamated from 1 July, 1905. The Government own and operate the Pacific Railway, from San José to Santo Domingo (46 miles), and the coast section of the same, Esparta to Puntarenas (13 miles); the gap between these two sections (13 miles by cart road) will shortly be joined by the railway. The journey from Limon to the capital takes six hours, and from the capital to Puntarenas one day under ordinary circumstances. A considerable amount of English capital is embarked in the Republic.

	1904-5.	1905-6.
Public income	£588,421	£662,019

Port Limon—Vice-Consul, T. M. de Pass.

San José is 5,687 miles from London; transit direct, 17 days; *via* New York, 16 days.

CRETE (or CANDIA).

Suzerain, H.M. the Sultan of Turkey.

High Commissioner, M. Zaimis, assumed office 30 Sept., 1906.

Crete (or Candia) is an island in the Mediterranean, about 148 miles long and 7 to 30 miles in breadth, with an area of 2,950 square miles; the population is 303,543, of whom 269,319 are Christians, 33,496 Mussulmans, and 728 Jews. The island formed part of the early and later Roman Empires, and in 1669 was captured by the Turks.

The island now has impartial administration under the high suzerainty of Turkey, but independent of its suzerain under the High Commissioner appointed by the Powers. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are wheat and fruit; and wool, soap, olive oil, carobs, sallona, and cheese are the principal exports. The chief towns are Candia (pop. 22,331), Canea, the capital (pop. 20,972), and Retimo (pop. 9,308).

Agriculture, F. I. de Vildosola (acting Sec.).

Envoy Extraordinary and Min. Plenipotentiary, Rafael Montoro, 3 Grosvenor Mansions, Victoria Street, S.W.

1st Sec., Gabriel Zendegui.

The island of Cuba lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of about 44,000 sq. miles and a population of 1,572,797 (1899). Cuba suffered many years of internal discord, from its discovery by Columbus until its liberation in 1898, having been a Spanish possession until the Spanish-American War, of which it was the main bone of contention. A Cuban constituent convention met at the end of 1900 and agreed upon a Constitution (1901), which was ratified on certain conditions by the U.S.A. in 1902. In 1906 disturbances broke out and resulted in the renewed occupation by American troops and the establishment of the present provisional administration.

The chief products of the island are tobacco and sugar; and the total imports for 1906 were £19,603,924 and the total exports £20,782,207; 1,580 miles of railway were open on June 30, 1907, and over 3,604 miles of telegraph line. The imports from the United States for 1906 were £9,520,469 and from the United Kingdom, £2,816,205. The exports to the United States were £17,635,090, and to the United Kingdom £1,179,947.

CAPITAL, Havana (pop. about 275,000); other towns are Santiago (40,000), Matanzas (37,000), Cienfuegos (30,000), Cardenas (22,000), and Camaguey (20,000).

Vice-Consul (vacant).

Consul-General—Lith, W. O. Berry.

There are also Consuls at Hull, Liverpool, Manchester, Belfast, Falmouth, Guernsey and Newcastle-on-Tyne.

A Kingdom of Northern Europe, and the smallest of the Northern States, with a Constitution dated 28 July, 1865; consisting of the islands of Zealand, Funen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long.; its present contracted dimensions being the result of the Dano-German war of 1864, which stripped it of the Duchies of Schleswig-Holstein and Lauenburg. It comprises an area of 14,844 square miles (9,375,403 acres), with a population in 1906 of 2,588,919 (174 per square mile), nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade. The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1901, 2,866,899 acres were under corn crops and 3,106,228 permanent pasture. In 1903 the livestock numbered 486,935 horses, 1,840,466 cows, 876,830 sheep, 1,456,699 swine, and 38,984 goats. The corn crop in 1902 amounted to 97,844,429 bushels. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. The value of butter exported to the United Kingdom in 1906 was £3,636,862, eggs accounting for £1,701,291, and bacon £4,324,055; the principal imports from the U.K. being coal and fuel (£1,335,401). There is a mercantile marine of 4,178 vessels, with a tonnage of 517,201. There are (1903) 1,879 miles of railway and 3,817 miles of telegraph line (1902).

Defence (for Army, see p. 636). The navy consists of 37 steam vessels (including 4 ironclads), mounting 227 guns, with 1,270 officers and men.

Education (see p. 640).

Cons. Gen., Miguel Ventura, 17 Coleman St., E.C. Consul, Octavio Ventura.

Santo Domingo, formerly the Spanish portion of the island of Hayti, is the oldest settlement of European origin in America, having been founded in 1494 by Bartolomeo Columbus. The capital city contains the cathedral and the founder's remains. It comprises an area of about 20,596 square miles, with an estimated population of nearly 500,000. The chief products are tobacco, coffee, sugar, cocoa, mahogany, and a great variety of other furniture woods, wax, honey, logwood, fustic, turtle-shell, hides, bananas, and divi-divi. Sugar is the most important crop, and cocoa, coffee, and tobacco are grown. Gold is found and copper mines of great richness are being worked in the vicinity of San Cristobal. Iron and coal are also found, and a petroleum well has been opened up. There are about 120 miles of railway, and telegraphic and telephonic

communication has been established throughout the Republic, which is connected by cable with North and South America. The Customs are administered temporarily by officials lent by the United States Government, pending a Treaty now in process of ratification, under the terms of which the United States will collect the Customs Revenues, assist the Dominican Government to maintain peace and act as intermediary between the Republic and its foreign creditors. Since April, 1905, 55 per cent. of the Revenues are being deposited in a New York Bank to the credit of the Foreign and Interior Debt. This fund now amounts to over £300,000.

A State of South America, on its western side, being that portion of the original Republic of Colombia which lies on each side of the Equator, extending from lat. 1° 38' N. to 6° 26' S. (according to the Ecuadorian geography, but there are boundary disputes with Peru and Colombia), and between 70° and 81° W. long., comprising an area of 120,000 English sq. miles. It has a population of about 1,270,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are—cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 15 provinces and one territory. In 1891 there were 15 miles of railway open. An arrangement was recently made with the bondholders for the conversion of the Debt, but the Dictator, in 1895, suspended payment pending a further and less onerous arrangement; meanwhile a 10 per cent. surtax upon import dues is being collected and deposited

in a Guayaquil bank. Guayaquil is the chief port; population, 1896, about 50,000. In 1890 the Customs duties amounted to £460,162. The currency is a gold condor (of 10 sucres) value £1.

The population of the other chief towns is approximately as follows: Quito, 40,000; Cuenca, 25,000; Riobamba, 12,000; Ambato, Loja, and Latacunga, 10,000.

The GALAPAGOS ISLANDS (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

Director-General of Revenue, A. Chitty.

Director-General of Customs, A. King-Lewis.

Director-General of Ports and Lighthouses, Rear-
Admiral Sir R. M. Blomfield, K.C.M.G., R.N.

A country in the north-east corner of the Continent of Africa; was made part of the Turkish Empire in the latter part of the 12th century. Its history became interwoven with that of Europe when the army of Napoleon the Great entered into possession in 1801. British successes drove out the invaders, and in 1803 the new-

comers also evacuated the country, which they endeavoured to restore to the control of the Sultan of Turkey; but after the abandonment by Great Britain a struggle arose between two Turkish parties, the Albanians and the Ghuzz, the former being completely victorious under their leader, *Mehemet Ali*, who, in 1811, in spite of the attempted intervention of Great Britain, obtained the supreme power and ruled the country, agreeing to pay an annual tribute to the Porte of £682,092. His successors were *Ibrahim* (1848), *Abbas* (1848-1854), *Said* (1854-1863), whose reign was marked by the Suez Canal concession, and *Ismail* (1863-1879), who by a firman of the Sultan (14 May, 1867) was granted the title of *KHEDIV MISR*, or Ruler of Egypt, the previous rulers having had the title of Vali, or Governor. In the early years of his reign the Egyptian dominions were very largely extended, until in 1875 its territories comprised an area of nearly 1,500,000 square miles, with a population of about 16,000,000. But on the heels of annexation and conquest followed misgovernment and financial embarrassment. At this point the Governments of France and Great Britain intervened, and forced *Ismail* to abdicate, appointing his son *Mohamed Tewfik* (1879-1892) to succeed him. By a decree of 10 Nov., 1879, a *Controller-General* was appointed by each Power. In 1882, however, their work of reform was interrupted by a military revolt, headed by an officer of the Egyptian army (*Arabi Pasha*), and, the French Government declining to co-operate, a British expedition was despatched to re-establish the authority of the Khedive. The Dual Control was abolished by a decree of the Khedive (18 Jan., 1883), and a British financial adviser appointed as a member of the Khedivial Government. Meanwhile a revolt had broken out in the southern provinces, headed by *Sheikh Mohamed Ahmed* of Dongola, who proclaimed himself a Mahdi, or prophet, foretold by the Moslems. General Gordon, the hero of the Chinese rebellion, was despatched to Khartoum (Jan., 1884) as Governor-General of the Soudan, but this step was not followed by immediate movements of troops against the rebels, and in 1885 General Gordon fell at the capture of Khartoum (26 Jan.) before the Nile relief expedition reached him.

In 1883 the Khedive created a Legislative Council of 30 members, and a General Assembly, consisting of the Legislative Council, the six Ministers of State, and 46 members elected by the people. These bodies, however, were, and still are, mainly consultative, the real legislative power resting with the Khedive and his Ministers. The command of the army is made by Khedivial decree with the consent of the British Government.

In 1892 (7 Jan.), the Khedive *Mohamed Tewfik* died, and was succeeded by his elder son *Abbas*, the present ruler.

For the purposes of local government the country is divided into governorships and provinces, the latter being sub-divided into districts. Justice is administered by (1) Religious Courts; (2) the Mixed Tribunals established in 1875, to deal with questions arising between foreign inhabitants of different nationality and civil suits between natives and foreign subjects; (3) the Consular Courts, by which criminal charges against foreign subjects are investigated; and (4) the Native Tribunals containing Egyptian and foreign judges, dealing with criminal charges against natives, and with civil cases in which

both plaintiff and defendant are local subjects. A British Judicial Adviser to the Khedive watches the proceedings of the latter.

The population in 1882 was 6,814,000, including 90,886 European foreigners (37,301 Greeks, 18,665 Italians, 15,776 French, 8,022 Austrians, 6,118 English, &c.); and by the census of 1897, Egypt Proper contains 9,734,000 inhabitants (750.5 per square mile), of whom 112,500 were foreigners (38,000 Greeks, 24,500 Italians, 14,000 British subjects, 5,000 British army, 14,000 French subjects, 7,000 Austrians, 3,200 Russians, and 1,300 Germans).

The cultivated portion of Egypt is confined to the country annually inundated by the Nile, or capable of being irrigated by canals. The great irrigation works, to which Egypt may be said to owe its existence, are being further extended by elevating dams across the Nile at Assuan, Assiut, and Zifta (completed and inaugurated in 1902) for raising the water.

Education (see p. 640).

Agriculture and Industry.—Its products consist of cotton, millet, maize, wheat, rice, melons, gourds, sugar, hemp, &c. No metals have been worked within recent times in any considerable quantity, but recently prospecting has been undertaken in the ancient mining districts for gold, copper, lead, sulphur, emeralds, &c., and several mines are being opened up. Salt is extracted in large quantities (110,000 tons in 1906). Nitre, marble, red granite, Oriental alabaster, and limestone are found, in addition to indications of petroleum and coal. Most of the turquoises of the world come from the mines in the Sinai peninsula.

Trade.—The chief imports are cotton stuffs, coals, provisions, woollens, coffee, tobacco, indigo, hardware, timber, wine and spirits, and machinery. The exports consist mainly of cotton and cotton-seed (88 per cent.), beans, wheat, sugar, maize, rice, gums, hides, wool, barley, cigarettes, ivory, and ostrich-feathers. Of the entire trade over 42 per cent. is British, 9 per cent. being carried on with France, 8 per cent. with Turkey, and 6 per cent. with Germany and Austria.

Communications.—There is a network of railways in the Delta, the principal lines radiating from Cairo to Alexandria, Damietta, Ismailia (continuing northwards to Port Said and southwards to Suez) and Shellal. There are also extensions from Wadi Halfa to Khartoum, and from Berber to Suakin. The total length of these lines (exclusive of the Wadi Halfa-Khartoum line) was 1,412 miles on 31 Dec., 1906, and 22,584,675 passengers and 3,981,652 tons of goods were carried in 1906, the net receipts being £1,418,057. From the terminus to Luxor the standard gauge is used, but thence to Shellal the gauge is 3 ft. 6 in., as in the extensions from Wadi Halfa to Kerma and Wadi Halfa to Khartoum. There are (1906) 2,510 miles of telegraph, with 11,826 miles of wire, over which 2,293,000 messages were transmitted in 1906. The net postal revenue was £63,989 in 1904.

Defence.—The British army of occupation numbers about 4,880 men. The Egyptian forces on 31 Aug., 1906, numbered 19,010.

Finance.—The situation of the Debt on 31 July, 1907, was as follows:—

Guaranteed debt, 3%	£7,724,300
Privileged „ 3½%	31,127,780
Unified „ 4%	55,971,960
Domains „ 4½%	1,066,920

£95,890,960

the Suez Canal since its opening in 1869 with the percentage of British steamers.

II. Egyptian Departments represented.

Inspector-General of Irrigation, C. E. Dupuis.
 Inspector of Irrigation, M. P. Tottenham.
 Director of Repression of Slavery, Capt. A. A. McMurdo, D.S.O.
 Assistant Director do., Maj. H. V. Ravenscroft.

The Sudan Provinces were recovered by Anglo-Egyptian expeditions, 1896-1899, and their extent is defined in a convention signed, on 19 Jan., 1899, by Viscount (now Earl of) Cromer and the Egyptian Minister for Foreign Affairs, laying down the principles of administration. The territories affected are all those lying south of the 22nd parallel of latitude, which have never been evacuated by Egyptian troops since 1882, and those which, if evacuated and temporarily lost, have since been, or shall henceforth be, reconquered by the two Governments acting in concert. The Government is to be administered by a Governor-General in supreme civil and military command, appointed and removable by Khedivial decree with the consent of the British Government. The Governor-General may legislate by proclamation with the consent of the Governments, and the territories do not fall under the jurisdiction of the Mixed Tribunals. The British and Egyptian flags together are used in the Sudan.

The seat of Government is Khartoum, where a palace for the Governor-General and Govern-

ment offices and barracks have been built. The town has been lighted throughout by electricity and will shortly be provided with an efficient water supply, independent of the river. On 5 Jan., 1899, the foundation stone was laid of the Gordon Memorial College, for the establishment of which Lord Kitchener obtained the necessary funds by public subscription (see p. 640). The College was formally opened by Visct. Kitchener on 8 Nov., 1902, and in 1906 the number of students amounted to about 500, the majority of whom pay small annual fees. There are also primary schools, where English is taught, at Omdurman (300 pupils in 1906), Halfa and Suakin, and small schools at Berber, Dongola, Wad Medani, Kassala, &c., also two industrial schools at Kassala and Wad Medani. One of the largest and finest of modern mosques has been built at Khartoum, as that city will be the centre of Mohammedan religion in the Egyptian Sudan. Two good hotels have been built at Khartoum, and *wagons-lits* run on the Sudan Railway. Tourists can now perform the journey from Cairo to Khartoum *via* Shellal and Halfa in 95 hours in trains and steamers replete with every comfort. An accelerated service has also been established *via* Suez and Port Sudan (Red Sea) by which passengers could travel between Cairo and Khartoum in 8½ hours; and tourist steamers also run from Khartoum to Gondokoro (Uganda), *via* Kodok and the unique "sudd" region.

The territories are divided into 13 provinces, one of which, Kordofan, will be divided into two provinces in the beginning of 1908. The Sudan Railway reached Khartoum in 1899. There is a line from Atbara to the Red Sea at Port Sudan and Suakin (declared open January, 1906). A branch to the Halfa Khartoum line from Abu Hamed to Kareima to tap the Dongola Province was also opened in 1906. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal and inland chiefly by camels and donkeys. Kassala, Gallabat (on Abyssinian frontier), Roseires, Taufikia (50 miles south of Kodok), and El Obeid are in telegraphic communication with Khartoum, also Bahr-el-Ghazal Province with the exception of that portion of the Bahr-el-Ghazal river between Taufikia and Meshra El Rek. The cost of military operations in the Sudan in the years 1883-86 amounted to £7,091,310, and on the expedition by which these territories were recovered the sum of £789,802 only was expended, excluding the sum of £251,000 provided in 1897-8 by the Egyptian Government. The territories are not expected to provide an income equivalent to their cost for some time; long periods of war, famine, and disease have caused great ravages amongst the population, and some years must elapse before a substantial revenue may be expected, the cost of administration being meanwhile partly borne by the Egyptian Government. The population of the territories at the present time is roughly estimated at 2,000,000.

CAPITAL, Khartoum. Population 14,023, consisting of merchants, workmen, &c., and the garrison; the population of Omdurman, with the garrison, is about 39,916, and Khartoum North contains 3,664, the suburbs (16,901) making a total of 74,504. Distance from London *via* Cairo, 4,196 miles.

Port Sudan. Vice-Consul, B. W. Echlin.

FRANCE.

President of the Republic, Armand Fallières, born at Mézin (Lot-et-Garonne), 6 November, 1841; elected 17 January, 1906 (in place of Emile Loubet, retired). Formerly President of the Senate £24,000

Premier and Minister of the Interior, M. Clemenceau (23 Oct. 1906).

Minister of Foreign Affairs, M. Stephen Pichon.

Minister of Finance, M. Caillaux.

Minister of Public Instruction, M. Aristide Briand.

Minister of War, General Picquart.

Minister of Marine, M. Thomson.

Minister of Commerce, Industry, and Posts and Telegraphs, M. Doumergue.

Minister of Public Works, M. Barthou.

Minister of Colonies, M. Milliès-Lacroix.

Minister of Agriculture, M. Ruau.

Minister of Labour and Social Providence, M. Viviani.

Ambassador to Russia, M. Bompard; *Austria-Hungary*, Marquis de Reverseaux; *Germany*, M. Jules Cambon; *Italy*, M. Barrère; *Turkey*, M. Constans; *U.S.A.*, M. Jusserand.

Ambassador in London, M. Paul Cambon, Albert Gate House, Hyde Park.

Minister Plenipotentiary, M. Leon Geoffray.

1st Secretary, Comte de Manneville.

2nd Secretary, M. A. de Fleuriau.

3rd Secretaries, Marquis de la Bégassière; Comte de Lastours.

Attachés, Comte de Montholon; M. C. Bérard; Comte de Saint Quentin.

Military Attaché, Lt.-Col. Huguet.

Naval Attaché, Commandant Shilling.

Commercial Attaché, M. Jean Périer.

Secretary Archiviste, M. Joseph Knecht.

Consulate General, 4, Christopher Street, Finsbury, E.C.

Consul-General, M. Pierre T. B. T. Auzépy.

Consul, M. Alicot.

Chancellerie, M. Doyen.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its present area at 207,218 square miles. The territory lost in 1871 amounted to 5,602 square miles. France is divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent (1,145,738,000 gallons of wine were produced in 1906), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1906 amounted to 492,622,000 gallons. The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beet-root, for the manufacture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1906, 33,581,658 metric tons), pig iron (3,318,732 metric tons),

copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. The culture of oysters is an important industrial feature, and in the year 1904 882,642,171 oysters were produced, representing a value of £638,032. The increase of population is very slow, as will be seen from the following table:—

Year.	Population.	Year.	Population.
1700	19,660,320	1872	36,102,921
1801	27,349,003	1881	37,672,048
1821	30,461,873	1886	38,218,903
1831	32,559,233	1891	38,343,192
1841	34,230,178	1896	38,517,975
1851	36,039,364	1901	38,961,945
1861	38,067,064	1906	39,252,245

France has always been attractive to foreigners, of whom (1906) 1,009,415 were resident there, or 2·51 per cent. of the legal population; this number included 330,465 Italians, 323,390 Belgians, 89,772 Germans, 36,948 English, 13,236 of the latter residing in the Department of the Seine. 20 per cent. of the foreign population was born in France. There are about 57,000 Frenchmen in the Colonies and in various parts of the world, and a colonial population of (according to the estimates of the French Ministry of Commerce) 31,953,774; but with French protectorates 77,139,000, including France. About 26,000 Frenchmen are resident in England. The comparatively small increase of the population is largely due to immigration from other countries. There has, however, been a preponderance of births over deaths in recent years:—

Births.	Deaths.	Births.	Deaths.
1894... 835,383	815,620	1901... 857,274	784,876
1895... 834,173	851,986	1902... 845,378	761,424
1896... 865,586	771,886	1903... 826,712	753,606
1897... 850,197	751,019	1904... 818,229	761,203
1898... 843,933	800,073	1905... 807,292	770,172
1899... 847,627	816,233	1906....	
1900... 827,297	853,285		

Defence (for Army, see p. 636).

The Navy consisted in 1907 of 30 battleships (also 5 building and 5 ordered), 7 armoured coast defence vessels, 19 armoured cruisers (and 4 building), 31 protected cruisers, 1 unprotected cruiser, 21 sloops, torpedo vessels, gunboats, training ships, &c., 36 destroyers (also 26 building and 5 ordered), 297 torpedo boats, 41 submarine boats (and 48 building, 10 ordered), with 2,849 officers and 54,259 men.

Education (see pp. 640-1).

Communications.—The system of railways in France is very extensive; they are almost entirely *concedés*, and become State property after the expiration of the concession. The length of lines of general interest, exclusive of local lines, open for traffic on 31 December, 1905, was 24,500 miles, the total receipts from passenger and goods traffic, &c., being £63,100,000, and the expenses £32,900,000. The length of telegraph wires is 354,874 miles. At the 1st of January, 1906, the mercantile marine, comprising boats of 2 tons and upwards, amounted to 16,755 vessels of 1,387,220 net tons (of which 15,284 were sailing ships, representing 676,193 net tons). The sums voted by Parliament for construction and navigation Bounties to Shipping in 1907 amounted to £1,626,800, and £1,052,028 for Postal Service Subventions.

Commerce.—The principal imports in 1906 were wool, wines, silk, coffee, cotton, coal, oleaginous

fruits and seeds, cereals, timber, machinery, silk tissues, minerals, cod and other fishing products, sugar, nitrate of soda, and products from tar. The principal exports were woollen tissues, silk tissues, wines, wool, cotton tissues, small-ware, tools and other metal goods, dressed skins, skin and leather goods, millinery, machinery, butter, raw skins, &c., ladies' garments, brandy and spirits, raw and refined sugars, and table fruits.

The trade in 1906 was shared as under:—

Exports to (1906, £210,619,640)—			
Great Britain.....	£51,768,000	U.S.A.	£16,084,000
Belgium	32,144,000	Russia	2,676,000
Germany	25,612,000	Holland	2,108,000
Imports from (1906, £225,090,040)—			
Great Britain.....	£30,020,000	Belgium	£15,030,000
U.S.A.	23,516,000	Russia	12,116,000
Germany	23,360,000	Holland	2,988,000

The chief articles exported to the United Kingdom in 1906 were valued at:—

Francs.	Francs.		
Silk Tissues	136,160,000	Ornamental	
Woollen Tissues	107,354,000	Feathers	7,546,000
Millinery, &c.	107,502,000	Potatoes	9,242,000
Butter	38,687,000	Vegetables	12,352,000
Wines	41,179,000	Fruit (Table)	22,216,000
Dressed Skins	35,219,000	Copper	13,874,000
Automobiles and		Eggs of Poultry	
Carriages	61,886,000	& Game	12,264,000
Wool & wool waste	36,779,000	Meat & Poultry	9,230,000
Leather Goods	32,477,000	Refined Sugar	9,062,000
Parisian Articles	18,554,000	Raw Sugar	31,029,000
Smallwares	22,914,000	Clocks & Watches	3,309,000
Timber	21,441,000	Cereals & Flour	1,351,000
Cotton Tissues	33,783,000	Preserved Fruits,	
Raw Hides, &c.	21,984,000	Biscuits, &c.	3,550,000
Brandy	20,671,000		

The chief articles imported from the United Kingdom in 1906 were valued at:—

	Francs.		Francs.
Coal	144,394,000	Leather Goods, &c.	15,173,000
Wool and Wool		Linen Tissues ..	5,754,000
Waste	54,197,000	Cast Iron, Iron	
Machinery	42,050,000	and Steel.....	11,013,000
Ornamental		Ships and Boats ..	12,054,000
Feathers	38,844,000	Cotton Yarn	8,057,000
Woollen Goods ..	25,423,000	Metal Goods	7,143,000
Chemical products	20,185,000	Copper, metal & ore	11,405,000
Prepared Skins ..	22,218,000	Rags	6,399,000
India-rubber and		Raw Tin	3,080,000
Gutta-percha		Sweets, Preserves	
(raw & remelted)	17,175,000	& Biscuits	1,641,000
Cotton Goods	15,966,000	Linen & made-up	
Raw Cotton	11,361,000	Garments	2,049,000
India rubber, &c.,		Sowing Seeds	1,761,000
Goods	13,076,000		

Shipping.—During the year 1905 the total number of French and foreign vessels entering French ports with cargo amounted to 25,121, representing a tonnage of 21,177,314 tons, of which only 26.84 per cent. was French, while the total clearings with cargo amounted to 21,421 ships of a tonnage of 16,742,786 tons, of which 32.68 per cent. was French. British tonnage entering amounted to 35.34 per cent. against 31.13 clearing.

Debt.—The National Debt is stupendous, the nominal capital of the Funded Debt amounting in 1906 to £1,162,137,087, and the Floating Debt to £77,717,932, the heaviest debt ever yet incurred by any nation in the world. The Public Debt of France in 1870 amounted to £511,840,000. The total service of the Public Debt in 1906 and 1907 was as follows:—

	1906.	1907.
Perpetual 3 per Cents.	£26,563,524	£26,552,643
Redeemable 3 per Cents.	11,502,901	11,354,853
and annuities		
Other Credits	2,100,502	2,146,199
Total	£40,166,927	£40,053,695

	1906.	1907.
Revenue	£148,369,660	£153,368,890
Expenditure	148,367,683	153,353,013
	1905.	1906.
Imports	£191,156,320	£225,090,040
Exports	194,664,680	210,619,640
Imports from U.K.	23,700,000	30,020,000
Exports to U.K.	50,248,000	51,768,000

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36' W. to 6° 16' E. longitude, 37° 6' N. to an undetermined S. limit, about 30° N., covering an area estimated at about 184,898 square miles, with a population in 1906 of 5,231,850, of whom 729,960 were Europeans and 4,501,890 natives. The revenue in 1906 was estimated at £4,134,442, and the expenditure at £4,132,534; the imports in 1905 were valued at £15,355,500, and the exports at £9,150,520. The bulk of the trade is with France. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. Iron, copper, quicksilver, zinc, and lead mines are being worked. The value of the exports of phosphates, in 1905, amounted to £348,080; being principally to the United Kingdom. In 1904 there were about 1,912 miles of railway open for traffic, and in 1905 the number of ships entering and leaving Algerian ports was 9,142, of a tonnage of 7,632,447 tons. The principal town is Algiers, the capital (pop., 1900, about 120,000), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemçen.

FRENCH COLONIES AND DEPENDENCIES.

The total area of French Colonies and Dependencies (excluding Algeria, *circ.* 184,898 sq. m., and Tunis, *circ.* 52,000 sq. m.) was estimated at about 2,780,490 square miles in 1904, with a native population of 34,697,000, and 7,660 European functionaries.

French Colonial Office Expenditure.*

1891	£2,843,627	1900.....	£4,259,734
1892	3,423,112	1901	4,474,660
1893	3,221,630	1902	4,630,422
1894	3,413,940	1903	4,388,357
1895	3,434,414	1904	4,331,708
1896	3,117,052	1905	4,431,173
1897	3,629,051	1906	4,416,604
1898	3,866,065	1907	4,378,950
1899	3,595,832		

Trade of the Colonies.

	1904.....	1905.....
Imports*	£16,465,513	£19,563,180
Exports*	15,007,368	15,374,298

Total..... £31,472,881 £34,937,478

Trade with the United Kingdom.

Imports from U.K.*	£1,120,463	£1,178,794
Exports to U.K.*	1,340,331	1,655,736

Total £2,460,794 £2,834,530

Geographically, the French Colonies are divisible into four main groups, according to their situation in *Asia, Africa, America, Oceania.*

I. Asiatic: French India.—The area of the French possessions in India is 193 square miles; pop. (1901), 273,185; (1891, 282,923). *Pondicherry* (area 115 sq. miles, pop. 1906, 176,671), the chief of these dependencies, is on the Coromandel coast, 85 miles S. by W. from Madras. The town of Pondicherry has 46,887 inhabitants. The fortifications were once strong, but in the war with England they were destroyed, and under the Treaty of Paris (1814) they must not be rebuilt, while the French garrison must be only sufficient for police purposes. Rice, oil-seeds, pulse, and cotton are cultivated. The chief industry is cotton spinning. There are five cotton-mills, employing about 7,400 hands. In 1906 the imports into French India were valued at £264,000, and the exports at £1,073,000. The chief exports are ground nuts, cotton goods, and oilcakes; the imports consist principally of raw cotton, cotton goods, wood, seeds, and oils. There is no harbour, though the roadstead is as good as any along this coast. The minor settlements are *Chandernagore*, on the Hoogly, 17 miles north of Calcutta (area 4 sq. ms., pop. 26,831); *Karikal*, in the Cauvery delta (area 53 sq. ms., pop. 56,595); *Yanam*, in the Godavery delta (area 5 sq. ms., pop. 5,005); and *Mahé*, on the Malabar coast (area 26 sq. ms., pop. 10,298). There are 23 miles of railway, 8 to connect Pondicherry and 15 to connect Karikal with the South Indian Railway. The revenue is about £100,000, of which £20,000 is a contribution from France, besides a subvention of £2,600 for the upkeep of a corps of Sepoys. *Governor, M. Angoulvant.*

* Exclusive of Algeria and Tunis.

French Indo-China.—These possessions have an area of about 290,000 square miles and a population of about 15,856,000 (including 15,500 French). They extend northwards to 25° 20', and march with China as far as the river Mekong, which forms the western boundary along almost the whole length of French Indo-China. They comprise Cochín-China, and the four protectorates of Cambodia (enlarged in 1907 by the annexation of Siamese territory), Annam, Tonkin, and Laos. In 1898–9 Kwang-Chow-Wan (pop. 190,000), a free port on the Lien-Chow peninsula, was acquired on a lease of 99 years from China. French Indo-China has been rapidly developed since 1893 by public works, by the influx of capital and enterprise, and by the reorganisation of the finances. The financial and political unity of Indo-China was finally established in 1898. These reforms were chiefly the work of the late Governor-General, M. Paul Doumer. The revenue is about £3,600,000. Since 1899 the colony has been self-supporting. The revenue is derived mainly from customs, excise, and other indirect taxes. The deltas of Cochín-China and Tonkin are fertile. Annam, connecting them, is a long mountainous tract, with a narrow littoral, habitable and cultivable, on one side, and a wild, sparsely populated hill-tract stretching to the Mekong on the other. Laos is practically inaccessible except by this river. The chief rivers are the Mekong (1,900 miles long), which, notwithstanding obstructions, has been navigated as far as Chinese territory, though it is not likely to become an important commercial route; the Songkoi or Red River, which is navigable by small steamers as far as Laokai in Yunnan; and the Black River. Rice, silk, cotton, sugar, poppy, tea, seeds, tobacco, pepper, and fish are the principal productions of Indo-China. The chief mineral product is coal, which is mined at Hongay on the Tonkin coast. Other minerals are said to exist. Cotton yarn, cement, &c., are manufactured. The principal harbours are Saigon, Haiphong in Tonkin, and Tourane in Annam. Haiphong is 48 hours by mail steamer from Hong Kong. The length of railways at the end of 1906 was about 950 miles, including lines from Haiphong to Hanoi, and thence to Langson (160 miles) on the border of Kwangsi, China, and to Laokai (240 miles) on the Yunnan frontier; Hanoi to Vinh (204 miles), &c. The Laokai line is being extended to Yunnan-fu (about 298 miles) by a subsidised company. The foreign trade in merchandise in 1906 was valued at—Imports, £8,827,000; and Exports, £7,076,000. There is a considerable transit trade passing to and from the Yunnan treaty "port" of Mengtze through Tonkin. By far the largest export from French Indo-China is rice, £2,780,000 in 1905 (chiefly from Cochín-China), fish and pepper coming next. The chief imports are metal manufactures, cotton manufactures and yarns, jute bags, liquors, machinery, petroleum, paper, opium, &c. The yarns and jute bags are mainly Indian. The French customs tariff is in force, with some exceptions. About half the trade is with France and French colonies, and most of the rest with China and India. The shipping is chiefly French, British, and German. The French Army of occupation numbers about 20,000, in addition to 35,000 native troops. There is a French Bank of Indo-China. Exports from the United Kingdom in 1906, £63,305; Imports into ditto, £331,377. Capital, Hanoi, in Tonkin. Pop., 100,000. Gov.-Gen. of Indo-China—M. Beau-

Sec.-Gen.—M. Broni. Regent—Hoang-lao-Khai. H.B.M.'s Consul—T. F. Carlisle. Capital of Cochín-China, Saigon. Pop. 19,200. Lieut.-Gov. of Cochín-China—M. Rodier. H.B.M.'s Vice-Consul—J. L. O'Connell. Capital of Cambodia, Phnom Penh. Pop. 40,000. King—H.M. Sisowath. Resident-Supérieur—M. Luce. Capital of Annam, Hué. Pop. 30,000. King—H.M. Duy-Tan, a minor (suc. in 1907). Resident-Supérieur—M. Leveque. Capital of Laos, Luang Prabang. Resident-Supérieur, Lt.-Col. Tournier.

II. **African:** The French African Empire consists of the colony of Algeria and the protectorate of Tunis in the north; in the north-west of an immense tract of country, in four main divisions, on the coast-line (Senegal, French Guinea, Ivory Coast, and Dahomey), penetrating inwards to meet the French possessions of Upper Senegal-Niger and Territory of Mauritania, which form a hinterland for all the colonies on the coast. In West Central Africa the French Congo joins, through protected territory, the French possessions which form the common hinterland of the north-western possessions. This common hinterland stretches northwards in the direction of Algeria and Tunis, so that the whole north-western portion of the vast continent, except where occupied by Morocco and Tripoli, and Spanish, Portuguese, British, and German possessions, is claimed by France. In the east France possesses a portion of Somaliland and the island of Madagascar in the Indian Ocean, with certain dependencies. Conventions have been signed by Great Britain and France delimitating the boundaries of co-terminous territories in the west, and, owing to the British advance in the Nile region, delimitating their respective spheres in East and Central Africa.

On the East Coast is JIBUTI, the port and seat of government of the French Somali coast protectorate. The coast-line of this territory extends for 60 miles; the inland frontier is fixed at a distance of about 57 miles. The population is about 50,000. A railway from Jibuti to Harrar and thence to Adis Ababa, the present capital of Abyssinia, is being constructed, and in 1904 was completed as far as Diré-Daouah (191 miles). At Jibuti a jetty, 800 metres in length, has been erected and is used principally by small craft, and a second one of 900 metres in length is being constructed for the requirements of large vessels. The imports (chiefly cotton goods) amounted to £477,197 in 1905, while the exports amounted to £728,760; the imports from France in 1905 amounting to £76,837, and the exports to France £50,888. There is an Anglo-French agreement defining the boundary of the French and English spheres of influence in the direction of Harrar, which place neither party is at liberty to annex.

Governor—M. Bonhoure; Envoy to the Emperor Menelik of Ethiopia, M. Klobukowski.

Off the East coast, in the Indian Ocean, is the vast island of MADAGASCAR, the fourth largest island in the world, being 975 miles long and 350 miles broad at its greatest width. The total area is about 230,000 square miles, and the native population is estimated at 4,000,000 and from 5,000 to 6,000 French, the rest being chiefly British subjects, the Hova being the dominant tribe. Christian missions have been active in the island, and about 450,000 of the natives are Protestants, and about 50,000 Roman Catholics. A French colonial station was planted, under the protection of Richelieu, in 1662, since when the

island has been almost continuously claimed by the French. Active steps were taken in 1895 to make their influence felt, and in 1894-1895 a military expedition captured the capital and deposed the queen, the island being declared a French possession in 1896. A railway between Tamatave on the coast and the capital (Antananarivo or Tananarive) is in course of construction; 93 miles of which were open to traffic on 1st January, 1906.

In 1900 a loan of £2,400,000 was raised for the construction of railways, roads, telegraphs, &c. Fully 3,000 miles of telegraph lines have been constructed as well as two new telephone lines, one at Antananarivo of 27 miles, and the other at Tamatave of 10 miles. Gold reefs have been found in different parts of the island, and up to the end of 1904 there were 1,099 prospecting permits held by 317 different persons, 64 of which are British. Minerals are found in large quantities, and in the lowlands rice, manioc, arrowroot, sugar-cane, tobacco, hemp, cotton, vanilla, tea and coffee are successfully grown; caoutchouc and gum-copal are indigenous, and there is a wealth of timber. The revenue of the colony in 1904 amounted to £994,612, and the expenditure to £897,357. The principal exports in 1906 (£1,127,553) were gold (2,255 kilos, of the value of £270,613), rubber, hides, raffia-fibre, beeswax, bullocks, and straw hats; the imports, largely reduced since the high protective tariff of 1897, are mainly cotton goods, wine, spirits, metal manufactures, food-stuffs, and building material, and amounted to £1,461,105 in 1906, of which France supplied £1,307,621. The trade with the United Kingdom was valued at £19,265 for imports and at £63,740 for exports. The capital, Tananarive (called by the natives Antananarivo), had in 1901 55,579 inhabitants. Tamatave is the chief port, others being Majunga, Tolia, Faradofay, Mananjara, Mahanoro, and Vatomanandry. Madagascar has immediate dependencies in the islands of NOSSI BÉ and SAINTE MARIE, while further east (450 miles from Madagascar) is the island of RÉUNION (capital St. Denis, area about 1,000 square miles, population estimated at 173,192); imports in 1905, £727,394; exports, £358,330; with the COMORO Islands, halfway between Madagascar and the coast, and the islands of ST. PAUL and AMSTERDAM and KERGUELEN to the south-east.

Gov.-Gen. of Madagascar, M. Augagneur.

West Africa.—The administration of the French possessions in North-West Africa (exclusive of the French Congo), which has been in process of reorganisation since 1895, was completed and consolidated by a Decree of 18 October, 1904. The territories of Senegambia and the Niger have been converted into a separate colony under the name of Upper Senegal-Niger, and a commissioner attached to the general government has been appointed for the administration of the civil territory of Mauritania, or vast regions on the right bank of the Senegal River, and which will probably be eventually extended to the French possessions in South Algeria. A general budget has been created, to be settled by the governor-general in council, to which are devoted the funds derived from the customs and navigation duties of all the constituent colonies, and which provides for all expenses which interest all the colonies generally. The several colonies, therefore, can only reckon on the funds arising from their internal resources, such as capitation tax, trading licences, etc., but they

are at the same time relieved of many expenses which have been transferred to the general budget. Provision is also made in the general budget for subventions to those of the colonies requiring financial help. The colony of UPPER SENEGAL-NIGER may be said to comprise the whole of the hinterland of West Africa, and includes the great bend of the Niger and the territories enclosed within it, but it has no seaport. It is divided into a civil and a military territory, and is administered by a lieutenant-governor, resident at Bammakou, under whom is a superior officer entrusted with the administration of the Niger military territory. SENEGAL is the oldest and most important of the French possessions in West Africa. It is situated to the north of the British colony of the Gambia, and has an area of about 806,000 square miles and a population estimated at 1,130,000, 200,000 of which are placed directly under the French administration; capital, St. Louis (local budget in 1903, £208,378). The principal exports are gold, ground-nuts, gum, palm nuts and oil, and rubber. The exports from Senegal and Upper Senegal-Niger in 1905 were valued at £1,136,383, and the imports at £1,349,647; 546 ships (tonnage 707,603) entered, and 559 of a tonnage of 720,812 tons cleared at Senegalese ports in 1906. A railway has been constructed from Dakar to Rufisque, and thence north-west to St. Louis at the mouth of the Senegal River, a distance of 177 miles, and from Kayes, on the same river, a narrow-gauge line has been constructed to Koulikoro, on the Niger. Next in order to the south comes FRENCH GUINEA (local budget in 1903, £160,000; imports, 1905, £756,550, exports £654,845), comprising the settlements of RIVIERES DU SUD (capital, Konakri) and FUTA JALLON, and extending up the whole of the north-west coast (save where intercepted by Portuguese Guinea and the British colony of the Gambia) to join the colony of Senegal. Between the British colony of the Gold Coast and the Republic of Liberia is the FRENCH IVORY COAST (local budget in 1904, £103,460; imports, 1905, £555,810, exports £305,429), comprising the settlements of GRAND BASSAM and ASSINIE and the KROO country with the hinterland. To the south is DAHOMEY, between the British colony of Lagos and German Togoland (local budget in 1903, £150,663; imports, 1905, £429,299, exports £305,367); it consists of about 55 miles of the Benin coast, where are the settlements of KOTONOU and GRAND POPO with the hinterland. The ancient capital of the colony is Abomey, which has now been transferred to Porto Novo. The chief port is Kotonou. The FRENCH CONGO borders the Congo Free State on the south and east, and the German Cameroons on the north and west, but undefined to the north-east, comprises the colony of the Gaboon, the middle Congo, the territory of Ubangui-Shari, and the Lake Chad territory (local budget in 1903, £111,736). The principal exports are ivory, india-rubber, cocoa, coffee, ebony and other wood, gum-copal, palm oil, and accounted in 1905 to £557,310. The imports, consisting chiefly of cotton goods, spirits, ammunition, tobacco, rice, and salt, were valued at £415,166; the chief town and trading station being Libreville, on the coast.

III. American: France possesses two small groups of islands off the south-east coast of Newfoundland, of which ST. PIERRE and MIQUELON are the largest respectively; their combined area is

about 95 square miles, with a total population of about 6,352, and they form an excellent basis for the French cod fishery. Local budget in 1903, £25,283; importations in 1906, £208,097; exports, £283,447. In the *West Indies* two of the most fertile of the Lesser Antilles belong to France, viz., MARTINIQUE (capital Port de France), area about 382 square miles; population, 189,599; (local budget in 1903, £191,975; total imports, 1905, £590,366, exports £722,766); and GUADALOUPE and BASSE TERRE (capital Pointe-à-Pitre), area about 687 square miles, population 182,112 in 1902 (local budget in 1903, £227,729; total imports, 1905, £537,536, exports £625,498). They have six dependencies: MARIE GALANTE and ILE DES SAINTES to the south and south-east, and PETITE TERRE on the east (part of the administrative island), with ST. BARTHOLOMEW and the northern half of ST. MARTIN, about 150 miles north-west and almost due south of Anguilla (British). In *South America*, CAYENNE or FRENCH GUIANA has an area of about 27,027 square miles, and an estimated population of about 26,000 (town population 12,000). The local budget of the colony in 1903 amounted to £125,658 (imports, 1905, £457,565, exports £397,580).

IV. In *Oceania*: France possesses the penal colony of NEW CALEDONIA (capital Noumea), a large island containing an area of 4,618 square miles (white population, 1906, 25,000, of whom about 12,000 are of free and 10,000 of convict origin, whilst there is a native population of about 26,000), with its dependencies, Isle of Pines, Loyalty Islands, Huon Islands, Chesterfield Islands, and the Wallis Archipelago, annexed in 1853 (local budget in 1903, £299,691; total imports into New Caledonia, 1906, £416,489, exports £368,385); and the SOCIETY ISLANDS, Tahiti, Moorea, &c. (local budget in 1903, £52,066; imports into Tahiti, 1906, £109,851, exports £147,233), the LOW ARCHIPELAGO or Tuamotu, the MARQUESAS, and the AUSTRAL ISLES or Tubuai, and the GAMBIE ISLANDS, altogether amounting to about 1,400 square miles, with about 20,000 inhabitants. By a convention with Great Britain of 16 Nov., 1887, it was agreed that the protection of persons and property in the NEW HEBRIDES (5,106 square miles, population 70,000), should be secured by means of a mixed commission of naval officers belonging to the French and British naval stations in the Pacific. This arrangement has, however, been superseded by the conclusion of a convention signed on 20 Oct., 1906, by which the group of the New Hebrides, including the Banks and Torres Islands, shall form a region of joint influence under the administration of two High Commissioners appointed by Great Britain and France.

See also TUNIS, p. 624.

THE GERMAN EMPIRE.

Emperor, William II. (King of Prussia), son of the Emperor Frederick III. and the Empress Victoria, Princess Royal of Great Britain. Born 27 Jan., 1859; succeeded his father 15 June, 1888; married, 27 Feb., 1881, Princess Augusta Victoria of Schleswig-Holstein, born 22 Oct., 1853 (issue, 6 sons and a daughter). *Heir Apparent*, H.I. & R.H. Crown Prince William, born 6 May, 1882. *Imperial Chancellor and Prussian Premier*, Prince von Bülow. *Interior*, Herr von Bethmann-Hollweg. *Foreign Affairs*, Herr von Schoen.

Colonies, Herr Dernburg. *Navy*, Admiral von Tirpitz. *Justice*, Herr Dr. Beseler. *Imperial Treasury*, Baron von Stengel. *Posts and Telegraphs*, Herr Kraetke. *President, Imperial Railways Dept.*, Dr. Schulz. *German Ambassador to Austria*, Herr von Tschirschky und B. gendorff; *Italy*, Count von Monts; *France*, Prince von Radolin; *Turkey*, Baron Marschall von Bieberstein; *U.S.A.*, Baron Speck von Sternburg; *Russia*, Count Pourtales; *Japan*, Baron Mumm von Schwartzstein. *Ambassador in London*, Count Paul Wolff-Metternich, 9 Carlton House Terrace, S.W. *Councillor of Embassy*, Herr Wilhelm von Stumm. *2nd Secretary, Councillor of Legation*, H.S.H. Wilhelm, Prince zu Stolberg Wernigerode. *3rd Sec.*, Herr Dietrich von Bethmann-Hollweg. *Attaches*, Count Berthelm; Herr von Goldschmidt-Rothschild. *Military Attaché*, Captain Ostertag. *Naval Attaché*, Commander Widenmann. *Director of the Chancery of the Embassy*, Hofrath C. Lentze. *Chancelliers*, Hofrat F. R. Moebius, Herr Meinck, Herr Carow, and Herr Dörner. *Consul-Gen.*, Dr. Johannes, 49 Finsbury Square. *Consul*, Herr Humbert. *Vice-Consuls*, Baron von Neurath, Herr von Ranke.

The Empire, according to the Constitution of April 16, 1871, is a Confederate League, bearing the name German Empire, under the hereditary presidency of the King of Prussia, who holds the title of German Emperor, and whose eldest son is styled His Imperial and Royal Highness. The Emperor as such represents the Empire in all matters affecting international law; in the name of the Empire he declares war and makes peace, concludes alliances and treaties with foreign States, and accredits and receives Ambassadors. Except to repel an attack on the territory or the coasts of the League, the Emperor cannot declare war in the name of the Empire without the consent of the Federal Council. The consent of the Federal Council and Reichstag is necessary in regard to certain specified treaties (cf. Art. 4 of the Constitution). The Emperor has the right to summon, open, adjourn, and close the Reichstag. The Federal Council and Reichstag must be summoned to meet every year; the Reichstag cannot be summoned without the adherence of the Federal Council. All bills are brought before the Reichstag in the name of the Emperor after acceptance by the Federal Council. Laws are promulgated by the Emperor in the name of the German Empire after acceptance by the Federal Council and the Reichstag. All edicts and orders of the Emperor made in the name of the Empire must be countersigned by the Chancellor, who is thereby responsible for them. The Emperor is the Bundesfeldherr, or Federal Commander-in-Chief of the whole German Army. In time of war he holds supreme command: in time of peace the Kings of Bavaria, Saxony, and Württemberg retain their sovereign rights as heads of their respective armies. In time of peace the Bavarian army administration is wholly independent of that of the rest of the German army, and only falls under the direct command of the Emperor when the army is mobilised for war. The rights of the Kings of Saxony and Württemberg in time of peace are not quite so extended as those of the King of Bavaria; but their armies remain distinct and

form separate army corps. The contingents of all the other Federal States are under the direct command of the King of Prussia, and under Prussian administration. The troops of all the Federal States swear loyalty to their respective sovereigns and obedience to the orders of the Emperor—in the case of Bavaria this obedience is limited to war-time. On the other hand, the German Navy is Imperial (Kaiserlich), and the Emperor as such is the supreme Admiral-in-Command of the Imperial German Navy in peace as well as war. The Reichstag, or Imperial Diet, consists of 397 Deputies; the original idea was that there should be one deputy to every 100,000 inhabitants of the Empire. The Reichstag sits for a period of five years, unless previously dissolved by the Emperor. Amongst the matters belonging to the jurisdiction of the Empire are all those that refer to the army and navy; the common, civil and penal law of the Empire; posts and telegraphs (not including the special rights reserved by Bavaria and Württemberg); the railways (subject to Bavaria's rights); inland navigation; the Customs of the Empire; weights and measures; coinage; banking; patents; foreign trade; the German mercantile marine; the Press; everything relating to the right of forming corporations; colonisation. A majority of the Federal Council and Reichstag is necessary, and also sufficient, for the validity of a law. The laws of the Empire take precedence of the laws of the Confederate States within the scope of the Constitution of the Empire; they are compulsory on all Governments of the Empire.

The German Empire consists of the following 26 States:—Prussia (including Lauenburg, and since 1890—Heligoland); Bavaria; Saxony; Württemberg; Baden; Hesse; Mecklenburg-Schwerin; Saxe-Weimar; Mecklenburg-Strelitz; Oldenburg; Brunswick; Saxe-Meiningen; Saxe-Altenburg; Saxe-Coburg-Gotha; Anhalt; Schwarzburg-Sondershausen; Schwarzburg-Rudolstadt; Waldeck; Reuss (elder line); Reuss (younger line); Schaumburg-Lippe; Lippe; Reichsland; Lübeck; Bremen; Hamburg.

The census of 1905 shows a total population of 60,641,278, of whom 29,884,681 are males, and 30,756,597 females.

The religious confessions were divided in 1900 as follows:—35,231,104 Protestants (62·5 per cent.), 20,327,913 Roman Catholics (36·1 per cent.), 203,793 Christians of other categories, 586,833 Jews (1 per cent.), 17,535 adherents of other religions, or unknown.

There were in 1900 4,231,129 persons residing within the limits of the Empire who spoke a non-German language, viz.:—80,361 Dutch, 20,677 Frisians, 141,061 Danish (and Norwegians), 8,998 Swedish, 20,217 English, 211,679 French, 11,841 Walloons, 65,961 Italians, 2,059 Spanish, 479 Portuguese, 3,086,489 Poles, 142,049 Massurians, 80,213 Kassubians, 93,032 Wends, 64,382 Moravians, 43,016 Czechs, 9,617 Russians, 106,305 Lithuanians, 8,158 Hungarians, 14,535 not above specified.

There are 41 large towns with over 100,000 inhabitants, and of these 28 are in Prussia, 4 in Saxony, 2 in Bavaria and Baden, and 1 each in Hamburg, Württemberg, Bremen, Reichsland, and Brunswick.

Education (see p. 641).

EMIGRATION.—At the commencement of the nineteenth century few Germans emigrated, but

about fifty years afterwards there was a strong desire to leave the mother country. The figures are as follows:—

1831-41 ...	152,000	1871-80 ...	623,000
1841-50 ...	435,000	1881-90 ...	1,342,432
1851-60 ...	952,000	1891-00 ...	529,875
1861-70 ...	822,000	1901-05 ...	146,540

Out of thirty millions of emigrants from Europe in the nineteenth century Germany contributed about five millions—viz., $\frac{1}{6}$ of the whole number.

In the eighties the average number per annum was over 100,000. In 1880 the number of emigrants was 117,097; in 1881 it rose to 220,902—the highest figure hitherto attained in one year. The statistics since 1880 are as follows:—

1881 ...	220,902	1894 ...	40,964
1882 ...	203,585	1895 ...	37,498
1883 ...	173,616	1896 ...	33,824
1884 ...	149,065	1897 ...	24,631
1885 ...	110,119	1898 ...	22,221
1886 ...	83,225	1899 ...	24,383
1887 ...	104,787	1900 ...	22,309
1888 ...	103,951	1901 ...	22,073
1889 ...	96,070	1902 ...	33,098
1890 ...	77,103	1903 ...	36,310
1891 ...	120,089	1904 ...	27,084
1892 ...	116,339	1905 ...	28,075
1893 ...	87,677	1906 ...	31,074

PRODUCTION AND INDUSTRY.—Germany is becoming more and more a manufacturing country.

In 1895, 34·9 per cent. of the population were supported by agriculture, 3·6 per cent. by mining, 35·5 per cent. by industries, 11·6 per cent. by trade and traffic. Of the total area in 1900, 48·6 per cent. was under cultivation, 16 per cent. consisted of meadows and pastures, and 26 per cent. of forest land. Germany supports nine-tenths of her population by her own produce. The mineral produce was valued in 1905 at £69,496,030, and included 139,132,554 English tons of coal, 51,574,384 of lignite, 23,025,455 of iron ore, 4,953,437 of kali, kainit, and other kali salts. The total mineral produce amounted to 201,921,304 English tons, including, besides the above, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, borate, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore. Crefeld, Elberfeld, Barmen, Mülhausen, Chemnitz, and the provinces of Westphalia and Silesia are the great centres of the textile industries.

The chief articles of export to the United Kingdom in the year 1905 were the following (£1 = Mks. 20.43):—

Sugar, refined and unrefined	£6,857,000
Woolen Unprinted Cloth Stuffs	1,972,000
Half-Silk Stuffs, Scarves, and Shawls	1,585,000
Coloured Prints, Engravings, &c.	1,228,000
Billot Iron, Pig Iron, Ingots	1,190,000
Women's Clothing of Cotton, Linen, Wool	1,190,000
Hides	1,115,000
Cotton Embroideries	1,112,000
Cotton Lint	1,081,000
Toys	933,700
Glove Leather, Manufactured Leather	905,500
Aniline and other Coloured Tar Stuffs	88,000
Machines and Parts of Machines, exclusive of locomotives, sewing machines, &c.	820,000
Fine Iron Goods	773,300
Cotton Stockings	768,000
Common Iron Goods	660,000
Pianos	651,000
Cotton Gloves	597,300

The chief imports from the U.K. were:—

Cool	£5,310,000
Woolen Yarn	1,973,000
Cotton Yarn	2,779,000
Gold	2,251,000
Hides	2,153,000
India rubber and Gutta-percha	1,840,000
Salted Herrings	1,160,000
Raw Silver	955,400
Combed Wool	895,700
Machines and Parts of Machines, exclusive of locomotives and sewing machines	822,230
Fresh Fish (of which Herrings £465,000)	572,700

MERCANTILE MARINE.—The Mercantile Marine consisted in 1906 of 1,560 steamers of 100 tons and upwards (3,109,966 tons gross register), and of 877 sailing vessels of 50 tons and upwards (471,824 tons net register). The gross tonnage of the British Mercantile Marine is about five times as great as that of the German Mercantile Marine.

The number of seamen in the German Mercantile Marine on January 1st, 1907, was 67,536 (January 1st, 1906, 64,037). Germany now ranks second in the list of the countries of the world that own shipping. In 1870 Germany's fleet of merchant steamers was only half as large as that of France; now it is twice as large. The year 1906 was, on the whole, satisfactory in the shipbuilding trade. There were built in 1906: 406 steamers, 664,175 tons gross (1905, 382 steamers, 667,808 tons gross), and 445 sailing vessels, 65,943 tons net (1905, 379 sailing vessels, 71,472 tons net).

COMMUNICATIONS.—The total length of the *Railways* in the Empire at the end of 1905 extended to 54,680 kilometres = 33,956 miles, of which about 92 per cent. belong to the State; the total cost of construction was £20,918 per mile; the expenses in 1905 were £75,539,215, and the receipts £119,460,800.

IMPERIAL POST (including Bavaria and Württemberg), 1905:—Length of telegraph lines, 88,244 miles (length of wires, 339,250 miles); telegrams handed in, 41,479,000; post offices, 39,052; telegraph offices, 32,312; telephone call-stations, 25,548; letters delivered, 4,422,700,000; cash on delivery orders, £39,186,274; money orders, £554,514,706; telegrams despatched, 41,479,000; telegrams received, 42,647,000. The number of employes in the service of posts and telegraphs was 278,061.

DEBT.—The National Debt amounted at the end of 1906 to £179,583,333, of which £78,431,373 bears interest at 3½ per cent., £87,426,470 at 3 per cent., £7,843,137 are Treasury Bonds, and £5,882,353 are Bank Notes. The debt of the former Norddeutscher Bund was cancelled by limitation at the end of 1902. (£1 = Mks. 20.40.)

DEFENCE (for Army, see p. 637).—The *Imperial Navy* consisted at the end of 1907 of the following ships, built or building: 29 Battleships, 8 ironclad Coast Defence ships, i.e., 37 Battleships (1st, 2nd and 3rd class, according to British classification), 16 large Cruisers (10 armoured, 6 protected), 37 small Cruisers, 10 Gun-boats, 71 large Torpedo Boats (mostly equal in size, but not in armament, to British Destroyers), 47 small Torpedo Boats, 27 antiquated—total, 145—and 12 building; a number of special ships and gunboats of no great fighting value on the high seas. The personnel of the Imperial Navy consists of 1,786 officers, 295 engineer officers, 231 surgeons, 2,033 warrant officers, 9,579 petty

officers, 31,320 seamen, 1,500 ships' boys—total, 46,747, including 378 midshipmen and 175 naval cadets, who hold rank between warrant officers and petty officers; entered separately are 199 paymasters.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread winners in the Empire a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The National Insurance is based on mutual insurance and self-administration. The Infirmary Insurance Act came into force 1 January, 1900. In 1905, £5,602,316 were given as pensions to invalids (i.e., persons unfit for work); £954,727 as old age pensions; £153,939 as sick pensions; £596,018 for medical assistance; £17,143 as home relief for infirm workmen; and £400,566 were refunded—total, £7,724,709. In 1904, the pensions to workmen unfit to work amounted to £5,164,028; old age pensions, £1,022,953; sick pensions, £129,151; medical assistance, £534,727; home relief for infirm workmen, £12,454; refunded, £385,204—a total outlay of £7,248,517, of which the State contributed £2,219,390. The insured are divided into five classes, according to the amount of their annual earnings, of £17 10s., £27 10s., £47 10s., £57 10s., and £100 respectively. Contributions are paid weekly, viz., 1d., 2½d., 3½d., 4½d., and 4½d. respectively—one half by the employer, the other by the employed; the State contributes a subsidy of £2 10s. to the pension. The *infirmary* pensions amount respectively (including the State subsidy) to £8 2s., £11 5s., £13 10s., £15 15s., and £18; the *old age* pensions to £5 10s., £7, £8 10s., £10, and £11 10s. respectively. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses—in so far as the incomes do not exceed £100—including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work.

(£1 = Mks. 20.43.)	1906-7.	1907-8.
Revenue	£119,136,074	£127,087,175
Expenditure	118,717,117	127,087,775
of which Army	36,341,243	39,104,953
Navy	12,355,310	13,609,378
Imperial Debt	162,677,453	179,583,333
	1905.	1906.
Imports	£363,989,045	£392,652,961
from U.K.	38,389,623	40,352,422
Exports	285,942,241	311,257,954
to U.K.	51,776,800	52,236,906

The imports from the U.K. and the British Colonies formed 18·3 of Germany's total imports in 1906 (1905, 18·1); the exports to the U.K. and the British Colonies formed 20·6 of Germany's total exports for 1906 (1905, 21·8). The imports from the U.K. and the British Colonies to Germany were in 1906 £5,369,065 more than in 1905; whilst the exports from Germany to the U.K. and the British Colonies show an in-

crease in value of about £1,972,590 in 1906 as compared with 1905. The imports from Russia and the United States of America to Germany far exceeded those from the U.K. in 1906; whilst the exports to the U.K. further increased—the U.K. thus remaining by a long way Germany's best customer.

The Imperial War Treasure deposited in the Julius Tower at Spandau amounts to £5,873,715.

British Ambassador, His Excellency the Rt. Hon. Sir Frank Cavendish Lascelles, G.C.B., G.C.M.G., G.C.V.O. £8,000

PRUSSIA.

King, William II., German Emperor (q.v.).

President of the Ministry and Minister for Foreign Affairs, Prince von Bülow.

Interior, Count Moltke.

Finance, Baron von Rheinbaben.

War, Lieut.-General von Einem.

Public Works, Herr Breitenbach.

Agria, Woods and Forests, Herr von Arnim-Kriewen.

Trade and Commerce, Herr Delbrück.
Instruction and Worship, Dr. Holle.
Minister of Justice, Dr. Beseler.

Prussia comprises the larger portion of Germany, and consists of 13 provinces, with area and population in 1905:—

Provinces.	Sq. miles, English.	Population.
1. East Prussia	14,266 '38	2,030,176
2. West Prussia	9,856 '47	1,641,746
3. Brandenburg	15,377 '09	3,531,906
City of Berlin	24 '47	2,040,148
4. Pomerania	11,626 '31	1,684,326
5. Posen	11,182 '57	1,986,637
6. Silesia	15,563 '21	4,942,611
7. Prov. Saxony	9,748 '54	2,979,221
8. Schleswig-Holstein & Heligoland	7,335 '65	1,504,248
9. Hanover	14,865 '24	2,759,544
10. Westphalia	7,801 '29	3,618,090
11. Hesse-Nassau	6,059 '92	2,070,052
12. Rhineland	10,420 '07	6,436,337
13. Hohenzollern	440 '92	68,282
Total	134,558 '34	37,253,324

Of the total population 18,398,903 are males and 18,864,421 females. According to Religions, Evangelicals (i.e., National Church) number 23,341,502; Roman Catholics 13,352,444; and Jews 409,501. There are 28 towns with over 100,000 inhabitants.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. Its principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of nearly 20,435,491 acres, chiefly consisting of fir. Minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the principal industries. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated and are exported. Its manufactures consist chiefly of cotton goods, machines of all kinds. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, and working in metals. Brewing is a business of great importance. The principal imports comprise coffee, tea, cotton, and other produce of the colonies; wines, silk, fruit, manufactured goods, tin, furs, and dye-stuffs. The principal exports comprise linens, woollens, hardware, wool, timber, pitch, linseed, tobacco, mineral waters; to which may be added horses, horned cattle, hams, salt meat, and wine from the Rhenish provinces.

CAPITAL, Berlin. Population (1905), 2,040,148. Berlin to London, transit, 22 hours.

ALSACE-LORRAINE.

Statthalter, Count Carl von Wedel (1907).
Minister of State, Herr von Köller.

The "Reichsland" of Alsace-Lorraine (Elsass-Lothringen), which was annexed by France from the old German Empire between 1648 and 1697, and restored to Germany in 1871, embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxemburg. Wine, tobacco, and hops, iron and coal are among its leading productions, and the cotton industry is most flourishing. There is an elective Provincial Committee of 58 members. The area is 5,591 square miles, divided for administrative purposes into three districts, Ober- and Unter-Elsass and Lothringen. The population in Dec., 1905, was 1,814,564, of whom 935,807 were males and 878,757 females. French was spoken by about 200,000 persons. Principal towns, Strassburg (pop. 167,678), Müllhausen, and Metz.

Revenue and Expenditure (1907-8) ... £3,029,017
 Debt (1907).....(Rentes £43,750) ... 1,458,333

ANHALT, Duchy of.

Duke, Friedrich II., born 19 August, 1856; succeeded 24 Jan., 1904; married, 2 July, 1889, Princess Marie of Baden; born 26 July, 1865. *Heir Presumptive*, Prince Edward, born 18 April, 1861; married, 6 Feb., 1885, Princess Louise of Saxe-Altenburg.

Prime Minister, Herr von Dallwitz.

A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, containing 906 square miles and a population of 328,029. Budget, 1907-1908, £697,400; Credit (1906), £561,101. Capital, Dessau. Pop. 55,134.

BADEN, Grand Duchy of.

Grand Duke, Frederick II., born 9 July, 1857; m. 20 Sept., 1885, Princess Hilda of Nassau, born 5 Nov., 1864; *Grand Duke*, 28 Sept., 1907. *Heir Apparent*, Max, b. 10 July, 1867.

President of Ministry, Dr. Freiherr von Dusch.

A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Switzerland and Alsace. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It comprises an area of 5,888 square miles (3,277 cultivated—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce—and 2,668 forests). The population in 1905 was 2,011,000, nearly two-thirds of whom were Catholics, more than one-third Protestants, and 25,893 Jews. Mannheim 163,000, Karlsruhe 111,000; Freiburg and Pforzheim have over 50,000 inhabitants. Principal industries are agriculture and manufactures (cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, paper, and machinery). There are 1,221 miles of railway, of which 950 miles belong to the State, constructed at a total cost of £32,339,000.

Budget, 1907 (including railways) £8,943,000
 Debt, Jan. 1, 1907 (only railways)..... 21,339,000

CAPITAL, Karlsruhe. Population (1907), 224,078. *British Chargé d'Affaires*, F. D. Harford, C.V.O. (Darmstadt).

Mannheim—Consul, Dr. Paul Ladenburg.

BAVARIA.

King, Otto, born 27 April, 1848; succeeded his late brother, Louis II., 13 June, 1886.

Regent and Heir Presumptive, Prince Luitpold, born 12 March, 1821, uncle of the late and

present Kings; appointed Regent, 10 June, 1886; mar. 15 April, 1844, Archduchess Augusta of Austria-Tuscany, who died 26 April, 1864.

Ministers of State—President and Minister of Foreign Affairs, Dr. Baron von Podewils-Durnitz; *Justice*, von Miltner; *Interior*, Dr. von Brettreich; *Instruction*, Dr. von Wehner; *Finance*, von Pfaff; *Communications*, von Fraendorfer; *War*, Gen. Baron von Horn.

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'–50° 34' N. lat. and 9° 13'–50° E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 28,885 square miles, and a population (in 1905) of 6,524,372 (4,608,469 were Roman Catholics, 1,844,699 Protestants, and 55,341 Jews). The capital (538,983) and Nuremberg (294,426) are the largest towns. Bavaria contributes three corps d'armée to the forces of the German Empire; their strength is fixed at 68,426 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c.

Budget, 1906 and 1907 £23,408,817
 Public debt, 31 Aug. 1906 (including railway debt, £74,570,991)..... 94,510,574

CAPITAL, Munich. Population (1905), 538,983.

British Minister Res., F. L. Cartwright, C.V.O. £1,500

Consul, Lucien Buchmann.....
Nuremberg—V.-Cons., S. Ehrenbacher...

BRUNSWICK, Duchy of.

Regent, H.H. Duke John Albrecht of Mecklenburg.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,418 English square miles, and a population (1905) of 485,958, of whom 455,680 were Protestants, 26,376 Roman Catholics, and 1,815 Jews. Budget, 1907-1908: Income, £707,315; Expenditure, £708,660; debt, £2,557,351.

Capital, Brunswick; population (1905), 136,397.

HESSE, Grand Duchy of.

Grand Duke, Ernest Louis, born 25 Nov., 1868; suc. 13 Mar., 1892; m. 2 Feb., 1905, Princess Eleanore zu Solms-Hohensolms-Lich, b. 17 Sept., 1871.

Heir Apparent, George, b. Nov., 1906.

President of Ministry, K. Ewald.

A central State in the west of Germany, comprising two disconnected territories, nearly equal

in size, containing an area of 2,966 square miles, and a population (1907) of 1,236,285, of whom two-thirds were Protestants. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a flourishing condition. Fruit is abundant, and the vine highly cultivated. Darmstadt, Mainz, and Offenbach have over 50,000 inhabitants.

Budget, 1907 £4,086,900
Public debt, 1907 (mostly for railways) 20,051,600
CAPITAL, Darmstadt. Population (1907), 86,500.
British Chargé d'Affaires, F. D. Harford,
C.V.O. (Darmstadt) £500
Consul-Gen., Sir Francis Oppenheimer (at Frankfurt).

LIPPE, Principality of.

Prince, Leopold, b. 30 May, 1871.
Area, 470 sq. miles; population (1905), 145,577;
rev. (1907-8), £113,467; exp., £115,228; debt,
£65,011. Capital, Detmold; pop. (1905), 13,272.

MECKLENBURG-SCHWERIN, Grand Duchy of.

Grand Duke, Frederick Francis IV., b. 9 April, 1882; *suc.* 10 April, 1897; *mar.* 7 June, 1904, Princess Alexandra of Brunswick and Luneburg, born 29 Sept., 1882.

Minister of State, K. H. L. Graf von Bassewitz-Letlow.

Comprises an area of 5,135 square miles on the Baltic, with a population of 625,045. The Legislative power is vested in representatives of the towns, and of the Knights' estates. Revenue (1906-7), £1,084,500; debt (1907), £6,409,000. Capital, Schwerin; pop. 41,628.

MECKLENBURG-STRELITZ, Grand Duchy of.

Grand Duke, Adolphus Friedrich, b. 22 July, 1848; *mar.* 17 April, 1877, the Princess Elizabeth of Anhalt, born 7 Sept., 1857.

Heir Apparent, Adolphus Friedrich, born 17 June, 1882.

Consists of two detached parts, separated by Mecklenburg-Schwerin. Area, 1,144 square miles; population, 103,451. No proper budget. Finances in good condition. Capital, Neu-Strelitz; pop. 11,658.

OLDENBURG, Grand Duchy of.

Grand Duke, Frederic Augustus, b. 26 Nov., 1852; *suc.* 13 June, 1900; *married* (1), Feb. 18, 1878, to the late Princess Elizabeth (second daughter of the late Prince Frederick Charles of Prussia), who died 28 August, 1895; and (2) to Princess Elizabeth of Mecklenburg-Schwerin, born 10 August, 1869.

Heir Apparent, Nicholas, b. 10 August, 1897.

Situate on the North Sea and the Weser. Area, 2,508 square miles; pop. 398,500; rev. 1900, £491,603; exp., £460,947; debt, £2,804,511. Capital, Oldenburg; pop. 26,000.

REUSS, Elder Line.

Prince, Henry XXIV., born 20 March, 1878; *suc.* 19 April, 1902.

Prince Regent, Henry XIV., b. 28 May, 1832. Area, 120 square miles; population (1905), 70,603; revenue and expenditure (1907), £76,090. No debt. Capital, Greiz; pop. (1905), 23,118.

REUSS, Younger Line.

Reigning Prince, Henry XIV., b. 28 May, 1832; *suc.* 14 July, 1867; *mar.* Princess Agnes of Württemberg (died 10 July, 1886).

Heir Apparent and Regent, Henry XXVII.

Area, 320 sq. miles; pop. (1905), 144,584; rev. and exp. (1905-7), £121,397; debt (1906), £50,932. Capital, Gera; pop. (1905), 46,909.

SAXE-ALTENBURG, Duchy of.

Duke, Ernest, b. 16 Sept., 1826; *suc.* 3 Aug., 1853; *mar.* 28 April, 1853, Princess Agnes of Anhalt-Dessau (died 23 Oct., 1897).

Heir Presumptive, Ernest, b. 31 Aug., 1871.

Area, 512 square miles; population (1905), 206,508, of whom over 200,500 are Protestants; revenue and expenditure (1905-7), £211,307; debt (1905), £44,372; reserve fund, £192,122. Capital, Altenburg; pop. (1905), 38,818.

SAXE-COBURG AND GOTHA, Duchies of.

Duke, Charles Edward (H.R.H. Duke of Albany), born 19 July, 1884; *suc.* 30 July, 1900; assumed government 19 July, 1905.

Heir Presumptive, H.R.H. Prince Johann Leopold, born 2 Aug., 1906.

Minister of State, Herr Richter.

A State consisting of two principal and several smaller detached portions, with an area of 763 English sq. miles, and a population (1905) of 242,432, of whom 237,187 were Protestants. Capital, Gotha (pop. 36,947). Coburg (the other capital) has 22,488 inhabitants. The common state revenue is set down at about £200,000; the combined state and domain revenues at about £500,000. There are 181 miles of railway open (1902), and at Gotha there is an English church.

British Minister Resident, M. de C. Findlay, C.M.G. (see Saxony).

Hon. Attaché, Edward Trench.

Consul-Gen., Baron von Tauchnitz (Leipzig).

SAXE-MEININGEN, Duchy of.

Duke, George II., b. 2 April, 1826; *suc.* 20 Sept., 1866; *mar.* (1) Princess Charlotte of Prussia (d. 30 March, 1855), (2) Princess Feodora of Hohenlohe-Langenburg (d. 10 Feb., 1872), (3),morganatically, Helene, Baroness of Heldburg. *Heir Apparent*, Bernhard, b. 1 April, 1851.

Area, 945 sq. miles; pop. (1905), 268,916; rev. and exp. (1906-8), £436,310; debt (1906), 297,295. Capital, Meiningen; pop. (1905), 15,945.

SAXE-WEIMAR.

Grand Duke, William Ernest, b. 10 June, 1876; *suc.* 5 January, 1901.

Minister of State, Dr. Rothe.

Area, 1,397 sq. miles; pop. (1905), 388,095; rev. and exp. (1908-1910), £531,523. There is a British and American church at the capital. Capital, Weimar; pop. (1905), 31,117.

SAXONY.

King, Frederic Augustus III., born 25 May, 1865; *suc.* 15 Oct., 1904.

Heir Apparent, his son, Crown Prince George, b. 15 Jan., 1893.

Ministers of State, Dr. Rüger, Dr. Otto, Freiherr von Hausen, von Schleier, Dr. Count von Hohenthal and Bergen.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,856 English square miles, with a population (1905) of 4,504,077, among whom 196,814 were Roman Catholics, and 12,378 Jews. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant.

(coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden (pop. 514,473), Leipzig (pop. 502,605), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 4,147 matriculated students in 1906); Freiberg (pop. 30,807), in the mining district; Zwickau (pop. 68,503), and Chemnitz (pop. 244,405), the Manchester of Saxony. Revenue and expenditure, 1904-1905 £17,000,000 Debt (railways), 1904 49,000,000

CAPITAL, Dresden. Pop. (1905), 514,973.
Brit. Minister Resident, M. de C. Findlay,
 C.M.G. £950
Hon. Attaché, Edward Trench.
Consul, H. Palmié.
Vice-Consul—C. W. Palmié.
Leipzig—*Cons.*, Dr. Baron C. C. B. von Tauchnitz.
Vice-Consul, Dr. Curt Otto.
Chemnitz—*Vice-Consul*, F. H. Felkin.

SCHAUMBURG-LIPPE, Principality of.

Reigning Prince, George, b. 10 Oct., 1846; *suc.* 8 May, 1893; *mar.* Princess Marie Anna of Saxe-Altenburg.
Heir Apparent, Adolphus, b. 23 Feb., 1883.
 Area, 130 sq. miles; pop. (1905), 45,000; rev. and exp. (1900-01), £53,535; debt (1900), £25,000.
 Capital, Bückeburg; pop. (1900), 6,000.

SCHWARZBURG-RUDOLSTADT, Principality of.

Prince, Gunther, b. 21 August, 1852; *suc.* 19 Jan., 1890; *mar.* Princess Anna Louise of Schönburg-Waldenburg.
 Area, 360 sq. miles; pop. (1905), 96,835; rev. and exp. (1906-8), £131,745; debt, £218,358.
 Capital, Rudolstadt; pop. (1905), 12,495.

SCHWARZBURG-SONDERSHAUSEN, Principality of.

Prince, Charles Gunther, b. 7 August, 1830; *suc.* 17 July, 1880; *mar.* Princess Marie of Saxe-Altenburg.
 Area, 330 sq. miles; pop. (1905), 85,152; rev. and exp. (1905), £177,079; debt (1907), £273,014.
 Capital, Sondershausen; pop. (1905), 7,383.

WALDECK.

Prince, Frederick, Prince of Waldeck-Pyrmont, Count of Rappolstein, Seigneur of Hohenack and Geroldseck, Wasziegen, &c., born 20 Jan., 1865; *suc.* 12 May, 1893; *mar.*, 9 Aug., 1895, Princess Bathildis of Schaumburg-Lippe, and has issue 4 children.
Heir Apparent, Josias George William, b. 13 May, 1896.
 Area, 438 sq. miles; pop. 59,127; income and exp. £67,872; debt, £83,820. Capital, Arolsen; pop. 3,000.
British Chargé d'Affaires, M. de C. Findlay, C.M.G. (Dresden).

WÜRTTEMBERG.

King, William II., born 25 Feb., 1848; *succeeded* 6 Oct., 1891; *mar.* (1) Princess Marie of Waldeck (died 30 April, 1882); (2) Princess Charlotte of Schaumburg-Lippe.
President of Ministry, Dr. von Weizsäcker.

A Kingdom of South Germany, with an area of 7,534 English square miles, and a population (in 1905) of 2,302,179, of whom 30 per cent. are Roman Catholics. Württemberg furnishes the 13th Corps to the German Army, consisting of 24,121 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pastureland being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

CAPITAL, Stuttgart.

Brit. Minister Resident, F. L. Cartwright, C.V.O. (see Bavaria).
Consul, James Hardwyn Harriss Gastrell.
Vice-Consul, B. Ehrenbacher.

THE FREIEN AND HANSE TOWNS.

The Free Hanse Towns comprise the three cities of Hamburg, Bremen, and Lübeck, each with a small rural territory, retaining their sovereignty and local self-government, like the other States of the Empire, and are situated in the North of Germany, on the Elbe, Weser, and Trave respectively. Hamburg is the great emporium of Germany, and is 65 miles from Cuxhaven, to which port it is connected by railway. Bremen is much smaller, but very prosperous, and only second in commercial importance to Hamburg. It is connected by railway with the outport of Bremerhaven, 35 miles distant, and carries on a very extensive American trade. Lübeck is situate near the Baltic, and is connected with the Elbe by the Elbe-Trave Canal; its commerce is principally with Denmark, Norway, Sweden, and Russia.

HAMBURG, area 160 sq. miles, pop. (1906), 886,798.
Burgomaster, 1907, Dr. Stammaun.

GERMAN COLONIES.

The German Colonies have a total area of 2,658,449 sq. kils. = 1,028,181 sq. miles, and had (1905) a population of about 12,500,000, of whom 12,440 were whites. Of these whites about 3,316 were Germans.

AFRICA.—*Togoland*: Area, 87,200 sq. kils. = 3,659 sq. miles; population about 1,500,000. Capital, Lome. Budget, 1907: Receipts, £103,650; expenditure, £103,650. 1905: Imports, £388,000; exports, £197,850.—*Cameroun*: Area, 495,000 sq. kils. = 191,074 sq. miles; population, 3,500,000. Capital, Duala. Budget for 1907: Receipts, £307,900, of which State aid, £145,200; expenditure, £307,900. 1905: Imports, £673,350; exports, £465,750.—*German South-West Africa*: Area, 835,100 sq. kils. = 322,348 sq. miles; population, 200,000 before the war. Capital, Windhoek. Budget, 1907: Receipts, £3,464,855; expenditure, £5,320,802. State aid, £3,185,000. 1905: Imports, no return; exports, no return.—*German East Africa*: Area, 995,000 sq. kils. = 384,079 sq. miles; population, 7,000,000. Capital, Dar-es-Salaam. Budget, 1907: Receipts, £566,000, of which State aid, £293,000; expenditure, £566,000. 1905: Imports, £882,750; exports, £497,500.—*German Australia*, under which name are now included New Guinea, Kaiser Wilhelm Land, Bismarck Archipelago, Solomon Islands, Marshall Islands, Caroline, Pelew, and Ladrone (Marianne Islands). Total area, 482,481 sq. kils. = 186,249 sq. miles; population, 656,000. Budget, 1907: Receipts, £100,600, including State aid, £74,700; expenditure, £99,350. 1905: Imports, £273,550; exports, £128,500.—*Samoa*: Area, 2,588 sq. kils. = 1,003 sq. miles; population, 33,000. Capital, Apia. Budget, 1907: Receipts, £36,800, of which £9,000 State aid; expenditure, £36,350. 1905: Imports, £169,350; exports, £101,450.—*Kiao-Chao*: Leased for a period of 99 years from China in 1898. Area, 501 sq. kils. = 193 sq. miles; population (in leased territory), 33,000; in sphere of interest, 92,000. Chief seat of government, Tsingtau. Budget, 1907: Receipts, £663,700, of which State aid, £886,700; expenditure, £662,100.

The German garrison in Kiao-Chao consists of 102 officers, 3,401 German non-commissioned officers and men, and one battalion of the East Asiatic Garrison brigade. It was further agreed that within a 50 kils. zone (31 English miles) from all points of the leased territory the Chinese Government should no longer, for the space of 99 years, be entitled to take any steps without previous authorisation from the German Government. Germany also received mining and railway concessions in the province of Shan-Tung, which is called "the sphere of influence," area about 2,750 English sq. miles, population 84,000. The leased territory, as it is called, comprises the bay up to high-water mark, its islands, and the north and south tongues of land at the mouth of the harbour.

Germany's share in the trade with her colonies in 1905 was 33 per cent.

GREECE.

King of the Hellenes, George, second son of the present King of Denmark, born 24 Dec., 1845; elected 30 (18) March, 1863; married 27 Oct., 1867, Olga, eldest daughter of the Grand Duke Constantine of Russia, born 3 Sept., 1851 (issue, 5 sons and a daughter). *Heir Apparent*, Prince Constantinos, Duke of Sparta, born 2 Aug., 1868; married 27 Oct., 1889, to the Princess Sophia, sister of the German Emperor, born 14 June, 1870.

Prime Minister and Minister for War (December, 1905), G. N. Theotokis.

Finance, A. Simopoulou.

Foreign Affairs, A. Skoussis.

Interior, N. Calogeropoulou.

Marine, C. Tricoupis.

Justice, D. Bocotopoulou.

Education and Religion, A. Stephanopoulou.

Envoy Extraordinary and Minister Plenipotentiary in London, D. G. Metaxas, 1 Stanhope Gardens, S.W.

1st Secretary, L. L. Caftan-Zoglu.

Cons.-Gen., T. Stavridis, 40 Old Broad St., E.C.

Consul and Secretary, J. M. Joannides.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 40'–40° 10' N. and long. 18° 20'–25° 50' E. comprising an area of 24,977 square miles (inclusive of the territory lost by the rectification of the Thessalian frontier after the war with Turkey in 1897), with a population (in 1896) of 2,433,806. The country is composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into twenty-six provinces, called Nomarchies. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. Its exports consist of currants, figs, olive oil, wine, cognac, tobacco, hides, lead, magnesium, emery, marble, and sponges.

Defence (for Army, see p. 637). The navy consisted of 3 ironclads, 2 armoured vessels, 1 cruiser, 10 gunboats, 4 steam corvettes, 8

schooners, 7 torpedo boats, 3 transports, and 7 various vessels, mostly obsolete, in July, 1903. Education (see p. 641).

Communications.—There are 830 miles of railway open for traffic. There is a ship canal cutting through the Isthmus of Corinth, but it is rarely used by foreign vessels. Telegraphs, 4,951 miles. The mercantile marine consists of 1,035 sailing vessels above 30 tons capacity, and 206 steamers (198,681 tons).

Finance.—On December 31, 1905, the public Gold Debt of Greece amounted to £29,037,580, involving an annual charge of £770,840, and the Interior Paper Debt to 171,629,436 drachmæ, with a charge of 7,593,535 drachmæ. In the Gold Debt is included the first portion (£880,000) of a 4 per cent. loan contracted in March, 1902, for the construction of a railway from the Piræus to Demerli in Thessaly. The second portion (£870,000) was issued in June, 1904, and a further instalment (£230,000) for the extension of the railway to Larissa was issued in Jan. 1905. The service of the Debt was entrusted (1898) to an International Commission, sitting at Athens, consisting of representatives of the Governments of Great Britain, France, Germany, Russia, Austria-Hungary, and Italy. To them are assigned the revenues from (1) the State monopolies (salt, matches, petroleum, playing cards, cigarette paper, and emery), (2) the tobacco tax, and (3) the stamp duties, together with the revenue from the Piræus Custom-house as a supplementary guarantee. The gross receipts from the first three sources mentioned are estimated at 28,900,000 drachmæ, out of which a minimum interest of 43 per cent. of the original interest on the Monopoly Loan (1887), and 32 per cent. of the original interest on all other loans contracted previous to 1898, as well as the full interest of 2½ per cent. on the loan of 1898, is guaranteed. If the receipts exceed 28,900,000 drachmæ, the surplus, less 18 per cent. for expenses of administration, is divided between the Government and the bond-holders, in the following proportions: 30 per cent. for increase of interest, 30 per cent. for increase of sinking fund, and 40 per cent. to the Hellenic Government. Profit on exchange is distributed in the same proportions. If the receipts fall short of the estimate, the revenue from the custom-houses at Laurium, Patras, Volo, and Corfu are successively assigned to make good the deficit.

The trade of Greece is hampered by a forced circulation of about 150,000,000 drachmæ (nominally equal to the French franc) in a depreciated paper currency. The agio on gold has been steadily declining during the last few years, and the average exchange constantly improving.

GUATEMALA, REPUBLIC OF.

President, Manuel Estrada Cabrera, elected 2 Oct., 1898, and re-elected July, 1904, to serve from April, 1905, to April, 1911.

Min. of Foreign Affairs, Juan Barrios.

Consul-Gen., Señor Machado, 31 Westminster Palace Gardens, Victoria Street, S.W.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 40' to 17° 40', and in W. Long. from 88° 15' to 92° 30', and comprises an area of 46,774 square miles, and a population in 1905 of 1,800,000. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. The Central Railway connects the port of San José (Pacific) with the capital. Work on the Northern Railway, which is to connect Port Barrios (Atlantic) with the capital, is being actively carried on, and is to be completed by contract in 1907. The total mileage in the Republic open for traffic in 1905 was 415 miles, with 65 miles under construction. There were 3,790 kilometres of telegraph working in 1905. The chief ports are San José de Guatemala, Manzanillo on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, valued at £1,459,469 in 1905; the other articles are sugar, rubber, hides, bananas, and timber.

HAYTI, REPUBLIC OF.

President, General Nord Alexis, born 1821,
assumed office as from 15 May, 1902, for
seven years.....£4,800
Minister of Foreign Affairs & Public Instruction,
P. Sannon.
War and Navy, General Cyriaque Celestin.
Interior and Police (ad int.), F. Marcelin.
Finance and Commerce, F. Marcelin.
Justice and Worship, E. Laleau.
Public Works, Numa Laraque.

Minister in London, Dr. Viard, 75 Artillery
Mansions, Victoria Street, S.W.
Consul, Maurice Erdmann, 32 Fenchurch Street.

The Republic of Hayti is the western or French
portion of the island of San Domingo, which,
next to Cuba, is the largest of the West India
Islands. It contains 29,830 square miles, of which
9,242 square miles belong to Hayti. It lies in N.
lat. between 17° 37'—20°, and in W. longitude
between 68° 20'—74° 28'; and belongs to the group
of the Greater Antilles. The portion belonging
to Hayti contains a population of 1,500,000 (1907).
The mountains are richly and heavily timbered,
and susceptible of cultivation nearly to their
summits; it is probably the most fertile spot in
the West Indies, whilst its harbours, especially
Port-au-Prince, offer considerable facilities to
foreign trade. The principal productions are
coffee, logwood, cocoa, cotton, hides, sugar,
honey, gums, these being the chief exports. It
is said to contain mines of gold, silver, copper,
tin, and iron. Its commercial prosperity has
been almost annihilated by repeated revolutions.
The principal foreign trade is carried on with
the United States, Great and Greater Britain,
France, and Germany.

HONDURAS, REPUBLIC OF.

Provisional President, General Miguel R. Davila,
assumed office 18 April, 1907.
Consul-General in London, M. J. Kelly, 8 Idol
Lane, E.C.

The Middle State of Central America, stretch-
ing in N. lat. between 13° 10' and 16°, and W.
long. between 83° 10' and 88° 40'; containing
42,658 English square miles, including a small
portion of the Mosquito Territory, and the Bay
Islands in the Gulf of Honduras. The popula-
tion in 1902 was 774,000, mostly of aboriginal
blood. It has a coast-line of nearly 400 miles on
the Caribbean Sea, chief ports, Truxillo, Puerto
Cortez, Omoa, Roatan, and La Ceiba; but only
about 40 miles on the Gulf of Fonseca, on the
Pacific side, chief port, Amapala. The country is
mountainous, being traversed by the Cordilleras.
The products are mahogany, fruit, cattle, cotton,
sugar, tobacco, coffee, indigo, sarsaparilla, hides
and skins, india-rubber, cedar, fustic, rose, and
Lima wool. Its mineral wealth is great. The
only railway (42-inch gauge) runs from Puerto
Cortez to Pimienta, 60 miles, which it is intended
to develop into an inter-oceanic railway, connect-
ing the Atlantic with the Pacific.

ICELAND (Danish Dependency).

Minister for Iceland (Resident), H. Hafstein,
appd. 2 Feb., 1904.

Iceland is a large, volcanic, and treeless island
in the North Atlantic Ocean, extending from 63°
23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W.
long., with an estimated area of 40,497 square
miles, or greater than that of Ireland. The
population was estimated in 1898 at 76,237.

The present constitution was granted in 1904,
and the assembly (Al-thing) is more or less con-
trolled by the Government at Copenhagen. The
principal products of the island are sheep, cattle,
ponies, and fish, and the imports consist of almost
all the necessaries of life, the chief items being
grain and meal, sugar, coffee, salt, cotton goods,
tobacco, spirits, hardware, and timber. Iceland
is now in direct telegraphic communication
with this country.

Consul-General, Comm. L. Allatini.

Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands. It is situate between lat. $36^{\circ} 38' 30''$ — $46^{\circ} 40' 30''$ N. and long. $6^{\circ} 30'$ — $18^{\circ} 30'$ E., and comprises a total area of 110,623 square miles (91,277 mainland, 19,346 islands), with a population (10 Feb., 1901) of 32,475,253. Formerly it was composed of the various States of Sardinia, the Two Sicilies, the Pontifical States, the Lombardo-Venetian provinces of the Austrian Empire, the Grand Duchy of Tuscany, and the Duchies of Parma and Modena. In 1870 the unity of the country was finally effected, and Rome became again the capital of Italy, which is now divided for administration into 69 provinces. The coast-line of the mainland is estimated at 1,999 miles; of Sicily, Sardinia, and Elba at 1,389 miles; of the minor islands at 557 miles; in all 3,945 miles, having several large bays and gulfs. The peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. The principal towns are Naples, Rome (over 500,000), Milan (over 450,000), Turin, Palermo (over 300,000), Genoa, Florence (over 200,000), and Bologna, Venice, Messina, Catania, and Leghorn (over 100,000 inhabitants). Its wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of silk forms an important agricultural industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly, and 45,268 tons were produced in 1903. The mineral produce in 1903 included iron ore (£216,396), zinc ore

(£685,748), and crude sulphur (£1,754,097). The railway system is making rapid progress throughout the kingdom; in 1901 there were 9,943 miles open for traffic, and 27,820 miles of telegraph line. The commercial marine (1902) consisted of 5,690 vessels (488 steamers), of 1,018,807 tons. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienne earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots &c., for dyeing and tanning, artistic works, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others. *Defence* (for Army, see p. 637). The navy in 1904 consisted of 14 first-class battle-ships (and 5 building), 4 third-class ditto, 5 armoured cruisers (and 1 building), 18 protected and 1 unprotected cruisers, 12 torpedo vessels, 13 destroyers (and 2 building), and torpedo boats: divisional 7 (and 8 building), and class 94. Spezia, the chief naval and military port of the kingdom is securely fortified. *Education* (see p. 642).

Foreign merchants vessels of 13,710,085 total tonnage entered and of 13,652,811 tons cleared at Italian ports in 1903. Italian vessels of 19,814,202 tons entered and of 19,749,749 tons cleared in 1903.

COLONIES.—Italy possesses the colony of Eritrea, a protectorate over part of the Somali coast, extending from Cape Guardafui to the Juba river, on which they have a station; an annual rent is paid to the Sultan of Zanzibar for the Benadir ports leased by him to Italy. The commencement of Italian influence was made in 1880, when the district of Assab was transferred from a trading company to the Government. The tract of land now known as ERITREA ("Red Sea") consists of a triangular portion of barren and sandy lowland between 12° and 18° N., containing in all a coast-line along the Red Sea of about 700 miles, with a total area of 85,000 to 90,000 square miles, and a population of about 400,000. The capital is Massowa, where there is a good harbour, and the principal product, salt, of great value as being the monetary currency

of Southern Abyssinia. In 1889 a protectorate was declared over the neighbouring kingdom of Abyssinia, which was repudiated in 1893 by the Negus, Menelek II.; after a campaign which ended in disaster, the Italian Government concluded a treaty (1896) withdrawing the protectorate from all parts, except from the portion of Somaliland above referred to. The total area is about 130,000 square miles, and the population, about 300,000. Itala, a newly formed settlement, being the seat of government.

ROME—Sovereign Pontiff, Pius X., born 2 June, 1835; elected 4 August, 1903.
Secretary of State to His Holiness, The Cardinal Merry del Val, appointed 1903.

" at Middlesbrough, Wayman Dixon.

This ancient and extensive Empire, now in alliance with the United Kingdom, consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Hondo (the name of the Empire being Nihon), Shikoku, Kiu-shu, and Hokkaido or Yé Zo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yé Zo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire comprises an area of 162,655 square miles, with a population of 47,215,630, according to the last census, there being 23,834,398 men and 23,381,237 women. In addition, the Russo-Japanese war gave to Japan the southern portion of the island of Saghalien, called by the Japanese, Karafuto.

Japan is said to possess a written history extending over 2,500 years, and its sovereigns to have formed an unbroken dynasty since 660 B.C.; the present Emperor being the 121st of his race; but the authentic history begins about 400 A.D. Within the last few years Japan has made unparalleled progress in civilisation and the adoption of Western manners and customs. The feudal system, under which the country was governed by numerous lords, has been abolished, and the Mikado is now absolutely the Sovereign of the State, which has since the revolution of 1868 shown a most remarkable power of adopting Western knowledge and experience. A wise and enlightened ruler is at the head of the nation, and the first national Parliament, the outcome of the constitution granted to the people by the Emperor, promulgated 11 Feb., 1889, met for the first time in November, 1890. The feudal lords, who have lost all their powers of government, still retain their high social positions, and a new aristocracy with these as its basis has been formed; it consists of five grades, corresponding to the European titles of Prince (not Imperial), Marquis, Count, Viscount, and Baron. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent and disastrous earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, and sulphur abound, whilst agate, cornelian, and rock crystal are also found. Gold was discovered in 1899 in considerable quantities in the northern island, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied. Fruit, for the most part of inferior quality, is abundant, and English fruits, such as cherries and gooseberries, are being produced in increasing quantities in Yezo; the quality is poor, but improving.

Commerce and Industry.—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, japanned ware, porcelain, and bronze, and shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, woollens, wool, drugs, rails, locomotives, and machinery from Europe and the U.S.A. Sugar is largely imported from Java, Philippines, Germany, Austria, Hong Kong, and Formosa; indigo from Germany, British India, and Java; kerosene oil from U.S. and Russia; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India,

Korea, Siam, and China. The chief exports are silk, cotton yarns, rice, tea, fish, copper, matches, coal, camphor, straw platts, and marine products.

Communications.—There were 3,252 miles of private railway and 1,531 miles of Government lines open in 1906; the Tōkaidō, Nippon, Kiushū, Sanyō, and other important lines have been purchased since that date as a result of the Government's scheme of nationalisation, and the work of duplicating Tōkaidō (East Coast route) is progressing. A Japanese line has also been built in Korea from Fusan to Seoul. The gross receipts for passenger and goods traffic on all the lines in Japan during 1904 was £5,461,000. The mercantile marine of registered ships above 20 tons consisted (1906) of 1,390 steamers of 329,740 gross tons and 3,696 sailing-vessels of 329,806 gross tons. Of the 10,653 vessels (tonnage 18,956,596) that entered Japanese ports (1906) 2,086 were British (tonnage, 5,766,670).

Defence (for Army, see p. 637). The Navy as at 31 March, 1907, is given on p. 204; it was manned by about 34,000 officers and men.

Finance.—From Oct. 1, 1897, the currency was placed upon a gold basis, the unit being the gold yen of 8,333 gr. containing 75 grammes of fine gold; but there is no smaller gold coin than the 5-yen piece. The local exchange value of the yen is about 2s. 0½d.

Education (see p. 642).

Under treaties with Great Britain and several other Powers, Yedo (Tōkiō), Kanagawa (Yokohama), Hiogo (Kobe), and Ōsaka (on the Inland Sea), Nagasaki in Kiushū, Hakodate in the Hokkaido (Yezo), Niigata, and 23 additional ports are open to trade. The following table shows the distribution of the foreign trade in 1904 among the countries principally concerned:—

	Exports.	Imports.	Total.
British Empire	£6,053,000	£15,666,000	£22,519,000
United States	10,235,000	5,932,000	16,268,000
China	6,940,000	5,595,000	12,535,000
France	3,708,000	341,000	4,049,000
Germany	418,000	2,930,000	3,348,000

The principal articles exported to Japan from this country in 1906 were iron, wrought and unwrought (£1,770,345), machinery and mill work (£1,041,637), locomotives, wool and woollens (£1,595,986), ships and boats (£2,800,403), and cotton manufactures (£1,687,529). Japan sent to the U.K. silk manufactures (£1,092,853), unwrought copper (£676,112), and straw plattings (£227,693).

	1906-7.	1907-8.
Revenue (Budget)	£40,716,000*	43,212,000*
Expenditure (Budget) ...	36,897,000*	42,087,000*
Total debt	191,130,000	226,393,000
Imports (1905 & 1906) ...	49,872,000	42,751,000
Exports (do.)	32,823,000	43,258,000
Imports from U.K. (do.)	11,778,000	10,342,000
Exports to U.K. (do.) ..	1,331,000	2,302,000

Formosa.—The island of Formosa was ceded by China to Japan (2 June, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with about 3,000,000 inhabitants (1905).

KOREA.

Emperor, Chōk, born 1874, acceded 26 July, 1907. Japanese Resident Gen., Prince Hirofumi Ito. Controller General of Finance and Chief Commissioner of Customs, Baron Mogata.

* Excludes extra-ordinary expenses.

Korea, the bone of contention in the war between Japan and China (1894-5), and again in the Russo-Japanese war of 1904-5, is an Empire consisting of a peninsula lying to the south-east of Manchuria, from which it is divided by the Yalu and Tumen Rivers. The country is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of some 71,000 square miles. Population estimated at about 10,000,000; there are about 100,000 Japanese in the country. Since the conclusion of the Russo-Japanese War in 1905 the administrative control of Korea has gradually passed into Japanese hands. In November, 1905, a Convention was concluded with Japan, under which the latter assumed a protectorate over the country; and the powers thus obtained were strengthened by the signature on July 31, 1907, of a second Convention, under which all administrative measures and all high official appointments became subject to the approval of the Japanese Resident General. The Koreans are for the most part tall, robust, and good-looking; they belong to the Mongolian stock, the language of the country being of Turanian origin, with a large admixture of Chinese words, Confucianism and a corrupt form of Buddhism, mingled with spirit and ancestor worship, may be said to be the religion of the country; there are, however, a considerable number of Christian converts. The soil is fertile, but mountainous except in the river valleys. About 4,500,000 acres are under cultivation, the staple agricultural products being rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. The greater proportion of the trade of Korea is in Japanese hands, but British imports, direct and indirect, form some 25 per cent. of the total.

Finances.—The finances of the country, which have hitherto been in a state of great disorder, are now in the hands of a Japanese Controller-General. A reform has been effected in the currency, the debased nickel coins having been called in and replaced by a new currency after the Japanese model, consisting of copper, nickel, and silver coins on a gold basis. Exhaustive investigations into the system of taxation are in progress, which are expected to result in a greatly increased revenue without adding to the burden of the people.

Commerce.—About 80 per cent. of the sea-borne trade is carried in Japanese bottoms, the number of Japanese vessels entered in 1906 having been 7,488, with a tonnage of 2,271,302, out of a total of 10,274, with a tonnage of 2,769,509. In 1906 the trade of Chemulpo amounted to £1,581,627, and that of the whole of Korea to £3,842,628. Considerable progress is being made in the direction of the proper lighting of the coast. There is an agency of the Hong Kong and Shanghai Bank at Chemulpo, and branches of

several Japanese banks both at Chemulpo and Seoul.

Communications.—The postal, telegraph, and telephone systems of Korea were placed under Japanese administration by an agreement signed in 1905, and the railways, two of which were Japanese companies and the third a Japanese military line, were transferred to the Japanese Government simultaneously with the nationalisation of the Japanese railways in 1906. The following lines of railway are open:—The Seoul-Chemulpo line, length 26 miles 7 chains; the Seoul-Fusan line, length 286 miles; the Seoul-Wiju line, length 310 miles. This line, though open to traffic, is not completed; it was built as a military line, and is in process of reconstruction. The two latter lines, when connected with the Siberian system, will complete the great highway connecting the Atlantic and Pacific Oceans, across two continents.

	1905.	1906.
Customs Revenue	£234,103	£223,586
Imports	3,262,541	3,013,682
Exports (excl. specie) ...	704,814	828,946

days (*via* Vancouver, 23 days; *via* Siberia, 21 days).

JERUSALEM—PALESTINE.

Turkish Governor, Ekrem Bey, appointed 4 Dec., 1906.

Palestine, which occupies so prominent a place in the history of human kind, and in the affections of the Christian world, is a country capable of considerable development, and, although her ancient glories are departed, still produces wine and olives, corn and the most varied fruits. Its population is not far short of 700,000, of whom 80,000 to 100,000 are Jews. In and about Jerusalem, the Jews number from 60,000 to 65,000.

Geographically, Palestine consists of a maritime lowland, the mountain region of Judah, which forms its backbone, the remarkable depression through which the Jordan wends its course towards the Dead Sea, and the elevated region lying to the east of the Jordan. It is barren only during the dry season, when the grasses are dried up, and the herdsmen retire with their flocks of sheep and goats to the loftier mountains, but the alluvial lowland to the south of Mount Carmel is as fruitful as ever, and it only needs an honest and vigorous administration to restore Palestine to its former prosperous condition. The entire area is computed to be about 11,000 square miles.

Palestine comprises the independent mutessariflik of Jerusalem (el Quds), together with the mutessarifliks of Acre and Nablus, the two last named belonging, for administrative purposes, to the vilayet (province) of Beirut. Since March, 1906, however, the kaza (district) of Nazareth, in the mutessariflik of Acre, has been included in the mutessariflik of Jerusalem. The stream Anja, which enters the sea a few miles north of Jaffa, forms the boundary between the independent district of Jerusalem and the above-named vilayet, the country to the east of the Jordan and the Dead Sea being subordinate to the vilayet of Damascus. Arabic is the language commonly spoken, and 80 per cent. of the population are Mohammedans; in addition to Mohammedans and Jews there are many Orthodox Greeks and foreigners of all denominations. A railway was constructed connecting Jaffa (Joppa) and Jerusalem in 1892.

The principal ports of Palestine are Acre, Haifa, Jaffa, and Gaza, and their exports amount annually to over £600,000, consisting principally of sesame, oranges, fruits, barley, olive oil, maize, and articles of Christian veneration, these latter weighing 2,700 cwt. The imports are estimated at £650,000 annually. The U.K. and France take the lead in this commerce.

Jerusalem—Consul, E. C. Blech £700
Jaffa—Vice-Consul, J. Falanga (acting) 300
Gaza—Cons. Agent, A. A. Knesevich *unp.*

Distant by overland route, about 2,300 miles, by sea 3,700 miles; transit, 8 to 10 days.

LIBERIA.

President, A. Barclay, born 1854, re-elected May, 1907, until Jan., 1911.

Vice-President, J. J. Dossen.

Secretary of State, F. E. R. Johnson.

Treasurer, D. E. Howard.

Attorney-General, C. D. B. King.

Postmaster-General, S. T. Prout.

Chief Inspector of Customs and Financial

Adviser, William J. Lamont £1,000
Asst. do., J. M. Hamilton.

Consul-General and Chargé d'Affaires in London, H. Hayman, 3 Coleman Street, E.C.
Acting Sec. of Legation, H. L. Hayman.
Consul, Sigismund Sinauer De Stein.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50', a distance of 250 miles from the seaboard. It was founded by the American Colonization Society

in 1820, and has been recognised by the United States and the European powers since 1847 as an independent State. The population numbers nearly 1,500,000. The principal exports are coffee, cocoa, palm-kernels, palm-oil, ivory, prassava, rubber, and camwood. The chief imports are cottons, haberdashery, salt, rice, provisions, arms and ammunition, tobacco, hardware, glass and earthenware, rum, gin, timber, and beads. The executive power is vested in a President elected for two years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for four years, and the House of Representatives with fourteen members elected for two years. There is no regular army. Foreigners are only allowed to trade at the ports of entry and frontiers, of which there are thirteen along the 350 miles of coast, viz.: Manna, Robertsport, Monrovia, Marshall, Grand Bassa, River Cess, Greensville, Nanna Kroo, Niffo, Harper, Half Cavalla, Jenne, and Webo. In 1906, 358 vessels (710,762 net tons) called at Monrovia.

	1904.	1905.
Revenue	£60,229	£59,330
Expenditure	62,840	59,760
Internal bonded Debt	10,000	10,000
External Debt	95,000	95,000
Imports	106,912	134,213
Exports	110,105	98,762

CHIEF TOWN, Monrovia. Population, 6,000.

British Consul, Capt. C. B. Wallis £800
Vice-Cons., William A. Ring.

Monrovia, 3,650 miles distant; transit, English steamer *via* Liverpool, 14 days; German steamer *via* Southampton, 11 days.

LIECHTENSTEIN.

Prince, Johann II., b 5 Oct., 1840; suc. 12 Nov., 1858.

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland; area 59.6 square miles, pop. (1906) 9,650. The main industries are agriculture (chief products being corn, wine and turf), textiles and embroidery. Revenue (1906), 1,004,331 K.; exp. 872,874 K.; no debt. CAPITAL, Vaduz.

LUXEMBURG.

Grand Duke, William Alexander, b. 22 April, 1852; suc. 19 Nov., 1905; mar. 21 June, 1893, Princess Maria Anna of Braganza.
Minister of State, M. Eyschen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23rd, 1890, it passed to the Duke of Nassau. The area is 999 square miles; the population (1905) 246,455, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1906 was £625,436, expenditure £606,000; debt (Jan. 1, 1906) £432,342. There are 342 miles of railway. The army numbers about 325 men. The capital, Luxemburg (population 30,000), is a dismantled fortress.

British Envoy, Sir H. Howard, K.C.M.G., C.B. (The Hague).

MADAGASCAR.

(French Possession—See pp. 588-9.)

MEXICO, FEDERAL REPUBLIC OF.

President of the Republic, Porfirio Diaz, born 15 Sept., 1830, acceded 1 Dec., 1884 (re-elected 7th time 1904 until 1910).

Vice-President, Ramon Corral (1 Dec., 1904).

Minister of Foreign Affairs, Don Ignacio Mariscal.

Minister in England, Miguel Covarrubias, 87 Queen's Gate, S.W.

1st Secretary, Balbino Dávalos.

2nd Secretary, Luis S. Carmona.

Attaché, M. Martinez del Campo.

Financial Agent, Luis Camacho, 85 Finsbury.

Pavement House, E.C.

Consul, Adolfo Bulle, Broad St. House, E.C.

Consul-Gen.—Liverpool, Emilio Alemán.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, situated between 15°—32' N. lat. and 87°—117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 767,005 square miles, with an estimated population of (1900) 13,545,462, of whom "only about 3,500,000 are taxable." The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 13,995 miles of railway open on Sept. 15, 1907, and 35,980 miles of telegraph. The railways have in a large measure been built by American and English companies. The "Mexican Central" joins El Paso (Texas) with the city of Mexico, by which passengers can travel in five days from New York without change of carriage. The National Railway *viâ* Laredo takes 4½ days to New York, and there is a third route *viâ* Eagle Pass (International Railway). The principal crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dye-stuffs, sugar and drugs ranking next in importance.

Defence (for Army, see p. 637). The Navy is limited to 7 small vessels, of about 200 to 300 tons, used for the prevention of smuggling.

Education (see p. 642).

Finance, &c.—The following figures have been

officially supplied, the value of the Mexican dollar being taken at 24d.:—

	1906-7.	1907-8.
Estimated revenue ...	\$90,073,500	\$98,825,000
Estimated expenditure	89,897,398	92,966,595
	1905-6.	1906-7.
Exports	\$271,138,809	\$248,018,010
Imports	220,651,074	233,363,388
Imports from U.K.	20,344,644	23,592,920
Exports to U.K.	41,672,873	31,874,020
	1904-5.	1905-6.
Internal debt	£31,323,735	£31,033,897
External debt	12,955,000	13,089,210
Floating Debt	90,272	86,049

MONACO.

Sovereign Prince, Albert, born 13 Nov., 1848; suc.

10 Sept., 1889; mar. 1869, (1) Lady Mary

Douglas-Hamilton, daughter of 11th Duke of

Hamilton; (2) Oct., 1889, the Duchesse de

Richelieu, born 10 February, 1858.

Heir, Prince Louis, born 12 July, 1870.

Governor-General, M. Roger.

Secretary-General, Count de Melville.

Consul-General in London, Theodore Lumley, 37

Conduit Street, Bond Street, W.

Vice-Consul, Paul Crémieu-Javal, J.P., 43 Hill

Street, Berkeley Square, W.

A miniature Principality on the Mediterranean,

between France and Italy, consisting of the old

town of Monaco, La Condamine, and Monte Carlo,

where is the gambling establishment, and com-

prising a narrow strip of country extending from

the Monaco Cemetery on the west to St. Roman

on the east; it is about 3 miles long and 1½ miles

broad, with (1904) 16,000 inhabitants, and a yearly

average of over 1,250,000 visitors. The whole

available ground is built over, so that there is

no cultivation. There is an army of 126 men.

British Consul, Alex. McMillan (Nice).

British Vice-Consul, J. W. Keogh (Monaco).

English Chaplain (1895), Rev. F. Stewart.

MONTENEGRO.

Prince, Nicholas, born 7 (20) October, 1841; suc. his uncle, Prince Danilo, 14 Aug., 1860; m. 1860, Milena, daughter of Voyerod Peter Vukotich, b. 4 May, 1847; issue 3 sons, 6 daughters.

Heir Apparent, Danilo Alexander, born 29 June, 1871; m. 1899, Princess Jutta of Mecklenburg-Strelitz.

Pres. of State Council and Minister for Foreign Affairs, Dr. Tomjanovic.

A small Principality, which has always claimed to be independent, and recognised to be so by the Treaty of Berlin. It has an area of 3,486 square miles, and a population diminished by emigration to about 225,000, of whom 13,000 are Mussulmans, 14,000 Roman Catholics, and the remainder Orthodox Slavs. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, cattle, castradina (smoked mutton), hides, and tobacco, which has been created a monopoly, and conceded for 25 years to an Italian company. The only manufactures are coarse woollens. Agriculture is the principal occupation. The imports are estimated at £150,000 from Austria, £58,000 from Turkey, £2,500 from United Kingdom, and £5,000 from Italy (1905).

A representative parliament was granted 5 Nov., 1905.

For military purposes the Principality is divided into 11 brigade districts, furnishing 56 battalions (11 infantry and 8 artillery), or 40,000 men; one battalion is always in barracks at Cetinje; a battalion is also maintained and instructed at Podgoritz. The two ports, Antivari and Dulcigno, have about 50 coasting vessels.

	1905	1906.
Revenue (estimated)	£124,000	£116,000
Public Debt „	70,000	70,000
Total Imports „	194,000	240,000
Total Exports „	71,000	81,000

CAPITAL, Cetinje. Population (1907) 5,000 (exclusive of permanent garrison of 600 men). British *Chargé d'Affaires*, Charles Louis Des Graz.

Distance about 1,100 miles; transit, average 5 days.

MOROCCO, EMPIRE OF.

Sultan, Muley Abdul Aziz, b. 1879, s. June, 1894. Grand Vizier, Sid Enfadl Gharuit.

Minister of Foreign Affairs, Sid Abdul Karim Ben Sliuan.

Minister of War, Sid Mohammed Gabbas.

Commissioner for Foreign Affairs at Tangier, Sid Hadji Mohammed Torres.

Instructor-in-Chief of Army, Kaid Sir Harry Maclean, K.C.M.G.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°–36° N. lat. and 1°–11° 40' W. long. The Empire, which is an absolute monarchy, consists of the Kingdom of Fez and Morocco, to the north of the Atlas, and the territories of Sûs, Drâ, Wadi Tadlet, Tuat, and others to the south, which are again subdivided into 33 districts, each under the superintendence of a "Kaid"; but the semi-independent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the Sultan. Morocco contains about 314,000 square miles, of which the "Tell," or fertile regions of the mountains and coast, contain 76,000, the steppe-land 26,000, and the Sahara 217,000, with a population

variously estimated at from 4,500,000 to 8,000,000. The Jews number about 300,000, chiefly in the cities. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto, and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. The chief ports are Tetuan, Tangier (where the Representatives of fourteen nations reside), El Araish (Laraiche), Rabat, Casa Blanca (or Dar-al-baida), Mazagan, Safi, and Mogador. There are no railways, and telegraphic communication from Tangier is by submarine cable of Eastern Telegraph Company to Gibraltar, by Spanish Government telegraph to Tâfira, and by French cable to Oran (Algeria). The principal exports (1906) were hides (£123,988), wool (£272,045), eggs (£108,198), skins (£507,280), almonds (£59,280), live cattle (£180,811); and the imports are cottons (£818,600), flour, &c. (£317,975), sugar (£449,922), tea (£209,097), linen, muslin and woollen goods, coffee, candles, cloth, silk, iron, brass, hardware, &c. The army consists of between 25,000 and 20,000, one-half of whom are negroes, Sultan's bodyguard, and a sort of militia, of various arms, amounting to 80,000 men. An English newspaper, *Al Moghib-el-Aksa*, a French paper, *La Dépêche Marocaine*, and three newspapers in Spanish are published at Tangier. There are three capitals, of which Fez, population 120,000, is the seat of government, and Morocco (Marrakesh), 50,000, is the capital of the Moorish Empire; and Mequinez, 56,000.

	1905.	1906.
Imports	£2,741,574	£2,976,900
Exports	1,690,323	1,756,109

NETHERLANDS (OR HOLLAND, KINGDOM OF).

Queen, Wilhelmina Helena Paulina Maria, born 31st August, 1880, succeeded her late father, King William III., 23 Nov., 1890; mar. 7 Feb., 1901, H.R.H. Prince Henry, Prince of the Netherlands and Duke of Mecklenburg.

Queen-Mother, Emma, Princess of Waldeck and Pyrmont, born 2 August, 1858; married the late King, 7 Jan., 1879, who died 23 November, 1890; acted as Regent 1890-1898.

Minister of Interior, Dr. P. Rink.
Foreign Affairs, Jhr. Dr. D. A. W. van Tets van Goudriaan.

Finance, Dr. Th. H. de Meester.

Colonies, Dr. D. Fock.

Justice, Dr. E. E. van Raalte.

War, Chevalier W. E. van Rappard.

Marine, J. Wentholt.

Waterways, Dr. J. Kraus.

Agriculture, Commerce, and Industry, Dr. J. D. Veegens.

Minister in London, Baron Gericke van Herwijnen, 8 Grosvenor Gardens, S.W.

Councillor of Legation, J. H. van Royen, 6 Upper Belgrave Street, S.W.

Chancellor, H. N. Brouwer.

Consul-Gen., H. S. J. Maas, 12 Blomfield St., E.C.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'—53° 34' N. and long. 3° 22'—7° 14' E., consisting of 11 provinces, and containing a total area of 12,582 square miles, with a population, on Jan. 31, 1905, of 5,591,702. The majority, about three-fifths, belong to the several Reformed Churches; and the remainder to Roman Catholics, with a small number of Jews, mainly in large towns such as Amsterdam, where there are about 70,000. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seeds, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, chemical and pharmaceutical products, sugar, printing, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, oils, beer, "geneva" and other liquors. Diamond-cutting employs numerous hands in Amsterdam.

Communications. There are 3,112 kilometres railway open (37 Dec., 1900), and 33,340 kilometres of telegraph. The mercantile marine, on the 31st Dec., 1905, consisted of 277 steamers, tonnage 1,009,746 cubic metres, and 479 sailing vessels (370,524 cubic metres), employing 10,198 men on 31 Dec., 1905.

Defence (for Army, see p. 637). The royal navy consisted, on July 1, 1906, of 122 vessels (8 of them ironclads, 7 protected cruisers, 18 coast and harbour defence vessels, 43 torpedo-boats for the colonies), 35 special service vessels and for special service in the colonies).

Education (see p. 642).

Trade and Commerce.—Holland figures largely in the trade returns of this country, a quarter of the value of which is represented by agricul-

tural produce, but much of the merchandise sent to Holland was for distribution in Germany and other parts. The following are the Board of Trade figures for imports from the United Kingdom in the year 1906:

Casotcheou	£119,866	Leather	£195,620
Chemical products	220,498	Machinery	623,562
Coal, coke, & fuel	1,083,000	Metals	2,257,794
Corn and grain	154,060	Oil	260,919
Cotton yarn	1,670,826	Oilcloth	138,268
Cotton manufs.	1,061,727	Ships	441,258
Cycles	122,476	Wool	214,814
Grease, &c.	267,286	Woollen manufs.	457,793
Horses	188,203	Woollen yarn	129,882

DEPENDENCIES.—The Dutch possessions in the EAST INDIES are very considerable, comprising the whole of the SUNDA ISLANDS, with the exception of a small portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA, with an area of 738,000 square miles, and a population (1905) of 67,815,400, of whom as many as 30,098,000 live in the islands of Java and Madura. JAVA and MADURA (customs receipts, 1907, £1,701,584) produce a sufficient supply of food for a dense population, besides furnishing sugar, tobacco, tea, coffee and other products for exportation to Europe. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Dutch Resident. There is a colonial army of 1,396 officers and 36,927 men. The colonial revenue for 1907 was estimated at £13,947,813, and was largely derived from the sale of coffee, salt, bark, and tin; whilst the estimated expenditure was £14,064,439. The exports, in addition to the above, include also tobacco, indigo, gums, and spices, and amounted in 1905, for Java, Madura, and the other outlying islands, to £24,702,273, while the imports for the same year amounted to £17,228,773.

In South America the colony of SURINAM, or Dutch Guiana (imports, 1906, £522,765; exports, £395,797), embraces 46,072 square miles and contains 81,273 inhabitants; and in the West Indies, CURAÇOA (imports, £262,715; exports, £41,002; population 30,401) and five other small islands belong to Holland, having an area of 436 square miles, with a population of 22,975.

	1905.	1906.
Exports to U.K.	£1,078,929	£898,121

NICARAGUA, REPUBLIC OF.

President, José Santos Zelaya, born 1852, first elected June, 1893; re-elected 1906 for 4 years.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 51,660 English square miles, including a large portion of the Mosquito Territory, and a population of about 400,000, of whom about three-quarters are mixed blood and the rest Indians, besides the Mosquitos, who are mostly in a savage state. There are 156 miles of railway open, and about 240 miles under construction, with 1,591 miles of telegraph, connected with the Pacific cable from Mexico to Peru. A ship canal to connect the Pacific with the Atlantic was commenced in Oct., 1890, but the company collapsed in 1899; in 1899 a new company obtained the concession, but failed to comply with the terms obtained, and the concession was revoked in August, 1900. The canal, which had been begun in 1890, is now almost entirely filled up, the machinery lying scattered about in all directions.

The interest on the foreign loan has been reduced to 4 per cent.

	1902.	1906.

Offices of Legation, 36 Victoria Street, S.W.

Secretary of Legation, J. Irgens, 30 The Grove, Boltons, S.W.

Consul-General, P. M. R. Ottesen, 22 Great St. Helen's, E.C.

Vice-Consul, H. L. Brækstad.

Norway, an independent kingdom, founded in 872 (fundamental law of 17 May, 1814), was united with Sweden under the same King from 4 Nov., 1814, to 7 June, 1905, when the union was dissolved. The Parliament of 123 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." The western and northern portion of the peninsula is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 124,130 sq. miles with a population (1905) of 2,311,527. The coastline is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren table-lands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains. Agriculture, though pursued with some vigour of late, is unable to furnish sufficient produce for home consumption; hence it

has been necessary to import considerable quantities of corn, meat, and pork. The fisheries give employment to a large part of the population throughout the year. The most important are cod and herring; the exports of these with other sea-products and fish-oil were valued at £3,177,863 in 1905. The mineral products are similar to, but far less valuable than, those of Sweden. Timber-dressing, mechanical engineering, textile manufactures, ship-building, and pulp-making are the principal departments of the Norwegian industry. The exports of produce of the forests were valued at £3,610,628 in 1905, the value of wood-pulp alone being £1,520,925. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of timber, matches, fish, oil, and other products of the fisheries, pulp, paper, skins and furs, nails, minerals, stone, ice, calcium carbide, condensed milk, butter, margarine, tinned goods, &c. The principal domestic exports from Norway to the United Kingdom in 1905 were paper and paper-making materials, timber, and condensed milk; and the principal domestic imports from the United Kingdom in 1905 were coal, steamships, Manchester goods, metals, and woollens.

Defence (for Army, see p. 637). The Navy consists of 4 ironclads, 4 coast defence ships, 38 torpedo vessels, 14 gunboats, and a few smaller vessels, with 5,150 officers and men and as many in reserve.

Education (see p. 642).

Communications.—The total length of railways open in 1906 was 1,584 miles, of which 237 miles were private lines. The length of telegraphs and telephones belonging to the State in March, 1906, was 9,170 miles. The mercantile marine, 31 Dec., 1905, consisted of 7,269 vessels, of 1,486,502 tons.

OMAN.

Sultan, or Sovereign, Seyyid Feysal bin Turki, G.O.I.E., born 1864, suc. 4 June, 1888.

Oman (area 81,000 sq. miles, pop. 1,000,000) is a Mohammedan State in N.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Oman, and the Arabian Sea. The small territory of Gwadar on the Mekran coast also belongs to it. The country, much of which is arid and desert, attains in Jebel Akhdar an elevation of 10,000 feet. The rainfall averages only about 6 inches annually. Among the Bedouins the authority of the Sultan is nominally recognised, but in the interior his authority is slight, and trade is hampered by robbery. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, East Africans, and Nubians. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his court. A joint Anglo-French declaration of 1862 guarantees his independence. Since 1798 the relations between Muscat and England have been friendly, and nine treaties and conventions have been made. British warships have upheld the Sultan's authority against rebellious tribesmen. The Sultan is pledged not to cede territory to any Power but the British Government. The Viceroy of India visited Muscat in 1903. Oman has no independent coinage except copper pice; the Indian rupee is the chief currency at Muscat and the Maria Theresa dollar in the interior. Muscat, the capital, with its commercial suburb of Muttra (pop. 25,000), has a good harbour, and a considerable trade, amounting in 1906-7 to £707,680. About 74 per cent. of the trade is with England and India, and 90 per cent. of the shipping is British. Indians (who numbered 1,300 in 1903) do most of the business. Dates are the chief export, and rice, arms, coffee, cotton and silk goods the chief imports. The imports from the United Kingdom were about £53,000 in 1906. An import duty of 5 per cent. is levied. There are three British steamship lines and a weekly mail service to Karachi and Bombay. There is also a fortnightly German steamship service with Europe. There is a cable to India via Jask. *British Consul and Political Agent*, Major W. G. Grey, I.A.

Vice-Consul, Mahomed Fazel.

Transit, 18 to 20 days.

PANAMA, REPUBLIC OF.

President, Manuel Amador Guerrero, born 1833, assumed office in 1904, for four years.

Vice-President, José Domingo de Obaldia.

Secretary of Government and Minister of Justice, Aristides Arjona.

Foreign Affairs, Ricardo Arias.

Treasury, Isidoro Hazera.

Public Instruction, Lasso de la Vega.

Public Works, Gil Ponce.

Consul General, C. R. Zachrisson, 35 Chapel Walk, Liverpool. (Vice-Cons., J. B. Chevalier.)
Consul at Manchester, F. A. Cortez-Leigh.

One of the nine Departments of Colombia revolted in Nov. 1903, and established a separate Government. A treaty was concluded with the United States which guarantees the independence of the Republic, and also paid ten millions of dollars, in return for which Panama grants to the United States, in perpetuity, a zone of land for the construction and operation of a canal, of the width of ten miles, extending to the distance of five miles on each side, with sovereign rights within the strip. A new port has been established at Cristobal, in the Atlantic, and Port Ancon, on the Pacific, is also administered by American officials and laws. The area of the Republic is 31,890 square miles, the population (1904) about 330,000. There are 165 primary schools, at which 9,181 children attend; the present system of public instruction is to be thoroughly reorganised and reformed. The once famous pearl-fisheries in the Gulf of Panama yield now but little, but other beds are being worked along the North coast. The prosperity of the State depends upon its favourable geographical position, which facilitates transit from the Atlantic to the Pacific. The distance from Limon Bay to Panama on the latter is only 35 miles, and the highest elevation of the watershed does not exceed 278 feet. Until 1896 Panama and Colon were free ports. A general import duty is now levied at the rate of 10 per cent. gold on the value of all imports, except liquors, which are provided for separately. A special agreement between the U.S. and Panama was signed in December, 1904, establishing free trade between the Republic and the Canal Zone. Merchandise entering the zone for consumption pays import dues to the Panama Government identical with those levied on the importations into the Republic. All supplies imported for account of the Isthmian Canal Commission are exempted from all taxation. A railway 47 miles in length (fare, first class \$2.40, second class \$1.50) (luggage 2 cents a lb.) (U.S. gold) joins the two oceans. The imports in 1906 were valued at £1,470,619 (from U.S., £729,684, exclusive of canal materials; from U.K., £387,114; from Germany, £152,966), and consisted chiefly of manufactured goods and foodstuffs. The exports (principally gold dust and bars, hides, rubber, mother-of-pearl shells, cabinet woods, bananas, and medicinal plants) at £200,000.

The Panama Canal.—A ship canal was commenced in 1879 by Ferdinand de Lesseps, the diggings being begun in 1881, but in March, 1889, work ceased owing to lack of funds. A French syndicate then assumed charge of the property and continued the works at the Culebra cut until the sale of the property to the U.S. for forty millions of dollars in 1904. A lock canal has been definitely decided upon, in 85 ft. level, with 6 locks; 3 will be located at Gatun, 1 at Pedro Miguel, and 2 at La Boca, all in duplicate. With the work already done it is estimated it can be completed in 9 years at an additional outlay of £28,000,000. Total length will be about 46 miles, and at surface of water 150 ft.; depth, 30 ft.

Panama—Minister Resident and Consul, Claude C. Mallet, C.M.G.£800
Vice-Consul, Thomas Broadwood...£350 to 450

Bocas del Toro—Cons. Agent, Louis F. Ryan.
Colon—Vice-Cons., Edward F. Hudson.

Consul-General in London, Alfred James, 18, Eldon Street, E.C.
Consul in London, A. F. Baillie.

An inland State of South America, situate between 22° 4'—27° 30' S. lat and 54° 32'—61° 20' W. long. Its area is computed at 145,400 square miles, enclosed within the rivers Parana and Paraguay; and contains a population (1900) of about 635,600. The chief crops are maize, rice, coffee, manioc, tobacco, sugar-cane, and oranges. Among its principal trees are several species of dye-wood, and many yielding juices or gums, as the caoutchouc or india-rubber; the Quebracho, used for tanning, and the "Yerba Maté," or Paraguay tea-plant; there are also hardwood and other timber trees and medicinal plants. Stock-raising is the chief industry. The chief articles of export are oranges, hides, tobacco, yerba maté, and timber. The army numbers about 30,000 men; there is no navy. A revolution, of several months' duration, came to an end in December, 1904. A railway, 155 miles in length, belongs to an English company.

	1905.	1906.	1907.
Revenue (Estimate) £	320,231	441,216	614,400

Chargé d'Affaires and Consul, Cecil W. Gosling£600

PERSIA.

Sovereign, Mohammed Ali, Shah. b. 21 June, 1872; suc. 9 January, 1907.
Heir-Apparent, Sultan Ahmed Mirza.
Prime Minister, H.E. Nazir-el-Mulk.
Minister for Foreign Affairs, H.E. Mushir-el-Mulk.

Envoy Extra. and Minister Plen. in London, H.E. Muhtasham-es-Saltaneh, Cornwall House, Cornwall Gardens, S.W.
Councillor, Mirza Mehdi Khan, Majd-es-Saltaneh.
First Sec., Mirza Abdul Gaffar Khan.
Consul-General, Harry Seymour Foster.
Do. for Scotland, Sigismund Moritz.

Persia—called by the natives Irán—comprises 630,000 square miles. The population, widely scattered, is estimated at 10,000,000. By the Anglo-Russian Convention of Aug. 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia in which each had, for geographical and

economic reasons, special interests. Russia engaged not to seek political or commercial concessions (for railways, mines, &c.) beyond a line going from the Afghan frontier *via* Gazik, Birjand, and Kerman to Bunder Abbas, while Great Britain made a like engagement as regards a line going from Kasr-i-Shirin *via* Ispahan, Yezd, and Kakhk to a point on the frontier at the intersection of the Russian and Afghan frontiers. Russia did not deny the special interests of England in the Persian Gulf, the result of British action in those waters for over 100 years. The ill-defined western frontier of Persia marches with Turkey, with which there were serious boundary disputes in 1906-7.

Persia is mostly a bare and arid table-land, encircled, except on the east, by mountains, those in the north rising to 13,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohamerali to Ahwaz in 1888. Messrs. Lynch Bros., aided by a British-Indian subsidy, run a fortnightly steamer to Ahwaz, whence there is a new road to Ispahan made by British capital. The Upper Karun, navigable up to Shuster, is reserved to the Persian flag. There is one (Belgian) railway of eight miles running south from Tehran. Most of the telegraphs are managed by the Indo-European Telegraph Department of the Government of India. The main telegraph is from Julfa, on the Russian frontier, to Bushire, whence there is a cable to Bombay. The convention for this telegraph lasts till 1925. A new land telegraph has been constructed by British agency, from Karachi (India) *via* Quetta, Yezd, and Kerman, to Tehran. It is leased to the Persian Government, but maintained by British directors and staff. The chief routes to Persia are those *via* Batoum-Tiflis-Tabriz and Baku-Resht, constructed and controlled by Russians, and closed to non-Russian merchandise except tea; the Trebizond-Tabriz route, long and costly; the Bunder Abbas route to Kerman, Yezd, and Seistan, liable to robbery; the Bushire-Shiraz-Ispahan route, long and difficult; the Bussorah-Baghdad-Kermanshah route, suited for bulky or heavy goods; and the increasingly popular Mohamerali-Ahwaz-Ispahan route, shorter, cheaper, and better than the Bushire route. Several good cart-roads have been made or are in progress. The Kazwin-Hamadan and Julfa-Tabriz roads (Russian) were completed in 1905 and 1906. Travelling is mostly by caravans, and transport by pack-animals. The cost of carriage is, therefore, very heavy. The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The principal towns are Tehran (pop. 210,000), Tabriz (180,000), Ispahan (60,000), Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000). The Persians are mostly Shi'ah Muhammadans; there are also many Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors

or Governors-General. Owing to increasing popular misery and to discontent with a corrupt and incompetent administration and an extravagant Court, a reform movement began in Dec. 1905, under the auspices of the Muhammadan clergy. In August, 1906, the Shah, admitting the need for reforms, granted a Constitution. The *Mejliss* (National Council or Consultative Assembly) consists of 162 representatives of the princes (kajars), clergy, nobles, landowners and agriculturists, merchants and tradesmen, who are elected by their peers. The peasant and working classes are not represented. The Council may deliberate on all important State affairs, and have a right to free expression of opinion on reforms. The first elections were held in October, 1906. During 1907 there has been much internal disorder from political causes. On 31 August, 1907, the Persian Premier was assassinated. A new Cabinet of eight responsible Ministers was formed in September, 1907. In October, 1907, the Shah signed a new constitution, limiting the sovereign prerogatives and ecclesiastical authority, and granting liberty of conscience, of the person, of education, of the press, of association, and of speech. The revenue, estimated at £7,000,000 for 1907-8, is derived from land tax, Crown lands, customs, and lease of monopolies. Foreign trade is developing. The total imports of merchandise into Persia in 1905-6 were £6,442,000, and the exports £4,885,700. Russia had about 50 per cent. of the imports and 67 per cent. of the exports; the British Empire 32 per cent. of the imports and 9 per cent. of the exports. Turkey and France were the other chief participants. Proximity to the best cultivated and most populous provinces, railways in Transcaspia, bounties on sugar, &c., a preferential tariff, and new roads from the frontier, have extended Russia's trade and influence. Persia's trade with Russia is chiefly through ports on the Caspian (on which only Russian vessels are allowed) or by the Trans-Caspian Railway, and with England and British India by way of the Persian Gulf. The sea-borne trade of Persia passes chiefly through the ports of Bushire, Lingah, and Bunder Abbas, and *via* Baghdad. There are several English firms at Bushire, the chief port on the Gulf and an *entrepôt* for trade with Shiraz, Ispahan, and Tehran, and many European business houses at Tehran, now the central exchange and money market, and at Tabriz, the *entrepôt* for European goods coming *via* Trebizond. The shipping of the Persian Gulf is almost wholly British. A subsidised Russian line runs four steamers a year from Odessa, and a German line has been inaugurated. Persia's chief imports are cotton piece-goods (mainly from the British Empire and Russia) and sugar (from Russia and France), with woollen goods, silk goods, cotton yarn, tea, metal wares, gold and silver, petroleum, and indigo. The principal exports are dried fruits, raw cotton, pearls, opium, rice, wool, fish, carpets, and silk cocoons. A new specific tariff on imports and exports was introduced in 1903, when vexatious internal dues were abolished. The customs (as also the post-office) have, since 1900, been managed by European officials. A commercial mission from India visited south-east Persia in 1904-5. Native dealers are reputed to be dishonest, and legal redress is hard to obtain. The (English) Imperial Bank of Persia has its head office at Telhran, with branches in the chief cities, and issues notes. There are also one Russian and

two native banks. A concession for a German bank was granted in 1907. A national bank is to be established. The foreign debt of Persia is about £3,400,000, at 6 per cent., borrowed in 1900 and 1902 from the Russian Banque d'Escompte for 75 years, and irredeemable for 10 years. It is guaranteed by the Russian Government, and secured on the customs.

Exports from United Kingdom, 1906 ... £491,975

Do., Southampton, Carlos G. Estenos.

Peru is a maritime Republic of South

America, situated between 1° 31' 29" and

19° 13' S. latitude and between 62° 6' and 81° 20' 45"

W. The territory between 17° 47' S. and 19° 13' S. is still occupied by Chili. The question of the provinces of Tacna and Arica is to be settled by a plebiscite, which will determine to which of the two countries these territories are to belong. It has not yet been possible to arrive at an arrangement for carrying out the stipulations of the Treaty of Ancón concerning these two provinces. Peru has a coast line of about 1,300 miles. It is bounded on the north by the republics of Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by the Brazils and Bolivia, and on the south by Chile and Bolivia. Peru has boundary questions with all the neighbouring republics. It is customary to estimate the area of Peru at about 500,000 square miles, but if the extreme claims of Peru be taken into consideration, the area is, of course, infinitely larger. The population is estimated at 4,000,000 by the Lima Geographical Society, but no census has been taken since 1876. The country is traversed throughout its length by the Andes, running parallel to the Pacific coast. The coast region is sandy desert, except where watered by transverse mountain streams, but capable of cultivation in the highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper and coal (of inferior quality) are conspicuous; while in the department of Piura, along the coast, there are important beds of petroleum. Gold is found in many districts, but especially in the province of Carabaya, where mining on an important scale is carried on. An American syndicate has bought four-fifths of the whole mineral zone of Cerro de Pasco, and many others in neighbouring mining districts, and has constructed a railway from Oroya to Cerro de Pasco. The eastern provinces are of vast extent and fertility, with a tropical climate. The medicinal productions of that region are of great value, comprising cinchona, or Peruvian bark (of which little is now exported), sarsaparilla, copaiba, &c. India-rubber is an important product of the country. Coca, cocoa, and coffee are grown on a small scale. Sugar is the staple agricultural article of the country. The Lobos and other islands on the Pacific coast provide the guano.

The total length of the railways open (1905) was 100 miles. A railway from Guauqui, on the Bolivian side of Lake Titicaca, to La Paz, has been completed, and extensions are in hand on other lines, from Sicnani to Cuzco and from Oroya to Huancayo. There is also steam navigation on that lake and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft.

Defence (for Army, see p. 637). The Navy consists of five vessels, two of which are in good condition. Two swift cruisers are building (1906) at Barrow. The principal imports are coal, cotton, woollen, linen, and silk goods, drugs, earthen and stone wares, machinery, explosives, metals, and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are sugar, copper and other ores, guano, gold, silver, cotton, llama and alpaca wool, and rubber. A small quantity of coffee is also exported. Excepting the coffee grown in Yungas, Bolivia, there is no better coffee in the world than that grown in the Perené Chanchamayo and Huanuco districts.

For Education, see pp. 642-3.

Peru has no foreign debt. An arrangement was concluded in January, 1890, by the Peruvian Government for the cancelling of the external debt (which amounted, with arrears of interest, to over £50,000,000), under which the State railways, the guano up to 2,000,000 tons, certain rights in the Cerro de Pasco district, and vast tracts of land are vested in the Peruvian Corporation. There are disputes outstanding between the Government and the Corporation. A loan of £600,000 has been concluded with the German Bank, guaranteed by the salt tax.

The total amount of the capital of the interest-bearing funded debt is £2,660,645, bearing interest at the rate of 1 per cent. Claims of every kind upon the Government are being converted into a non-interest bearing funded debt, which is redeemed at a low rate, which fluctuates. For the year 1905 the capital of this debt was £806,000.

Peru has now a gold standard, the unit being of the same weight and fineness as the £ sterling which, with the \$10 piece, are legal tender. Half-sovereigns and \$5 gold pieces are in circulation. Exchange was steady in 1905 at 24d. to the \$.

The most westerly Kingdom of Europe, and a part of the great Iberian Peninsula; it lies in 37°—42° 8' N. lat. and 6° 15'—9° 30' W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 34,254 square miles, with a population in 1900 of 5,016,267, exclusive of the colonies. The Azores and Madeira (1,237 square miles, pop. 406,865) form part of the kingdom, which thus has a population of 5,423,132. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1906) numbered 630 steam and sailing vessels, of which only 17 steam and 5 sailing vessels exceeded 900 gross tonnage. Railways 1,504 miles in extent were open for traffic in 1906, and there are 5,301 miles of telegraph wire in 1902. For many years the national income has been considerably less than the expenditure; this deficiency has added to the national debt.

Defence (for Army, see p. 637). The Navy consists of 39 steamers and 16 sailing vessels, many scarcely seaworthy, and about 4,808 sailors.

Education (see p. 643).

COLONIES AND DEPENDENCIES.

MADEIRA (imports, 1906, £454,506; exports, £232,840) and the AZORES are an integral part of Portugal proper; the CAPE VERDE ISLANDS, off the Cape of that name in Senegambia, consist of St. Antonio, St. Nicolas, Fogo, Santiago, Roavista, Sal, and some smaller islands, having a total area of 1,490 square miles, and a population of about 150,000; the capital is St. Vincent. In West Africa a portion of the GUINEA COAST, with the BISSAGOS ISLANDS, was acquired in 1885; the capital is Cacheo, and the territory has an area of 14,370 square miles with about 1,500,000 inhabitants. In the Gulf of Guinea the two islands of ST. THOMAS (direct and transit trade with mother country, 1904, £1,715,000; principal export, cocoa) and PRINCEPE were obtained in 1879; area 420 square miles (population about 40,000). Between the French Congo and the Free State are the territories of LANDANA and CABENDA, area about 2,030 square miles (population 30,000); and extending from the left bank of the Congo river to the right bank of the Cumene river is the vast province of ANGOLA, Gov.-Gen., Maj. H. de Paiva Conceiro (direct and transit trade with mother country, 1904, £2,163,000; principal export, rubber), with about 1,350 miles of coast-line and an area of 510,670 square miles (population about 4,000,000). The capital of Angola is St. Paul de Loanda; railways, 300 miles open, and about 250 miles of telegraph wires. LORENZO MARQUES and MOZAMBIQUE together constitute PORTUGUESE EAST AFRICA, Gov.-Gen., Col. Freire d'Andrade; area about 297,750 square miles, population 2,000,000. In the southern province are the ports of Lorenzo Marques (Delagoa Bay) and Beira, and in the northern, Quilinae, Mozambique, and Ibo: the exports of Portuguese East Africa amounting to £1,500,000 in 1903, and the imports to £750,000. Parts of Mozambique are leased to the Mozambique

Company and to the Nyassa Company; Railways—Delagoa Bay Railway from Lorenzo Marques north-west to join the Transvaal system on the frontier, about 60 miles, and the Beira Railway, from Beira to Umtali on the borders of Rhodesia, about 200 miles. PORTUGUESE INDIA.—The territory of GOA contains an area of 1,301 sq. miles, and a population of 475,573 (1901). The city of NOVA GOA (New Goa or Panjim), capital of that territory, and of all the Portuguese possessions east of the Cape of Good Hope, is situated on the Malabar Coast, about 265 miles S.S.E. of Bombay. Old Goa, five or six miles inland, has fallen into decay, but is still remarkable for its cathedral and ancient buildings. The Portuguese West of India Railway (51 miles) connects the harbour of Mormugao with the Southern Mahratta Railway in British India. The chief products are rice, coco-nuts, and salt. The direct foreign trade is small, but there is a large transit trade with British India. Trade facilities were improved in 1906. Commerce is chiefly in the hands of natives of British India. A German steamship line plying between Bombay and Zanzibar, subsidised by Portugal, calls every three weeks. The principal imports are cotton piece-goods, rice, kerosene, sugar, tobacco, &c.; the principal exports are coco-nuts, salt, fish, betel-nuts, &c. The other Portuguese possessions in India are DAMAUN (pop. 41,671, area 149 sq. miles), to the north of Bombay; and DIU, a town and fort on an island off the Gujarati coast (pop. 14,614, area 20 sq. miles). Of the total population (531,798) of Portuguese India, 262,648 are Catholics, 260,144 Hindus, and 8,431 Mohammedans. The revenue of the Portuguese possessions amounts to about £155,000.

Governor-General, H. E. Señor Horta e Costa.

Portugal also possesses rather more than half the island of TIMOR in the East Indian Archipelago and MACAO, an island near the mouth of the Canton river.

	1905.	1906.

RUMANIA.

King, Charles, second son of Prince Charles Antoine of Hohenzollern-Sigmaringen, born 20 April, 1839 (O.S.); elected Hereditary Prince 26 Mar., 1866; confirmed 24 Oct., 1866; proclaimed King by vote of both Chambers, 26 March; crowned 22 May, 1881; mar. 15 Nov., 1869, Elizabeth (Carmen-Silva), daughter of the late Prince Hermann von Wied, born 29 Dec., 1843.

Heir Presumptive (Nephew), Prince Ferdinand von Hohenzollern, born 24 August, 1865; proclaimed Heir Presumptive 26 March, 1889; mar. 10 January, 1893, to Princess Marie of Edinburgh, and has issue Carol, b. 15 (28) October, 1893, Elizabeth, b. 1894, Marie, b. 1900, and Nicolas, b. 5 (18) August, 1903.

Premier and Foreign Affairs, Demetrius Sturdza.

Interior, Ion Brătianu.

War, General Avaresco.

Finance, E. Costinesco.

Instruction, Spiru Haret.

Agriculture, Commerce, Industry, and Lands, Anton Carp.

Public Works, V. G. Mortun.

Justice, Toma Stelian.

Envoy Extraordinary and Minister Plenipotentiary,
Al. Catargi, 4 Cromwell Place, S.W.
1st Secretary of Legation, Prince Antoine Bibesco.
Consul-General in London, Alfred Stead.

The Kingdom of Rumania consists of the Moldo-Wallachian provinces formerly belonging to Turkey, but which by the Treaty of Berlin, 13 July, 1878, were recognised as an independent State, and the territory of the Dobruja added to them. On the 26th March, 1881, Rumania was raised to a Kingdom. The entire area is 50,702 square miles, with a population of about 6,150,000. The dominating religion is that of the Greek Church (5,200,000); Roman Catholics, 114,200; Protestants, 13,800; Jews, 400,000. The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle and sheep. Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, petroleum (over £1,000,000 in 1906), rock-salt, spirits, hides, wood and cattle. The total length of railways is 2,295 miles (1904), and there are 223 telegraph offices with 9,915 miles of wire.

An International Commission, created by the Treaty of Paris, 1856, and whose powers were enlarged by the Treaty of Berlin, 1878, has its seat at Galatz, and exercises sovereign powers over the navigation of the Danube; the British representative is Hamilton E. Browne, Consul-General. Its income, principally derived from shipping dues, amounts to about £60,000 per annum. On November 10, 1892, a large dock was opened at Ibraila, and in 1896 a canal through the "Iron Gates" rendered that hitherto dangerous part perfectly navigable.

Defence (for Army, see p. 637). There is a small navy of 45 vessels.

Education (see p. 643).

THE RUSSIAN EMPIRE.

Tsar, Nicholas II., Emperor of all the Russias, b. 6 (19) May, 1868; *suc.* 20 Oct. (1 Nov.), 1894; m. 34 (26) Nov., 1894, Princess Alix of Hesse (Alexandra Feodorovna), grand-daughter of Queen Victoria, and has issue a son, Alexis Nicholaievitch, b. 30 July (12 Aug.), 1904, and 4 daughters, Olga, b. 15 (27) Nov., 1895, Tatiana, b. 10 (22) June, 1897, Marie, b. 26 June (8 July), 1899, and Anastasia, b. 18 June (1 July), 1901.
Heir Apparent, Grand Duke Alexis Nicholaievitch (Cesarevitch), b. 30 July (12 Aug.), 1904.
President of the Council of the Empire, M. Frish.
Minister of Imperial Household, General Baron de Fredericks.
President of the Council of Ministers, M. Stolypine (also *Minister of Interior*).
Foreign Affairs, M. Iswolsky.
Finance, M. Kokovtsov.
Public Instruction, M. von Kaufman.
Public Works, General Schaffhausen.
War, General Rödiger.
Navy, Admiral Dikoff.
Justice, M. Stcheglovitch.
Commerce, M. Filosofov.
Agriculture and Crown Domains, Prince Vassilchikov.
Ambassador to France, M. Nelidoff; *Germany,* Count Osten-Sacken; *Austria-Hungary,* Prince Urusoff; *Italy,* M. Muraviev; *Turkey,* M. Zinoviev; *U.S.A.,* Baron Rosen.

Ambassador in London, Count Benckendorff, Chesham House, S.W.
Councillor, M. S. Poklewski-Kozietzki.
1st Secretary (vacant).
2nd Secretaries, M. Sevastopoulo, Prince Sviatopolk-Mirski.
Attachés, M. Abrikossov; Baron Meyendorff.
Military Attaché, General Yermaloff.
Naval Attaché, Capt. Behr.
Agent of Ministry of Finances, M. Rytkowski.
Consul-General, Baron Ungern Sternberg, 17 Great Winchester Street, E.C.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominion under British rule. In addition to Russia in Europe (exclusive of the Caucasus), situate between lat. 44° 28'–76° 33' N. and 17° 40'–64° 33' E. long., and embracing more than half of that continent, it comprehends one-third of Asia, and until 1867 included also a large section of North America. The empire comprises:

	English Square Miles.	Population in 1906.
<i>European Russia:</i>		
Russia Proper (50 Provs.)	1,859,195	107,750,000
Poland (10 Provs.)	49,084	10,800,000
Finland (Grand Duchy)	144,211	2,820,000
<i>Asiatic Russia:</i>		
Caucasia (11 Provs.)	181,550	10,300,000
Siberia (8 Provs. and Regions)	4,817,687	6,600,000
Central Asia (10 Provs. and Regions)	1,327,317	9,000,000
Russian subjects in } Khiva and Bokhara }	—	7,000
	8,379,044	147,477,000

Of the total population 64,616,280 were men

and 64,594,883 women, in 1897, and the population is 50·3 per sq. mile in European Russia, 51·2 in Caucasia, and 25·3 for the whole Empire.

In the European parts of Russia alone the population increases annually at the rate of nearly a million and a half. The largest towns are St. Petersburg (1,678,000), Moscow (1,173,427), Warsaw (756,426), Odessa (449,673), Lodz (351,570), Kieff (329,000), Riga (256,197), Kharkoff (197,405), Vilna (162,633), Saratov (143,431), Kazan (143,707), Ekaterinoslav (135,552), Rostoff (119,889), Astrakhan (121,580), Tula (109,279), and Kishineff (125,787); whilst Nižni Novgorod, Nikolaieff, Samara and Minsk have populations between 90,000 and 95,000. In Asiatic Russia the Caucasus contains two towns with over 100,000 inhabitants, Baku (179,133) and Tiflis (160,645); Turkestan contains five large towns, Tashkend (156,000), Namangan, Samarkand and Andijan; in Siberia Tomsk, Irkutsk, and Ekaterinburg have each about 50,000 inhabitants. Nižni Novgorod, though small, is a station on the Trans-Siberian Railway, and has annually the largest fair in the world. The various nationalities in 1882 were represented about as follows:—Russ, 69,770,000; Poles, 6,010,000; Lithuanians, 2,910,000; Germans, 1,120,000; Swedes, 270,000; Tajiks (Persians), &c., 1,125,000; Armenians, 800,000; Jews, 5,189,401; Caucasians, 2,850,000; Finns, 2,000,000; Turks and Tartars, 7,700,000; Mongols, 530,000; various, 584,000. The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there were (1897):—Orthodox Church, 87,384,480 (or 70 per cent. of the whole population); Dissenters, 2,173,738; Roman Catholics, 11,420,937; Protestants, 3,743,209; other Christians, 1,221,511; Jews, 5,189,401; Mohammedans, 13,889,421 (or 11 per cent. of whole population); and other non-Christians, 645,503. European Russia consists mainly of an immense plain; the Valdai hills in the west rise only to about 1,000 ft., and the Lublin hills in the south-west to about 1,500 ft. On the right bank of Lake Imandra, in the Kola peninsula, is an elevation of 3,300 ft. The Timanski range, in the province of Archangel, rises to about 3,000 ft., and Mount Lujaur-Ort in Finland to about 3,400 ft. In the Crimea and Caucasus various heights are over 4,500 ft., and the Obdorsk and Ural Mountains, which form the borderland between Europe and Asia, rise in many places to between 4,000 and 5,000 ft. In Siberia the principal ranges are the Altai, Sayansk, Baikal, Yablonoi and Verkhnoiansk mountains, with a volcanic chain in Kamtchatka. In Russian Turkestan are portions of the Thian Shan range, and in Bokhara are the Pamirs, the "Roof of the World," and in all these ranges are heights of over 5,000 ft. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries. The river Amur, dividing Manchuria from Eastern Siberia, is navigable from its mouth to Chita, in the Trans-Baikal province, by shallow draught steamers, and is of importance, together with the Trans-Siberian Railway, in spreading Russian influence in the outlying portions of the Chinese Empire.

A great portion of Russian territory is unfit for cultivation; in the north the tundras are almost constantly frozen, but in a short summer

provide good pasture and certain berries fit for human food; in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst some of the interior provinces (to the extent of about 460,000,000 acres) and nearly the whole of Siberia are clothed with forests, in which the fir, pine, birch, oak, lime, maple and ash predominate. The country between the Baltic and Black Sea, however, is eminently fertile, producing abundance of grain. The chief cereal raised is wheat, of which the harvest in 1905 was about 12,000,000 tons; other cereals are barley (5,800,000 tons), oats (11,000,000 tons), buckwheat, millet, and especially rye (15,223,000 tons), the staple food of the inhabitants. Hemp and flax are extensively cultivated, and of late years potatoes (18,000,000 tons) and tobacco (100,000 tons). The Obdorsk and Ural Mountains contain very great mineral riches, and, with the Altai range, are the principal seat of mining and metallic industry, producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. Russia is now the largest producer of petroleum in the world, the output amounting to 410,000,000 poods (of 36 lbs.) in 1905. An immense bed of coal, both steam and anthracite, and apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper). The coal output for the whole of Russia in 1905 was 17,000,000 tons; other mineral products in 1905 were pig iron (2,656,000 tons); gold, 1903 (1,134,000 oz.); platinum (366 poods = 6 tons, being 95 per cent. of the world's output), steel and rails (1901, 1,198,000 tons), copper (8,500 tons in 1904), and quicksilver (351 tons in 1901 and 400 tons in 1902).

The principal ports are Petersburg, the naval depot and fortress Kronstadt, Narva, Riga, Libau, Parnau and Vindau (Baltic), Hango (Gulf of Bothnia), Revel, Helsingfors and Wiborg (Gulf of Finland), Archangel and Ekaterinsk (Arctic and White Seas), Odessa, Nicolaieff, Sevastopol, Novorossiisk, Berdiansk, and Batoum, Taganrog, Mariupol, Rostoff and Kertch (Black Sea and Sea of Azov), Astrakhan, Derbent and Baku (Caspian Sea), and Nicolaieffsk, Vladivostok, and Petropaulovsk in Kamtchatka (Pacific).

TRADE AND COMMERCE.—With metallurgical and engineering factories, Russia possesses many extensive manufacturing establishments for weaving, tanning, fur-dressing, &c. Linen is largely manufactured by hand-looms, the chief operations consisting in spinning and weaving flax and hemp. Woollen and worsted stuffs, fine cloths, and mixed fabrics are also produced. The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables, oil, &c. The chief exports are grain (56 per cent.), raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow and bristles. The trade of Russia in 1905 was divided among the principal commercial nations as follows (in millions of roubles):—

Imports from:—			Exports to:—		
	1904.	1905.		1904.	1905.
Germany.....	225	233	Germany.....	234	255
U.K.	102	95	U.K.	230	250
U.S.	62	40	U.S.	4	3
France	26	26	France	61	64
Holland	19	22	Holland	98	126
Belgium	3	7	Belgium	44	44

The chief Russian exports in 1906 to the United Kingdom were:—

Bacon	£168,261	Iron Ore	£185,128
Butter	2,918,124	Manganese ore ..	240,613
Corn, wheat	5,224,904	Oil-seed cake ..	500,695
" oats	1,668,818	Paper, &c.	267,701
" barley	1,811,122	Petroleum	715,567
" maize	299,744	Poultry & Game ..	206,260
Bristles	96,377	Seeds (linseed, &c.)	404,563
Eggs	2,342,250	Skins and Furs ..	422,591
Flax and tow	2,062,681	Wood, hewn or	
Hemp	331,451	sawn	7,791,614
Hides	232,514		

The chief British imports into Russia in 1906 were:—

Coals, &c.	£1,611,156	Machinery	£1,417,144
Chemical products	198,446	Do., steam engines	194,894
Cotton yarn and		Metals, all kinds	177,172
manufactures ..	563,604	Wool and yarn, ...	1,331,976
Grease and Fat ..	150,454	Woolen manufac-	
Herrings	791,722	tures	126,695
Implements & tools	165,096		

DEFENCE (for Army, see p. 637). The Navy (for which £12,345,000 was allowed in 1905) consisted in December, 1905, of 15 battleships (including 4 building and 6 very old), 10 coast defence ships (very old), 12 first-class cruisers, 12 second-class cruisers, and 120 gunboats and torpedo craft. Of the above, 10 battleships (2 building and 5 very old) and 3 cruisers are in the Black Sea.

EDUCATION (see p. 643).

RAILWAYS, &c.—The total length of lines open for traffic in 1906 was over 40,000 miles, including 6,023 miles in Siberia and Manchuria, but exclusive of 2,106 miles in Finland. The Southern portion of the Manchurian Railway is no longer under Russian control.

In 1901 the mileage and revenue were:—

Line.	Mileage.	Gross Revenue.
<i>European Russia.</i>		
State	18,477	rs. 366,917,368
Companies	10,605	162,395,951
Local	1,032	3,297,838
<i>Asiatic Russia.</i>		
State	4,965	35,156,873
	35,079	rs. 567,768,030

In 1903 the gross revenue amounted to £72,000,000, and working expenses to £48,600,000. The gross revenue from the State railways was estimated at £53,800,000 in 1906. The interest payable by the Government on railway bonds amounts to nearly £14,000,000.

There were (1901) 10,967 post-offices, carrying 996,379,947 letters, &c. Of telegraphs there were (1901) 6,096 offices, with 106,913 miles of line.

The sea-going commercial marine consisted in 1903 of 2,489 sailing vessels and 810 steamers, with a total tonnage of 668,550; the ocean shipping of the Russian Empire is comparatively insignificant, but the internal (lake and river) shipping is considerable.

REVENUE.—The main source of revenue is the liquor traffic. The gross revenue from the Government spirits monopoly (which has now been introduced practically throughout the Empire) is estimated at £59,000,000 (1906), and the net revenue at £42,000,000, exclusive of revenue from excise (£3,000,000).

THE GRAND DUCHY OF FINLAND.

Grand Duke, The Emperor of Russia.
Governor-General, M. Gerhard.

A Grand Duchy on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808. The area is 144,254 square miles, with a population of about 3,000,000 in 1907, of whom about 2,600,000 are Finns, 400,000 Swedes, 19,000 Russians, 3,000 Germans and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,512 students, of whom 518 are women. The leading crops are rye, barley, oats, potatoes. Saw mills and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export. There are 2,106 miles of railway; and a merchant fleet of 2,589 vessels (mostly small), of which 334 are steamers.

The country was formerly governed by the Imperial Finnish Senate, of 22 members. This form of government gave way on Jan. 1, 1907, to a new Constitution involving a single Chamber elected by universal suffrage of both sexes. Women are likewise eligible for election to the Chamber. Finland is thus the first country to concede true equality of the sexes; and it is noteworthy that it has been gained without recourse to "Suffragette" agitation. The Finnish troops only exist in name, the Diet having voted £400,000 per annum to the Russian Treasury in lieu of furnishing Finnish recruits to the army or navy, and Finland has been made part of the Petersburg Military District. The revenue in 1906 was £4,935,241, and the expenditure £4,477,758; the debt amounts to £5,556,410. The imports in 1906 were £12,540,000 (of which 60 per cent. was timber), and the exports £12,540,000. The capital is Helsingfors; population, 140,000 (including Russian garrison).

* Budget estimates.

† War expenditure is not included in the Budget for 1905. It is stated to have amounted to £65,800,000 in 1904. It has been met by loans, the issue of Treasury bonds bearing interest at varying rates, and the issue of paper currency against gold deposited in the State Treasury. The total note circulation has been increased from £66,000,000 to £127,000,000. Foreign loans were placed at Paris and Berlin to a nominal amount of £56,000,000 interest 5 and 4½ per cent., realising about 95 per cent.; and two internal loans (interest 5 per cent.) were raised in 1905 of the total nominal amount of £42,328,000, issued to the public at 96 and 95½. Thus the permanent indebtedness of the Empire has been increased during the war by £98,000,000, of which £31,750,000, placed in Paris, is redeemable in 1909. Very little additional revenue has been raised by taxation. A new loan may, however, be necessary for the redemption of Treasury bonds issued during the war to the amount of £43,000,000.

CAPITAL OF THE RUSSIAN EMPIRE, St. Petersburg. Population (1903), 1,534,000.

British Ambassador, His Excellency the Rt. Hon. Sir A. Nicolsson, Bart., G.C.B., G.C.M.G., G.C.V.O., K.C.B., K.C.I.E. £7,800

 Warsaw—Consul-Gen., Alex. Murray 800
 Vice-Consul, E. B. St. Clair
 St. Petersburg, via Calais, is 1,709 miles from London; transit, 3 days.

SALVADOR (REPUBLIC OF).

President, General Fernando Figueroa, b. 4 March, 1849; installed 1 March, 1907, for four years.
 Foreign Affairs, Dr. Ramon Garcia Gonzalez.
 Public Instruction and Interior, Dr. Tomas G. Palomo.
 War and Marine, The President.
 Finance, Frederico Mejia.

Consul-General, M. J. Kelly, 8 Idol Lane, E.C.

Salvador extends along the Pacific coast for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 13,177 square miles, with a population estimated at 1,000,000. It is divided into 14 departments, and has four ports, Acajutla, La Libertad, La Union, and El Triunfo. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. *A railway nearly 100 miles in length connects Acajutla with the capital and Santa Ana, the coffee centre. Earthquakes are frequent, and the capital (now rebuilt) was entirely destroyed by one in 1873; but the country has of late years suffered comparative immunity. There are 85 post-offices and 168 telegraph offices, with 2,800 miles of wire.

CHIEF TOWN, San Salvador. Pop. circ. 60,000.

British Minister, L. E. G. Carden (Guatemala).
 Consul, Walter E. Coldwell
 Vice-Consul, W. Gibson
 La Union—V. Cons., J. B. Courtade
 Salvador is 5,700 miles from London; transit, 33 days.

SAMOS.

Prince Governor, George Georgiades Bey.
 Senators, Th. Sofoulis, M. Chadjidaki, E. Solounias, and G. Keudouris.

A principality of the Ottoman Empire, more or less independent under the guarantee of Great Britain, France and Russia (1832), is one of the Anatolian Islands, with an area of 180 sq. miles and about 50,000 inhabitants, the capital (Vathy) having a good harbour. The whole island is fertile, and wine, raisins, olive-oil, and tobacco are produced and exported. The imports are valued at about £200,000 (of which about 25 per cent. are British), and the exports at the same figure, of which nearly four-fifths is wine. The revenue for 1905-6 was £27,500, and expenditure £26,000. Antimony, silver-lead, manganese, emery, and copper are known to exist in the island.

CAPITAL, Vathy. Pop. circ. 25,000.

British Vice-Consul, Gregory D. L. Marc.

SAN MARINO.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60 (20 nobles, 20 townsmen, and 20 peasants), of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 33 square miles, the population 11,000. There is an army of about 100. The village of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. Agriculture

* The external debt was extinguished in 1899 by a Financial Syndicate, who also purchased the railway and obtained a concession to complete it as far as the capital.

and viticulture flourish. By a treaty concluded in 1872 the Republic has placed itself under the protection of Italy.

British Consul, Maj. W. P. Chapman (Florence).

Consul-General for Great Britain, Commendatore Arthur Serena, J.P., F.R.G.S., 8 Austin Friars, London, E.C.

Consul, Commendatore William Le Queux, Minorities Chambers, Birmingham, and Villa Renata, Florence, Italy.

Vice-Consul, Birmingham, E. Clutterbuck.

SERBIA.

King Peter I. (Karageorgevitch), b. 1844, elected 15 June, 1903, married, 1883, Princess Zorka of Montenegro (who died 1890), and has issue Princes George (below) and Alexander, b. 1888, and Princess Hélène, b. 1884.

Heir Apparent, Prince George, b. 1887.

Premier and Foreign Affairs, Nikolas Passitch.

Interior, Nastas Petrovitch.

War, General Radomir Putnik.

Justice, M. Trifkovitch.

Public Instruction, Andra Nikolitch.

Commerce and Agriculture, Kosta Stoyanovitch.

Finance, Patchu.

Public Works, Jovan Jovanovitch.

Minister in London, Dr. Militchevitch, 40, Pout Street, S.W.

Consul-General in London, Alexander Tucker, 17 Seymour House, Waterloo Place, S.W.

A Kingdom of Eastern Europe, separated from Hungary by the Danube and Save, by the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people; this constitution was re-established by the present king. By the Berlin Treaty, 1878, it received a large accession of territory, and now has an area estimated at 18,757 square miles, with a population in 1901 of 2,500,000. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The imports consist mainly of cottons, sugar, and colonial goods, hardware, woollens, &c.; the export, of dried prunes (11.6 per cent.), pigs, and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. There were (1902) 369 kilometres of railway, and, in 1894, 3,174 kilometres of telegraph, with 111 post-offices and 392 kilometres of telephone.

Consul-General (vacant).

Financial Agent, C. J. Rivet-Carnac.

The Kingdom of Siam (estimated area, 220,000 square miles) is a buffer State between British Burma and French Indo-China. The boundary of Burma and N.W. Siam was demarcated in 1891. By the Anglo-French agreement of May, 1896, the main central part of Siam, including the basins of the rivers Menam, Petchaburi, and Petriu, was neutralised, the two Governments agreeing not to send troops or obtain any exclusive advantages in it. The two Powers retained freedom of action in the portions of Siam west and east of the neutralised zone. The western portion, adjoining British territory, includes the Malay States dependent on Siam. The eastern portion, the Mekong Valley, included Battambang and Angkor, adjoining Cambodia and the territories acquired by France under the treaty with Siam in 1893. By the Anglo-French Agreement of April, 1904, both Powers disclaimed any intention of annexing the Siamese territory in their respective spheres of influence. By an arrangement with Siam France abandoned Chantabun and the 25-kilometre neutral zone of the 1893 treaty; but the port of Krat became French, thus giving Cambodia access to the sea, while France received trading concessions on the right bank of the Mekong and power to make railways where navigation of the river is impossible. The provinces of Melupre and Bassac were recognised as French. By a further Treaty with France in 1907, the territories of Battambang, Siem-reap, and Sisophon (total area 20,000 sq. kils., pop. 200,000), on the frontier of Cambodia, were ceded by Siam to that country. In return, France gave back to Siam the district of Krat, and made slight concessions in Dansai (Laos), at the same time concluding an arrangement for the gradual abandonment of the ex-territorial privileges hitherto enjoyed by French Asiatic subjects and protégés in Siam. The population of Siam, according to the first census (1905), numbered 6,686,000. Besides the Siamese there are many Chinese (largely engaged in trade and industry), the rest being Shans, Laos, Malays, Burmese, and Cambodians. The principal religion is Buddhism, and education is mostly conducted by the Buddhist monks. Bangkok is the only much-frequented port. Over 80 per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping now largely exceeds British through the purchase of certain British steamship lines. Norwegian shipping also exceeds British. The chief products of Siam are rice and teak. The area under rice is being much enlarged

by irrigation. There are 55 rice mills. The teak industry in the great forests of N. Siam is mainly in English hands. In 1906 rice constituted 78 per cent. and teak 12 per cent. of the exports; while pepper, hides, and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem*. In 1906 the total imports were £4,866,809, and the exports £7,082,081 (rice £5,546,926, and teak £819,647). Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, rubies and sapphires, there are no important mineral products. The King is an absolute monarch. He appoints his successor. There is an Executive Council of Ministers with a general European adviser, and, since 1895, a Legislative Council of State, consisting of the Ministers, six royal princes, and from ten to twenty members appointed by the King, who has an absolute power of veto. A number of English, Germans, Italians, Danes, and Japanese are employed as departmental advisers. The administration of the revenue and of justice and the police has been improved. The revenue is derived from opium and spirit monopolies, land and capitation taxes, customs, &c. Gambling monopolies have been abolished, and increased land and fishery taxes and customs duties substituted. The first Siamese loan was raised in 1904 at 95. £1,000,000 being required for railways. A second loan of £3,000,000 was raised in 1907 at 93½. Siam has an army of about 26,000 men, and a few small gunboats. Over 400 miles of railways (mostly State-owned) are now open for traffic. Bangkok is connected by rail with Petchaburi (95 miles), and with Korat (165 miles). A State line that is being constructed from Ban Phagi to Chiengmai (pop. 50,000), the second town in size, has reached Pakuampho (162 miles). A line to Tachin was opened in 1905; and lines from Bangkok to Pat-ti-er on the E. and Meklong on the W. are under construction. Good roads are few. There are 3,000 miles of telegraph lines.

The currency is the tical (value in 1907, 18. 5½d.); the introduction of a gold standard is contemplated whereby the value of the tical will be fixed. The Mint was closed to the free coinage of silver in Nov., 1902. In N.W. Siam the Indian rupee is current. The Government issues notes.

2nd Secretary, Ricardo Spottorno.

Attachés, E. Martínez, M. Yncian, E. Peña.

Military Attaché, Major Carlos Lacasa.

Consul-Gen., J. M. Torroja, 40 Trinity Square, E.C.

A Kingdom situate in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.-9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,371 miles—712 formed by the Mediterranean and 659 by the Atlantic. It was formerly divided into 14 kingdoms (now forming 49 provinces); the ancient Provinces still best understood are New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary Isles and the Balearic Isles (Majorca and Minorca), comprising a total area of 196,173 English square miles, and a population (at the census of 1900) of 18,618,086. The principal towns are Madrid (pop., 540,000), Barcelona (533,000), Valencia (214,000), Seville (150,000), Malaga (130,000), Murcia (112,000), and Saragossa (100,000); and there are also twelve other towns with over 50,000 inhabitants. The Constitution upon which the present government is formed is dated 30 June, 1876. The interior of the peninsula consists of an elevated tableland, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton,

spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, cattle, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany and the United States are now competing for a share. Home manufacture is rigidly protected by high customs duties.

The mercantile marine in 1905 consisted of 157 sailing vessels over 100 tons, and 515 steam vessels of a total tonnage of 711,599; during 1906 vessels of 17,344,980 tons entered, and of 17,965,581 tons cleared at Spanish ports; 4,367,559 tons of cargo were landed, and 13,678,707 tons were shipped.

Nearly all the 49 Provinces are now connected by railways, of which about 11,268 miles of normal gauge were open in 1906; there are 18,000 miles of telegraph.

The principal exports to the United Kingdom in 1906 were:—

Copper	£1,858,395	Raisins	£481,989
Cork	215,754	Pyrites	1,003,803
Fruit, Preserved	193,461	Quicksilver	260,270
Grapes, Raw	494,488	Esparto, &c.	288,033
Oranges	1,825,173	Onions	456,838
Iron Ore	5,029,965	Silver Ore	144,868
Lead	1,889,976	Wine	396,445
Nuts (Inc. Almonds)	402,210		

And the chief domestic imports from the United Kingdom in 1906 were:—

Chemicals	£333,775	Manure	£710,374
Coal and Coke	1,358,678	Metals, all sorts ..	434,225
Cotton Manufacts.	245,202	Wool	246,666
Machinery, all sorts	468,785	Yarn, Jute & Linen ..	123,878

Defence (for Army, see p. 638).

The Navy was almost entirely destroyed during the war of 1897 with the U.S.A., and there now remain one second-class battleship of 10,000 tons, the *Pelayo* (1886); a cruiser of 10,122 tons, the *Carlos V.* (1895), and three of 7,000 tons, the *Cardinal Cisneros* (1897), *Cataluña* (1900), *Princesa de Asturias* (1896); two old armoured coast defence ships of 7,300 tons, *Numancia* (1863) and *Vitoria* (1865); the royal yacht *Giralda*, 2,057 tons; four cruisers of over 1,000 tons, four destroyers, three training ships, and small craft.

Education (see pp. 643-4).

SPANISH OVER-SEA POSSESSIONS.

The over-sea possessions are regarded as an integral part of Spain, the head-quarters of the local administration being Teneriffe, in the

Canary Islands. In the Gulf of Guinea, the island of FERNANDO PO, and ANNOBOM, CORISO and ELOY islands off the coast of French Congo. On the mainland CAPE SAN JUAN and the right of navigation over the rivers Benito and Muni, with the district bounded on the north by the German Cameroons, on the east by the 9th meridian E. of Paris, and on the south by the Muni river, while the district between Capes Bojador and Blanco is under protection. To the north-west are the CANARY ISLES (area about 3,000 square miles, population 334,521), the capital being Santa Cruz (Tenerife). In Morocco are several "Presidios"; *IFNI, near Cape Non, TETUAN and CEUTA (30 square miles, population 16,000), opposite Gibraltar, and the coast towns of Gomera, Allucemas, Melilla, and the Zafarin Islands. The total area of these possessions is about 244,000 square miles, with a population of about 135,000.

SWEDEN, KINGDOM OF.

King of Sweden of the Goths and the Vandals, Oscar II., born 21 January, 1829; suc. 18 September, 1872; married 6 June, 1857, Sophia, daughter of the late Duke William of Nassau, born 9 July, 1836 (and has issue, 4 sons).

Heir Apparent, Oscar Gustaf Adolf, Duke of Wärmaland, Crown Prince, b. 16 June, 1859; mar. 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, born 7 August, 1862.

Prime Minister, S. A. A. Lindman.

Foreign Affairs, Eric B. Trolle.

Minister of Justice, G. A. Peterson.

War, Major-General L. Tingsten.

Navy, Rear-Admiral W. Dyrssen.

Interior, J. Juhlin.

Finance, C. J. G. Swartz.

Instruction, A. H. Hammarskjöld.

Agriculture, A. Petersson.

Ministers sans portefeuille, C. F. W. Hederstierna and G. W. A. Roos.

Envoy Ext. and Minister Plenipotentiary in London, Count H. Wrangel. Legation, 73 Portland Place, W.

Councillor of Legation, Bon C. A. Beck-Friis.

Naval Attaché, Lieut.-Comm. J. C. Schneider.

Chancellor of Legation, J. G. Kihlman.

Consul-General, D. Danielsson, 10 Lloyds Avenue, E.C.

Vice-Consul, C. W. Espersson.

The Kingdoms of Sweden and Norway were united under one sovereign from 1814 until the dissolution of the union in 1905.

Sweden comprises the eastern half of the Scandinavian peninsula, and, except the capital, is divided into 24 governments, "Län," with an area of 172,876 square miles, and a population, 31 Dec., 1905, of 5,337,055, nearly all Protestant. Nearly 54 per cent. of the population are devoted to agriculture, about 246,000 being owners and 44,000 tenants of the land they cultivate. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kölen Mountains, which separate Sweden from Norway; and may be divided into three separate

districts—the northern, forest; central, mining; the southern, agricultural. The lakes cover about one-twelfth of the surface. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes. The forests are very extensive, covering one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and also the chief fuel. The mineral products are extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scauia. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, hides, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c. The chief domestic exports to Great Britain in 1904 were butter, iron, paper and paper-making materials, and timber; and the chief domestic imports from Great Britain in 1904 were coal, machinery, metals, wool and woollen manufactures.

Commercial travellers in Sweden are compelled to take out a licence, costing 100 crowns a month, or they incur the risk of being fined.

Railways 8,080 miles in length (of which 2,605 are the property of the State) were open at the end of 1906; and 15,275 miles of telegraph (exclusive of 4,846 railway telegraph), 179 stations, and 1,530 railway and 725 other telegraph stations (1905). There were at the same date about 156,000 miles of telephone wires.

Defence (for Army, see p. 638). The Navy consists of 80 fighting vessels (457 guns), 24 being ironclads, with some training ships, &c.

* At his trial at Gibraltar, Major Spillbury, relying (a) on the Treaty of Tetuan, 1859, and (b) on "common knowledge" as demonstrated by the above entry in Whitaker's Almanack, pleaded that Ifni was a Spanish Possession. The court-martial decided, however, that Ifni was part of the dominions of the Sultan of Morocco.

* Expended in the construction of railways.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 84' N. lat. and 5° 58'–10° 30' E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1847, and comprises a total area of 15,469 square miles, with a population of about 3,313,000 in 1901, who are divided between Roman Catholics, 40 per cent., and Protestants, 59 per cent., Jews numbering 7,400 and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansch (in the Grisons), 1½ per cent. The most important cities are Zürich, pop. (1901) 150,000, Geneva 105,000, Basle 113,000, Bern 64,000, and Lausanne 56,000. It is the most mountainous country in Europe, having

the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, &c.; clocks and watches have long been the staple products of Geneva and Neuchâtel, while leather, gloves, pottery, tobacco and snuff, cheese, &c., are made. Being an inland country, the direct trade with the United Kingdom is comparatively small. In 1899 there were 2,396 miles of railway in working order, and 4,384 miles of telegraph.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 147 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of £720; the Vice-President and other members of the Federal Council £480 each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council. (For Defence, see p. 638; for Education, see p. 644.)

TRIPOLI.

Governor-General, Field-Marshal Rejeb Pasha, appointed August, 1904.

A Vilayet, or Province of the Ottoman Empire, on the northern coast of Africa, and the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast line of nearly 1,200 miles, and inland to the south a distance of about 800 miles. Formerly (1713-1835) it was under a native (Karamanly) dynasty, and passed under direct Turkish control in 1835. It comprises the four sub-provinces or Mutesarrifliks of Tripoli, Khoms, Jabel-el-Gharb and Fezzan, and also of Benghazi or Cyrenaica, the latter being under the direct government of Constantinople since 1875. It has an area of 420,000 square miles, and a population of over 1,000,000 in Tripoli proper and Cyrenaica. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years. The military force of the country now numbers 10,000 men. The revenue is chiefly raised by a poll-tax, regulated according to the wealth of each individual, and by tithes, but steps are being taken to co-ordinate the incidence of taxation with that obtaining in other parts of Turkey. Barley, dates, olives, oranges, lemons and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli; but the caravan trade, once the mainstay of the country, has seriously diminished of late years. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, cattle and horses. The ancient ruins in Cyrenaica, i.e., at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli; agricultural colonies of Cretan Moslem refugees are being formed in the neighbourhood of Cyrene and Apollonia (Marsa Susa). The town of Benghazi has a population of about 21,000, consisting of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests.

	1904.	1905.	1906.
Total imports	£361,000	£443,600	£429,800
Total exports	386,500	377,400	370,100
Imports from U.K.	84,500	89,800	86,200
Exports to U.K.	175,000	137,920	157,700

TUNIS.

(French Protectorate.)

Bey, Mohamed en-Nasir Bey; born 1855; suc. 12 May, 1906.	
Heir Apparent, Mohamed Ben Mahmoud Bey.	
French Resident-General, Gabriel Alapetite (7 Feb., 1907).	

The Regency of Tunis—the ancient Libya—was occupied (it is believed) by the Phœnicians

so far back as the 14th century B.C.; by the Romans in 146 B.C.; by the Vandals in 439 A.D.; and by the Arabs in 698 A.D. This latter period witnessed a succession of powers—Berber (1048), Spanish (1535), Turkish (1573), and Husseinite (1705). Finally, by the Treaty of "The Bardo" (12 May, 1881), the Regency passed into the hands of France, and is under the control of a French Resident General. By its terms the occupation is to terminate when both French and Tunisian authorities mutually recognise that the local Government is capable of maintaining order. By a convention of 18 Sept., 1897, all previously executed treaties and conventions between the U.K. and France were extended to Tunisia, and Article 2 of this convention, dealing with British cotton goods, remains in force up to the end of 1912. By convention of 10 July, 1882, the Bey is granted a civil list of £37,500, and the Beylical princes £30,000. The Regency of Tunis lies almost midway on the Mediterranean coast of North Africa. Area, 44,920 square miles. Population, 1,800,000. Exports: Barley, beans, blankets, bran, carpets, cork, dates, esparto grass, Fez caps, goats, hides, lead, oats, olive oil, sheep, silk goods, tan bark, tunny fish, wheat, wine, wool, zinc, &c. Imports: Alcohol, boots and shoes, building material, clocks and watches, coal, cotton goods, cars and carriages, flour, glassware, hardware, milk (condensed), motors, rail and tram cars, wrought-iron, and steel.

The chief town, Tunis (pop. 176,500, composed of—Moslems 100,000, Jews 50,000, French 9,000, Italians 12,000, Maltese 5,000, &c. 1,500), is an inland port, with a basin of 1,800 square metres with 21½ feet of water, 1,875 feet of quays, cranes up to 20 tons, connected with the sea by a canal 10 kilometres long, 98 feet wide, and dredged to 21½ feet. Port dues 1 fr. per ton (phosphates 50 c.), harbour dues 30 c., sanitary dues 18 c. N.E. of Tunis is the site of ancient Carthage (15 kilometres). There are 713 miles of railroad and 3,906 of telegraph.

President of Council of State, Hassan Fehmi Pasha.

Mines and Forests, Selim Pasha Melhamé.
Police, Shefik Pasha.
Director Gen. of Customs, Raif Pasha.

Turkish Ambassador to France, Salih Munir Pasha; *Russia*, Husni Pasha; *Germany*, Tewfik Pasha; *Austria-H.*, Mahmoud Nedim Pasha; *Italy*, Mehemed Reshid Bey; *U.S.A. (Minister)*, Mehemed Ali Bey.

Ambassador in London, S. Musurus Pasha Vezir, 69 Portland Place, W.

Councillor of Embassy, Abdul Hak Hamid Bey.
1st. Secs., Essad Bey; Tueni Bey.
and do., Abdul Hak Hussein Bey
3rd do., Daniel Bey.
Hon. Attaché, Lucien Morel Bey.
Naval Attaché, Captain Mahmoud Nedim Bey.
Imam, Mehmed Redjai Effendi.

Consul-General, Refet Bey, 140, Leadenhall Street Place, E.C.

The Ottoman Empire comprises an area of about 66,500 square miles in South Eastern Europe, about 680,000 square miles in Asia, and about 399,000 square miles in Africa, containing altogether about 25,000,000 inhabitants. The Sultan is also suzerain of Bulgaria, Bosnia and Herzegovina, Crete, Cyprus, Samos, and Egypt.

I. TURKEY IN EUROPE, formerly very extensive, is now reduced to 66,500 square miles, with a population (1901) of about 6,000,000, including about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,500,000 are Mohammedans. European Turkey comprises the vilayets of Adrianople, Salonika, Mouastir, Kossovo, Scutari, and Janina, together with the administrative district of Constantinople and the separate sanjak of Chatalja. The principal towns are Constantinople, the capital (pop. 1,100,000), Salonika (120,000), and Adrianople (80,000). A great part of the surface is covered with mountains of moderate elevation. The principal rivers are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, barley, millet, sesame and other oil seeds and tobacco; the natural products are the pine, beech, Valonia oak, oak, lime, and ash, with the palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls,

leather, firearms, with dyeing and printing works. About 1,200 miles of railway were open in 1901.

II. TURKEY IN ASIA, the larger of the two divisions, has a total area of 680,000 square miles, and an estimated population of nearly 17,000,000 inhabitants. *Asia Minor* (pop. about 9,400,000) comprises the following vilayets: Broussa, Smyrna, Castamouni, Angora, Konia, Adana, Sivas, Trebizond, the islands of the Archipelago, and the Mutessarifats of Ismid and Bigha; in *Armenia* (pop. about 2,500,000) the vilayets of Erzeroum, Mamouret-ul-aziz (Kharput) Diarbekir, Bitlis and Van; in *Arabia* (pop. about 2,500,000) Mossul, Baghdad, Basra, Hedjaz and Yemen; in *Syria* (pop. about 3,250,000) Aleppo, Zor, Syria and Beyrout, with Jerusalem (see pp. 603-4) and Lebanon. The principal towns are Smyrna (200,000), Baghdad (145,000), Damascus (200,000), Aleppo (125,000), and Beyrut (120,000).

In ARABIA the Turkish *Pashalik* of Basra extends N.W. to Ali Garbi on the Tigris and Kalat-al-Daraj on the Euphrates. The higher basins of these rivers form the *Pashalik* of Baghdad, which extends to Syria and Kurdistan. Not far from the city of Baghdad (pop. 180,000) is Kerbela, the most sacred centre of pilgrimage for the Shia (Persian) Mohammedans. The trade of the Shat-el-Arab and its branches is considerable; much of it is carried by the vessels of the (British) Euphrates and Tigris Steam Navigation Company. The foreign trade is mainly done by the British India Steam Navigation Company. The exports from Bussorah and Baghdad in 1904 were valued at £1,306,000, and the imports at £1,261,000. Beyond these deserts are the Turkish provinces of the *Hejaz* and *Yemen*. The *Hejaz* includes the sacred cities of Mecca and Medina, the home of Mohammed, with the port of Jeddah (pop. 40,000), the mainstay of which is the pilgrim traffic. In 1904 the imports were £1,405,000, and the exports £25,000. The trade with India is large and increasing. The Damascus-Mecca railway has reached the Hejaz. In *Yemen* are the towns of Sanaa, Assir, and Taiz. During 1905 Yemen was the scene of a serious rebellion. Hodeida (pop. 33,000), its chief port, had a total trade of £918,000 in 1904. Rebellion, piracy, cholera, and famine interfered with business. Coffee is the principal export. Jeddah and Hodeida have a considerable trade. The Sinai peninsula belongs politically to Egypt.

In AFRICA, Turkey rules Tripoli and Barka (see p. 624).

Commerce.—The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank. Since the establishment of the Anatolian railway by German enterprise, the export of cereals, chiefly malting barley, has largely increased. The British Chamber of Commerce was established at Stamboul, Constantinople, in 1887, with branches at Smyrna and Salonika, and in the North of England (Manchester); *Pres.*, Sir Adam Block, K.C.M.G.; *Sec.*, H. E. Mountain. The commercial marine of Turkey consisted in 1901 of about 180 steamers, 60,000 tons, and 200 sea-going sailing vessels, 50,000 tons.

There are British Post-offices at Constantinople, Salonica, Smyrna, Beirut, and Baghdad.

The principal domestic exports to the United Kingdom in 1900 were corn, fruit, wool, and mohairs, and the chief domestic imports from the United Kingdom in 1900 were coal, Manchester goods, metals, and woollens.

Defence (for Army, see p. 638). In 1906 the Navy consisted of 50 ships (including 16 armoured vessels) and 40 torpedo craft; of which only 5 armoured and 2 unarmoured vessels, with 20 torpedo craft, are fairly modern and fit for service. It has a total peace force of about 15,000 men. Besides this, there is the Makhussa Fleet of about 75 steamers of various sorts, worked by the Government and available as transports, storeships, and coastguard cruisers.

Education (see p. 644).

Finance.—The Budget of the Turkish Empire is not published officially, but the revenue for the year 1906-7 is estimated at about £18,680,000. The external debt of Turkey in September, 1907, amounted to £79,306,624, necessitating an annuity of £3,455,618 for the service of interest and sinking fund. The floating debt is unknown, but it is estimated at about £13,000,000. The Russian war indemnity continues to be paid off at the rate of £318,181 per annum, the amount still outstanding being £21,520,000.

Turkish Debt (Loans).....	£79,306,624
Floating Debt	13,000,000
Indemnities owed	21,520,000
Total Imports, 1900	21,050,000
Total Exports, 1900	14,030,000

A Federal Republic, consisting of 45 partially independent States, 5 organized and 2 unorganized Territories, occupies the central portion of North America, between the Atlantic and Pacific Oceans, in lat. 25°–49° N. and long. 67°–124° 30' W., and also the territory of Alaska and the island of Hawaii. The area is estimated at 3,622,933 square miles, of which rivers and lakes cover 55,562 square miles, excluding the water area of Alaska and Hawaii. This area includes the vast district of Alaska, in the extreme northwest of the continent, purchased from Russia 18 October, 1867, comprising 590,884 square miles. About one-third of the country is estimated to be in a state of cultivation. The population of the whole of the States and Territories, according to the Census of 1900, was 76,356,000. In 1890 the Indians on reservation numbered 133,417; off reservation, 115,836 (including 58,806 civilised Indians); Chinese, 107,475; Japanese, 2,039; and Alaska, 32,052 (23,531 Indians). The increase in the ten years, 1880–1890, was 12,466,467, and 1890–1900, 13,018,609, exclusive of certain districts above alluded to.

Its coast-line on both oceans is reckoned to have a length of about 13,200 miles, excluding the numerous bays and sounds, besides 3,620 miles on the great lakes. The principal river is the mighty Mississippi-Missouri, formed by the confluence of these two noble streams, traversing the

whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt and lead, which in Missouri, Colorado, and Idaho appears inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. California produces silver, copper, and lead, and gold in large quantities.

Finance.—The financial condition of the United States of America exerts a great influence on that of other nations. The following is a statement of the debt on 1 Oct., 1906 and 1907:—

	1906.	1907.
2 % bonds	\$625,942,350	\$676,250,150
3 % bonds	63,945,460	63,945,460
4 % bonds and certificates	235,271,390	118,489,900
On which interest has ceased	1,126,375	8,272,545
Bearing no interest	399,173,714	400,592,067
Certificates & Treasury notes offset by cash	1,067,323,869	1,200,319,869
Total debt	\$2,392,783,158	\$2,467,869,991
Less cash and reserve in Treasury	1,438,536,965	1,589,871,183
Actual indebtedness	\$954,246,193	\$877,998,808

MERCANTILE MARINE.—On July 1, 1907, it consisted of 24,911 vessels, of which 10,050 were steamers, and 14,861 other than steamers, the total gross tonnage being 6,938,794.

COMMERCE OF THE UNITED STATES.

Merchandise only (provisional figures for 1997).

YEAR.	EXPORTS.	IMPORTS.	TOTAL.
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>
1792	...	...	20,753,998
1892	1,030,278,148	827,402,462	1,857,680,610

1899	1,227,023,302	697,148,489	1,924,171,791
1900	1,394,483,082	849,941,184	2,244,424,266
1901	1,487,764,991	823,172,165	2,310,937,156
1902	1,381,719,401	903,320,948	2,285,040,342
1903	1,420,141,679	1,025,719,237	2,445,860,916
1904	1,460,827,271	991,087,371	2,451,914,642
1905	1,518,561,666	1,127,513,071	2,636,074,737
1906	1,743,864,500	1,226,562,446	2,970,426,946
1907	1,880,891,078	1,434,421,425	3,315,272,503

The total domestic exports for the last four fiscal years ending June 30 have been: 1904, \$1,435,179,017; 1905, \$1,491,744,641; 1906, \$1,717,953,382; 1907, \$1,853,718,034.

RAILWAYS. For the year ending June 30, 1904, the length of single track mileage was 213,904 miles, an increase of 5,227 since 1903. The mileage of tracks of all kinds for which operations were reported (including 212,243 miles of single track) was 297,073, increase 13,252 miles, and the gross earnings \$1,975,174.02; the number of railway employees was 1,296,121.

POSTAL.—The number of Post Offices in the United States, June 30, 1907, was 62,659. The postal revenue (1904) was \$143,582,624. The number of inland money orders issued was 50,712,168, and the amount \$383,452,373. Of international money orders the number issued was 1,888,730, value \$37,876,265; postal expenditure, \$152,362,116.

PRECIOUS METALS.—The Director of the U.S. Mint estimates the (1906) production of gold at 4,565,333 fine oz. (\$94,373,800), silver 56,517,900 fine oz. (\$38,256,400 commercial value), the total value therefore being \$132,630,200.

TERRITORIAL EXPANSION.

In the year 1898 the U.S.A. became involved in war with Spain on account of the unsettled state of affairs in the neighbouring island of Cuba. The result of the war was the freedom of that island from Spanish control and the cession of the Philippine Islands and the Island of Guam.

the island of Puerto Rico, which was captured during the war, being retained; these conditions were confirmed by a Treaty of Peace signed at Paris (10 Dec., 1898). During the year the independent islands of the Hawaiian group were annexed by a resolution of Congress; and in 1899, under the provisions of the Samoan Convention, those islands of the Samoan Archipelago not annexed by Germany fell to the share of the U. S. A.

In a few months, therefore, the U.S.A. assumed the responsibility of a vast over-sea dominion, with between 9,000,000 and 10,000,000 inhabitants.

Hawaii is a group of islands in the N. Pacific in lat. 19° to $22^{\circ} 15' N.$, and long. $154^{\circ} 48'$ to $160^{\circ} 20' W.$, with a total area of about 6,600 sq. miles, and a population of about 100,000 (75,000 Hawaiians, 24,000 Japanese). The capital is Honolulu in Oahu, pop. about 30,000.

The Samoan Islands.—By the Anglo-German agreement of 14 Nov., 1899, the island of Tutuila and all other islands in the Archipelago east of 175° E. long. were reserved to the U.S.A.

In the West Indies: The Island of PUERTO RICO, captured during the war, has an area of about 3,600 square miles, and 953,243 inhabitants; the capital, San Juan, has a population of 32,048, Ponce (27,952) and Mayaguez (15,187) being also towns of importance. The products are sugar, coffee, and tobacco.

In the East Indies : The PHILIPPINE ISLANDS have an area of about 115,026 square miles, with a population (1903) of 7,635,426 (civilised, or partly so, 6,987,686; wild and uncivilised 647,740). The capital is Manila, in the island of Luzon (population 219,928), other large towns being Laoag (34,459), Lipa (37,943), Bauan (39,094), Batangas (33,131). The principal products are hemp, sugar, coffee, indigo, and copra, in addition to the tobacco plant, which is extensively grown in the island of Luzon. The total trade in 1903 was \$33,813,384 for imports, and \$32,396,746 for exports.

Guam, the largest island of the Ladrone (or Marianne) group, is situated in 143° E. and 14° N., and has an area of about 224 square miles, with about 10,000 inhabitants. The capital is Agaña.

FEDERAL CAPITAL, Washington (3,850 miles from London). Pop. 1900, including the District of Columbia), 278,718.

New York (pop. 3,437,202), transit. 5-6 days; Philadelphia (pop. 1,293,697), 6½ days; San Francisco (pop. 342,782), 11 days; Chicago (pop. 1,698,575), 8 days. There are also three cities with over 500,000, four with over 300,000, eight with over 200,000, and thirteen with over 100,000 inhabitants. Distance, New York to Liverpool, about 3,100 miles.

THE following are the values, according to the British standard, of the commoner measures of length, surface, capacity (dry and liquid), and weight in use in foreign countries. Those measures which appear in italics may be regarded as obsolete. The chief authorities which have been consulted are Siegfried's "Münz-, Maass-, und Gewichts-Tabelle" (Leipzig), and Dr. W. A. Browne's "Merchants' Handbook" (Stanford, London). To the latter, inquirers may be referred for fuller information.

The Metric System is fully given on p. 448.

Annam (Cochin China).

1 Tak	=	1'92 inches.
1 Thuok	=	19'2 inches.
1 Truon (2 Ngu)	=	16'0 feet.
1 Saô	=	24'0 feet.
1 Maô	=	240'0 feet.
1 Li, or Mile	=	486'0 yards.
1 Dam	=	972'0 yards.
1 square Saô	=	64'0 sq. yards.
1 Haô	=	6'222 gallons.
1 Shita, or Taô	=	12'444 gallons.
1 Fan (10 Li)	=	6'015 Tr. grains.
1 Lmông (10 Dong) ...	=	601'562 Tr. grains.
1 Khan	=	1'375 lb. av.
1 Yen	=	13'75 lb. av.
1 Binah	=	68'75 lb. av.
1 Ta	=	137'5 lb. av.
1 Kwan	=	687'5 lb. av.

Argentine Republic.

The Metric System.

1 Pie (12 Pulgada)	=	11'365 inches.
1 Vara (3 Pie)	=	2'84 feet.
1 Braza (2 Vara)	=	5'682 feet.
1 Cuadra (150 Vara) ...	=	142'065 yards.
1 Legua (40 Cuadra) ...	=	3'228 miles.
1 Quintal	=	90'251 lb. av.

Austria-Hungary.

Metric, by compulsory law of Jan. 1, 1876.

1 Faust or Hand	=	4'148 inches.
1 Fuss (12 Zoll)	=	1'037 feet.
1 Elle	=	30'613 inches.
1 Vienna Klafter ...	=	2'874 yards.
1 Post Mile	=	4'713 miles.
1 square Fuss	=	1'075 sq. feet.
1 square Klafter	=	4'301 sq. yards.
1 Joch	=	1'422 acres.
1 Metze	=	1'692 bushels.
1 Muth (30 Metze) ...	=	6'347 quarters.
1 Mass	=	1'246 quarts.
1 Eimer	=	12'463 gallons.
1 Loth	=	9'877 drams av.
1 Pfund (32 Loth) ...	=	1'234 lb. av.
1 Centner	=	123'472 lb. av.

Belgium.

The Metric System.

1 Pied (10 Pouce) ...	=	11'811 inches.
1 Aune (4 Pied)	=	3'937 feet.
1 Toise (6 Pied)	=	5'905 feet.
1 Perche (10 Pied) ...	=	9'842 feet.
1 Arpent	=	38750'02 sq. feet.
1 Pot	=	'880 pint.
1 Muid	=	88'097 pints.
1 Boisseau	=	3'303 gallons.
1 Livre	=	1'102 lb. av.
1 Quintal	=	110'231 lb. av.

Bolivia.

As old Spanish (*q.v.*).

Brazil.

1 Pollegada (12 Linha) =	1'093 inches.
1 Pé (12 Pollegada)	13'123 inches.
1 Covado	26'247 inches.
1 Vara	1'215 yards.
1 Braca	2'430 yards.
1 Estadio	285'235 yards.
1 Milha	1'296 miles.
1 Legoa	3'889 miles.
1 square Vara	1'476 sq. yards.
1 square Braca	5'906 sq. yards.
1 Geira	1'476 acres.
1 Oitavo	'380 gallon.
1 Alqueira (Bahia)	'825 bushel.
1 Alqueira (Rio)	1'1004 bushels.
1 Fanga	1'523 bushels.
1 Quartilho	'614 pint.
1 Canada (Rio)	2'44 quarts.
1 Almuda	3'684 gallons.
1 Oitavo	55'335 Tr. grains.
1 Onca	442'687 Tr. grains.
1 Arrázel	1'0118 lb. av.
1 Arroba	32'379 lb. av.
1 Quintal (100 Arrázel) =	101'186 lb. av.

And the Metrical System.

Bulgaria, As Turkish (*q.v.*).

The Metric System is also used.

Burmah.

As Indian (*q.v.*); and,

1 Pulgat	=	1'0 inch.
1 Taim, or Maik (8 Thit) ...	=	5 5 inches.
1 Tounge or Saading (4 Taim) ..	=	22 0 inches.
1 Lan (4 Tounge).....	=	88 0 inches.
1 Tha (7 Tounge)	=	154 0 inches.
1 Okethapah	=	85 56 yards.
1 Tain	=	1069 44 yards.
1 Dain (4 Tain)	=	2 430 miles.
1 Uzena	=	15'555 miles.
1 Lamyet.....	=	1'0 gill.
1 Salay	=	1'0 pint.
1 Sah	=	1'0 gallon.
1 Saik	=	1'0 peck.
1 Teng	=	1'0 bushel.
1 Coyan (100 Teng)	=	12 5 quarters.
1 Large Ruay.....	=	3'937 Tr. gr.
1 Bai, or Anna	=	15'75 Tr. gr.
1 Moo	=	31'5 Tr. gr.
1 Mat	=	63'0 Tr. gr.
1 Tikal, or Kyat	=	252'0 Tr. gr.
1 Viss, or Piakthah.....	=	3'6 lb. av.

Chile.

The Metric System, and,

1 Vara (3 Pie)	=	33'367 inches.
1 Cuadra	=	3'9 acres.
1 Arroba (wine)	=	7'749 gallons.
1 Quintal (100 Libra) ...	=	101'42 lb. av.

Also as old Spanish (*q.v.*).

China.

1 Ts'un (10 Fan).....	=	1'41 inches.
1 Ch'ih (10 Ts'un).....	=	14'1 inches.
1 Chang (10 Ch'ih).....	=	141'0 inches.
1 Yin (10 Chang).....	=	117'5 feet.
5 Ch'ih.....	=	1'0 Kung.
2 Kung.....	=	1'0 Chang.
1 sq. Chang (1 Ching)...	=	121'0 sq. feet.
15 Ching (1 Chüo).....	=	1815'0 sq. feet.
4 Chüo (1 Mou).....	=	7260'0 sq. feet.
100 Mou (1 Ch'ing).....	=	72600'0 sq. feet.
1 Ho.....	=	2'0 pints.
1 Shêng (10 Ha).....	=	circ. 20 pints.
1 Tou (10 Shêng).....	=	circ. 100 pints.
1 Tael, or Liang.....	=	1'333 oz. av.
1 Chin, or Chitty (16 Tael).....	=	1'333 lb. av.
1 Picul, or Tan (100 Chin).....	=	133'333 lb. av.

British weights and measures also are used at Hong Kong and other Treaty Ports.

Colombia.

The Metric System since 1857. Previously, and still occasionally, the old Spanish.

Denmark.

1 Tomme (12 Linie).....	=	1'029 inches.
1 Fod (12 Tomme).....	=	1'029 feet.
1 Alen (2 Fod).....	=	2'059 feet.
1 Favn (3 Alen).....	=	6'178 feet.
1 Rode (2 Favn).....	=	12'356 feet.
1 Mil (2000 Rode).....	=	4'680 miles.
1 square Fod.....	=	1'060 sq. feet.
1 square Rode.....	=	16'965 sq. yards.
1 Tonde.....	=	1'363 acres.
1 Pægle.....	=	1'247 pint.
1 Flaske (3 Pægle).....	=	1'2743 pints.
1 Pot (3 Pægle).....	=	1'6991 pints.
1 Kande.....	=	3'398 pints.
1 Viertel (4 Kande).....	=	1'6991 gallons.
1 Anker.....	=	8'0799 gallons.
1 Tonde (136 Pot).....	=	28'885 gallons.
1 Oxeoved.....	=	48'425 gallons.
1 Fad.....	=	193'702 gallons.
1 Skeppe.....	=	4'778 bushel.
1 Fjerdingkar.....	=	9'557 bushel.
1 Tonde.....	=	3'823 bushels.
1 Læst.....	=	45'876 bushels.
1 Lierpfund.....	=	17'63 lb. av.
1 Pfund.....	=	15'00 Tr. oz.
1 Centner.....	=	100'21 lb. av.

Dutch Indies. Java.

1 Duim.....	=	1'3 inches.
1 Foot.....	=	12'36 inches.
1 Ell.....	=	27'082 inches.
1 Djong (4 Bahu).....	=	7'0149 acres.
1 Sack.....	=	61'034 lb. av.
1 Pecul (2 Sack).....	=	122'068 lb. av.
1 Timbang (5 Pecul).....	=	610'340 lb. av.
1 Cayan (30 Pecul).....	=	3662'042 lb. av.
1 Kan.....	=	328 gallon.
1 Leager.....	=	127'337 gallons.
1 Tael.....	=	1'0848 lb. av.
1 Catty (16 Tael).....	=	1'356 lb. av.
1 Pecul (weight).....	=	135'631 lb. av.
1 Large Bahar.....	=	1831'021 lb. av.
Commercial Pound.....	=	7576 Tr. grains.

Sumatra.

1 Tempo.....	=	4'5 in.
1 Junkal.....	=	9'0 in.
1 Eito.....	=	18'0 in.
1 Hailoh.....	=	1'0 yard.
1 Tung.....	=	4'0 yards.
And as in Netherlands.		

Ecuador.

Metric since 1857, and as old Spanish (q.v.).

Egypt.

1 Kirat.....	=	1'125 inches.
1 Rub (6 Kirat).....	=	6'75 inches.
1 Draa, or Pike.....	=	27'0 inches.
1 Draa Istambuli.....	=	26'654 inches.
1 Draa Belendi.....	=	22'736 inches.
1 Endasch.....	=	25'134 inches.
1 Pike Nili.....	=	21'287 inches.
1 Nubian Draa.....	=	26'654 inches.
1 Gasab.....	=	3'0 yards.
1 Peddan (400 sq. Gasab)...	=	1'1019 acres.
1 Ardeb (Alexandria).....	=	7'4457 bushels.
1 Ardeb (Cairo).....	=	4'9246 bushels.
1 Ardeb (Rosetta).....	=	7'8131 bushels.
1 Ardeb (Nubia).....	=	5'0069 bushels.
1 Morrhi (12 Maud).....	=	7'703 bushels.
1 Dirhem.....	=	47'661 Tr. gr.
1 Uckieh (12 Dirhem).....	=	571'938 Tr. gr.
1 Rottolo (12 Uckieh).....	=	1'9804 lb. av.
1 Cantar (100 Rottoli).....	=	98'046 lb. av.
1 Oka (400 Dirhem).....	=	2'723 lb. av.
1 Trade Oka (420 Dirhem).....	=	2'859 lb. av.
1 Kirat (jewels).....	=	2'9788 Tr. gr.
1 Metikal.....	=	71'492 Tr. gr.

France.

Metric System, and old "Système Usuel."

1 Pied (10 Pouce).....	=	11'8112 inches.
1 Aune (4 Pied).....	=	3'937 feet.
1 Toise (6 Pied).....	=	70'864 inches.
1 Perche (10 Pied).....	=	118'1123 inches.
1 Pot.....	=	1'8809 pint.
1 Brande.....	=	22'048 pints.
1 Muid.....	=	88'097 pints.
1 Livre.....	=	1'1023 lb. av.
1 Quintal.....	=	110'231 lb. av.
1 Barrique (Bordeaux).....	=	401'28 pints.
1 Barrique (Marseilles).....	=	394'24 pints.
1 Millerole.....	=	112'64 pints.
1 Pièce (Bordeaux).....	=	668'8 pints.
1 Pipe.....	=	1091'2 pints.
1 Tonneau.....	=	2204'6 lb. av.

Germany.

The Metric System was legalized throughout the Empire, Jan. 1, 1872, but French nomenclature is as far as possible avoided. The millimètre is also called Strich; the centimètre, Neu Zoll; the mètre, Stab; the décimètre, Kette; the litre, Kanne; the half-litre, Schoppen; the hectolitre, Fass; the décalitre, Neu Loth; the half-kilogramme, Pfund. The Centner is 50, and the Tonne is 1,000 kilogrammes. The chief obsolete measures are:—

Prussian Fuss (12 Zoll).....	=	1'0297 feet.
Elle.....	=	2'1881 feet.
Ruthe.....	=	4'1188 yards.
Melle.....	=	4'6805 miles.
Morgen.....	=	2'5207 roods.
Hufe (30 Morgen).....	=	18'929 acres.
Metze.....	=	3'024 quarts.
Scheffel (4 Viertel).....	=	1'512 bushels.
Tonne.....	=	756 gr.
Last (60 Scheffel).....	=	11'340 gr.
Ossel.....	=	1'007 pints.
Anker (60 Ossel).....	=	7'559 gallons.
Ohm (2 Eimer).....	=	30'237 gallons.
Fuder.....	=	181'422 gallons.
Zollpfund (30 Loth).....	=	1'1023 lb. av.

Germany—continued.

Prussian Old Pfund	=	7217886 Tr. gr.
Saxon Fuss	=	11'1494 inches.
" Stab	=	44'5976 inches.
" Scheffel	=	2'892 bushels.
" Kanne	=	1'647 pints.
" Fass (2 Oxhoft)	=	88'937 gallons.
Hanoverian Fuss	=	11'5 inches.
" Last	=	10'284 qt.
" Anker (4 Viertel)	=	8'570 gallons.
Brunswick Fuss	=	11'235 inches.
" Anker (10 Stubschen)	=	8'24 gallons.
Oldenburg Fuss	=	11'649 inches.
" Anker (26 Kanne)	=	7'860 gallons.
Baden Fuss	=	11'811 inches.
" Maass	=	1'320 quarts.
" Pfund	=	1'023 lb. av.
Württemberg Fuss	=	'9399 foot.
" Pfund (32 Loth)	=	1'031 lb. av.
Hamburg Fuss	=	11'2825 inches.
" Anker	=	7'9735 gal.
" New Pfund	=	1'023 lb. av.
Bremen Fuss	=	11'3919 inches.
" Anker	=	7'8 gallons.
Lubeck Fuss	=	11'323 inches.
" Anker	=	8'006 gallons.
" Pfund (32 Loth)	=	1'0725 lb. av.

Greece.

The Metric System was introduced by an ordinance of Oct. 26, 1832. In Greece, gramme = millimeter; daktulos = centimeter; palame = decimeter; pecheus = meter; stadion = kilometer; skionis = myriameter; stenna = are; kybos = milliliter; mystron = centiliter; kotyle = deciliter; litra = liter; koiilon = hectoliter; kokkos = centigram; obolos = decigram; drachme = gram; mna = $1\frac{1}{2}$ kilogram.

Hayti, as in France.

India.—Bengal.

Under "The Indian Weights and Measures Act, 1870," the standard of weight is the Ser (Kilogramme) = 2'20462 lb. av.; the standard of length is the metre = 3'280899 feet; and the standard of capacity is the Ser (litre) = 1'760773 pints, or 61'027046 cubic inches.

1 Moot (4 Ungulee)	=	3 inches.
1 Hâth (2 Ungulee) ..	=	18 inches.
1 Hyderabad Hâth	=	35'334 inches.
1 Guz	=	1 yard.
1 Coss	=	2000 yards.
1 Jojun	=	8000 yards.
1 Beegah	=	1600 sq. yards.
1 Beegah (N.W. Provs.) ..	=	3025 sq. yards.
1 Ser	=	2'20462 lb. av.
1 Ser	=	1'76195 pints.
1 Tola	=	180 Tr. grains.
1 Seer (16 Chittaks)	=	2'059 lb. av.
1 Factory Maund	=	74'66 lb. av.
1 Bazaar Maund	=	72'33 lb. av.
1 Imperial Maund	=	82'287 lb. av.
1 Masha (8 Ruttee)	=	15'0 Tr. grains.
1 Seer (4 Powah)	=	1'961 pints.
1 Maund (40 Seer)	=	9'8098 gallons.

Bombay.

1 Guz (24 Tussoo)	=	27 inches.
1 Beegah (20 Pund)	=	3927 sq. yards.
1 Seer (72 Tank)	=	7 lb. av.
1 Maund	=	28 lb. av.
1 Candy	=	560 lb. av.
1 Sattara Candy	=	3055 lb. av.

Madras.
English Measures, and,

1 Kole or Guz	=	33 inches.
1 Moolum	=	19 $\frac{1}{2}$ inches.
1 Puddee	=	2'8852 pints.
1 Mercal	=	2'8852 gallons.
1 Parah	=	14'4261 gallons.
1 Tola	=	180 Tr. grains.
1 Cutcha Seer	=	4320 Tr. grains.
1 Viss	=	3'0857 lb. av.
1 Maund	=	24'6857 lb. av.
1 Candy	=	493'7124 lb. av.

Italy.

The Metric System.

1 Roman Miglio (1000 Passo) ..	=	1627'783 yards.
1 Roman Scrozo	=	1381'648 sq. yd.
1 Roman Quaterello	=	1'012 bushels.
1 Roman Foggietta	=	'8015 pint.
1 Roman Boecella	=	3'201 pints.
1 Roman Denaro	=	18'2 Tr. gr.
1 Roman Oncia (24 Denaro) ..	=	436'2 Tr. gr.
1 Roman Libbra (12 Oncia) ..	=	7'477 lb. av.
1 Naples Miglio	=	1'1507 miles.
1 Naples Oncia	=	412'512 Tr. gr.
1 Sicilian Miglio	=	1625'793 yards.
1 Tuscan Miglio	=	1'0275 miles.
1 Lombard Miglio	=	1093'63 yards.

Japan.

1 Bu (10 Ring)	=	'1193 inch.
1 Sun' (10 Bu)	=	1'1931 inches.
1 Shaku (10 Sun)	=	11'931 inches.
1 Ken (6 Shaku)	=	5'965 feet.
1 Jo (10 Shaku)	=	3'314 yards.
1 Cho (60 Ken)	=	119'305 yards.
1 Ri (36 Cho)	=	2'44034 miles.
1 Kujirad Shaku	=	14'913 inches.
1 Cho	=	2'4507204 acres.
1 Tan	=	32'211526 sq. poles.
1 Se	=	118'61486 sq. yd.
1 Tsubo	=	3'9538289 sq. yd.
1 Shaku	=	98845723 sq. ft.
1 Sai (10 Sat)	=	003176 pint.
1 Shaku (10 Sun)	=	03176271 pint.
1 Go (10 Shaku)	=	3176271 pint.
1 Shô (10 Gô)	=	3'176271 pints.
1 To (10 Shô)	=	3'703389 gallons.
1 Koku (10 To)	=	4'9629237 bushels.
1 Fun (10 Rin)	=	5'797 Tr. grains.
1 Momme (10 Fun)	=	57'97 Tr. grains.
1 Rin (10 Mo)	=	0'5797 Tr. grains.

Malta.

1 Piede	=	11'166 inches.
1 Palmo	=	10'2757 inches.
1 Misura	=	41'103 inches.
1 Canina	=	2'283 yards.
1 Salma (16 Tumulo)	=	4'964 acres.
1 Salma	=	7'9372 bushels.
1 Pint	=	'8331 pint.
1 Barrile (wine)	=	9'35 gallons.
1 Libbra (12 Oncia)	=	4886 Tr. grains.
1 Rotolo	=	1'745 lb. av.

Mexico.

As old Spanish (q.v.).

Netherlands.

Since 1820 the Metric System. Strep = millimeter; Duim = centimeter; Palm = decimeter; El = meter; Roede = decameter; Mijle = kilometer; Wisse = Stere; Vingerhoed = centiliter; Maatje = deciliter; Kan = liter; Vat = hectoliter; Korrel = decigram; Wigtje = gram; Lood = decagram; Onze = hectogram; Pond = kilogram.

Norway.

The Metric System since 1878.

Persia.

1 Zer (16 Gereh)	=	38 inches.
1 Fersakh (<i>Parasang</i>)	=	4½ miles.
1 Chenica	=	289 gallon.
1 Capicha	=	578 gallon.
1 Collothun	=	1809 gallons.
1 Arlata	=	1809 bushels.
1 Seer (16 Miscal)	=	284 Tr. grains.
1 Ratel	=	1'014 lb. av.
1 Batman, or Maund.	=	6'491 lb. av.
1 Karwar	=	649'142 lb. av.
1 Batnan Rei	=	27 lb. av.

Peru.

Metric, old Spanish, and British; but Vara (3 pie) = 2'780 feet; Fanega (wheat) = 135 or 140 libra; Carga = 150 libra.

Philippine Islands.

1 Pulgada (12 Linea)	=	'927 inch.
1 Pie	=	11'125 inches.
1 Vara	=	33'375 inches.
1 Gantah	=	'8796 gallon.
1 Caban	=	21'991 gallons.
1 Libra (16 Onzo)	=	1'0144 lb. av.
1 Arroba	=	25'360 lb. av.
1 Catty (16 Tael)	=	1'394 lb. av.
1 Pecul (100 Catty)	=	139'482 lb. av.

Poland.

As in Russia, and,

1 Cwiere (6 Cal) = 5'606 in.	1 Senurow = 47'245 yds.
1 Stopa	= 11'212 in.
1 Mila	= 5'304 mls.
1 Loziec	= 22'425 in.
1 Morgow	= 1'382 acs.

Portugal, Rumania, and San Domingo.

The Metric System.

Russia.

1 Stopa (8 Vershok)	=	14 inches.
1 Arschine (16 Vershok) ..	=	28 inches.
1 Saschen (3 Arschine) ..	=	7 feet.
1 Verst (500 Saschen) ..	=	1166'66 yards.
1 Desatine	=	13066¼ sq. yards.
1 Vedro (100 Tsharkoy) ..	=	2'704 gallons.
1 Anker	=	8'114 gallons.
1 Chetvert	=	46'2 gallons.
1 Sarokowaja	=	108'196 gallons.
1 Tschetwerik	=	2'885 pecks.
1 Pajak	=	1'442 bushels.
1 East	=	11'540 quarters.
1 Zolotnick (96 Doli)	=	65'830 Tr. gr.
1 Funt (12 Lani)	=	'9028 lb. av.
1 Pood (40 Funt)	=	36'1127 lb. av.
1 Berkowitz	=	361'273 lb. av.
1 Packen	=	1083'382 lb. av.

Servia.

The Metric and Turkish Systems.

Siam.

1 Niw	=	'83 inch.
1 Ku'p (12 Niws)	=	10 inches.
1 Sawk (2 Ku'p)	=	19½ inches.
1 Wah (4 Sok)	=	80 inches.
1 Sen (20 Wahs)	=	44¼ yards.
1 Yot (40 Sens)	=	9½ miles.
1 Roeheng	=	2'525 miles.
1 Thang	=	3'75 gallons.
1 Coyan	=	375 gallons.
1 Tael (4 Bat)	=	936'25 Tr. grains.
1 Chang, or Catty	=	2'675 lb. av.
1 Hap, or Pecul	=	133'75 lb. av.
1 Kean (20 Piculs)	=	1675 lb. av.

Spain.

The Metric System was made compulsory on July 1, 1869. In many countries that were

colonized by Spain some of the old Spanish measures are still used, e.g.:-

1 Pulgada (12 Linea)	=	'927 inch.
1 Sesma (6 Pulgada)	=	5'564 inches.
1 Vara (6 Sesma)	=	2'782 feet.
1 Estado (2 Vara)	=	5'564 feet.
1 Legua (of Castile)	=	4636'66 yards.
1 Fanegada	=	1'6374 acres.
1 Cuartillo (4 Capo)	=	'1109 gal.
1 Cuartilla (2 Azumbre) ..	=	'8879 gal.
1 Arroba Mayor (or Cantara) ..	=	3'5517 gal.
1 Mayor (16 Cantara)	=	56'276 gal.
1 Medio (2 Cuartillo)	=	'0621 bushl.
1 Almude (2 Medio)	=	'1256 bushl.
1 Fanega	=	1'5076 bushl.
1 Cahiz	=	18'0919 bushl.
1 Tomin (12 Grain)	=	'02113 OZ. av.
1 Onza	=	'0634 lb. av.
1 Libra (of Castile)	=	1'014 lb. av.
1 Quintal	=	101'442 lb. av.
1 Tonelada	=	1014'42 lb. av.

Sweden.

The Metric System since 1875.

1 Fot (10 Tom)	=	11'689 inches.
1 Mil (360 Ref)	=	6'6416 miles.
1 Kanna	=	4'608 pints.
1 Skoal pund (100 Ort)	=	'937 lb. av.

Switzerland.

The Metric System since Jan. 1st, 1873.

1 Fuss (10 Zoll)	=	11'8113 inches.
1 Stunde (1600 Ruthe)	=	2'9826 miles.
1 Malter (10 Vierel)	=	4'726 bushels.
1 Maass (4 Schoppen)	=	2'641 pints.
1 Pfund (16 Unze)	=	1'1023 lb. av.

Tripoli.

1 Pike	=	26'416 inches.
1 Draa	=	19'13 inches.
1 Orbah	=	1'476 gallons.
1 Hucia (4 Temen)	=	2'952 bushels.
1 Secchie (4 Bozze)	=	2'361 gallons.
1 Oka (40 Uckieh)	=	2'69 lb. av.
1 Centner (100 Rottol)	=	107'66 lb. av.

Turkey.

1 Piko or Arshen	=	27¼ inches.
1 Pike or Arshen (land) ..	=	29¾ inches.
1 Halebi or Archim	=	27'9 inches.
1 Endazzezh (Sik)	=	25¼ inches.
1 Agatsch (3 Berri)	=	3'1559 miles.
1 Jubbeh (11 Rottol)	=	'4851 bushel.
1 Fortin (4 Killow)	=	3'8809 bushels.
1 Rottol (12 Okiejeh)	=	2'513 pints.
1 Almud (8 Oka)	=	1'1519 gallons.
1 Cantar (100 Rottol)	=	3'417 gallons.
1 Cantar (dry)	=	124'08 av.
1 Okiejeh (100 Dirhem)	=	'70854 lb. av.
1 Kélé or Oke (4 Okiejeh) ..	=	2'1975 lb. av.
1 Batman (dry)	=	16'92 av.

United States.

The Metric System, authorized 1866; also weight, length, and surface measures as in England, and old Winchester measure.

1 Pint (dry)	=	'9694 pint.
1 Gallon (dry)	=	'9694 gallon.
1 Bushel	=	'9694 bushel.
1 Quarter	=	'9694 quarter.
1 Pint (wine or spirit)	=	'8331 pint.
1 Gallon (wine or spirit)	=	'8331 gallon.
1 Pint (beer)	=	1'017 pints.
1 Quintal or Centner	=	100 lb. av.
1 Barrel (of flour)	=	196 lb. av.
1 Barrel (of beef)	=	200 lb. av.

Uruguay.

Metric System, introduced 1864; also as in Argentine Republic, Venezuela, the Metric System, since 1857; and old Spanish.

IN the 1906 edition will be found a detailed account of the Military System of each country. In referring to the following Table it will be remembered that all have adopted universal and compulsory military service, with the exception of Spain and Portugal (still adhering to conscription), Belgium and the Netherlands (which supplement voluntary enlistment by conscription), and certain Central and South American Republics, where, as a rule, an irregular conscription is in vogue. Switzerland, Norway, and the Netherlands maintain only Militia Armies, with intermittent periods of training; Denmark, in similar manner, gives longer trainings, whilst Rumania has a peculiar system of partly continuous, partly intermittent training. The only countries adhering exclusively to voluntary enlistment are China (for the present), the United States of America, and Great Britain.

Much care has been taken in extracting the various Military Budgets, and the figures given may be accepted as substantially accurate, but they cannot be used for such purposes as calculation by division of the cost per head of the soldier, since some States (e.g., Belgium) spend relatively a great deal more than others (e.g., Japan) on fixed defences and fortifications. Often, too, supplementary credits or loans require to be added, whilst in some instances the nominal sums voted are never actually expended. Pensions may be included, or may appear in a separate Budget, whilst some Governments charge their Army with items that others reckon in their Naval Estimates.

Country.	Numerical Strength.		Budget, 1907.
	Peace.	War.	
Argentina	1,560 officers 16,000 others	490,000	£1,627,392

The following summaries present in as brief a form as possible the various educational systems of the countries of the world. It is impossible to draft a similar account for the United Kingdom, as there is no "system" to epitomise.

Argentine Republic.

Primary: Secular, comp. and free. Age 6-14. Control, in the capital and the 10 territories, by the National Educational Council; in the 14 provinces, by the Provincial Govts. Maintenance, by local taxation, with grants from Central Govt. Public expenditure, over \$13,000,000, or £1,148,000, on 4,341 elementary schools, whereat average attendance is 379,120, or 45 p.c. of children of school age. Adult illiterates, however, are numerous.

Secondary: 35 normal schools, 16 lycæums, controlled by Central Govt. Average attendance, 6,000.

Special: 1 mining, 1 agricultural school; 1 naval, 1 military academy.

Universities: National, Buenos Aires, Córdoba. Provincial, La Plata, Santa Fé, Paraná.

Budget, 1907: \$28,152,338 (£1,463,400).

Austria.

Primary: Comp. and free. Age 6-12, 13, or 14, according to the province. Control by the 17 Provincial Diets. Some 21,300 elementary schools are maintained by local taxation, State grants being exceptional. At 33 p.c. of above the language used is German, at 25 p.c. Czech, at 26 p.c. other Slav dialects; in a few cases more than one language is used, whilst Magyar, Italian, and Rumanian are also represented. Average attendance, over 3,900,000, or nearly 91 p.c. of school age.

Secondary: Inclusive of private intermediate schools, subject to similar control, 244 gymnasia (collegiate schools with an 8-yrs. course) and 131 realschulen (polytechnics with a 7-yrs. course) prepare for the Universities and the several Government technical high schools (8 of engineering, &c., and the Vienna School of Agriculture). The majority are maintained by local taxation, some by the Central Govt. Pupils attaining a prescribed standard qualify for military service as 1-yr. volunteers.

Special Schools: 270 commercial, 1,200 industrial, 180 agricultural, &c., in all, 4,700; 48 theological colleges, mainly Roman Catholic.

Universities: National, State-maintained, Vienna, Prague (2), Lemberg, Cracow, Graz, Innsbruck, and Czernowitz.

Budget, Ministry of Worship and Instruction, 1907: Kr. 90,460,266 (£3,769,178).

Hungary.

Primary: Comp. and free, but nearly 47 p.c. of the pop. remains illiterate. Infants' schools, age 3-6, in each commune and parish, with, in some cases, a school for nurses. First grade age 6-12; repetition courses, age 12-15. Second grade (higher primary), course, 3 years for boys, 2 years for girls. Burgher (or "City High") schools, course, 6 years for boys, 4 years for girls. In all, 19,000 primary schools; average attendance 2,655,000, or 77 p.c. of school age. At 58 p.c. the language used is Magyar, at 18 p.c. Magyar with another tongue; Rumanian and other Slav dialects are also represented, whilst at only 2 p.c. is German alone the medium of instruction.

Secondary: 175 gymnasia and 42 realschulen, prepare for the University and the

Budapest Polytechnic; course, 8 years. Such of these as are not State-maintained are State-aided. There are few private intermediate schools.

Special: 570 industrial, 65 agricultural, 155 commercial, 6 mining, 40 art, &c.; with 49 theological colleges, of which 29 are Roman Catholic.

Universities: National, Budapest, Kolozsvár, Zagreb.

Budget, Ministry of Worship and Instruction, 1906: Kr. 47,792,950 (£1,991,373).

Belgium.

Primary: Comp. and free. 2,600 infants and over 7,000 primary schools are maintained by local taxation, aided by both State and provincial grants. In addition there are many private schools, chiefly under ecclesiastical control, and 54 normal primary schools.

Secondary: 128 high schools (of which 40 for girls), 35 Royal colleges, and many private institutions (65 boys' and 150 girls' high schools, and 80 colleges).

Special: 8 commercial, 72 industrial, 150 technical schools, the Royal Antwerp Academy of Arts, and numerous conservatoires of music.

Universities: State, Liège, Ghent, Louvain, Brussels. (Louvain alone has a faculty of Theology.)

Budget, 1907 (£1,391,800); local expenditure, about £400,000.

Brazil.

Primary: Secular and free, but not comp. In practice. About 84 p.c. of the entire population is illiterate. Control, within the Federal district by the municipality, in the states by joint state and municipal administrations.

Secondary: Not free. The National Gymnasium is under Federal control, and the maintenance of similar institutions in the several states is encouraged. All other secondary schools are private.

Special: 1 school of mines, 1 polytechnic, 4 of law, 2 of medicine, besides 1 naval and 4 military academies, are maintained by the Federal Govt.

Bulgaria.

Primary: Free and nominally comp. Age 8-12. About 4,600 primary schools, cost of which is borne by the State to the extent of two-thirds, the remainder being defrayed by local taxation.

Secondary: Besides the Bulgarian, American, Armenian, French, Greek, Turkish, and Jewish schools are maintained. State bears one-half the cost. In all, 190 intermediate schools, 116 technical and various, besides 18 gymnasia.

University: Sofia.

Budget, Public Instruction, 1906: Lev. 10,681,975 (£427,279).

Chile.

Primary: Free, but not comp. 1,970 public and 500 private elementary schools. Average attendance, 139,000.

Secondary: 15 State lycæums, 4 for girls. Provincial colleges; 3 normal schools for men, and 3 for women. National Institute at Santiago. Numerous private secondary schools, of which some (under clerical control) have courses similar to the Government establishments.

Special: Provincial schools of agriculture, a National Conservatoire of Music, a School of Arts and Crafts, &c.

Universities: 1 State, 1 private (law and mathematics only).

Budget, Public Instruction, 1905: Pesos (gold) 135,033, (silver) 15,127,012 (£1,144,652).

China.

There are signs that the educational paralysis of China is about to pass away. Recent events in the Far East have awakened the desire for Western literature and science, and Japanese influence is asserting itself. Persistent missionary efforts, too, are producing an effect. As yet, however, it cannot be said that any definite educational system is in sight, to replace the time-honoured studies of Chinese literature and moral philosophy, with their attendant system of examinations, so often described elsewhere. A degree in those subjects has, until quite recently, been necessary for all public appointments, examinations for that purpose being held twice in three years at each provincial capital. Examinations for the higher degrees were held once in three years, successful candidates being subjected to further tests until their number was reduced to correspond with the vacancies. The issue of an Imperial Edict has been (Oct., 1905) announced, which prescribes that for the future officials will be selected from amongst those who have received a modern education, and insists upon the desirability of despatching students abroad, especially to Great Britain and the U.S.A. This decided step is due, it is said, to the representations of the enlightened Yuan Shi Kai, who has done so much to modernise the Chinese military system. Mission schools are especially numerous in the coast towns, Roman Catholic predominating. At Peking the so-called "Foreign College" teaches European languages and science, besides giving a Chinese education. A modern school of medicine has been opened, also at Peking. Provincial and other colleges, special and technical schools, are rapidly increasing in numbers, and many Chinese students are finding their way abroad, notably to Japan. In the naval and military schools, too, foreign instructors are necessarily employed.

Denmark.

Primary: Comp. and free. Age 7-14. Some 3,000 elementary schools are maintained by local taxation. Average attendance, 330,000.

Secondary: 14 State and 17 private Latin schools. 72 private high schools (State-aided).

Special: 99 technical and commercial institutes, 1 polytechnic, 1 Royal Academy of Arts, 1 veterinary and agricultural college, 12 schools of horticulture (State-aided).

University, Copenhagen, founded 1479, admits women.

Budget, Ministry of Worship and Instruction, 1907: Kr. 9,189,691 (£488,200).

Egypt.

Village (rudimentary) schools or "kuttabs" are very numerous; the teaching is conducted in Arabic, and some (the more progressive) are State-aided.

Govt. Primary Schools, to the number of 34, include the teaching of English, and in a few cases of French, but throughout the system the former language is ousting the latter as a medium of instruction. These schools have a four-years'

course, admitting to lower posts in Govt. service, or to the secondary schools, the School of Agriculture, or the intermediate technical schools. The great majority of pupils pay fees.

Govt. Secondary Schools, 4 for boys, 1 for girls, have also a four-years' course, admitting to intermediate Govt. positions or to the three Cairo Colleges of Medicine, Law, and Engineering (Polytechnic). The teachers are usually English.

Special Schools, besides those mentioned, include very many Trade (vernacular) Schools liberally supported by private beneficence. Great strides, too, are being made in the direction of agriculture, survey, electrical, and building instruction—to keep pace with the rapid development of the country. A Govt. Department of Agriculture and Technical Education has recently been formed on the lines of that existing in Ireland. The education of women has hitherto been seriously impeded by the peculiar position they occupy in the country.

Besides the Govt. schools there are numerous mission (European) institutions, Mahomedan and Coptic schools, &c., which are encouraged to conform to Govt. syllabus.

The Anglo-Egyptian Sudan.

An educational system is being developed. Elementary (native) schools number 15, higher schools 6, and others are being opened.

Secondary: The Gordon Memorial College at Khartum is well equipped, and gives both literary and technical education.

France.

The educational system is highly developed. The Central Administration comprises: (a) The Minister of Public Instruction; (b) the Superior Educational Council, charged with the administration of the system; (c) the Consultative Committee, whose duties are solely advisory; (d) The Educational Bureaux, with their inspection staffs, the heads of which report direct to the Minister. The local administration is two-fold, comprising: (a) The 17 *académies* (territorial districts), each with its inspection staff, the chief of which recommends teachers to the local council; (b) the Departmental Council, presided over by the Préfet, and charged with the management, maintenance, and inspection of the primary schools within its jurisdiction. Teachers are paid direct by the State, save in towns of over 150,000 inhabitants. The anticlerical policy of the Government has resulted in the closing of many private schools under clerical control, but about one-half of those thus suppressed have been re-opened under lay management. The result, however, is a considerable diminution in the number of teaching establishments. By the law of July, 1904, all congregationist teaching is to be suppressed within ten years. It should be noted that for statistical purposes Algeria is included in French reports and returns.

Primary Education (male, female and mixed) is secular, comp. and free. Age 6-13. Schools are classified as: I. Infants (écoles maternelles), numbering, in 1904, some 2,570 (125 clerical); 2,050 private (about half clerical) with an average attendance of nearly 680,000. II. Primary and Higher Primary, nearly 82,000 in same year, of which 68,000 were public and 13,400 private, with an attendance of over 5,500,000 (exclusive of those attending continuation courses). Adult primary courses attracted 620,000 (two-thirds

male), whilst many private and philanthropic societies assist, occasionally with aid from local taxation. Primary certificates are granted on completion of the course. The expenditure of public money on primary education exceeds 238,000,000 frs. (£9,500,000), of which the State Budget contributes 175,000,000 frs. (£7,000,000).

Secondary Education (male). Recently reorganised in four distinct courses, 1 purely classical, 1 purely modern, and 2 combining classics with science and modern languages. Schools are classified as (1) public lycées, numbering 110 in 1906; (2) communal colleges, 228; (3) private (lay) establishments, 253; (4) private (clerical) establishments, 283; (5) ecclesiastical seminaries, about 140. The degree of Bachelor is conferred after completion of the 7-yrs. course. Secondary education for females is given in (1) public lycées, 46; (2) communal colleges, 57; (3) extension courses, 69; (4) municipal high schools (free); (5) private (lay and clerical) schools and courses.

Special Schools, both public and private, are very numerous, some being under the control of a Minister other than the Minister of Public Instruction. Amongst them are:—

Under the Minister of Public Instruction: The Collège de France (advanced literature, mathematics, languages, political economy, &c.); the Ecole Pratique des Hautes Etudes (higher mathematics, science, history, philology, religion, &c.); the Conservatoire of Music and Elocution; the School of Oriental Languages; the Louvre School of Art and Archaeology, &c. *Under the Minister of Commerce:* The Conservatoire of Arts and Crafts; the Commercial College; some dozen commercial high schools. *Under the Minister of Agriculture:* Several veterinary and agricultural institutes. *Under the Minister of Public Works:* The Parisian School of Mines; the Ecole des Ponts et Chaussées, &c. *Under the Minister for the Colonies:* The St. Etienne School of Mines; the Colonial College, &c. *Under the Minister of Marine:* The Brest Naval Academy. *Under the Minister for War:* The Ecole Supérieure de Guerre (Staff College); the Ecole Polytechnique; the Saumur Cavalry School; the St. Cyr Cadet College, &c.

Higher Education, generally, is given in State Universities and private faculties, the former alone being empowered to grant degrees. The several faculties are: *Paris—Law, Sc., Lit., Med., Protestant Theology; Aix—Law; Algiers—Law, Sc., Lit.; Angers—Law, Sc., Lit.; Besançon—Sc., Lit.; Bordeaux—Law, Med., Sc., Lit.; Caen—Law, Sc., Lit.; Clermont—Sc., Lit.; Dijon—Law, Sc., Lit.; Grenoble—Law, Sc., Lit.; Lille—Law, Med., Sc., Pharmacy, Lit., Theology; Lyon—Law, Med., Sc., Lit., Theology; Marseilles—Law, Sc., Lit.; Montauban—Prot. Theology; Montpellier—Law, Med., Sc., Lit.; Nancy—Law, Med., Sc., Lit.; Nantes—Law; Poitiers—Law, Sc., Lit.; Rennes—Law, Sc., Lit.; Toulouse—Law, Med., Sc., Lit., Theology.*

(Italics indicate that the faculty is free.)

Budget, Public Instruction, 1907: Fcs. 261,367,546 (£10,454,702).

Germany.

The German educ. system is remarkable for the ease with which it accommodates itself to all possible requirements of every social class, and is, moreover, practically homogeneous in all its branches throughout the Empire.

The Prussian administration may be cited as

typical, and is briefly as follows:—The Minister of Public Instruction controls all educ. establishments, public and private. The provincial school boards are directly charged with the management of secondary and normal schools and the curricula therein, also the selection and appointment of teachers. The town and other local councils administer the elementary schools within their jurisdiction.

Primary: Comp. and free. Age 6-14. 59,350 public and 643 private schools. Average attendance, nearly 9,000,000. Public expenditure, 419,000,000 marks (over £20,000,000), of which the Central Govt. contributed about 120,000,000 marks, or £6,000,000.

Secondary: Evening continuation classes for children of working folk. City intermediate schools. 468 gymnasia, some of which are State-maintained, prepare for the University and the learned professions, with a 9-yrs. course. (The standard to qualify for military service as a 1-yr. volunteer is that for advancement from the lower to the upper second class of a State gymnasium.) 100 progymnasias are similar, but lack the higher class of the gymnasia; 122 real-gymnasias confine classical instruction to Latin; 48 real progymnasias bear the same relation to the above that the progymnasias bear to the gymnasia; 64 oberrealschulen and 265 realschulen make a special feature of modern languages; 185 lehrer-seminarien and 33 fachschulen supply specialised instruction. In addition, there are some 55 private secondary schools, some of which are empowered to grant certificates qualifying pupils for service as 1-yr. volunteers. The secondary educ. of girls is provided for by girls' high schools (Töchterschulen), both public and private.

Special Schools for agriculture, commerce, industries, &c., are very numerous throughout the Empire. There are 15 schools of mining, 15 of architecture, 20 for naval engineering, and a very large number of special trade schools. Then there are 9 technical high schools, granting degrees, at Aix, Berlin, Brunswick, Darmstadt, Dresden, Hanover, Karlsruhe, Munich, and Stuttgart, the courses comprising chemistry, metallurgy, engineering, &c.; 9 institutes of forestry, and several brewing academies.

Universities: 21 Universities are State-maintained and State-administered, viz.: Berlin, Bonn, Breslau, Erlangen, Freiburg, Giessen, Göttingen, Greifswald, Halle, Heidelberg, Jena, Kiel, Leipzig, Marburg, München, Münster, Rostock, Strassburg, Tübingen, and Würzburg.

(Italics indicate that the faculty of theology is Roman Catholic; Bonn, Breslau, and Tübingen comprise both Protestant and Roman Catholic, the remainder being Protestant.)

The naval and military establishments include the Kiel Naval Academy and School, the military academies of Berlin and Munich, besides several cadet and other schools, and the Technical Military Academy at Berlin.

Greece.

Primary: Free, but comp. is not generally enforced. Age 5-12. 3,263 schools are maintained by local taxation, with State grants. Average attendance, over 200,000.

Secondary: 285 public high schools, 16 private high schools, 39 State gymnasia, 8 private gymnasia, 10 normal schools for men, 3 for women.

Special: 1 commercial, 2 agricultural, 2 indus

trial schools, industrial academy (Athens), & ecclesiastical seminary, & polytechnic.

University: Athens (founded A.D. 1836), with faculties of law, medicine, philosophy, chemistry, and theology; about 30 p.c. of the students are foreign, Turkish subjects predominating.

Budget, 1906: Worship and Public Instruction, Dr. 7,143,923 (£285,757).

Italy.

A great impulse to educ. has been given by the law of July, 1904, previous to which it was estimated that 49 per cent. of the population over 20 years of age was illiterate.

Primary: Secular, free, and comp. in the lower grade, age 6-9, and in the higher, age 9-12. Elementary schools, maintained by local taxation, with occasional State grants, comprise over 3,300 infants', 53,250 public, and 8,500 private primary schools. Average attendance, about 3,000,000. In addition, there are evening classes and continuation courses.

Secondary: 157 lycceums and *277* gymnasia (State-aided) supply a classical educ. In addition, there are over 700 private schools. *295* technical schools and *72* institutes (also State-aided) give secondary technical instruction.

Special Schools comprise *19* mercantile marine, *2* mining, *300* industrial and commercial, *13* Government art schools and *13* private art schools, *34* of agriculture, *5* Government schools of music and *51* private schools of music. The majority of these, if not State-maintained, are State-aided.

Universities: The following are free:—Perugia (founded A.D. 1276), Urbino, Camerino, and Ferrara. The following are *State Universities*:—Bologna (A.D. 1200), Cagliari, Catania, Genoa (A.D. 1243), Macerata (A.D. 1290), Messina, Modena, Naples (A.D. 1224), Padua (A.D. 1222), Palermo, Parma, Pavia, Pisa, Rome (A.D. 1303), Sassari, Siena (A.D. 1300), and Turin. Many of these enjoy ancient revenues.

Budget, Public Instruction, 1907: Lire 66,189,273 (£2,647,571).

Japan.

Primary: Lower grade comp. and free. Age 6-10. *295* kindergarten, over 27,000 elementary schools. Average attendance, over 5,100,000, or 80 p.c. of school age. Of these, some 54 p.c. complete the *Higher grade course* (age 10-14), for which a small monthly fee of 30-60 sen (7d.-1s. 2d.) is demanded. Local charges amount to nearly £3,000,000.

Secondary: Schools comprise *270* public intermediate (State-aided), with a uniform curriculum throughout the Empire and a 5-yrs. course. *34* private do. *8* high schools (State-maintained) prepare for the Universities with a 3-yrs. course, largely devoted to the study of foreign languages (in which, owing to the lack of vernacular textbooks, many of the higher branches of education are necessarily pursued). For girls, there are *84* public and *8* private high schools; course, 4-5 years, with extensions of 2-3 years for special subjects. Sixty-four normal schools are either locally maintained in connection with primary, or State-maintained in connection with secondary and high schools.

Special Schools comprise *5* of medicine, *1* of language, *1* of art, *1* academy of music, and numerous industrial, commercial, and technical institutes.

Universities: State, Tokio (law, medicine, science, literature, agriculture, and engineering); Kyoto (law, medicine, science, literature, and engineering).

The principal naval and military establishments are: The Naval Cadets' College at Yeta-jima, the Imperial Naval Academy at Tokio, the (Army) War School, and the several Central and Provincial Cadet Colleges.

Budget, Public Instruction, 1907: Yen 5,000,351 (£510,453).

Mexico.

Large numbers of the partially civilised native Indian races and many half-castes are entirely illiterate. These forming about 80 p.c. of the total population, the number of illiterates is estimated at nearly 10,000,000, but a yearly improvement is noticeable.

Primary: Free and nominally comp. 9,370 schools are maintained by local taxation, with grants from Central Govt. Average attendance, 485,000. In addition, some 2,300 schools are maintained by private associations, mostly under clerical control. Average attendance, 120,000.

Secondary: 49 higher schools (12 girls'), and *20* normal colleges (Federal or State).

Special: In all, some 65 institutions for commerce, engineering, mining, medicine, law, art, &c.

Budget, Public Instruction, 1907: \$6,288,790 (£592,000).

Netherlands.

Primary: Comp., age 7-13, but private establishments (State-aided) are encouraged rather than public, though the latter are maintained by local authorities (with State subsidies) where ever private institutions are lacking. *1,148* infants' schools (996 private) and *4,871* elementary (1,630 private). Average attendance, over 810,000, or about 95 p.c. of school age. Disciplinary schools are provided for neglected children.

Secondary: 83 intermediate, *30* higher classical, *196* adult (working class), also normal schools, &c.

Special Schools comprise numerous institutes of commerce, agriculture, horticulture, art, &c., and a Royal Conservatoire of Music at Amsterdam.

Universities: Amsterdam, Groningen, Leiden, and Utrecht, besides a small private university.

Budgets: State, about £1,200,000; *Commercial,* about £1,300,000 annually.

Norway.

Primary: Comp. and free. Age 6½ or 7-14. *8,700* schools and classes locally maintained, with State aid to the extent of 25 p.c. of total outlay.

Secondary: 14 (State), *49* (local), and *27* private high schools; *6* public and *4* private normal schools.

Special: 52 industrial and technical institutes. (A complete and practical reformatory system is State-aided.)

University: Christiania.

Budget, Public Instruction and Worship, 1907: Kr. 10,742,000 (£596,778).

Peru.

Primary: Free and nominally comp. 1,870 schools are locally maintained. Average attendance, 77,000, or about 20 p.c. of school age.

Secondary: Govt. high schools in the capitals of the 18 departments, small fees charged, also a few private schools under European direction.

Special: School of Mines and Engineering, (Lima), and Agricultural College.

University: St. Mark's (Lima).

Budget, about £95,000 annually (one-third contributed by State).

Portugal.

Primary: Free and nominally comp., but over 70 p.c. of the population is illiterate. 4,500 public and 1,000 private elementary schools. Average attendance, 200,000. 175 adults' elementary schools.

Secondary: A State lyceum in each of the 21 districts, including Madeira and the Azores, and 3 other similar establishments. Girls' high school at Lisbon. Most other secondary schools are private.

Special: 4 technical institutes, 2 commercial colleges, a polytechnic, and schools of medicine, agriculture, art, literature, music, &c., all located in Lisbon or Oporto. 1 naval and 1 military academy.

University: Coimbra (founded A.D. 1290).

Public expenditure: 1,500,000 milrs. (£331,000).

Rumania.

Primary: Free and nominally comp., but the number of schools (about 4,200) is quite inadequate, and 70 p.c. of the total population is illiterate. Average attendance, 475,000, or 50 p.c. of school age.

Secondary: 107 high schools (75 boys').

Special: A few schools of agriculture, engineering, industries, &c.

By law of 17 March, 1906, preparatory military instruction is obligatory in all schools, elementary, secondary, and professional.

Universities: Bucharest and Jassy.

Russia.

One result of the present upheaval in Russia will almost certainly be a betterment of the present unsatisfactory state of educational affairs.

Hitherto educ. of the masses has been regarded, probably correctly, as tending directly towards subversion of the existing political system, and in consequence all initiative has been not merely discouraged but suppressed. Anything beyond the narrowest form of classical educ. has been regarded with suspicion.

Probably not 7 p.c. of the total population have received an educ. of any kind.

Primary: Some 45,000 schools are maintained under the control of the Minister of Public Instruction. Over 43,000 are nominally maintained by the Holy Synod, the governing body of the Orthodox Catholic Church, which receives a large proportion of the annual sum allotted to educ. in the Central Govt. Budget. About 2,000 schools are controlled by other associations, mostly ecclesiastical.

In many cases both equipment and curriculum leave much to be desired—indeed, a large number of schools are said to exist only on paper—whilst the qualifications of the teachers, especially in the remoter districts, are often more than dubious, quite uneducated persons being engaged by the priests.

There are very few private schools, but illiterate army recruits are at least taught to read and write in their regiments.

Average attendance at primary schools is perhaps 5,000,000.

Secondary: Some 240 gymnasia and progym-

nasia for males and 435 for females, 145 real-schools and technical institutes (nearly all of recent date), with about 70 normal schools, are controlled by the Minister for Public Instruction. In addition, the several Cossack *voiskos* maintain 119 gymnasia and progymnasia, of which 31 are for females.

Special Schools are comparatively few, comprising some 53 commercial, 70 industrial, &c., controlled by the Minister of Finance, besides 19 schools of agriculture, 5 of law, 1 of forestry, 2 of mining, 5 of medicine, &c.

A private Imperial Cabinet administers the various institutions founded by the Empress Maria (mother of the Tsar Nicholas I.) and called by her name.

The Holy Synod maintains, besides ecclesiastical seminaries, normal and high schools for girls.

There are Armenian, Jewish, and Mahomedan educational institutions in the districts where these nationalities predominate.

Universities: Kazan, Kiev, Kharkov, Moscow, Odessa, St. Petersburg, Tomsk, Yuriev, Warsaw, and Helsingfors (Finland, &c.).

Total State expenditure, 1906, about Rs. 76,700,000 (£8,109,900).

Finland.

As compared with that of Russia, the educational system is in every way superior.

Primary: Over 2,300 schools. Average attendance, 125,000.

Secondary: 53 lyceums (24 State-maintained), 38 girls' high schools, 27 real-schools, 8 normal colleges, &c.

Special: 59 industrial and technical, 9 commercial, 24 agricultural schools, 1 polytechnic, several navigation, horticultural, and dairy-farming schools.

University: Helsingfors (admits women).

Budget, Public Worship and Instruction, about Mks. 11,500,000 (£460,000).

Servia.

Primary: Free and nominally comp., but only about 20 p.c. of school age attend. 1,270 schools (average attendance, 123,000) maintained by local taxation, with State subsidies.

Secondary: 18 gymnasia and progymnasia, 2 girls' high schools, 4 normal colleges (State-maintained).

Special: 1 commercial, 1 horticultural, 1 agricultural school.

University: Belgrade (admits women).

Public expenditure: Din. 6,000,000 (£240,000).

Siam.

In the capital much is done for education by British initiative.

Primary: 80 schools, of which 4 for girls; 1 purely English school.

Secondary: 9 schools, and 1 purely English school; 2 normal colleges.

Special: 1 medical, 1 civil service, 1 law school, besides the naval and military academies, police schools, &c.

In the interior, instruction is mainly in the hands of the Buddhist religious orders.

Spain.

Education is largely in the hands of the religious orders, but recent legislation provides for more stringent Government control.

Primary: Free and nominally comp., but as yet far from being so in practice. 25,340 public

and 6,150 private schools, maintained for the most part by local taxation.

Secondary: 27 provincial high schools, in which, however, the curriculum is defective.

Special: Several schools of agriculture, art, engineering, &c., are State-maintained.

Universities: Barcelona, Granada, Madrid, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

Budget, Public Instruction, 1907: Pes. 48,539,357 (£1,941,000).

Sweden.

The educational system is highly developed, and an illiterate Sweden rare.

Primary: Comp. and free. 12,800 schools maintained by local taxation, with State aid to the extent of 25 p.c. of total outlay. Average attendance, 750,000. Public exp., over Kr. 24 million (£1,335,000).

Secondary: 82 high schools, 31 high schools for working classes, 14 normal schools.

Special: 8 industrial and technical institutes, 10 navigation schools, besides medical, veterinary and agricultural schools.

Universities: Lund and Upsala, besides several private faculties.

Budget, Public Instruction and Worship, 1907: Kr. 19,945,553 (£1,098,323).

Switzerland.

Although there exists no Federal or central administration, the system leaves little to be desired, and works admirably in the hands of the cantonal and communal authorities, a close connection being maintained between public instruction and military service. There is a compulsory school course (age 16-20) of gymnastics, physical development, and musketry, as a preparation for army service.

Primary: Comp. and free, the school age and the measure of enforcement varying in the different cantons, the Roman Catholic never having applied compulsion in the thorough manner characteristic of the Protestant. 865 infants' and 4,700 elementary schools. Average attendance, 530,000.

Secondary: 598 high schools, 83 middle schools, 36 normal schools (of which some are private).

Special: 318 technical schools (mostly State-aided), 104 commercial colleges of various grades; the Zurich Polytechnic, and several schools of agriculture, horticulture, dairy-farming, &c. (State-aided). 275 girls' schools make a special feature of domestic economy.

Universities: Basle, Berne, Fribourg, Geneva, Lausanne, Zurich; to which may be added the Neuchâtel Academy.

Public expenditure: State, Fcs. 29,000,000; local, Fcs. 29,000,000; total, £2,320,000.

Turkey.

Primary educ. takes the form of instruction given by the Mahommedan priesthood attached to the principal mosques. It is nominally comp. (age 6-10 for girls, 6-11 for boys), but owing to the dubious qualifications of the teachers its efficiency is not great. There are a few intermediate schools, in which modern languages (especially French) and sciences are taught in an elementary manner. The University of Constantinople is of recent foundation (1900), the subjects studied being law, medicine, mathematics, philosophy, and Mahommedan theology, but is said to be as yet inoperative. A con-

siderable number of Turkish subjects attend the University of Athens. The various recognised non-Mahommedan religious officers maintain some few establishments of their own (e.g., a Greek school, a theological college, &c.).

United States of America.

The system of public instruction extends from the kindergarten and elementary schools to the State colleges and universities. Control is vested in the State and local (county, township, and municipal) authorities, there being no Central (Federal) Educational Department other than the Bureau of the Educational Commission, charged with the duty of "collecting statistics and diffusing information as to organisation and management." The degree of authority possessed by the chief educational officers differs in the several States, their powers being in some cases plenary, in others merely advisory.

In 30 States, 1 Territory, and in Columbia, educ. is comp., but the laws are not invariably enforced. In 15 States there is no compulsion, though the machinery is fully maintained. The census of 1900 showed 10.7 p.c. of the total pop. as illiterate, a figure that would stand at under 5 p.c. were it not for the fact that, whilst over 44 p.c. of the coloured pop. is uneducated, there is a constant influx of illiterate immigrants. Statistics as to the number of schools of primary and secondary grades are not readily available, but it is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and fro at the public expense. These schools are supported mainly by local taxation, the Federal subsidies being for the most part indirect. The primary age is 8-14 yrs.

Public elementary schools comprise 8 grades of primary and grammar schools, with nearly 15,800,000 pupils. There are 1,500 public kindergartens in 15 States, great reliance being placed upon the kindergarten system as a preliminary.

Evening schools in the principal towns offer continuation classes to over 250,000 pupils.

Public secondary establishments include high schools and academies, numbering some 6,800; they enrol over 680,000 students (4-ys. course). 179 public normal schools mustered 54,600 pupils.

There are reformatories, and Government and "public" schools for Indians; 44 technical institutes, granting scientific degrees; 122 colleges for women; and public institutions for the educ. of the blind, deaf, and mentally afflicted.

Powerful aid is afforded by private and philanthropic initiative, there being over 3,000 private kindergartens, private elementary schools with over 1,200,000 pupils, private high schools with 180,000, private normal schools with 15,700, commercial schools with 137,000, besides many orphan and other asylums, schools of art, music, &c.

The special or professional schools comprise 156 institutes of theology, 96 of law, 148 of medicine, 67 of pharmacy, 54 of dentistry, 12 of veterinary science, whilst no less than 862 institutions are devoted to the training of nurses.

Passing to the 464 "colleges and universities," it may be noted that the American "college" has no exact counterpart in Europe, its curriculum corresponding somewhat to that of the upper classes of a German gymnasium, or of the higher forms of a British public school. The term "university" is rather misleading, being applied to a large number of establishments of very varying efficiency and status. The institu-

tions at which a university training (as understood in England) is given are: California, *The Catholic University of America*, Chicago, Clark, Columbia, Cornell, Harvard, The Johns Hopkins, Michigan, Pennsylvania, Princeton, Stanford, Wisconsin, and Yale.

All the above, with the exception of those given in italics, are also "colleges."

A salient and characteristic feature of the American system is *co-education of the sexes* throughout, there being comparatively few institutions where the tuition is not *dual*.

The League of the Empire.

President: RT. HON. LORD TENNYSON, G.C.M.G.
Hon. Sec., MRS. ORD MARSHALL, Caxton Hall,
Victoria Street, Westminster, S.W.

The League of the Empire was founded in 1901. Its work is entirely non-political and non-sectarian. Its objects are to further the friendly and educational union of schools and other institutions of the Empire, to bring knowledge of the conditions of the different parts of the Empire within reach of all at the smallest expense and trouble, and to promote co-operation between the different countries for their mutual service.

Schemes for reciprocal education between the schools of the Empire were submitted by the League in February, 1903, to the Colonial Governments, through the Agents-General, and later by means of a despatch issued by the Colonial Office, and they have received the approval of the Administrative Authorities in all countries of the Empire.

The League has a Federal Council of Representative members in all parts of the Empire, which includes His Excellency the Governor-General of Canada, with other Colonial Governors, Colonial Secretaries, and Directors of Education. Among the Vice-Presidents and Members of Committees are the Agents-General, the Earl of Meath, the Head Master of Eton College, Dr. S. H. Butcher, M.P. (*Chairman of Council*), Sir F. Pollock, Sir H. Craik, Professor Bury, the Principal of Trinity College, Oxford, Dr. Mahaffy, Principal Gregory Foster, Principal Reichel, Professor Ray Lankester, Sir John Bramston, Sir Philip Hutchins (*Chairman of Executive*), Sir Charles Lyall (*Hon. Treasurer*).

The League holds now a recognised position educationally, having obtained the co-operation of the Education Departments in all countries of the Empire, to a number of which it is the recognised Official Agent in all parts of the world. The work of the Society is sometimes conducted directly through the Education Offices, sometimes by Agents appointed by the Authorities for the purpose, and also by Branch Committees in the different Colonies, States, and Provinces. The work of the League permeates into the smallest Colonies, and the Individual Correspondence Branch of the Society numbers now

over 13,000. Through its affiliated schools it already probably influences over 400,000 children. In South Africa the Society has forty local branches and two executive committees. In Adelaide it has over 4,000 members.

The League has a large staff of practised lecturers. During the last three years lectures have been given both in schools and public halls throughout the United Kingdom. Courses of weekly public lectures on the different Colonies have also been given in the Caxton Hall, Westminster. Two courses of popularly written lectures on the "History of the British Empire," and also on the "Great Men of the Empire," fully illustrated by lantern slides, are published by Mr. John Murray, and are on sale or hire at the office of the League.

The education work of the League is directed by committees of experts. The History Section of the League (Chairman, Professor Bury) has undertaken the issue of a graded series of Imperial Text-Books in co-operation with committees and representatives appointed by the Education Departments throughout the Empire. For this scheme a gift of £5,000 has been made the League.

An Exhibition of the "Schools of the Empire" was held in 1906 at the Crystal Palace, the schools exhibiting ranging from Eton College to the smallest primary school. In May, 1907, a *Federal Conference on Education*, convened by the League of the Empire, was held in the Caxton Hall, Westminster. Nearly 50 representatives of the different Education Departments of the Empire were appointed to attend, and there were over 150 delegates representing Universities, Education Associations and Colleges. The invitations to the Colonial Education Departments were conveyed in the Colonial Office mail bags, by courtesy of Lord Elgin. The Official Conference, which took place daily, May 25th to June 1st, placed on record "its high appreciation of the work done by the League of the Empire in stimulating and collecting and circulating information on educational subjects." One of the most important results was that His Majesty's Government undertook to call the next Federal Conference on Education.

Union Jack Club.

Patrons, H.R.H. THE PRINCE OF WALES, K.G.
Patronesses, H.R.H. THE PRINCESS OF WALES.

H.R.H. THE DUKE OF CONNAUGHT, K.G.
H.R.H. THE DUCHESS OF CONNAUGHT.

THE Union Jack Club was founded by Miss Ethel McCaul, R.N.O., and the foundation-stone was laid on 21st July, 1904, by H.R.H. the Prince of Wales, the Club buildings in the Waterloo Road being opened by H.M. the King on 1st July, 1907. Its objects are to promote the welfare and ameliorate the condition of sailors in the British Navy and soldiers in the British Army and Royal Marines, and with this object in view to provide a club-house and all conveniences in connection therewith. The accommodation provided includes 200 bedrooms; lounge hall, with

music, games, &c.; dining-room; library and reading-room; billiard room, 6 tables; lavatory and toilet rooms; barber's shop, foot-baths and "kit-room." Since the opening, 18,621 beds have been occupied (1st July-25th November, 1907). *President of Council and Chairman of Committee,* Sir Edward W. D. Ward, K.C.B., K.C.V.O. *Vice-President,* F. C. Wallis, F.R.C.S. *Comptroller and Secretary,* Major E. F. O. Gascoigne, D.S.O. *Offices,* 92A, Waterloo Road, S.E. *Telegrams,* "Anchorable, London." *Telephone,* 14,298 Central.

Geographical Progress and Territorial Changes, 1906-7.

Europe.—In Iceland, which is conventionally regarded as part of Europe, a German scientific expedition under Drs. von Knebel and Spethman has unfortunately met with disaster. During the examination of the great lava field of the Odadabraun Dr. von Knebel attempted the navigation of the hot lake of the Askja volcano, accompanied by a young artist named Radloff. The remains of their boat were afterwards found on the shore of the lake, but as no tidings of the explorers have been forthcoming, it seems certain that they have perished.

Asia.—In spite of the barren and desolate nature of the surface, the vast interior of Asia continues to provide a field for the activity of explorers. Even where the outlines of the geography are known, there is much to be done in the way of archaeological research, which has already thrown much light on the past vicissitudes, both of nature and man, in this region. Dr. M. A. Stein, of the Indian Education Department, has continued his investigations throughout the whole of 1907, and has gained some valuable results. After examining various sites on the southern edge of the Takla Makan desert, which gave evidence of unusual vicissitudes of fortune in the past, he proceeded to the Lob Nor district, and was able to prove that the headquarters of the region was in ancient times, as now, in the neighbourhood of Charklik. During an advance into the desert to the north-east he examined further ruins which proved to be those of a post on the old trade route to China, abandoned at the close of the third century A.D. The Indian surveyor, Rai Ram Singh, was meanwhile occupied with independent surveys along the mountain range to the south. Dr. Stein afterwards made his way to the Chinese province of Kansu by the route once followed by Marco Polo, which skirted the shores of an old salt-covered lake-bed; and he was successful in bringing to light an ancient line of frontier defence corresponding to the "great wall" on the Kansu border. The German expedition under Professor Lecoq, and the French under Professor Pelliot, have also made some interesting antiquarian finds, the former in the region of the Turfan depression.

Of a more strictly geographical nature are the explorations of Dr. Sven Hedin, who, on his present (third) great expedition to Central Asia, has fully equalled his previous achievements. He first crossed one of the least known parts of Central Tibet from north to south, arriving at Shigatse on the Sanpo or Upper Brahmaputra early in 1907, and has since carried out an important journey to the west, exploring the northern tributaries of the Sanpo, and the great range separating this from the independent lake-basins to the north, some of which were also examined for the first time. He arrived at the Mansarowar lake towards the end of July, but seems to have since continued his explorations, which will form a valuable supplement to the work of Major Ryder and Capt. Rawling in this region. The young Austrian zoologist, Dr. Zugmayer, who in 1906 had attempted to penetrate Western Tibet from the north, returned to Europe in December, 1906, after carrying out a part of his programme.

The entry of British explorers into Tibet having been vetoed by the Indian Government, their energy has spent itself on portions of the Hima-

layas within British territory. Dr. T. Longstaff, who had previously made a successful trip through the western part of the range, succeeded, in the summer of 1907, in reaching the summit of the peak of Trisul in the Garhwal district, the altitude of which has been fixed by the Trigonometrical Survey as 23,406 feet. This is possibly the highest altitude on the earth's surface ever yet attained, though it is practically identical with the record achieved by Dr. Hunter Workman, in 1903. At the other end of the range, another young Englishman, Mr. J. W. Brooke, has made an attempt, after reaching the western borders of China *via* the Yang-tse route, to penetrate into the forbidden region about the great bend of the Sanpo—with what success is not yet known. In north-eastern Tibet a plucky journey has been made by the German geologist, Dr. Tafel, who, though twice driven back through the attacks of marauding bands, has succeeded in pushing south from the headwaters of the Hwang-ho to that of the Yang-tse, though afterwards compelled to turn east to Fa-chien-lu, on the Chinese frontier. The same region is said to be the objective of a new expedition of the Russian explorer, Kozloff.

In China proper, an important piece of work has been done by a French expedition under Capt. D'Ollone, who has made his way through the country of the independent Lolos, an aboriginal race, into the heart of whose domain no traveller had previously penetrated. A little further west, a little known region, inhabited in part by the Mossos—another aboriginal race—had been traversed in 1906 by D'Ollone's compatriot, the Count de Marsay. In the province of Kiangsi, south of the Middle Yang-tse, a journey of research, covering some new ground, has been successfully accomplished by Dr. G. Wegener, of Berlin.

In the field of political geography, the most important event has been the signing, on Aug. 31,

SKETCH MAP OF PERSIA
BOUNDARY OF ZONE OF INFLUENCE ---

of a convention between Great Britain and Russia, regulating the mutual relations of the two Powers in various parts of the Continent.

In Persia two zones are reserved respectively for the prosecution of British and Russian enterprise, as shown on the accompanying sketch; both Governments undertaking to respect the political integrity of the country as a whole. Russia also recognises Afghanistan as outside her sphere of influence, while both Powers pledge themselves to refrain from interference with Tibet. During the year, the new frontier between Russia and Japan, in the Island of Sakhalin, has been demarcated by the cutting of a line through the forest and the setting up of pillars along it.

Africa.—Early in 1907, Lieut. Boyd Alexander, whose journey in Central Africa has been spoken of in former issues of this Almanack, reached the East Coast at Port Sudan, thus completing the traverse of the Continent, begun fully three years earlier. His careful surveys had been continued as far as the Upper Nile, the latter part of the route leading up the Welle and down the Yei, one of the least known western feeders of the Nile. A journey in the reverse direction across the greatest width of the Continent, was completed a little earlier by the adventurous traveller, Mr. H. Savage Landor, who, after traversing Abyssinia and the Bahr-el-Ghazal province, had continued his route through the French territories of the Congo, Lake Chad, and the Sudan, ultimately emerging at the Senegal. This extensive journey was carried out with very scanty means, Mr. Landor having travelled almost alone, trusting in great part to the hospitality of the peoples he met with, and it is of interest as showing what may now be done in this way of African travel with no armed escort to depend on. Another extensive journey through Central Africa was completed in 1906 by an English lady, Miss Mary Hall, who made her way from South to North, a little east of Lake Tanganyika, with quite a small native caravan.

Mr. Hans Vischer completed his adventurous journey across the Central Sahara, from Tripoli to British Nigeria, towards the end of 1906; but no detailed account of the journey has yet been received from the traveller. The French military authorities continue to show great activity in the Sahara west of Mr. Vischer's route. In 1906 an expedition under Lieut. Cortier went north from the Niger across the desert to Taodeni, the site of the salt deposits which supply so important an article of trade in this region. Having met an expedition from the north, under Col. Laperrine, Lieut. Cortier returned south by a new route, his party suffering great hardships during the passage of this waterless tract. In 1907 another French officer, Capt. Arnaud, made a strikingly rapid journey from Algeria to the Niger, and on to the Guinea Coast at Kotonu, choosing new routes as far as possible, and executing careful surveys with the help of several colleagues, some of whom returned by the northward route. In the French Congo territory, most important geographical work has been done by the well-known explorer, Capt. Lénfant, and his coadjutors, whose task was to study new routes from the Congo to the Chad territories. A new river, the Pendé, belonging to the Shari system, was explored, and is thought to offer facilities as a line of communication.

In the Equatorial region, the expedition sent out by the British Museum to make natural history collections on the Ruwenzori range returned in two sections to the west coast, Mr. Woosnam taking the now frequented route through the forest to the Congo, while Dr.

Wollaston and Mr. Carruthers chose a more circuitous route *via* Lake Kivu. Mr. Woosnam described the life-zones observed on Ruwenzori at the meeting of the British Association at Leicester. Major Powell-Cotton, who had been travelling for some time in the north-eastern portion of the Congo State for the purpose of securing specimens of the larger fauna, returned early in the year, having brought to light several new varieties of mammals. During the latter part of his journeys he had been accompanied by his wife.

In East Africa, a scientific expedition under Dr. F. Jaeger has been brought to a successful conclusion, much new light having been thrown on the rift-valleys and old volcanoes of the German territory between Mount Kilimanjaro and the Victoria Lake. Some of the volcanic peaks reach heights of 10,000 to 13,000 feet, and there are old craters measuring three, five, and even twelve miles across—one being possibly the largest in the world.

Further north, in the Galla countries subject to Abyssinia, an Italian expedition under Don Livio Caetani, a son of the Duke of Sermoneta, has made its way south to Lake Rudolf, returning to the coast by a different route.

Our knowledge of the continent receives welcome additions from the precise surveys now in progress in many parts. The measurement of the arc of the 30th meridian, begun some ten years ago in South Africa under the direction of Sir David Gill, has advanced some distance north of the Zambezi, and arrangements have been made for the continuance of the work in the neighbourhood of the equator during the survey, now in progress, of the joint frontier between Uganda and the Congo State. The altitude of Khartum has for the first time been accurately fixed at 1,252 feet above the sea by a line of levels, while that of the Albert Nyanza has been provisionally fixed by a similar method at 2,028 feet.

THE NEW LIBERIAN BOUNDARY.

An arrangement regarding the frontier between Liberia and the French territories to the north and east has at last been arrived at, during the visit of the Liberian President to Europe. The Kavalli River, and its supposed western head stream, the Nuon, form the greater part of the boundary, which is roughly shown on the accom-

panying sketch-map, the want of precise surveys making it impossible, at present, to lay it down with minute accuracy. The texts of the agreements concluded in 1906, defining the frontiers between Nigeria and Dahome, and between the Gold Coast and the French Sudan, have been published as Parliamentary papers during 1907, accompanied by large-scale maps. It is almost entirely in points of minute detail that the lines, as finally drawn, differ from the frontiers previously accepted. By an Order in Council of July 6, 1907, the name "Nyasaland Protectorate" is substituted for that of British Central Africa, a new constitution being also established.

America.—Some excellent survey work in the coast region adjoining the Mackenzie delta has been done by Mr. A. H. Harrison, and some also by members of Mr. Mikkelsen's expedition, though, as both these were undertaken primarily with a view to Arctic discovery, they will be better dealt with under that heading. Official surveys in Alaska continue to be prosecuted with vigour, and good progress has been made during 1907 with the survey and demarcation of the Alaska-Canadian boundary fixed by the award of 1903. Among researches in Physical Geography may be mentioned various studies of the glaciers of the north-west coast region by Prof. Tarr, Dr. Klotz, and Messrs. Vaux. A valuable report on the recession of Niagara has been made on behalf of the United States Geological Survey by Prof. Gilbert. Prof. Spencer, who had previously made a preliminary report on the same subject to the Canadian Geological Survey, presented some additional details, especially regarding his soundings of the river below the falls, to the Leicester meeting of the British Association. He is about to publish an elaborate study of the whole question, based on researches extending over a number of years. A careful examination of the area inundated in 1905-6 by the Colorado river (as described in the last issue of this Almanack) was made early in 1907 by Prof. MacDougal, who found that the Salton Sea covered, at its maximum, an area of 700 square miles. After gigantic efforts involving the expenditure of over 3½ million dollars, the breach effected by the river was at last stopped in February, 1907. It is calculated that during the final effort 100,000 tons of material were dumped into it in 13 days.

The effects of the great earthquake in Jamaica, by which the city of Kingston was wrecked on Jan. 14, 1907, have been studied on the spot by Dr. Vaughan Cornish, Prof. C. W. Brown, and others.

In South America, some important surveys have been carried out by Major P. H. Pawcett, head of the Bolivian Commission for the delimitation of the frontier with Brazil laid down by the treaty of 1903 (see this Almanack for 1905, p. 662). Many of the points in this region have thus for the first time been fixed by accurate observations, and a good many alterations of existing maps will be rendered necessary. In the Brazilian State of São Paulo, explorations have been carried out on the upper Paraná and other rivers under the auspices of the "Comissão Geographica e Geologica." In Dutch Guiana, a new expedition for the survey of the little-known interior has been organised by the authorities during 1907, while at the opposite extremity of the continent a scientific expedition to the Straits of Magellan has been undertaken by Mr. Skottsborg, a member of the recent Swedish Antarctic Expedition.

The principal event of the year affecting the frontiers of American States was the ratification, on January 25, of the declaration and agreements drawn up in 1905 respecting the boundary between Costa Rica and Panama. The result is to modify considerably the frontier laid down by the award of 1900 (Almanack, 1902, p. 639), according to which Colombia (of which Panama then formed a part) received the whole basin of the Tarire (Sixola) river, running far into Costa Rica. This never met with full acceptance, and the northern part of the frontier is now drawn much to the advantage of Costa Rica, while on the other hand Panama gains in the south by the new arrangement. The accompanying sketch shows the new frontier by a

COSTA RICA - PANAMA BOUNDARY

NEW FRONTIER ——— OLD FRONTIER ———

strong broken line, the *prima facie* interpretation of the 1900 award being indicated by the fainter dotted one.

A territorial re-arrangement not affecting international relations is that by which the district of Ungava, forming the western part of the Labrador peninsula, is added to the Canadian province of Quebec, which thereby becomes the largest province of the Dominion. In the United States, the Territory of Oklahoma has been raised to the rank of a State.

Australasia and Pacific.—In Australia the most important recent exploring expedition has been that of Mr. A. W. Canning, which was organised by the survey department of Western Australia, for the purpose of finding a practicable stock-route between the eastern goldfields and the Kimberley division in the north of the State. The expedition left Wiluna in May, 1906, and successfully crossed the desert to the north, reaching Sturt's Creek after a journey of several months. The conditions as regards pasturage

and water-supply proved more favourable than had been anticipated, and the chances of opening up the desired route are thought to be good. The return journey across the desert was completed, without mishap, in July, 1907. In New Zealand some good work on the side of physical geography has been done by Mr. J. M. Bell (formerly of the Geological Survey of Canada, and now Director of that of New Zealand), who has studied especially the glaciers of the New Zealand Alps. In New Guinea a journey for anthropological research in various parts of the island has been completed by Dr. R. Poch, of Vienna, while Dr. Schlechter, already known for work in the German West African territories, has undertaken an expedition into the little-known interior of the German part of the island, mainly for the study of its rubber resources. In Dutch territory, an expedition under Mr. H. A. Lorentz is endeavouring to penetrate inland from the south coast. It should be mentioned that the official designation of British New Guinea has lately been changed to "Territory of Papua."

Several good pieces of oceanographical work have been carried out in the Pacific and neighbouring seas. The German surveying-ship *Planet*, which had carried on scientific observations during the whole outward voyage, has begun work in the German part of the Western Pacific, after bringing to light, by means of soundings, a remarkable sub-oceanic furrow on the outer side of the Sunda Islands. During a survey of the ocean bottom between Formosa, the Philippines, and the Carolines, in connection with the laying of new cables, the German ships *Edi* and *Stephan* have revealed the existence of quite a series of ridges and furrows in this part of the ocean. The magnetic survey of the Pacific by the U.S. sailing-ship *Galilee* has also made good progress.

The convention concluded in 1906 between Great Britain and France for the provision of a joint administration in the New Hebrides was printed as a Parliamentary Paper in January, 1907, ratifications having been exchanged on the ninth of the month.

Polar Regions.—The year has been rather one of preparation for future work than of actual achievement. Something has, however, been done in the area north of the Mackenzie basin by the expeditions which had taken in hand the exploration of the Beaufort Sea. Mr. Harrison, whose surveys on the mainland have already been referred to, made his way in the spring of 1907 to Banks Land, and from his observations of the physical conditions of the sea to the west, is confirmed in his belief in the existence of undiscovered land to the north, though unable to make any advance over the ice in this direction. Mr. Mikkelsen, in command of the Danish expedition in the *Duchess of Bedford* (supported by sympathisers in England and the United States), had the misfortune to lose his ship, in which he and his party had wintered at Flaxman Island. This somewhat delayed the start on his sledge expedition over the ice to the north, but with much determination he pushed on with two companions over rough and difficult ice to a point 120 miles from the land, carefully studying the winds and currents, and carrying out a series of soundings which revealed the existence

of depths exceeding 300 fathoms over a considerable area only some sixty miles from the coast. The edge of the submarine platform known as the "continental shelf" seems, therefore, to lie at no great distance from the North American coast in this region, and the probability that land exists to the northward seems somewhat lessened. Yet Mr. Mikkelsen's observations of the drift of the ice make him still regard this sea as a land-locked area. The return to the land was rendered difficult by the amount of open water, and the prolonged absence of the party occasioned some uneasiness, which, however, proved groundless. The explorers hope to make a more extended journey in 1908.

Commander Peary, who had planned to start in 1907 for another attempt on the Pole, has been obliged to postpone his departure till 1908. The experienced American traveller, Dr. F. A. Cook, has, however, started on an expedition to the far north, in the hope of pushing his way to the Pole by a route to the west of Ellesmere Land. Mr. Wellman, who went to Spitsbergen with his reconstructed airship in the summer of 1907 with the intention of attempting a voyage to the Pole, has again returned without accomplishing anything beyond a trial voyage lasting three hours. Several scientific expeditions have, however, been at work in the region north of Europe. The Duke of Orleans, with the help of several scientific men, has carried out an interesting voyage to Novaya Zemlya and the Kara Sea, while Mr. W. S. Bruce has continued his work, begun in 1906, in Prince Charles Foreland, Spitsbergen; and the Prince of Monaco has once more engaged in oceanographical work in the adjacent seas.

As regards the Antarctic, the campaign, which showed signs of languishing after the return of the various national expeditions some three years ago, seems in a fair way to be actively resumed. A well-equipped British Expedition, organised by Lieut. E. H. Shackleton, one of Capt. Scott's companions on his record journey south in 1902, started for the scene of action at the end of October, his ship, the *Nimrod*, re-christened the *Endurance*, having preceded him by the route round the Cape, after being inspected by the King and Queen off Cowes. Lieut. Shackleton has chosen King Edward VII. Land as his base of operations, and here winter quarters will be established, whence, in the southern spring of 1908, it is hoped both to push southwards and to investigate the extent of King Edward Land and its possible relations with other Antarctic land-masses. The staff of the expedition includes a competent biologist and others capable of scientific work, which will be prosecuted whenever possible. After landing the party, the ship, which is in charge of Lieut. Rupert England, R.N.R., will return northwards, and will prosecute investigations off the supposed coast of Wilkes Land, going south once more to bring back the landing party early in 1909. Besides ponies and dogs, Lieut. Shackleton has taken, as an experiment for transport purposes, a specially constructed motor-car.

Fresh expeditions are also being organised by the French scientist, Dr. Charcot (who is building a vessel for the purpose), and by M. Arctowski, of the former Belgian expedition.

EDWARD HEAWOOD.

In the 1906 edition (pp. 646-652) there was given a full description of the typical modern military system, followed by details of the organisation, strength, and expenditure of the various Powers.

In 1907 (on p. 632) this latter information was summarised in tabular form, whilst on pp. 656-665 appeared an exhaustive account of the British military system, emphasising especially the fundamental differences that distinguish it from the typical and from all other systems.

In the same edition, on pp. 649-651, appeared a *resumé* of the several measures of so-called Army and War Office reform introduced since 1743, none of which, however, purported to establish a truly National Army, or to build up such a military system as had been found necessary by other States.

By far the most important expression of Ministerial and Governmental military policy made public in recent years is to be found in the Memorandum on the Military Forces in the United Kingdom, presented to Parliament by command of His Majesty, and initiated by the Right Honourable Richard Burdon Haldane, Secretary of State for War, under date 25 February, 1907.

The importance of this Memorandum lies in the fact that it announces in the most uncompromising terms the dissatisfaction of the responsible Minister with the inadequacy, inefficiency, and costliness of the Forces, considered as a whole, that are provided by the existing régime.

In language that none can mistake, it is pointed out:—

- (x) That the heterogeneous composition of the Land Forces, the result of casual growth rather than of scientific evolution, is disabling in its perplexity and unsuited to modern requirements.
- (2) That the Regular Reserves are insufficient even to effect an initial mobilisation, quite apart from their true function of repairing the wastage of war.
- (3) That no effective machinery exists for the purpose of training such substitutes for a Regular Reserve as might be forthcoming.
- (4) That the conditions of engagement service and organisation in the existing Militia, Yeomanry, and Volunteer Forces are such as to render their scientific training for war impracticable, with the result that military opinion is unanimous in holding that these troops are unfit to take the field against a European army—that is, unfit to accomplish the sole task for which they are maintained at an annual cost of some £4,400,000. (It must not, however, be assumed that either Ministerial or military opinion is ignorant of, or indifferent to, the efforts that have been made by officers and men of these forces to better, in so far as they were able, a condition so lamentable.)
- (5) That the mere contemplation of the present large nominal establishments by a British public, unable, owing to its lack of familiarity with the requirements of war, to assess their true military value, necessarily promotes dangerous illusions.
- (6) That in point of fact the large establishments, maintained at so great a cost, can with difficulty provide an Expeditionary Force of fully-trained troops, totalling 6 divisions and 4 cavalry brigades, the

whole constituting a Field Army of relatively insignificant proportions. Behind this organised body there is little or nothing suitable for its support, or expansion.

This opening portion of the Memorandum frames a formidable—indeed, an unanswerable—indictment, wholly praiseworthy in its frank recognition of facts that have long been patent to thinking soldiers, and admirably calculated to prepare the public mind for radical changes. These, however, do not as yet appear to be forthcoming.

All is not merely destructive criticism and comment, for the Memorandum proceeds to outline the proposed measures of reconstruction and reform, which, we are assured, have been the subject of close discussion with the military authorities best qualified to advise. On the other hand it is not suggested that these reconstructions and reforms represent all, or even the greater portion, that those responsible for the war strategy of the British Empire prescribe as necessary.

The proposals adumbrated are, very briefly:—

- (x) The future division of the Land Forces into two, and only two, categories. The existing division into three categories is emphatically condemned.
- (2) The future National Army to consist of (a) a Field Force of 6 Infantry Divisions and 4 Cavalry Brigades, ready in all respects for rapid mobilisation and prompt employment, and (b) a Territorial or Home Force, destined to be embodied "for systematic training" on an outbreak of war. The special rôle of this Force to be the support and expansion of the Field Army, which, it is tacitly assumed, will not experience the need for either until after a lapse of six months, during which period the Territorial Troops will be engaged in qualifying themselves for those duties. But nothing is said as to liability of this Force to render these services overseas, in the event of the need being experienced there.
- (3) The perfection of an organisation to assure the complete mobilisation of the Field Force, and its maintenance in the field, in the shape of a "Special Contingent" composed of officers and men who, for the consideration of an annual bounty, will, it is hoped, present themselves for an annual training sufficient to fit them to undertake (a) many of the auxiliary and non-combatant services of the Field Army; and (b) the provision of drafts to repair wastage in combatant arms other than cavalry. The establishment of this Special Contingent is forecasted at some 3,500 officers and 75,000 men, the bulk of whom are to perform six months recruits training on enlistment, followed by short annual exercises.
- (4) The provision of a machinery for training (a) the Special Contingent and (b) officers and men who, after mobilisation, may be available for drafting to the Field Army, in the shape of (i) a third or nucleus battalion for each pair of Line Infantry Battalions, (ii) 11 Training Brigades of Field Artillery, evolved from existing service units, and (iii) a similar organisation for the other arms and services. These nuclei

to be expanded on mobilisation to a War Establishment by calling up the Special Contingent and incorporating details from the affiliated First Line units. Also to act as Schools of Instruction for the Territorial Force.

- (5) The unification of the existing Auxiliary Forces into a homogeneous Territorial Army, recruited, maintained, organised, and trained on a single uniform system. The training to be given on present Volunteer lines. The force to comprise all arms, services, and departments necessary to the eventual formation of a Second Line Army of 14 Infantry Divisions and 14 Yeomanry Brigades, by a gradual process of absorption and reconstruction. The annual periods of consecutive training to be fixed at a *minimum* of 8 and a *maximum* of 15 days (corresponding to the present regulations for Volunteer camps), and special attention to be paid to the military education of officers and non-commissioned officers by means of classes and local Schools of Instruction conducted by Regular Officers.
- (6) The creation of County Associations, composed of prominent county officials, with the local territorial commanders, and assisted by a Regular military element, who, under the control and direction of the Army Council, will be responsible for (a) the recruiting, administration, and general finance of the territorial units of their district during peace, and (b) such local military matters as the interests of reservists, discharged soldiers, and families in peace and war. War training of the Home Army, however, and the finance of moneys advanced for that purpose, to be wholly in the hands of the Regular General Officer Commanding-in-Chief.
- (7) Cadet Corps and Civilian Rifle Clubs to receive State encouragement and support only in so far as they feed and generally further the interests of the Home Army.

The principal supplementary points of importance that have been elucidated since the issue of the Memorandum are:—

- (1) Eight Regular Line Infantry battalions have been disbanded, and one Guards battalion. Another Guards battalion and 6 more Line battalions are noted for early destruction, ostensibly in order that the principle of the Cardwell Scheme, which prescribes an equal number of Infantry battalions at Home and Abroad, may be adhered to.
- (2) Enlistments in the Territorial Forces are to be for a term of 4 years, with option of re-engagement. The age limits for enlistment to be 18 and 24 years. Discharges to be subject to 3 months' notice, and payment of a fine (maximum £5) in event of default, such fines to be imposed at the discretion of County Associations. All ranks to be paid at Service rates whilst training.
- (3) The reduction of 11 Field Artillery Brigades to a "Training" establishment has happily been postponed until Second Line troops are available to replace them.
- (4) A War Office Committee charged with the consideration of measures to create a Reserve of Officers has issued an Interim

Report, recommending that the present serious deficiencies should be made good by an Ersatz organisation, composed of Officers who, after a preparatory period of training, return to civil life with a liability to serve on general mobilisation. Such training to be acquired by one of the following courses:—(a) A year's continuous service with a regular unit; (b) service in a School Cadet Corps, followed by eight months' continuous training; or (c) service in both a School and a University Corps, followed by four months' continuous training. Liability to be renewed from year to year, to age 35, at the Officer's option. A retaining fee of £20 for each year of liability completed, with certain gratuities. An annual training of 14 days at first, and later a like period biennially. Special outfit allowances to Officers joining the Territorial Forces who are in possession of School and University certificates. Colonial co-operation to be invited.

Thus it would appear that a remedy has been prescribed for each and every symptom of the patient. The above proposals contain much that compels admiration and applause. It has been aptly remarked that they hold before us the great ideal of a National Army, different from all other National Armies in the fact that it is to be constituted entirely upon voluntary lines. It now remains to be seen whether any approach to that ideal will be rendered possible by the national support and enthusiasm Mr. Haldane invites, and appears to expect. Can the necessary men be obtained? Can they, if obtained, be made to do what is required of them? In view of individual preferences and interests, can the proper proportion of the various arms and services be ensured in a voluntary Territorial Force? The only possible answer is, that Mr. Haldane hopes so.

But the strategist and the military administrator, concerned primarily with the application of the national forces in war, impatient of considerations of political expediency, distrustful of ideals in relation to military service by reason of his past experience, and steeped in the irrefutable lessons of bygone campaigns, must approach the study of such reforms in a more chastened spirit.

Let us, then, discuss the British military policy of 1908 from the detached standpoint of the Chief of the General Staff of a great and friendly nation, anxious to enhance the value to his country of a British alliance. Such a one may be trusted to criticise fairly and dispassionately.

Adverting first to the probable nature of future British wars, he would express his opinion that these must necessarily be conducted overseas, that invasion of the United Kingdom is happily a remote contingency, and that, in any case, Second Line troops are the least fitted to oppose any such enterprise. He would then observe that we propose to establish a Territorial Force, legally available as such only for home defence, of rather more than twice the numerical strength of our Expeditionary Army. He would inquire by what perversity of reasoning we aim at such a reversal of means to ends, and would emphasise the fact that we make no legal or previous provision for our Territorial Army reinforcing our Field Force in the event, which seems most probable, of the latter experiencing

the need for support when engaged in an overseas campaign. The fact is, he would say, your Home Army corresponds almost exactly to our Landsturm, which, however, is composed of men who have served their full time in the Active Army and its Reserves. We prefer to concentrate our youth and energy on our Active Army; you divide it between your two categories of troops, and must thereby lose a great deal of it.

In default of any definite arrangements, he would prefer to consider our forces available for overseas war as limited to the Field Force, its Reserves, and the partly-trained Special Contingent, and would point out that these amount to but a small army for the purposes of modern warfare. Such defects, he would observe, are already characteristic of the system you propose to supplant.

He might express grave doubt whether we were making sufficient provision for the maintenance of internal order, and the suppression of possible disturbances, in time of war and excitement. Certain of your territories, he would observe, are in a dangerous political condition.

He would ridicule reliance upon troops needing six months' systematic training after an outbreak of hostilities, and would point out that insistence on this very expression implies the absence of system in the training previously given. If, he would add, it should unfortunately happen that your Field Force, the keystone of your military edifice, were to be shattered by an initial blow, you may be assured that no time would be afforded the remainder of the structure to develop any powers of resistance it might possess.

He would applaud the formation of nuclei for draft-training purposes, and would point out that all experience proves the importance of maintaining the strength of a Field Army by drafts to its existing units, rather than the maintenance of totals in the field by the addition of complete units of partially-trained men.

He would welcome the decision to afford greater facilities for the education of officers and non-commissioned officers of the Home Army, but would express the hope that it might be possible to ensure their receiving something more practical than training at night classes, and some doubts as to the attitude of civil employers of labour in the matter. He would enter a caution that the commissioned and non-commissioned officers of the Home Army should be sought only amongst those whose military merit and social status were calculated to ensure the respect of their subordinates and the habit of command.

The creation of County Associations he would regard as a wholly original idea, possibly admirably suited to the British genius for arranging such affairs, but liable to produce unequal results, and very probably wholly indefensible or unworkable in particular territories.

He would deplore the reduction of Regular units, particularly before the proposed Second Line organisations were ready to replace them, and would absolutely deny that any effective Field Artillery can be improvised. You already recognise that fact, he would say, with regard to your Cavalry.

But he would add that he saw no especial reason to be uneasy over the reductions already made in the Regular Army, provided the process

stops where it is, there being no instance where the existence or non-existence of 10 battalions decided the allotment of success or failure in a great war. On the other hand, he would cite several instances where national ignorance of war resulted directly in disaster, and some where national insistence on scientific preparation led to conspicuous success. This is, after all, the decisive factor, and he would believe that Mr. Haldane's proposals tend to assist the impressing of sober and rational views as to military requirements on the minds of the people.

Lastly, he would conclude that we unquestionably propose to make the greatest step we have yet contemplated towards the scientific preparation before mentioned. But he would bear in mind our political difficulties, and remember the tendency to parochialism which causes our present Auxiliary Forces and their political supporters to resent interference.

Detecting, as he would, a significant relationship between (i) our existing Militia and our proposed Special Contingent, and (ii) between our present Volunteers and our new Territorial Force, he would not be surprised to find that in five years' time we remain still very much where we are, concessions in this and that direction having dulled the edge of our intentions. If he is correct in his surmise, all that we shall have accomplished is included in the following summary:—

- (1) A better organisation of our Regular Army and its Reserves, reductions in the Active Army being rather more than made good by its Reserve formations.
- (2) A considerably smaller, but more carefully recruited and better disciplined Auxiliary Force for home defence, which, however, will add but little to our power to strike overseas.
- (3) An appreciable reduction in our military expenditure.

The net result will assuredly be the strengthening of our military position, for which there is sore need, and a wholesome dispelling of popular illusions, but we may at once dismiss the ideal of a National Army on a voluntary basis as chimerical, and regard our new framework for what it indubitably is—an excellent foundation for the compulsory military service we shall be forced to adopt when first we become involved in a great struggle for a vital objective.

Mr. Haldane's reorganisation proposes to provide for:—

1. *A Field Force of 4 Cavalry Brigades and 6 Infantry Divisions, composed of Regular Troops and Special Contingent, comprising—*

(a) *Combatant Troops—3,952 officers, 124,355 others (of whom 16,002 furnished by the Special Contingent. (b) Non-Combatants—1,594 officers, 29,720 others (including 14,855 Special Contingent).*

2. *A Territorial Force of 14 Yeomanry Brigades and 14 Infantry Divisions; approximate total, 300,000 all ranks.*

The war wastage of the Field Force for the first six months of a campaign is estimated at 40 per cent. of combatants, 15 per cent. of non-combatants, to be made good mainly by the Special Contingent. In this connection see *Losses in War*, p. 654.

P. R. COLER.

SINCE the promulgation on May 27, 1904, of the report of the Norfolk Commission on the Militia and Volunteer Forces, much has been heard of unofficial proposals for the introduction of an element of compulsion into the naval and military services, and organisations such as the National Service League, aided by the cultured and strenuous advocacy of its president, Field-Marshal Lord Roberts, have done much to prepare the public mind for dispassionate consideration of a subject hitherto so unfamiliar. As a distinguished and friendly foreign critic has lately expressed himself, "upon the reality of a National Army may depend at an early date the prestige and even the liberties of Great Britain." Lord Roberts's vigorous and self-sacrificing campaign has at least had the effect of presenting the reality of a danger which the British public has always preferred to regard as imaginary, and to set afresh the definite military problems from whose solution the British people have always shrunk in affright. Ignorance of the essentials is, however, so intimately bound up with love for tradition, that there is no immediate hope for the adoption of compulsion, nor can it become a measure of practical British politics until an adequate body of public opinion emphatically demands it. The present system of recruiting for the Regular Army vividly recalls the French methods of the 17th and 18th centuries."

It will be remembered that the labours of the Royal Commission alluded to were confined, by the terms of its reference, to investigation of conditions affecting the internal defence of the United Kingdom from invasion, and that its report, hastily repudiated by the Government of the day on grounds of political expediency, comprised (1) a condemnation of reliance upon the Auxiliary Forces as then constituted, (2) proposals for changes in their organisation calculated to increase their military value, (3) an expression of conviction that no practicable measures of reform could ensure genuine security, and (4) an insistence upon the principle of universal military service, with a definite and continuous period of systematic military training, as being the only true solution of the problems presented.

It would have been infinitely more satisfactory had this, or another, Royal Commission been appointed to review the shortcomings of the British military system as a whole, for it is clearly incorrect strategically thus to separate the problem of interior or home defence from the wider aspects of our military situation.

It may safely be assumed that any such Commission, sitting then or now, would arrive at the conclusion that our vast and scattered Empire can only be maintained if the youth of the United Kingdom be reared in the fixed belief that it is their duty to defend it in prestige and integrity whenever and wherever it may be assailed.

Mr. Haldane's proposals, outlined on pp. 650-1, represent a final, and in a sense a despairing, appeal to the patriotism of the nation to furnish larger and better military resources. It is our duty to do what we can to assure an adequate response, but experience, common sense, and acquaintance with modern tendencies unite in forbidding us to be enthusiastically confident of success, or of finality in the event of success being momentarily attained.

The truth is that, whilst voluntary recruiting for a Regular Army of the size we are obliged to maintain involves a permanent uncertainty and dependence on exterior conditions (such as the

conditions of trade and employment and of the labour market, and even of the weather) with a constant increase of material inducements to enlist, proposals for the better training of forces recruited as our present Volunteers are (and as our future Territorial Army will be) are necessarily confined within extremely narrow limits. These limits are imposed by the unalterable fact that the officer or soldier serving under such an engagement is first and foremost a man who must at the same time earn his living. Well-intentioned schemes for giving him an adequate military training quickly break upon the rock of conflict with his convenience and his wage-earning opportunities. The result of making any sufficient demand upon either must be the denial, or the loss, of his military services altogether. And in neither Regular nor Territorial Army can we assure the presence of representatives of the nation's best brains or physique. An army or navy is too important to be based on such a foundation as this.

The advantages that accrue from compulsion to serve are both military, social, and economic. They may be summarised as follows:—

- (1) *Military*.—Substitution of certainty and scientific preparation for uncertainty and improvisation in all branches of organisation; settled establishments and abolition of need for expensive inducements; elimination of the unfit previous to enlistment; systematic and progressive military training in all services, and restriction of term of colour service to the minimum essential to proficiency; a Territorial Army, composed of men who have served their full time in the active forces; largely increased Reserves immediately available for overseas war; a large reservoir of carefully-enlisted men available for voluntary engagement in the overseas garrisons maintained in peace; concentration of the youth and energy of the nation on its first-line organisations; the best brains of the country at the disposal of the military services in time of need.

- (2) *Economic and Social*.—Improved education resulting from the military stimulus; establishment of a community of interest between various classes; improved physique, inculcation of habits of discipline, cleanliness, mental alertness, and punctuality; abolition of "Jingoism" based on ignorance of war; the institution of a truly National Army, with roots penetrating to all strata of society; and the checking of calamitously early marriage.

Proof of the reality of these advantages must be sought elsewhere as beyond the scope of this article. Another aspect, however, requires elucidation. The present writer has little sympathy or patience with the attempt to differentiate military training from military service, to applaud the one and condemn the other, but between "conscription" and "universal" service there is a wide gulf fixed.

Broadly speaking, the difference lies in the fact that whereas, in countries which have adopted "universal" service, every able-bodied adult male is obliged to undergo military training in one category or another of the Army or Navy (exemptions being confined to such individual cases as the only son of a widow, young men entering on a medical or professional career, clergy, youths with brothers already in the service, &c.), the essence of "conscription" lies

in the choosing by lot of a regulated annual contingent from amongst a considerably larger number of young men who are liable to serve. In the latter case exemption can always be purchased by a monetary payment, or a substitute can be found and paid to serve instead. The former system is essentially fair and democratic in character, recognising no distinctions of rank or wealth, except that superior education may be (as it is, for example, in Germany, but not now in France) accepted as a reasonable ground for the supposition that the individual is capable of acquiring the requisite military proficiency in a shorter time than his comrades who are less well equipped in this respect. Thus, in Germany the one-year Volunteer serves in the Regular Army, but at his own expense. France has recently abolished even this concession, and insists upon two years' service without exemptions.

Conscription, on the other hand, presents many objectionable features, and has been abandoned by all nations except Belgium (which retains it as an adjunct to voluntary enlistment), Spain, Portugal, Mexico, and certain South American Republics.

Amongst the many arguments popularly employed against compulsory service in our own case, most of which can very easily be refuted by adducing the practical experience of other nations, is often found the allegation that the system would provide us with forces largely in excess of our requirements. Again, however,

German statistics prove only 54 p.c. of those attaining military age in a given year to be fit for service. In our own case some 400,000 in round numbers annually reach age 20, but, owing to poorer physique, greater emigration, and larger marine requirements, we cannot regard more than 40 p.c., or 160,000, as available. Our actual bare requirements amount to about 132,000 recruits (*Reg. Army 38,000, Mil. 36,000, Leo. 6,000, Vols. 36,000, Navy 16,000*), these numbers being considerably short of the total needed to maintain the nominal establishments authorised by Parliament. We enlist, moreover, many who under a compulsory system would be excluded by reason of physical and moral unfitness, whilst the pick of the national resources never comes within the purview of the recruiting officer. Hence, the application of compulsion, though making a vast difference in the military value of the recruits, and thereby effecting enormous economies, would not do more than fill the cadres of our existing units. Compulsion, however, is applicable *during peace* only to organisations serving at home, and overseas garrisons must needs continue to be maintained by voluntary engagement.

It seems reasonable to suppose that our new Territorial Army can never attain either the dimensions or the importance desired by Mr. Haldane and his advisers without some such measure of support. Its application to the Regular Army presents rather more serious difficulties. P. R. COLRS.

Losses in War.

In connection with schemes for Army reorganisation, the following tables deserve careful consideration:—

COMPARATIVE LOSSES IN GREAT BATTLES
SINCE 1812.

Battle.	Year	Opponents.	Approx. Nos. engaged.	Total Losses.	Per cent.
Borodino ...	1812	French Russians	130,000	32,000	24.0
Dresden	1813	French Allies	66,000	42,500	35.1
Leipzig	1813	French Allies	200,000	10,000	14.1
Waterloo ...	1815	French Allies	171,000	38,000	19.0
Solferino ...	1859	French Austrians	301,000	60,000	35.0
Königgratz	1866	Prussians Austrians	151,200	53,000	17.5
Gravelotte...	1870	Prussians French	133,250	20,130	10.7
Sedan	1870	Prussians French	220,000	12,270	10.8
Liao-Yang ...	1904	Russians Japanese	140,000	8,920	6.3
Sha-ho	1904	Russians Japanese	90,000	38,000	42.2
Sandepu	1905	Russians Japanese	150,000	15,000	10.0
Mukden	1905	Russians Japanese	135,000	23,700	17.6
		Russians	200,000	36,000	18.0
		Russians	170,000	21,000	12.4
		Russians	90,000	24,000	26.7
		Russians	65,000	9,100	14.0
		Russians	320,000	91,490	28.6
		Russians	235,000	72,000	30.6

Statistics of the Manchurian War are especially relevant, inasmuch as, in the unfortunate event of a British conflict with Russia in Central Asia,

the conditions would be very similar. The following are taken from authentic sources:—

Total numbers placed in the field by Russia	1,356,000
Total numbers placed in the field by Japan	(Japanese estimate) 1,200,000
	(Russian estimate) 755,000

Mean effective strength of Russian Field Army, excluding fixed garrisons (Port Arthur, Vladivostok, &c.), and also excluding troops employed on lines of communication, 10,103 officers, 544,005 other ranks.

LOSSES.

Russian Field Armies only.

	Killed.	Wounded.	Missing.*	Prisoners.
Officers	678	3,810	422	662
Other ranks 19,068 ...	118,850	39,193	31,150	

Totals ...	19,746	122,660	39,615	31,912
* Of whom many are also included under prisoners.				

Cases of sickness treated in Russian Military Hospitals:—

Officers, 13,143; others, 345,222.
Of this number there died:—
Officers, 210; others, 7,158.

Japanese Field Armies.

Killed in battle	47,152	all ranks.
Died of wounds	11,424	"
Died of disease	21,803	"

Total	80,379	"
Wounded	170,129	"
Missing	5,081	"
Cases of sickness treated	221,136	"

In a favourable climate, over 30 per cent. of wounded may be expected to rejoin for duty within three months. P. R. COLRS.

WORKMEN'S COMPENSATION ACT, 1906.

THE Workmen's Compensation Act, 1906, which came into force on July 1, 1907, concerns the majority of people, either as employers or employed. Under previous Acts compensation to injured workmen could be claimed only by the classes of employees specifically mentioned in the Acts; but under the Act of 1906 all employees are entitled to compensation, except those who are specifically excluded. The scope of the Act was enormously widened by omitting "domestic servants" from the category of those to whom the Act did not apply. The conditions of domestic servants are so different from those of employees in large works that, the Act having been originally drafted with special regard to manufacturing and business firms, a great deal of uncertainty exists in regard to the application of the Act to domestic servants and other employees now included for the first time.

WHEN AND TO WHOM LIABLE.

The first clause of the Act provides that "if in any employment personal injury by accident arising out of and in the course of the employment is caused to a workman his employer shall subject as hereinafter mentioned be liable to pay compensation in accordance with the first schedule to this Act." The precise meaning of "injury by accident" is doubtful. Nervous shock from witnessing an accident, as well as the disease of anthrax, have been held to be injury by accident. It seems by no means impossible that a servant catching an infectious disease in her master's house would be regarded as having been accidentally hit by the bacillus of the disease, and therefore injured by accident. Certain industrial diseases, which come on slowly, would probably not be regarded as injury by accident, but are included in a separate section of the Act, which requires employers to compensate employees contracting such diseases.

Injury by accident entitling the employee to compensation must arise "out of and in the course of the employment." The words are likely to be interpreted by the Courts in favour of the employees wherever it is reasonably possible. A servant out on her own pleasure or business could not claim compensation for an accident happening then. If employed on an errand for the employer compensation could be claimed: the decision would depend upon questions of fact which would have to be determined in each case, and cannot be described with any definiteness in general terms.

In order to be entitled to compensation the injured person must be a "workman" within the meaning of the Act: this word is defined as follows:—

"Workman does not include any person employed otherwise than by way of manual labour whose remuneration exceeds £250 a year or a person whose employment is of a casual nature, and who is employed otherwise than for the purposes of the employer's trade or business, or a member of a police force or an out-worker, or a member of the employer's family dwelling in his house, but save as aforesaid means any person who has entered into or works under a contract of service or apprenticeship with an employer whether by way of manual labour, clerical work, or otherwise, and whether the contract is expressed or implied, is oral or in writing."

Perhaps the simplest way to give some idea of

what this means is to mention people clearly included, clearly excluded, and doubtful cases. Among those clearly included are cooks, house-maids, ordinary nurses, butlers, gardeners, chauffeurs, and other such servants regularly employed. Also included are clerks, articled clerks, apprentices, shop-assistants, errand-boys, drivers, and all employees such as carpenters, mechanics, and the like.

Among those clearly excluded are "out-workers," who are people to whom materials are given out to be made up, cleaned, washed, or altered in their own homes, or on other premises not under the control of the person who gave out the materials. Thus washerwomen working at home are excluded. A clerk in receipt of more than £250 a year is also excluded.

Among the doubtful cases are those whose employment is "of a casual nature, and who are employed otherwise than for the purposes of the employer's trade or business." In this connection it is necessary to make a distinction between "casual" employment and "part-time" employment. It is almost certain that a charwoman coming regularly one day a week, or regularly one hour a day, would be entitled to claim compensation from a private employer in the event of injury by accident in his service. Similarly a jobbing gardener coming regularly could claim compensation. It is doubtful, however, whether a charwoman, a jobbing-gardener, or a window-cleaner coming at irregular intervals only when called for by the employer, even supposing that the same person were employed whenever such services were required, would come under the Act: we incline to the opinion that such service would be considered as casual. A permanent secretary, governess, or tutor, in receipt of less than £250 a year, could almost certainly claim compensation. Visiting governesses, coming regularly, are also entitled to claim in the majority of cases. Possible exceptions to the validity of such claims might arise if the employees were regarded as "contractors" rather than as "workmen." If a man employs a contractor to do carpentering or plumbing at his (the employer's) private house, the employer is not liable to the contractor or his workmen. Probably on the technical ground that a doctor in regular and long-continued attendance on a patient is a contractor doing his work in his own way, and not under the control of the employer, a medical attendant could not claim compensation. Among other doubtful cases are trained nurses. A regular attendant on a permanent invalid would in all probability be regarded in the same way as a children's nurse or a valet, and be entitled to compensation; but a professional nurse, engaged for the course of a particular illness or accident, might on the one hand be considered a "casual" employee, or perhaps be regarded as technically a "contractor," and thus not be entitled to compensation. It seems clear that if a professional nurse is regularly employed by an institution which pays the nurse and is paid by the employer, the nurse could claim compensation from the institution. It is probable that a doctor's assistant, if in receipt of less than £250 a year, and a curate, if they are regarded as working under the direct orders of their superiors, would be entitled to compensation; as also, apparently, would be schoolmasters and school teachers.

Any person, say a barrister or a commercial

traveller, employing an odd man to occasionally carry luggage, would probably be liable if employed on "the employer's trade or business," say, for instance, carrying a brief-bag or samples, or even personal luggage if the employer were travelling on business. Doing exactly the same work, if the employer were visiting private friends on pleasure, would exempt the employee from the right to claim. In the case of clubs of various kinds, such as golf clubs, it seems practically certain that if the club employed caddies, even though the club was neither making nor seeking to make a profit, such employment would be regarded as the "trade or business" of the club, and it would be liable. A private player employing a caddie would not be liable to a caddie on links to which a temporary visit was being paid: such employment would be casual. It is, however, quite possible that a golfer playing frequently at a particular club, even if he did not systematically have the same caddie every time, would be liable to compensate any caddie regularly working on the links.

Another important provision of the Act is as follows:—

"Where any person (the principal) in the course of or for the purposes of his trade or business contracts with any other person (the contractor) for the execution by or under the contractor of the whole or any part of any work undertaken by the principal, the principal shall be liable to pay . . . compensation under this Act which he would have been liable to pay if the workman had been immediately employed by him . . . except that the amount of compensation shall be calculated with reference to the earnings of the workman under the employer by whom he is immediately employed."

This is of much importance to property owners and other people who, in the course of their business, employ contractors of one kind or another. In view of this clause it is advisable that employers should satisfy themselves that contractors employed by them are insured, or are otherwise in a position to pay the claims of injured workmen.

NATURE OF COMPENSATION.

The compensation which has to be paid in the event of injury by accident is as follows:—If the result is incapacity for more than two weeks the employer is liable for "a weekly payment during the incapacity not exceeding 50 per cent. of his (the workman's) average weekly earnings . . . (such payment not to exceed £1.) The "average weekly earnings shall be computed in such manner as is best calculated to give the rate per week at which the workman was being remunerated." This means that lodging, board, and clothing are to be taken into account in determining the weekly earnings. If incapacity lasts less than two weeks no compensation is payable in respect of the first week. If the incapacity is permanent the employer must provide an annuity for life for the injured employee. When the incapacity is only partial, and the injured person is able to earn something, the compensation is to be settled by arbitration. It is moreover provided that "any weekly payment may be reviewed at the request either of the employer or of the workman and on such review may be ended, diminished, or increased." Further, "where any weekly payment has been continued for not less than six months, the liability therefor may on application by or on behalf of

the employer be redeemed by the payment of a lump sum."

In the event of death, if the workman leaves no dependants, the employer is only responsible for the payment of reasonable expenses for medical attendance and burial, not exceeding £10. This payment is apparently in addition to any amount previously paid to the workman by way of compensation during incapacity produced by the accident that proves fatal.

"If the workman leaves any dependants wholly dependent upon his earnings," the compensation is a sum equal to three years' earnings, but not less than £150 nor more than £300. It is provided, however, that any compensation previously paid shall be deducted from this lump sum payable at death. When the deceased workman leaves people partially dependent upon him, the amount to be paid is to be determined by arbitration, but cannot exceed the sums mentioned above.

INSURANCE.

In view of the serious character of the liabilities, of the uncertainty attaching to the meaning of many parts of the Act, and of the fact that claims for compensation may be brought against employers which, even if they proved unsuccessful, would involve trouble and expense in contesting, the necessity of insurance against the liability is obvious. The legal liability to indoor domestic servants can be insured against at a cost of 2s. 6d. a year for each servant. The normal charge for gardeners is 5s., for coachmen 7s. 6d., and for chauffeurs £1. It is usually advisable for employers of domestic servants to take policies at a slightly higher annual premium—5s. for each indoor servant—covering more than the legal liabilities under the Workmen's Compensation Act, such as householders have been accustomed to give their servants in the event of accidents. In taking policies for the insurance of domestic servants, it should be seen that they fully protect the policy-holder not merely against all payments for which he may be liable legally, but for the defence at the company's expense of all claims. It is also of importance, especially in regard to outdoor servants, that the liability of the insurance office should not be limited to accidents happening when "employed as described," or any such limitation. A gardener mending the roof is not acting as a gardener, but an employer should see that the policy covers the gardener, however he may be employed. Whenever occasional workers, such as charwomen or jobbing gardeners, are employed, these should be insured, the normal cost being an extra 2s. 6d. a year to cover all occasional workers.

The rate of premium for business employees of all kinds is generally based upon the wages paid. For each £100 paid in wages in the course of a year some specimen charges are as follows:—Shop assistants, 4s. to 10s., according to the nature of the business; clerks in offices, 3s.; hotels: indoor employees, 7s. 6d.; outdoor, 20s.; caretakers of schools, &c., 7s. 6d.; window-cleaners, 6s.

It will thus be seen that while the liabilities under the Act are extremely serious should an accident happen, the cost of insuring against them is in most cases very slight, and adequate insurance is therefore a clear necessity for every employer.

WM. SCHOOLING.

The Public Trustee.

FROM the 1st January, 1908, no person need experience the loss of any property forming part of the estate of a deceased person or of a settlement, arising through the fraud, incompetence, or incapacity of their executors or trustees; nor need persons experience the expense, inconvenience, or loss occasioned by the death or absence of their executors or trustees; nor need anyone any longer undertake these onerous duties. For from this date, under the Act of Parliament 6 Edw. VII., c. 55, the State has provided an official called the Public Trustee, whose integrity, as to matters within his control, is guaranteed by the State, who will act as executor or trustee to persons who may desire to avail themselves of his services. Many attempts have been made since 1886 (Bill 121 of 1887) to set up a public department "for the custody and management of property held in trust, and the execution of the wishes of deceased persons," but without success. Public opinion, however, continued active; enormous losses of trust property occurred, and it was found difficult in all ranks and conditions of life to get private persons to act as executors or trustees. At last, in December, 1906, the present Act, based upon the report on Trusts Administration of 1895, and upon the experience of the Public Trustee in New Zealand, was passed. It is an Act of 17 sections, to be supplemented by rules (43 of which have been issued) as occasion may require. The Public Trustee is to be a corporation sole with perpetual succession. His general powers permit him, if he thinks fit, to act in the administration of estates of small value; to act as custodian trustee; to act as an executor or administrator; to act as an ordinary trustee; as a judicial trustee; as an administrator of convicts' property; and to regulate the audit and investigation of trust accounts. He is, moreover, to have all the same powers, duties, and liabilities, rights and immunities as a private executor or trustee. He may decline to act under any will or trust, but not on the ground only of the small value of the estate. He may accept as an ordinary trustee, under exceptional circumstances, a trust which involves the management or carrying on of any business, but, except with the consent of the Treasury, with a view only in such case to sale or winding up, and if the business can be carried on without risk of loss. He may not accept the administration of any insolvent estate. As to his services likely to be most in request, further details may be added to say that the Public Trustee may by that name be appointed executor or trustee, or both, of any will: e.g., "I appoint the Public Trustee executor and trustee of this my will"; or trustee of any settlement, solely, jointly, or as custodian trustee, either as an original or as a new trustee, or as an additional trustee; with this advantage to the public, that although the trustees originally appointed were two or more, the Public Trustee may be appointed sole trustee, thus enabling all the trustees other than managing trustees to retire if they wish to do so. The consent of the Public Trustee to act in any given case must, however, be obtained in due course, except that in the case of a will he is at liberty to act as executor or trustee without application, at any time after the fact of his appointment shall

have come to his knowledge. Applications to the Public Trustee for his consent to act in other cases should be accompanied by the instruments, if any, under which it is proposed his duties should arise, and by such general information as to the case as is required to be set out in the forms provided for that purpose. In the case of any existing trust, notice of the proposed appointment has also to be given, where practicable, to all persons beneficially interested. A most valuable provision in the Statute is that which enables the Public Trustee to act as what is called a "custodian trustee"—that is, as trustee to take care of the capital of the trust, leaving the management of the trust to individual trustees called the managing trustees. The appointment may be made by the Court; or, as the case may be, by the person having power to appoint new trustees; and, of course, in a new will or settlement, by the testator or creator of the trust at the time that the instrument is drawn up. The usefulness of the provision lies in the fact that it enables a testator or settlor to make sure that his capital will be safely secured, whilst at the same time he can associate his friends or members of his family in the management of the trust. There is, further, considerable provision made in the Statute for the administration, by the Public Trustee, of estates of all kinds of small value, and in cases where, but for the Statute, estates would be administered by the Court of Chancery. Administration by the Court is not so common as formerly, when, at one time, almost any dispute arising under a will or settlement was enough to cause the estate to be administered in Chancery. But owing to an improvement in procedure this is now the exception. Nevertheless, cases of this character may arise, and where, in these and other cases in future, the estate can be dealt with by the Public Trustee, it will be greatly to the advantage of the estate. For the Public Trustee is to have certain administrative powers conferred upon him by the Court of Chancery, and he is authorised to get assistance from the same without judicial proceedings, whilst the Statute says that his procedure is to be simple and inexpensive. The Act also makes important provision in regard to what is commonly understood by letters of administration, in that it provides (sec. 6 (1)) that the Public Trustee shall be equally entitled with any other person to letters of administration of a deceased person's estate, but that he is not to be preferred to the next-of-kin unless for good cause shown. This original departure in our law on this matter (letting in a stranger to administer) should prove a great relief to persons called upon to administer some estate, for which duty they feel themselves quite unfitted, and of which they would like to be relieved. An executor or administrator is also permitted, with the sanction of the Court, to hand over his duties, wholly or in part, to the Public Trustee, even although such executor or administrator may have obtained probate or letters of administration and acted in the matter.

Another important matter for which the Act provides is the investigation and audit of trust accounts.

This section (sec. 13) should prove to be a valuable protection to any anxious trustee or

beneficiary. On application being made by any trustee or beneficiary to the Public Trustee, he will cause the condition and accounts of any will or settlement to be investigated and audited, by such solicitor or public accountant as may be agreed upon by the applicant and the trustees, or, in default of agreement within three months, the investigation will be made by the Public Trustee, or some person appointed by him. The auditor, on the completion of his audit, is to forward to the applicant and to every trustee a copy of the accounts and of his report upon them. The remuneration of the auditor, and the other expenses of the investigation, are to be such as may be agreed upon by the trustees and the person entitled to the receipt of the income of the trust property, or (in default of such agreement) determined by the Public Trustee, and are to be borne by the estate, unless the Public Trustee shall order them to be borne by the applicant, or by the trustees personally, or partly by them and partly by the applicant.

As to the mode of action of the Public Trustee, sec. 11 allows him to employ such solicitors, bankers, accountants, and brokers as he may consider necessary, regard being had to the interests of the trust, the wishes of the creator of the trust, and of the trustees and beneficiaries; so that any vested interests concerned in the present management of trusts are not likely to be disturbed. By sec. 7 of the Statute, the Consolidated Fund is to make good all sums required to discharge any liability which the Public Trustee, if he were a private trustee, would be personally liable to discharge, except where the liability is one to which neither the Public Trustee nor any of his officers has in any way contributed, and

which neither he nor they could by the exercise of reasonable diligence have averted—a generous and adequate form of State guarantee.

The development of this valuable department of the State will be followed with great interest. It may be urged by some that there are matters of a delicate, discretionary, and personal character in a trust that may not be advantageously dealt with by a Public Department. But the corporate trustee must act through some person, and it need not be assumed that this person, or his deputies, will be less well equipped to deal with matters of a private and personal nature than the individual trustee. Strict secrecy is to be observed in respect of every trust or estate in the Department, and it may be safely assumed that the spirit of officialism, so severely condemned by the Committee when considering this project in 1895—over which the present Lord Chancellor presided, in whose hands, moreover, the guidance of the new Department rests—will not be allowed to mar its success.

The Public Trustee is not to work for a profit, but to charge such fees only as may be sufficient to pay the expenses of the Department. Up to the moment of going to press the fees have not been published. They can, however, be obtained, together with a pamphlet giving full particulars of the Department, on application to the Public Trustee at the address given below.

The central office has been open at 3-4, Clement's Inn, Strand, W.C., since the 1st October, where all particulars may be obtained.

Public Trustee, CHARLES JOHN STEWART.

Principal Clerks, Ernest King Allen, Leonard J. Fulton.

Offices, 3-4, Clement's Inn, Strand, W.C.

Immigration and Emigration, 1887-1906.

THE following tables give the number of persons who entered or left the British Isles during the period of twenty years 1887-1906. In the first case the countries from which the Immigrants set out is given, and in the second (which deals with *British and Irish Emigrants only*) the destinations of those who left this country:—

NATIONALITY OF IMMIGRANTS.					DESTINATION OF EMIGRANTS.					
Year.	British and Irish.	Foreigners.	Not distinguished.	Total.	Year.	To North American Colonies.	To the United States.	To Australia and New Zealand.	To South Africa.	Total.

The Cost of Old Age Pensions.

In an article on Old Age Pensions in the ALMANACK for 1902 the numerous schemes submitted up to that time for the establishment of Old Age Pensions were classified and criticised. It was pointed out that whilst the principle was generally accepted by politicians and public alike, it only remained for an acceptable scheme to be formulated for it to be carried into practice. Since that year new schemes have been suggested and considered, and the only essential points now remaining for settlement are (1) whether the recipient shall or shall not be required to contribute to the pension, and (2) the cost of establishing an accepted scheme upon a working basis. Upon the former point Mr. Asquith has not intimated his opinion, but it is quite clear from the remarks made by the Chancellor of the Exchequer in his Budget Statement in the spring of 1907 that he is prepared to find the necessary funds for carrying a scheme into effect. It will serve its purpose, therefore, if we limit this supplementary article to a consideration of the cost which the contributory and non-contributory schemes will respectively incur, and await Mr. Asquith's final conclusions regarding the particular method he proposes to recommend.

In estimating the cost of schemes for the provision of old age pensions regard must be had not only to the immediate cost, but also to the expenditure which will probably be involved at a more remote date, subsequent to the inception of the scheme. The cost of a non-discriminating universal old age pension scheme, of which Mr. Charles Booth is the principal advocate, would

£27,508,000, apart from the cost of administration. This amount would be equivalent to a poll-tax of about 12s. 6d. per head on the total estimated population (1907) of the United Kingdom. The cost of pensions granted universally to persons of 70 years and upwards would amount to £16,302,000, the estimated numbers of that age being 1,254,000. The cost at a later date, after the scheme had become operative, would be affected only by the natural growth of the aged section of the population, and in 1921 might be estimated at £30,632,000 for all persons 65 years of age and upwards. There is no difficulty in arriving at the cost of this scheme, because Mr. Booth has made it quite clear that he regards universality as the essence of his proposal. The cost of the scheme framed by Mr. Chaplin's Committee of 1899 (which may be accepted as representing the non-contributory schemes, carrying with them a discrimination as to the class of recipients) is more difficult to estimate. It is necessary to arrive, first, at estimates of the total number of the aged (various age periods and dates being dealt with), and, secondly, at the numbers who would be disqualified from a pension on the various grounds specified in the scheme—that is, no conviction for crime within the previous twenty years, no poor law relief within the previous twenty years, "unless under exceptional circumstances," non-possession of income of 10s. a week, proved industry or proved exercise of reasonable providence by some definite mode of thrift. The following table shows the estimated cost of the scheme, assuming the age limit to be 65 years:—

	England and Wales.	Scotland.	Ireland.	UNITED KINGDOM.
Estimated number of persons over 65 years of age in 1907 *	1,616,163	225,250	274,849	2,116,267
Deduct—				
1. For those whose incomes exceed 10s. per week	597,673	78,481	102,129	778,283
2. For Paupers	476,803	35,673	69,207	541,683
3. For Aliens, Criminals, and Lunatics	26,624	3,567	3,400	33,661
4. For inability to comply with thrift test	55,390	10,702	10,084	76,185
Total Deductions.....	1,116,508	128,423	184,820	1,429,811
Estimated Number of Pensionable Persons	499,660	96,827	89,969	686,455
Estimated Cost	£ 7,794,696	£ 1,384,626	£ 1,286,557	£ 10,465,879
Add Administrative Expenses (3 per cent.)	233,841	41,500	38,597	33,877
Total Estimated Cost.....	8,028,537	1,426,105	1,325,154	10,779,856
In round figures	8,029,000	1,426,000	1,325,000	10,780,000

* Estimated mid-year Population.

necessarily be very large. The age fixed by Mr. Booth is 65, and the pension proposed 5s. weekly, no contribution being required from the pensioner. The total number of persons of 65 years of age at the present time is estimated at 1,616,000, so that the initial outlay would be

Raising the age limit to 70 years, the cost works out at £4,444,000 for England and Wales, and £6,119,000 for the United Kingdom. If the limit were fixed at 75 years the cost would be about £2,223,000 for England and Wales, and £3,933,000 for the United Kingdom. In regard

to the amount of actual pensions, an average payment of 6s. a week (£15 12s. a year) was assumed on the ground that the pension was to range between 5s. and 7s. a week, according to the cost of living in various localities. If the smaller sum of 5s. is taken, the amount which would have to be distributed by way of pensions in 1907 would be, for the United Kingdom, £8,924,000. It should be understood that the estimates relate only to the immediate cost of a pension scheme. Any estimate of the cost of the scheme some years after its introduction must be quite hypothetical.

We may now refer to the contributory schemes—that is, schemes under which the recipient must contribute toward the pension. The first of these to receive commendation in any degree was that considered by the committee on Old Age Pensions (1895-8) of which Lord Rothschild was chairman. This scheme, which was the "least open to objection" among about a hundred brought before the committee, was one for granting pensions to all who could prove the possession, at 65 years of age, of an "assured income" of not less than 2s. 6d. and not more than 5s. a week, the pension to be on a sliding scale calculated to bring the aggregate income to not more than about 5s. a week. With regard to the cost of this scheme, the committee calculated, on the assumption that at least one-third of the total population above the age of 65 years would not require aid, and on the further supposition that one-third of the remainder would become entitled to pensions averaging 2s. a week, that the cost would amount, at the commencement, to about £2,300,000 a year, apart from the expense of administration.

The principle that the pensioner should contribute a portion of the pension has found, during the past year, many influential advocates on the ground that it has this support—"that the effective test whether a man desires a pension or not is whether he is willing to pay something for it." A scheme of this nature was outlined in an important communication to the *Times* of September 3, 1907, signed by Lord Avebury, Sir Edward Brabrook, Sir Arthur Clay and others, who pointed out that under the Friendly Societies Act of 1896 the Government is empowered to receive from friendly societies the money derived from the contributions of their members, and to allow on such contributions a fixed rate of interest during the continuance of the lives of the contributors. Lord Avebury and his colleagues proposed that this principle should be so applied and extended as to enable the contributors to become beneficiaries of the fund so accumulated, not at death, but in the form of old age pensions, payable in proportion to the contributions received at the age of 65, or at some later age.

At present the minimum rate of interest paid on deposits is fixed at $2\frac{3}{4}$ per cent. under the Act of 1896. A payment from the age of 20 of

£1 a year, or a little more than 4d. a week, would ensure a weekly pension of 7s. 6d. at the age of 65, or 14s. 9d. at the age of 70. But it is suggested that, having regard to the importance of encouraging provident habits, the Legislature might be willing to grant an extra interest of 1 per cent., that is, $3\frac{1}{4}$ per cent. total, which would make the pensions 10s. 4d. and £1 1s. 6d. at the respective ages of 65 or 70. The cost of administration is estimated at 3 per cent., which it is thought could be made a charge on the pensions or included in the Votes for the Civil Service. It is claimed for this scheme that it is safe, avoids responsibility for the soundness of friendly societies, is capable of indefinite extension, involves no forfeitures, and gives help to all who wish to help themselves. It is criticised on the ground that it involves considerable monetary payments on the part of the recipients; that in the event of premature death the whole of the accumulated savings will be diverted from their natural recipients, the wife and children; that it does not provide for those who cannot, on account of age, obtain for themselves a sufficient annuity; and, finally, that the scheme could be used by those who are not in need of a pension for the purpose of swelling their income.

As to the sources from which the cost of any pension scheme should be defrayed, it may be pointed out that subvention by the State is assumed in all the schemes considered. The Local Government Board has provided an estimate of the probable incidence of the charge upon rates as between urban and rural areas. Taking a scheme based on proposals under which 30.9 per cent. of the population aged 65 years and upwards in England and Wales would be pensionable, and assuming one-half the cost of the pensions to be met by a grant from Imperial sources, the rate in the £ required to meet the cost would be 4.5d. in London and provincial boroughs and other urban districts, and 5.9d. in rural districts.

It will be observed that although considerable progress has been made since the first definite proposals for old age pensions were brought before and rejected by Lord Aberdare's Commission in 1893, the question still bristles with difficulties. But the demand for the adoption of some scheme has grown so strong that no political party is in a position to resist it. The principle of contribution or non-contribution by the recipient must, sooner or later, give way before the greater principle which is involved, namely, that a man who has reached old age, and is unable to support himself owing to misfortune or causes beyond his control, is entitled to assistance from the State. And such assistance must not carry with it the taint of pauperism, or it will not be claimed by that class of deserving poor whom it is particularly desired the scheme of old age pensions should reach.

HERBERT H. BASSETT, F.S.S.

Public and Private Wealth and Charitable Bequests.

THE net receipt from the Death Duties in the year ended March 31, 1907, was £18,958,763, and the amount paid into the Exchequer was £14,400,000, which exceeded the Budget Estimate by £1,200,000. In the year 1899-1900 the total receipt was £18,409,293, and the amount paid into the Exchequer was £14,020,000, as compared with a Budget Estimate for that year of £11,150,000; and in the year 1901-2 the total receipt was £18,513,714, and the amount paid into the Exchequer £14,200,000, as compared with a Budget Estimate of £14,000,000. In 1899-1900 the great wealth of Mr. George Smith, of Elgin and Chicago, came into account. In 1901-2 part of the estate which passed on the death of the first Duke of Westminster was charged with the Death Duties, and ground rents were valued at £17,720,000—nearly three times as much as in any other year since 1894. Probably two-thirds of the great sum at which ground rents were valued in 1901-2 were assessed upon the Westminster estate. In 1906-7 there were ten estates of more than a million each, as compared with an average of six or seven, but the number of estates between a quarter of a million and a million each was smaller than in the previous year, and the valuation of securities was lower. The excess of revenue from the Death Duties in 1906-7 appears, therefore, to have been in part due to arrears of former years then brought into account. During the past six years the receipt of duty and the capital assessed have been as follows:—

	Duty Received.	Capital Assessed.
1901-1902	£18,513,714	£288,869,885
1902-1903	17,913,177	270,473,307
1903-1904	17,326,137	264,118,116
1904-1905	17,258,431	265,103,196
1905-1906	17,344,925	272,172,947
1906-1907	18,958,763	298,460,180

£107,315,147 £1,659,197,631

THE NEW SCALE OF DUTIES.

By the Finance Act of 1907 important changes have been made in the scale of charges for Estate Duty. Under the Finance Act of 1894 the highest charge for Estate Duty was 8% on any amount over a million. An estate of three millions or more paid at no higher rate than an estate of one million. Under the Finance Act of 1907 an estate of £1,000,000 will pay £100,000 in estate duty at the rate of 10%, but an estate of over £3,000,000 will be charged 10% on the first £1,000,000 and 5% on the remainder, and will thus pay in future £400,000, instead of £240,000 as hitherto. There are other considerable changes affecting estates over £150,000 each, as follows, but the scale up to £150,000 remains as settled by the Finance Act of 1894:—

Exceeding	Not Exceeding	New Duty.	Old Duty.
£150,000	£250,000	7%	6½%
250,000	500,000	8%	7%
500,000	750,000	9%	7½%
750,000	1,000,000	10%	7½%
1,000,000	1,500,000	10% & 11%	8%
1,500,000	2,000,000	10% & 12%	8%
2,000,000	2,500,000	10% & 13%	8%
2,500,000	3,000,000	10% & 14%	8%
3,000,000	—	10% & 15%	8%

The charge of 10% continues on the first million, but the new super-tax at the rate of 11% up to £1,500,000 is charged on the remainder.

The new scale of Duties imposed by the Finance Act of 1907 became chargeable on the estates of

persons who died after April 19 last. It is estimated that the addition from this source to the Revenue from the Death Duties will be at the rate of £1,200,000 or £1,250,000 a year. This estimate is evidently very moderate, and is likely to be exceeded unless the higher charges lead to avoidance or evasion of the duties by the transfer of property by rich people in their lifetime. Such transfer is easy, and there have been two or three noteworthy instances in which noble owners of great estate had made over while they lived the whole or large part of their possessions to their children, in order to save their estate from payment of the Death Duties. Hitherto, however, there has been apparently little of such avoidance or evasion of the burden of the graduated Death Duties by rich people, and least of all by very rich people, even in cases where the bulk of the estate having been left to public institutions, or to persons not of kin to the testator, legacy duty at the rate of 10% has been payable in addition to the 5% Estate Duty.

The effect of the legislation of 1907 upon the yield of the Death Duties will be watched with interest not only in this country but in the colonies, the United States, and wherever graduated taxation is in force or likely to be imposed.

A PROBABLE SURPLUS FOR 1908.

The Budget Estimate of the total receipt from the Death Duties for the financial year which will end on March 31, 1908, is £18,697,000, at the rate of nearly £360,000 a week, and the actual receipt for the half-year ended Sept. 30, 1907, was £9,700,000, at the rate of £373,077 a week; but there were only three estates exceeding a million each reported in the half-year to Sept. 30 last, namely, those of Lord Allendale (78), £3,234,806; William Whiteley (75), £1,452,825; and George Herring (73), £1,371,152; whereas in the corresponding period of 1906 there were eight estates of more than a million each with a total of £14,870,065, including those of Sir Charles Tennant (83), £3,151,976; Alfred Beit (53), £3,000,000; Lord Grimthorpe (89), £2,111,775; T. Vallentine Smith (81), £1,932,139; Lord Leven and Melville (71), £1,300,013; Edward Steinkopff (68), £1,247,022; G. C. Raphael (69), £1,103,247; and William Sturdy (74), £1,023,893. It has also to be noted that the new scale of charges was not in full effect during part of the half-year April to September, 1907. There seems at present, therefore, to be reasonable expectation of a fair surplus from the Death Duties in the year which will end on March 31, 1908.

PROPORTIONS OF REALTY AND PERSONALTY.

The gross capital value of all property subject to Estate Duty (including settled property) of which the Inland Revenue Department had notice during the past six years is as follows, but the report of the Commissioners explains that this includes all property liable to contribute to the duty, whether in lump sums or in yearly or half-yearly instalments.

	No. of Estates.	Personalty.	Realty.
1901-1902 ...	61,393	£214,302,811	£105,996,426
1902-1903 ...	62,310	213,594,553	84,869,513
1903-1904 ...	62,108	212,473,239	80,707,614
1904-1905 ...	63,918	211,041,806	82,283,543
1905-1906 ...	62,845	219,748,899	83,969,576
1906-1907 ...	66,082	243,743,088	84,591,411
	378,656	£1,314,904,396	£522,418,083

The total gross value of all property—real and personal—liable to Estate Duty in the six years was £1,837,322,479, with an average of rather more than £306,000,000 a year and an average gross value for each estate of nearly £5,000, but in each year two-thirds of all the estates liable to duty were under £1,000 each and nearly one-third under £300 each. There were also in each year about 17,000 other estates under £100 each and not liable to Estate Duty. Nearly one-third of the property charged with duty in each year is contributed by the estates of fewer than 350 persons who left over £100,000 each. The average of age of these 350 rich people exceeds 70 years. The average gross total value of £306,000 for the sixth year was exceeded in 1901-2, when the amount was £320,300,000, and in 1906-7 with a total of £328,335,000, but in 1899-1900 with 65,341 estates the total was £326,200,000. The increase in seven years was thus slight.

The great sum of nearly 106 millions at which realty was valued in 1901-2—the year in which the Duke of Westminster's estate came into account—included very nearly 46 millions as the valuation of settled real estate, which in other years had not exceeded 25 millions.

The personal estate charged with duty in 1906-7 included shares and debentures of companies valued at more than 100 millions. Some comparative figures are as under:—

compared with 99 in 1905-6 and 68 in 1904-5. The net receipt of Income Tax in 1906-7 was £31,891,949—an increase of only £597,197 as compared with 1905-6, in which year the receipt exceeded that of 1904-5 by only the very small amount of £31,098. The growth of wealth in this country from year to year seems to be slow. Large fortunes which come under probate for the Death Duties have seldom been made quickly. The belief that the number of rich people in the United Kingdom is larger than in any other country in the world appears to be well founded, but whilst for statistics of wealth in this country there are the official Inland Revenue reports and accounts, full statistical information for other countries is not available, and estimates or statements of reputed wealth cannot safely be relied upon even when apparently made with authority. It happens very often that statements respecting sums of money, expressed at first in the currency of the country of their origin as so many francs, marks or dollars, appear when reproduced in this country as the same number of pounds sterling, and the original sum is thus multiplied on paper five times or twenty times or even twenty-five times.

Recently official documents were filed in this country showing that an American estate reported as declared at £3,200,000 had been in fact sworn at \$3,200,000 (£640,000), another at

	1904-1905.	1905-1906.	1906-1907.
	£	£	£
Shares and Debentures	83,272,576	90,124,494	100,173,144
British Funds	9,364,026	9,073,836	9,898,551
Colonial and Foreign Stocks	9,417,473	10,906,357	12,052,150
Money on Mortgage and on Bonds and Bills ..	20,415,500	18,498,750	20,670,000
Cash at Bank	16,680,467	16,451,681	18,236,958
Cash in House	637,554	626,183	624,803
Household Goods and Works of Art	6,050,965	6,451,389	6,744,189

Cash in house is at the rate of only about £10 for each household.

Shares and debentures, funds and stocks are taken at the official quotation of the day of the testator's death. Personal estate, excepting household goods, is now for the most part assessed at nearly its full value. For furniture and household effects it has been customary to accept a very moderate valuation, and especially for pictures and other works of art, the value of which can only be tested by sale. The Death Duties paid on works of art in this country as originally valued for probate amount probably to £20,000 or £25,000 annually on a valuation of £400,000 or £500,000. Additional duty may of course be claimed if in the event of sale higher prices than those of the probate valuation are realised.

The estimated value of the bequests to National and Municipal Institutions exempted from Death Duties was in the course of the year ended March 31, 1907, only £24,626, including one picture for the National Gallery, one for Birmingham, others for the Borough of Stoke Newington and the Public Art Gallery of Newcastle-on-Tyne, and portraits for the National Portrait Gallery and the Scottish National Portrait Gallery.

THE SLOW GROWTH OF WEALTH.

The estates valued for probate at more than £250,000 each were in number 86 in 1906-7, as

£6,000,000 was really \$6,000,000 (£1,200,000), and a collection of pictures, part of an estate of £200,000, was stated to have been taken at £1,000,000 instead of 1,000,000 francs or £40,000. Similar instances are many.

INCOME TAX.

The gross income for the United Kingdom brought under the review of the Inland Revenue Department was, for 1904-5, £912,129,680, reduced by deductions to £619,328,000, upon which income tax was received, and in 1905-6 the gross income was £925,184,000, reduced by deductions to £632,024,746 net. The gross income for 1906-7 is not yet in the published official report, but the net income for the year 1906-7 is estimated by the Department at £636,000,000. The accounts for the year 1904-5 of incomes under Schedules D and E of persons and firms from business, professions, and employments show the following results:—

The number of persons assessed was 2,000 more in 1905-6 than in 1904-5, and the total of their income was nearly £1,000,000 more, but although the number of firms assessed was nearly the same in both years the income of firms was £1,700,000 less in 1905-6 than in 1904-5. The income of Public Companies under Schedule D in 1905-6 was £247,681,447, of which nearly £120,000,000 was assessed in the Metropolis. The total income derived from investments abroad in

Amount Exceeding	And not Exceeding	No. of Persons assessed.	Gross amount of Incomes assessed.	No. of Firms assessed.	Gross amount of Income assessed.
£	£		£		£
50,000		21	1,849,816	89	10,302,375
10,000	50,000	237	4,414,478	967	17,972,868
5,000	10,000	496	3,495,888	1,713	12,007,264
4,000	5,000	304	1,402,099	874	3,966,443
3,000	4,000	559	1,955,785	1,432	5,013,399
2,000	3,000	1,508	3,741,626	2,813	7,049,565
1,000	2,000	6,145	8,987,232	7,080	10,901,173
		9,270	25,846,914	14,968	67,213,087
Gross Incomes under £1,000 each		370,186	81,175,543	44,196	16,583,543
Total		379,456	107,022,457	59,164	83,796,630

1905-6 was returned at £7,800,000 more than in the previous year.

INCOME OF EMPLOYEES.

The number of employees and the assessment of their income showed again a large increase in 1905-6. The number was 503,077, and their gross income was 9½ millions more than that of the 379,456 other persons who were assessed for £107,022,547. The assessments of employees in 1905-6 were as follows:—

		Gross Income.
		£
Schedule E—Government, corporation, and public company officials.....	402,503	93,185,804
Schedule D—Other employees.....	100,574	23,401,641
	503,077	£116,587,445

The increase in number and income is in respect of Government, corporation, and company officials. The figures for other employees are very nearly the same as the preceding year. Most of these incomes will benefit in the current year from the reduced charge on earned incomes. Twenty-six employees under Schedule D and 460 under Schedule E are returned as having incomes exceeding £3,000 a year each, and of these 106 with incomes of more than £5,000 a year each were assessed for an aggregate income of £1,038,124.

Out of the total of 402,503 employees in Schedule E, 391,587 were assessed as with incomes not exceeding £700 a year each, and among the other employees only 923 had incomes exceeding £700 and 99,651 were assessed below £700. All of these under £700 will be entitled to claim abatements. The total number of abatements in all classes under Schedules A, B, C, D and E in 1905-6 was 724,728, of which employees were more than two-thirds.

CHARITABLE BEQUESTS.

ANOTHER REMARKABLE YEAR.

The amount of the bequests for charitable, religious, and other public uses, under wills proved during 1907, has been extraordinarily large. Under ninety wills, of which a schedule appears on p. 402, there were bequests for public uses to the amount of nearly five millions sterling, derived from estates valued at 11½ millions sterling, in the proportion of about 42 per cent. to the amount of the estates. Other bequests under £10,000 each, not enumerated, would probably bring up the total for the year to about 5¼ or 5½ millions, or more than double the average of the past twenty years. In 1906 bequests were noted under sixty wills to the amount of nearly 4½ millions, derived from

estates valued at nearly 15¼ millions, in the proportion of about 30 per cent., and it was estimated that other bequests not enumerated would bring up the total to about five millions.

In 1906 there were nine bequests exceeding £100,000 each, contributing 3¼ millions to the total of about 4½ millions, and there were in 1907 only five bequests of upwards of £100,000 each, making up £2,420,000 of the total of nearly five millions; but the number of bequests between £50,000 and £100,000 last year was three times as many as in the previous year.

TWO GREAT BEQUESTS IN 1907.

Mr. William Whiteley, of Westbourne Grove, and Mr. George Herring, a prominent supporter of the Metropolitan Hospital Sunday Fund, left about a million each for charitable purposes. Under Mr. Whiteley's will a sum of as nearly as may be a million sterling is eventually to be devoted to a scheme for Whiteley Homes, to be built on freehold land in the western suburbs of London on a soil of chalk, sand, or gravel (but not clay), and not more than ten miles from Charing Cross; to be occupied either rent free, or at such rent as the trustees may think proper, by aged and deserving poor persons, with preference to those who have been engaged in commercial or agricultural pursuits. It is expected that probably two years will elapse before a start can be made with the scheme, and in the meantime the important question has arisen whether the homes shall be on one estate in one great building or scattered over London in various districts. The former plan, it is supposed, was in the testator's mind, but it is understood that two of the trustees incline to favour the latter plan. Mr. Whiteley's will does not expressly provide for pensions for the inmates of the homes, but the trust may perhaps be wide enough to include such allowances in some cases.

Under Mr. George Herring's will the proceeds of sale of his house in Hamilton Place and its contents were left to the King's Hospital Fund "as a slight acknowledgment of His Majesty's most gracious message to me"; the trustees were authorised to make up his gift to the Salvation Army to £100,000; and he left the ultimate residue of his estate, probably between £700,000 and £750,000, to the Metropolitan Hospital Sunday Fund, to which he had given, since 1899, more than £80,000 in annual additions of 25 per cent. to the amount collected in places of worship. The total receipt of the Fund last year was £63,000, including £3,000 on account of a legacy, £44,633 from collections in places of worship, and £11,000 from Mr. Herring, the interest from whose bequest will in future

probably be about £30,000, equal to nearly three-fourths of the amount otherwise collected, unless it should increase.

SOME FOREIGN AND COLONIAL BEQUESTS.

Among the wills registered in this country of foreign and colonial testators in 1907 was that of M. Daniel Ifla Osiris, of Paris and of the Château de la Tour Blanche, Sauterne, the Jewish banker and philanthropist, who left English estate valued at £93,581, and the whole of whose estate was reported to be of the value of £2,600,000. He had presented to the French Republic the Château de la Malmaison and its art treasures, and he left to the State his estate in the Gironde, his vineyards and the appliances there to be used for practical, popular, and free education in vine-growing and wine-making, the wines to be always known as "Cru Osiris." He left also £80,000 to his native city of Bordeaux, to endow a day home for aged workmen and beggars on a boat to be moored in the river Gironde, and the ultimate residue of his estate (not to be less than £120,000) to the Pasteur Institute. Mr. Aaron David Sassoon, of Hove and formerly of Bombay, whose estate was valued at £88,361, left about £70,000 for the benefit of the poor in any country, kingdom, or principality in which David Sassoon & Co., their predecessors or successors, may have carried on business. Baron Arthur de Rothschild, of De Rothschild Frères, Paris bankers, left pictures by old masters to the Louvre, a valuable collection of rings and antique leather goods to the Cluny Museum, and 70,000 francs for lifeboats; and various public works in course of construction are to be completed at the cost of his estate. Mr. Stibbert, of Florence, whose English estate was £11,045, but whose property in Italy was of great value, left the famous Stibbert collection, valued at £300,000, with the Villa Stibbert at Montughi, and 800,000 lire, to the British nation, on certain conditions which the Government could not accept; but the bequest was accepted by the City of Florence.

Mr. Charles Tyson Yerkes, of Chicago, chairman of the Underground Electric Rlys. Co. of London, whose estate was valued altogether at £645,000, including £5,614 in the United Kingdom, left £160,000 for a hospital in the Bronx-District of New York, £150,000 to the Yerkes Museum, and his house in Fifth Avenue and his art collection to the municipality of New York City.

Mr. James Henry Smith ("Silent Smith"), of Orange County, New York, whose estate in the United Kingdom was valued at £2,414, and in the United States about £1,250,000, left £20,000 each to St. Luke's Hospital and the Orthopaedic Hospital in New York; and the Hon. Ebenezer Vickery, of Sydney, N.S.W., and of Leeds, in England, whose estate was valued at £509,475, left £11,000 to the Methodist Church and Missions in Sydney.

OTHER WILLS.

Mr. Archibald Henry Blount, Lord of the Manor of Orleton, Hereford, the owner of large estates in the county, whose property was valued at £93,514, left his residuary estate, about £80,000, to the Yale University at New Haven, U.S.A., with which he was not known to have had any connection. Mr. Charles Carr Ashley, of Kingston-on-Thames, left about £70,000 for lifeboats. Mr. Henry Calcott Brunning, of the Stock Exchange, left about £100,000 among Masonic institutions, orphan-

ages, the Artists' General Orphan Fund, and the Stock Exchange Benevolent Fund; Mr. George Francis Watts, of Manchester, left £25,000 to the Church Missionary Society; Mr. John Brownell, of Alderley Edge, Chester, about £50,000 to the Pendlebury Charity for Orphans at Stockport; Mr. Henry Howard Paul, of Bournemouth, left over £40,000 to the Middlesex and Charing Cross Hospitals and other institutions. A lady of 90 years who desired that her name should not be published left £30,000 among numerous institutions; and Miss Helen Perry, of Tatton Hall, Wolverhampton, daughter of the former head of a firm of pen-makers, left £5,000 each to numerous hospitals and altogether charitable gifts to the value of £150,000 from her estate of £321,000. Lieut.-Gen. Baynes, of Haywards Heath, an Indian Mutiny veteran, whose estate was valued at £67,848, left £1,000 to the Lifeboat Institution, £10,000 to other institutions, and his residuary estate of about £25,000 to the King's Hospital Fund. Miss Harriet Clarke, of Macclesfield, left about £88,000 among the British and Foreign Bible Society, Church Pastoral Aid Society, Dr. Barnardo's Homes, and other institutions; Mr. Charles James Oldham, a surgeon of Brighton, from his estate of £78,000, left about £50,000 for education, including £10,000 and half of his residuary estate to Corpus Christi College, Oxford, and his Stradivarius violin (if not sold for 3,000 guineas) is to go to the British Museum. Miss Caroline Everard, of Laverstock Hall, Salisbury, left from her estate of £111,000 about £38,000 to numerous Church institutions; and Mr. Charles Edward Fulford, a patent medicine proprietor, of The Bile Beans Manufacturing Company, whose estate was valued at £67,187, left 20 per cent. of the capital of any company formed to acquire his business to Dr. Barnardo's Homes, on condition that the said capital is retained by the institution as a permanent investment, and although the company has been formed with a capital of £100,000 it does not appear that the trustees of Dr. Barnardo's Homes have as yet accepted the bequests.

THE UNCERTAINTY OF BEQUESTS.

The uncertainty of bequests as a source of income for charitable institutions has had a noteworthy example in the experience of the Metropolitan Hospital Sunday Fund, which during the 27 years 1880 to 1906, inclusive, became entitled under the wills of 24 testators to legacies amounting to £77,279; but this sum included £45,346 Consols in 1895 as an endowment from Mr. Guesdon, £12,500 in 1905 from Mr. W. F. Cook, £10,000 in 1901 from Mr. Herbert Lloyd, £4,500 in 1894 from Mr. W. L. Whitaker, making up from four bequests all but £5,000 of the total of £77,279. In almost every year since the foundation of the fund some one hospital has had a legacy much larger than the whole of the fund's receipts for the year from donations and legacies combined, but Mr. George Herring's great bequest of £700,000 or £750,000 in 1907 will be between nine and ten times as much as all the previous legacies of 27 years. King Edward's Hospital Fund had from 1900 to 1903 legacies to the amount of £12,148, in 1904 £11,443, in 1905 £39,642, and in 1906 £19,795, making up a total of £83,040 in the seven years; but in 1907 the bequests from Mr. Samuel Lewis and Mr. Alfred Beit, amounting to £300,000 or more, will probably have been received.

OCTOBER, 1906, to NOVEMBER, 1907.

If the state of the English Drama had to be judged by statistics the survey of the past twelve months would indeed be sorry reading. For on searching my files I find that 216 nights spent in the theatre yield a harvest acceptable by its quality of not more than twenty-five English plays, not including Shakespeare, who has been frequently revived with great splendour and commensurate success. For a nation of so many millions as inhabit these islands, this numerical output is indeed small. But there is consolation in the fact that, although the quantity remains inconsiderable, the quality is steadily progressing. In saying this I am applying the high standard of criticism which should be applicable to the drama of a great and civilised nation. I, therefore, do not include that which is mediocre, or that which, despite a great popular success, has no intrinsic merit. I shall also avoid any mention of one-act plays which may indicate some promise, but which, by their very conciseness, do not allow the full measure of a dramatist's capacity. His test should be the play which covers the whole of the evening, for the maintenance of interest is the decisive quality of the writer for the stage.

The most memorable record of the year is that of the Court Theatre, under the management of Messrs. Vedrenne & Barker, who have now, unwisely I think, transferred their activity to the Savoy. I say unwisely because, as far as can be ascertained, the army of playgoers which, in the long run, would appreciate the so-called intellectual drama, is neither sufficiently large nor sufficiently casual to warrant, at the present juncture, success in the Strand. For to the Court one went with a definite purpose, whereas the Strand theatres, to no small extent, rely on the impulse of the passer by.

Of course, the ruling power of the Court, and latterly at the Savoy, was George Bernard Shaw, who was represented by five plays—"You Never can Tell," "The Philanderer," "Don Juan in Hell," "The Devil's Disciple," and, as a novelty, "The Doctor's Dilemma."

Without intending any jest or comparison, it may be stated that Shaw shares with Shakespeare in having been in 1906-7 the dramatist of whom the largest number of works have been produced. The four first-named plays are already well known—"You Never Can Tell" has often been revived. "The Philanderer," his least successful effort, has been produced by a private Society. "Don Juan in Hell" was familiar in book form, and "The Devil's Disciple" was performed in 1896, at Kennington Theatre, under the direction of Mr. Murray Carson. "The Doctor's Dilemma" was to a certain extent a disappointment. It was, as will be remembered, the outcome of a challenge from Mr. William Archer that Mr. Shaw should write a death scene. As far as the skit on the medical profession is concerned, the play was well observed, mordant and amusing, but the death scene, immensely protracted, unreal and none too reverential, failed to make a deep impression. The play was short-lived, and will not rank among the author's best. It is significant, while speaking of Shaw, to refer to his vogue in Germany. There he is the most popular dramatist of the day, and there is not a large city in the whole of the German Empire where one or more of the plays of George Bernard Shaw are not included in the regular repertoire.

In Mr. John Masefield a new author was brought to the fore. His play in three episodes, entitled "The Camden Wonder," was ethically unpleasant, and thrilling to the degree of being horrible. But it revealed the distinct dramatic vein, and promises well when the author has learned to discern between realism and brutality. To a certain extent this also applies to Mr. Wharton's play "Irene Wycherley," with which he made a successful debut at the renovated Kingsway Theatre under the management of Miss Lena Ashwell. Mr. Wharton has great dramatic power. His dialogue is easy and natural; his characters have individuality, but both subject and treatment lack restraint.

Mr. St. John Hankin, another ally of the Court Theatre, saw his delightful and unconventional comedy, "The Charity that Began at Home," in the evening bill; whereas he suffered failure in the Stage Society with his newest work "The Cassilis Engagement," which showed some of the author's qualities but had a commonplace plot.

Mr. Goldsworthy, whose "Silver Box" was one of the finest manifestations of British drama of the early part of 1906, gave in "Joy" a new work which was lacking both in form and logical evolution. The impression prevailed that this play was written before the talented author had felt his feet as a dramatist.

In remembering with gratitude the excellent work done at the Court and at the Savoy, Professor Murray's masterly translation of Euripides' "Medea" should not be forgotten. In the hands of this translator the great classic became English domain.

Modern poetic drama found expression in two plays. One, "The Virgin Goddess," by Rudolph Besier, owed its production to the enterprise of Mr. Otto Stuart; the other "Attila," by Mr. Lawrence Binyon, was produced by Mr. Oscar Asche and Miss Lily Brayton during their tenancy of His Majesty's Theatre. "The Virgin Goddess" was a valuable acquisition, for the verse was often inspired, and the dramatic form revealed the instinct of the theatre. "Attila" was more the work of a poet. It had moments of dramatic power, but as a whole it was not sufficiently strong to lay a firm hold on the play-going public.

A welcome accession to the ranks of our dramatists was Mr. William Locke, whose "Morals of Marcus" was a charming idyll, and whose "Palace of Puck" was a but moderately successful attempt to combine fairyland and real life on the stage.

Another new-comer of promise was Mr. John Valentine, better known as the novelist Percy Andrae, whose "Stronger Sex" had a successful career and appealed to playgoers who are pleased to listen to a romantic love story with a happy ending.

Among the older dramatists who were heard during the year under review, the first place should be given to the late Oscar Wilde, the production of whose "Woman of no Importance" at His Majesty's Theatre amounted to a rehabilitation. The play itself, which was none too well acted, appeared to have suffered through change of time and taste, and although the famous epigrams proved still amusing, they could not compensate for the inherent melodramatic nature of the action. Mr. Pinero, Mr. Grundy, Mr. Carton and Mr. Haddon Chambers

remained silent. Mr. Henry Arthur Jones, whose luck on this side of the water seems, alas, to have temporarily forsaken him, suffered failure by "The Hypocrites," an old-fashioned drawing-room melodrama manned with cardboard figures. Mr. L. N. Parker gave a little comedy, of light texture and not much consequence, in "Mr. George," and Mr. Sutro is represented by two plays—"John Glayde's Honour," which was produced at the St. James's, and "The Barrier," which is still being played at the Comedy Theatre. "John Glayde's Honour" was a strong play, full of unconventional ideas and situations, and especially remarkable for the boldness of its conclusion. The last scene, in which the husband offers to his wife freedom and alimony, in order that she should no longer live a life of lying, at first bewildered the audience, but left a deep impression and provoked much discussion. "The Barrier" seemed to be an older play of Mr. Sutro's, and although in form it is germane to the French School of the seventies and eighties of the last century, it lacks the firmness of grip which is the first essential of the well-made play. It was interesting to some, but on the whole, partly through injudicious casting and defective stage management, it failed to meet with much approval.

A dramatist who is still youthful but who yet, by his record, deserves to be remembered among the practised hands, Mr. H. H. Davies, succeeded by the veriest *tour de force* of craftsmanship. "The Mollusc" is a comedy of commonplace in which there appear but four characters. These characters move in circumstances of everyday life and speak the language of everyday people. Yet so dexterously has the young dramatist handled both plot and dialogue that the whole evening is one of unalloyed enjoyment. "The Mollusc" is destined to become popular wherever light, clean and vivacious comedy is appreciated, and it indicates that we have much to expect of Mr. H. H. Davies.

Before concluding the nomenclature of plays

worth remembering, a word of tribute should be vouchsafed to the excellent work of the Irish Theatre under the guidance of Miss Horniman, which has already demonstrated that young Ireland is full of budding talent; and to the French plays at the Royalty, where, thanks to the laudable enterprise of Mr. Gustav Meyer, our public becomes acquainted with the best plays and the best actors of modern France.

Now let us see what is, all things considered, the summary of the year's activity. In the first place it may be recorded with joy that the intellectual quality of the native drama is improving, that the horizon is widening, and that gradually men who have succeeded as novelists turn their earnest attention to the stage. In the second place we may observe, not without profound satisfaction, that the era of adaptation of foreign plays belongs to the past. One or two French plays have come to us in a localised form, but as a rule our public is now found amenable to foreign plays in literal translation, as a contrast to barbarous bowdlerising and denaturalisation. This is, indeed, a significant sign of the times, for it does away with the stigma that the British playgoer is unable to understand foreign matters and manners unless especially prepared for the British market.

Lastly, a feature of the past twelvemonth is the renaissance of time-honoured melodrama. As I write, Drury Lane is night after night besieged by crowds who love simple sentiment and picturesque sensation. And the Lyceum, where Hall Caine's "Christian," with moral sauce, defies the critic, is no less a focus of public attention. Without pausing to investigate the merits or demerits of the various melodramas which are now before the London public, I venture to say that this return to a wholesome, if artless, form of entertainment, is not to be pooh-poohed, for melodrama appeals to the human emotions, and if the subject is rightly handled it can make for good.

(2 Nov., 1907.)

J. T. GREIN.

AVERAGE WEEKLY EARNINGS OF RAILWAY SERVANTS.

THE following table shows the *average wages per head* of workpeople employed in the coaching, goods, locomotive, and engineers' departments of the 27 principal Railway Companies of the United Kingdom during the first or second week in December in each of the years 1897-1906. The Companies included in the table employ over 90 per cent. of the total number of Railway servants.

Les Hanneçons*, translated from the French of Brieux, by H. M. Clark. *June 9. Wederkind's Der Kammerdiener*, and *David Ballard*, by Charles McEvoy.

ATHLETICS.

COMPARED with its predecessor, the athletic season of 1907 was not particularly eventful, although it furnished its quota of interesting events. Cross-country men were early at work, and on Saturday, Feb. 2, the South of the Thames Championship at Bromley, Kent, was won by the Kent A.C., who defeated the Cambridge Harriers by one point. The first three men home were J. Keywood, Kent A.C., 42 mins. 3 secs.; B. H. Baskshall, Eastbourne, 42 mins. 14 secs.; and J. S. Satch, Kent A.C., 42 mins. 31 secs. On the same afternoon the North of the Thames Championship was won by the Essex Beagles, the first three men being G. M. Parkinson, Essex Beagles, 45 mins. 38½ secs.; R. Harding, St. Bride A.C., 46 mins. 11 secs.; J. N. Howard, Slough H., 46 mins. 43 secs. The Southern Counties Cross-Country Association was decided on Saturday, Feb. 16, at Imber Court, Thames Ditton. Twenty-two clubs competed, with a total of 227 runners, and G. Pearce, Highgate Harriers, 50 mins. 5½ secs.; J. E. Deakin, Herne Hill Harriers, 50 mins. 37½ secs.; and T. Johnston, Highgate Harriers, 60 mins. 21 secs., were the first three men home. The Highgate Harriers were the successful club. On the same afternoon at Haydock Park the Lancashire Harriers won the Northern Counties Championship.

The National Cross-Country Championship was decided at Colwell Park Racecourse on Saturday, March 2. There was a record entry of twenty clubs, of which nineteen competed, and a field of 186 runners—another record. As in the Southern Counties, Geo. Pearce, Highgate Harriers, 55 mins. 33 secs., and J. E. Deakin, Herne Hill Harriers, 56 mins. 3 secs., finished first and second, A. Underwood, of the Birchfield Harriers, 56 mins. 27 secs., being third. The winning club was the Birchfield Harriers, whose first man home was Underwood. On Saturday, March 23, England won the International Championship at Glasgow for the fifth consecutive year. Scotland was second, France third, Ireland fourth, and Wales last. A. Underwood, 54 mins. 25½ secs., was first; G. Pearce, 54 mins. 48 secs., second; and S. Welding, 54 mins. 50 secs., third.

Turning to path work the most important meeting of the spring was the Inter-University Meeting held at Queen's Club on Friday, March 22. It was the 42nd meeting of the rival Blues and one of the most successful, the climatic conditions being splendid and the form, in several instances, much above the average. A keen struggle was generally anticipated, but to the surprise of the experts Oxford won easily by 8½ events to 3½. A peculiar thing occurred in connection with the 100 yards race. R. C. McLeod (Fettes and Pembroke College, Cambridge) and N. G. Chavasse (Magdalen College School and Trinity College, Oxford) ran a dead-heat in 10½ secs. First of all Chavasse was given as having won by inches. Later on that decision was declared void and the race given a dead-heat. As soon as the tape was broken, and while the judge was conferring, an appeal was made to the referee by an enthusiast, and a decision in favour of Oxford was given, the referee, in the excitement of the moment, understanding that the judges had disagreed. Such was not the case. The judges had agreed that they were unable to separate Mr. McLeod and Mr. Chavasse, and no appeal was officially made to the referee. Hence the natural consequence fol-

lowed on the state of affairs being explained, and a dead-heat was the only possible verdict.

K. Powell (Rugby and King's College, Cambridge) won the 120 Yards Hurdles by a foot from E. R. T. Hussey (Repton and Hertford College, Oxford) in the splendid time of 15½ secs., only one-fifth of a second outside world's (grass) record, and an easy "best" for the University sports, which previously was 16 secs. Another best on record was accomplished when A. M. Stevens (Yale University and Balliol College, Oxford) threw the hammer 146 ft. 9 ins., and won that event for the Oxonians. The previous best throw was 138 ft. 3 ins., by G. H. Hales (Cambridge), in 1876, with an unlimited run. The winners of the other events were:—Putting the Weight, R. L. Robinson (St. Peter's College, Adelaide, and Magdalen College, Oxford), 37 ft. 7 ins. Long Jump, R. M. Young (South Dakota University and Oriel College, Oxford), 22 ft. 4 ins. Half Mile Race, P. D. Darling (Winchester and New College, Oxford), time 2 mins. One Mile Race, L. P. L. Lloyd (South Eastern College, Ramsgate, and Magdalen College, Oxford), time 4 mins. 28 secs. High Jump, P. M. Young (South Dakota University and Oriel College, Oxford) 5 ft. 8½ ins. 440 Yards Race, C. M. Chavasse (Magdalen College School and Trinity College, Oxford), time 50½ secs. Three Miles Race, N. F. Hallows (Felstead, Leeds University and Keble College, Oxford), time 15 mins. 6½ secs. The sports have been won on 21 occasions by each University. There have been two dead-heats, viz., in 1864 (four events each) and 1899 (five each), on both of which occasions the Cantabs would have won had the sports been decided by second places. The record for the whole series of sports shows that Oxford have secured 206½ firsts and 196 seconds, and Cambridge 196½ firsts and 197 seconds out of 403 events.

The Long Distance Championships of the Amateur Athletic Association were decided on the grounds of the Manchester Athletic Ground, at Fallowfield, on Saturday, April 13. A. Aldridge, the holder, did not defend his title to the ten miles running championship, which attracted a field of 34 competitors, the most prominent of whom were:—G. Pearce, the National and Southern cross-country champion; A. Duncan, the Northern four-mile champion; A. Underwood, the International cross-country champion; A. J. Robertson, Birchfield H.; W. H. Whittingslow, Salford H.; and the Swedish champion, J. F. Svanberg. Underwood eventually won by 15 yds. from Duncan in 54 mins. 3 secs.; W. T. Clarke, of the Sefton Harriers, being third. For the Seven Miles Walking Championship 25 men put in an appearance. The holder, F. T. Carter, was forced through illness to retire, after going a mile and a half, and eventually F. B. Thompson (London Athletic Club) won in 52 mins. 46½ secs. from C. Tropper (Salford Harriers), with J. W. E. Bennett (Manchester A.C.) third.

Fallowfield, about three miles from Manchester, was also the scene of the Amateur Championship Meeting on Saturday, July 6. A high wind caused the times generally to be poor, but many excellent finishes were seen. One or two holders of titles failed to defend them, notably Lieut. Wyndham Halswell (440 Yds.), A. Russell (Steeplechase), and Patrick O'Connor (Long Jump). London, Dublin, Liverpool, and Glasgow as well as America sent representatives. As showing the bad conditions, it may be noticed that J. W. Morton, in scoring

his fourth successive victory in the 100, tied the slowest time—the 10½ secs. of H. J. Palmer in 1897—that has ever been recorded since the Championships were first decided so far back as 1866. Morton was all out, too, in the final, for he only won by a foot from a fine runner in Nat Cartmell, of the Pennsylvania University. The other winners were:—Putting the Weight, T. Kirkwood, holder (Bellahouston Harriers), 44 ft. 2 ins. One Mile, G. Butterfield (Darlington Harriers), holder, time 4 mins. 22½ secs. 120 Yds. Hurdles, O. Groenings (Polytechnic Harriers), time 16½ secs. Pole Jump, B. Soderstrom (Stockholm), 10 ft. 6 ins. 220 Yds., J. P. George (South London Harriers), time 22½ secs.; Half Mile, I. F. Fairbair-Crawford (West of Scotland Harriers), 1 min. 59½ secs. Long Jump, D. Murray (County Dublin Harriers), 22 ft. Throwing the Hammer, T. R. Nicholson (West of Scotland Harriers), 158 ft. 9 in. Four Miles, A. Duncan (Salford Harriers), time 19 mins. 51½ secs. Two Miles Walk, R. Harrison (North Shields W.C.), time 14 mins. 1½ secs. 440 Yds., R. H. Montague (South London Harriers), time 52½ secs. Two Miles Steeplechase, J. C. English (Manchester A.C.), time 12 mins. 21½ secs.

In the way of records, O. Groenings, of the Polytechnic Harriers and L.A.C., on July 20, at the Essex Championship at Chelmsford, ran 300 yds. over hurdles in 38½ secs.; and on Sept. 7 J. B. Densham, of the South London Harriers, at the South London Harriers' Sports at Kennington Oval, tied T. M. Donovan's figures of 57½ secs. for 440 yds. over hurdles; whilst on June 21 and 22 J. E. Hammond (Surrey Walking Club) walked from London to Brighton and back (104½ miles) in 18 hrs. 13 mins. 37 secs., the previous best being H. W. Horton's 20 hrs. 31 mins. 53 secs., made in 1903. Previously—on March 29—Hammond had walked from the Marble Arch to Oxford in 8 hrs. 57 mins. 14½ secs., beating the previous best time—J. H. Barnes-Moss's—by 68 mins. The A.A.A. do not, however, place the latter course amongst their official list of records.

The hon. sec. of the Amateur Athletic Association is Mr. P. L. Fisher, 10, John Street, Adelphi.

BILLIARDS.

THE season of 1906-7 will long be remembered as one of the most remarkable in the annals of the game. A stroke, variously described as the "anchor" and "cradle" cannon, was exploited by certain professionals to such an extent that it quite spoilt the game of billiards, as properly understood, and at length the committee of the Billiard Association had to step in and bar it. W. A. Lovejoy, an ex-amateur champion, was the first to publicly demonstrate the possibilities of the new cannon last January, and when he had done so, publicly stated that it had taken him two years to ascertain how to obtain the requisite position. Other professionals, however, speedily improved upon Lovejoy's "secret," and the result was a crop of mammoth breaks, made by one particular kind of stroke, that threatened to render the game ridiculous; though, strange to relate, no prominent amateur gave any public demonstration of ability to acquire the requisite position. In private Earl de Grey made some mammoth scores, after first placing the balls, but the recognised leading amateurs seemed fearful of tackling the problem. No good purpose would be served by enumerating all the big

"cradle" cannon breaks scored by leading professionals, but a few call for notice. On March 22 and 23, at Hull, W. A. Lovejoy scored 2,257 (1,068 cannons) by means of the stroke, which put into the background a run of 1,269 made by T. Reece, in London, on the 5th of the same month. Indeed, Reece proved the greatest adept at the new stroke, for during the season he made breaks of 1,825 (March 13 and 14), 6,165 (March 26 to 30), 23,810 (April 24 to May 1), 40,001 (May 27 to June 1), and finally ran up the colossal score of 499,135. The latter break was made at Soho Square, in a match against J. Chapman, of Birmingham, of 500,000 up. The game commenced on Monday, June 3, and terminated on Saturday, July 6. The break has not been officially recognised, for the reason that Reece more than once played in the middle of the night, when the room was not open for spectators, and the committee of the Billiard Association therefore ruled that the contribution "was not made in public." Amongst other players who built up huge "cradle" cannon breaks were W. Cook—42,746, in June and Chas. Dawson—7,184, at Liverpool, and 23,769, at Glasgow, both scored in April. The committee of the Billiard Association eventually barred the stroke, and their action was endorsed by a special general meeting of the members. At the latter gathering several alterations in the rules were sanctioned, the most important being one that did away with the "spotting" of the balls when they remained touching after a stroke.

During the year two more or less new ideas in tables were introduced to the public. One, called by its originator the "no bar" table, proved a distinct failure, and was tried in very few public matches. The other, dubbed the "arc-oval," was boomed extensively, and the veteran John Roberts, in his sixty-first year, emerged from his retirement in order to give exhibitions thereon. At the time of going to press, however, there appears to be no indication that the innovation will in any way interfere with the popularity of the game as played on the oblong table.

Two striking personalities in the persons of H. W. Stevenson and M. Inman made a prolonged tour of Australia and other colonies, and no effort was made to revive matches for the professional championship. Amongst the amateurs, Mr. John F. Lessels walked over for the Scottish Championship; Mr. H. C. Virr beat Mr. H. O. Lonsdale in the Northern Qualifying Competition; Mr. A. R. Wisdom won the London Qualifying Competition; and the Irish Championship resulted in Mr. J. Nugent defeating the holder, Mr. A. T. Marsh, in the final. The various winners met in the Competition Proper for the Amateur Championship at the National Sporting Club, London, during the second week in March, when Mr. Harry Virr beat Mr. J. Nugent in the final heat.

The Inter-County Championship finals were decided at the National Sporting Club from March 12 to 14, and in the final Cornwall (represented by Messrs. C. L. Taylor, C. B. Sweet, and R. Thomas) defeated Middlesex (Messrs. H. W. Moy, A. W. T. Good, and W. Bradshaw).

The season was not remarkable for any big money matches, but great interest was aroused by the improvement in play of T. Aiken, the Scottish champion, and A. E. Williams, of Manchester.

CRICKET.

ONE of the most notable features of the first-class season of 1907 was the persistent manner in which it was attacked by rain. So much was that the case during the first half of the campaign that public interest was seriously discounted. However, the visit of the South African eleven, the meritorious performances of Notts, and the controversy that arose over the selection of an English team to visit Australia, considerably enlivened the latter part of the season.

Courtesy demands that a brief *résumé* should first be made of the South Africans' tour. Two years ago, it will be recollected, an England team visited South Africa, and lost four out of five Test matches. This afforded emphatic proof that the all-round standard of play in the colony had undergone considerable improvement. It was therefore decided to treat the 1907 contingent very seriously, and for the three Test matches arranged English elevens of first-class calibre were chosen. The first encounter was at Lord's, on July 1 and 2, rain preventing a finish; and the result was a draw greatly in favour of England, who scored 428 to the South Africans' 149 and 185 for three wickets. At Leeds, on July 29, 30, and 31, England (75 and 162) won by 53 runs, South Africa scoring 110 and 75. At the Oval, on August 19, 20, and 21, another draw resulted, the scores being: England, 295 and 138; South Africa, 178 and 159 for five wickets. England thus won the rubber, but the Colonials did sufficiently well to command the respect of all followers of the game.

In these games twelve batsmen represented England, of whom C. B. Fry (44·20 for five innings), Braund (31·40 for five), Lilley (25·50 for five), R. E. Foster (23·20 for five), and G. L. Jessop (23·20 for five) headed the batting averages. The only centuries on our side were 104 by Braund in the Lord's match, and 129 by Fry at the Oval. Blythe headed the bowling averages with 26 wickets for 10·38, Hirst taking 10 for 18·50. A. D. Nourse, for the South Africans, had a batting average of 31·75 for six innings, P. W. Sherwell (captain) coming next with 25·20 for five innings. Nourse also headed the bowling averages, but only took four wickets. The really best performers in the series were G. A. Faulkner (12 wickets, average 18·16) and A. E. Vogler (15 wickets, average 19·66). In all the South Africans played thirty-one matches—four were not looked upon as first-class—of which they won twenty-one and drew six. Surrey and Notts were the only counties to defeat them, but they also lost to a strong M.C.C. team at Lord's in September. Although it was proved conclusively that there was practically no tail to the batting, it was in bowling that their strength was greatest, and R. O. Schwarz, an old Middlesex player, easily carried off the honours (all matches) with 143 wickets, average 11·51; G. C. White took 72 wickets, average 23·45; and A. E. Vogler 133 wickets, average 15·25. Three batsmen aggregated over 1,000 runs, these being S. J. Snooke, 1,127, average for 41 innings 31·30; G. A. Faulkner, 1,286, average for 48 innings 30·66; A. D. Nourse, 1,329, average for 47 innings 29·53. It is significant of the strength of the South African attack that although fifteen centuries were scored on behalf of the team only four were hit off their bowling.

Now it is time to proceed to a brief review of

the County Championship competition, and as a preliminary thereto it may be well to insert the following table, which shows at a glance the result of every match in the Championship series. The top line gives the outcome of the home fixtures, the bottom line the result of those played away:—

County.	Derbyshire.	Essex.	Gloucester.	Hampshire.	Kent.	Lancashire.	Leicestershire.	Middlesex.	N'th'mpt'shire.	Notts.	Somerset.	Surrey.	Sussex.	Warwick.	Worcester.	Yorkshire.

w Won. L Lost. D Drawn. A Abandoned.
w Unfinished (Lancashire declined to finish game).

The above gives a total of 180 matches played, of which 128 were finished—a rather surprising percentage, considering the long spell of wet weather already referred to. KENT, champions the previous season, can urge as an excuse for their drop to eighth position that the conditions in the early part of the season were all against their brisk methods of batting; that the steady defence of C. J. Burnup, who only played in five innings in all, was greatly missed; and that injuries kept K. L. Hutchings out of the team for over a month! NOTTS secured the Championship for the first time since 1889, when they were bracketed equal first with Lancashire and Surrey. Prior to that they held undisputed sway in 1883, 1884, 1885, and 1886. The chief factor in the side's success was the consistently good bowling of Wass and Hallam, who, well served by the wet pitches, captured all but 41 of the 339 wickets that fell to the side. Hallam came out best with 153, average 11·78; Wass's figures being 145 wickets, average 13·57. The team maintained its unbeaten certificate right to the close by drawing with a strong England eleven at the Oval in September. George Gunn headed the batting averages with 815 runs for 28 innings, average 32·60; A. O. Jones was next with 823 runs for 27 innings, average 31·65; and J. Gunn third, 668 for 27, average 30·36. WORCESTERSHIRE—for whom the three Fosters, G. N., R. E., and H. K., all averaged over 40 runs—only lost two matches, and their bowling showed great improvement over that of the preceding season,

Cuffe doing best with an average of 18'91 for 100 wickets, whilst Arnold took 67 for 24'00, and Burrows 57 for precisely the same average.

It was frequently remarked that the rain seemed to follow YORKSHIRE about, and at one period they had seven matches off the reel more or less interfered with. Their receipts dropped from over £6,000 to less than £3,000. The services of the Hon. F. S. Jackson were practically lost to the side, Haigh was frequently absent, Denton had only a moderate season, and, generally, fortune did not smile on the team. Hirst (1,032 runs, average 34'40) and Tunncliffe (1,095 runs, average 30'41) were the most prolific scorers. Haigh headed the bowling averages with 78 wickets for 11'51, but Hirst took 140 wickets for 15'21, and Rhodes 141 for 16'41. SURREY—who will possibly be without Lord Dalmeny, N. A. Knox, and J. N. Crawford next season—did fairly well on good wickets, but poorly on slow ones, and would have fared very badly indeed but for Hayward, Hayes, and Hobbs, whilst the Anglo-Australian, Alan Marshall, scarcely came up to expectations. The bowling figures came out poorly, J. N. Crawford's 110 wickets for an average of 15'59, and Lees' 124 for 18'39 being a long way the best.

The features of the MIDDLESEX season were the wonderfully consistent batting of P. F. Warner, and the admirable bowling of the Australian, Tarrant. The former never displayed such fine form previously, and his non-inclusion in the English team for Australia was generally regretted. He totalled 1,353 runs, and averaged 46'65. Tarrant took 115 wickets for 15'20. ESSEX showed in-and-out form, and a propensity to slovenly fielding. P. A. Perrin, C. McGahey, and F. L. Fane all averaged over 30 runs per innings, the two first-named aggregating over 1,000 runs, but J. W. H. T. Douglas and Buckenham were the only others to average more than 20. Walter Mead was once more the mainstay of the attack, taking 120 wickets for 16 runs apiece, and he was well backed up by Douglas (72 for 20'63) and Buckenham (84 for 21'22).

The appended table shows, at a glance, the position, and percentage, of every county taking part in the Championship:—

Positi.	County.	Played	Won.	Drawn.	Lost.	Points.	Per-centage
1	Notts	19..15..	4...	0...	15	...	100'00
2	Worcestersh. 18..	8...	8...	2...	6	...	60'00

15	Nthampton. 20..	2...	6...	12...	10	...	71'42
16	Derbyshire..	20..	2...	1...	17	...	78'94

The Yorkshire v. Derbyshire match, at Sheffield on March 24, and 25, Derbyshire v. Warwickshire, at Derby on May 30, 31, and June 1, and Yorkshire v. Notts, at Huddersfield on July 4, 5, and 6, abandoned without a ball having been bowled, are not included in the above table. *Match Middlesex v. Lancashire, at Lord's, July 23, &c., abandoned owing to damage done to wicket by the public, included among the drawn games.

According to the rule laid down by the M.C.C., "One point shall be reckoned for each wicket; one deducted for each loss; unfinished games shall not be reckoned. The county which during the season shall have, in finished matches, obtained the greatest proportionate number of points shall be reckoned champion county."

Having glanced briefly at the doings of the leading shires, a few general remarks may not be out of place. The highest county score of the season was the 596 of Kent v. Hampshire at Tonbridge, whilst Worcestershire (strangely enough, against Kent) got close to it with 567. A new record was set up when for Gloucestershire Dennett and G. L. Jessop disposed of Northamptonshire, on June 10, at Northampton, for 12 runs. The biggest aggregate of the series was the 1,215 for 34 wickets in the Middlesex v. Surrey match at the Oval in August. The highest individual score of the year was 240 by G. L. Jessop for Gloucestershire v. Sussex, at Bristol, on July 15. There were only four other individual innings of over 200, and the total list of centuries dropped from 140 in 1906 to 91. Last season Hayward totalled 2,814, but this year he dropped to 1,570, whilst better aggregates were secured by Hayes (1,721), Hobbs (1,717), and Tyldesley (1,597). Dennett (184) took the highest number of wickets.

Taking the whole first class into account, the leading batsmen were C. B. Fry, innings 34, runs 1,449, highest 187, average 46'74; P. F. Warner, innings 47, runs 1,891, highest 149, average 46'12; Hayward, innings 58, runs 2,353, highest 161, average 45'25; G. N. Foster, innings 33, runs 1,182, highest 163, average 40'75; H. K. Foster, innings 33, runs 1,127, highest 152, average 37'56; Hobbs, innings 63, runs 2,165, highest 166 not out, average 37'45.

In bowling it will be noted that Dennett took the greatest number of wickets (202). The best figures were as follows:—K. O. Schwarz, 711'3 overs, 137 wickets, average 11'79; Hallam, 937'1 overs, 168 wickets, average 12'69; Haigh, 591'3 overs, 102 wickets, average 12'84; Wass, 885 overs, 163 wickets, average 14'28.

Tarrant, Hirst, J. N. Crawford, and Rhodes each scored a thousand runs and captured 100 wickets; and K. L. Hutchings and P. F. Warner joined the band of those who have scored a century twice in the same match. Most overs were sent down by G. Cox (1,228).

The Oxford and Cambridge match at Lord's, in the first week of July, yielded decidedly interesting cricket. Cambridge won by five wickets—a result that was quite in accordance with public form, as in the "trials" the Cantabs had won three and drawn two of nine engagements, whilst, for the same number of games, Oxford could only boast of a solitary victory—over Worcestershire—and three draws. In the Lord's match Cambridge totalled 108 and 146 (for five wickets), and Oxford 141 and 112. A. F. Morcom (Clare) and G. G. Napier (Pembroke) bowled exceedingly well for Cambridge, the former taking nine wickets for 98 in the match and the latter the same number for 104. H. A. Gilbert (Christchurch) was Oxford's most successful bowler. Oxford and Cambridge have now played 73 matches, the latter claiming 36 victories to Oxford's 30, the other seven matches having been drawn. Oxford last won in 1903.

The Eton and Harrow match, which ended at Lord's, on July 13, in a win for Harrow by 79 runs, was remarkable in many respects. Harrow totalled 222 and 382 for eight wickets,

and Eton 291 and 234. When Harrow adopted the closure in the second innings, Eton were left to make 314 to win in three hours and twenty minutes. There was little chance of getting the runs, but Eton tried in the most sporting spirit, and were only beaten ten minutes before time. This brought Harrow's victories up to 34 against 31, 17 matches having been drawn.

The Gentlemen and Players match at Lord's, on July 8, 9, and 10, had to be abandoned through rain after the Players had made 278 and 138, and the Gentlemen had scored 160 and 41 for two wickets. Hayward scored 145 for the Players; and Mr. Brearley took ten wickets for 180 for the Gentlemen, and Mr. Napier nine for 111. The Players won the Oval match the following week by 54 runs, totalling 303 and 239 to 255 and 233.

An English team, under the auspices of the M.C.C., sailed for Australia in the *Orient*, on September 20, and was made up as follows:—A. O. Jones (Notts) (captain), F. L. Fane (Essex), K. L. Hutchings (Kent), J. N. Crawford (Surrey), R. A. Young (Cambridge University and Sussex), Braund (Somerset), Rhodes (Yorkshire), Hayes (Surrey), Hobbs (Surrey), Hardstaff (Notts), Blythe (Kent), Fielder (Kent), Barnes (S.) (Staffordshire), and Humphries (J.) (Derbyshire).

CROQUET.

THE croquet events of 1907 produced some very interesting and exciting play. The Croquet Association's Champion Cup Tournament, at Roehampton, was very closely fought, and only resulted in a win for Mr. M. Barry after a tie with Mr. R. C. J. Beaton. In the competition proper each had secured 14 wins out of a possible 18, and on playing off the tie Mr. Barry beat Mr. Beaton by two games to one (28 minus 28 plus 13). Mr. G. H. Woolston, the holder, tied with Mr. T. J. Considine and the Rev. H. C. Launder for third place, with 11 wins; whilst Mrs. R. C. J. Beaton (10 wins) was sixth, Mr. E. A. S. Fawcett (9 wins) seventh, Miss V. Rowley (4 wins) eighth, and Miss N. E. Coote and Mr. C. E. Willis tied for ninth place with three wins each. At the same meeting, in the final round of the Open Singles, Mr. W. E. G. Fisher beat Mr. A. Martlet by 14.

CYCLING.

THE cycling season of 1907 must be regarded as an eminently satisfactory one as regards both the sport and pastime. The trade returns show that the great increase in the ranks of motoring has not weakened those of the humbler form of motion. Although in the sport there arose no Zimmerman or Reed, most of the well-known riders maintained their form, and some of the newer men showed considerable improvement. Ernest Payne, the young Worcester crack, did not stand out so prominently as in the previous year, and the most successful all-round rider—in proportion, at all events, to the number of races in which he took part—must have been B. Jones, of Wigan. The rider, however, who showed the most promising form was undoubtedly V. L. Johnson, of Birmingham.

The National Championships were, as usual, decided at three different meetings. The Quarter-Mile, Five-Miles, and Twenty-Five Miles events all fell to men new to National honours, in G. C. Anderson, South-West Ham, C. W. B. Kingsbury, Gosport, and D. C. Robertson, Peterborough, respectively. The Mile Championship was won by Ernest Payne, Worcester, for the

third successive time; and Leon Meredith, Paddington, regained the Fifty Miles. Jean Devoissoux, the French champion, finished second in the One and Five Miles events. The Tandem Championship was won rather easily by F. G. Hamlin and H. T. Johnson, of the Putney A.C. Anderson, who was thought by some to be a rather lucky winner, showed that his performance at Exeter was no mere flash in the pan, by repeating his success, at the same distance, in the British Empire Championships at Newcastle. In the preliminary heats he defeated B. Jones and E. Payne, whilst in the final his runner-up was J. Lavery, the Irish champion. B. Jones, of Wigan, won both the One and Ten Miles Championships. The International Championships were held in Paris, and were won as follows:—Professional: 100 Kilometres: Louis Darragon, France; 200 Metres: Emile Friel, France. Amateur: 100 Kilometres: Leon Meredith, England; 2,000 Metres: Jean Devoissoux, France. The last named subsequently won the Sportsman Cup at Herne Hill, and then, like all other Continental riders who have attained amateur International Championship honours, became a professional.

The outstanding event of the season, on the road, was the North Road Club's 24 Hours Race, which was won by T. A. Fisher, of the Unity C.C., who covered the excellent distance of 377½ miles. C. Moss, of the Midland C. & A.C., Birmingham, won that club's open 100 Miles Race, with an allowance of 9 mins., and also made the fastest actual time, viz., 5 hrs. 4 mins. 38 secs.—a very fine performance. Later, Moss made fastest time—viz., 5 hrs. 7 mins. 41 secs.—in the Bath Road Club's 100 Miles Race, which, on the handicap, was won by F. C. Higgins, with 29 mins. start, in 4 hrs. 49 mins. 9 secs. F. W. Wingrave, North Road Club, made fastest time—viz., 5 hrs. 17 mins. 44 secs.—in the Anfield (Liverpool) Club's 100 Miles Race, which was won by F. C. Lowcock, Manchester Wheelers, with an allowance of 20 mins., in 5 hrs. 0 min. 50 secs. In the North London C.C. 50 Miles Handicap, A. W. Ashton, Highgate C.C., did the fastest time, viz., 2 hrs. 33 mins. 51 secs., and also won the handicap. Ashton afterwards made fastest time—5 hrs. 26 mins. 28½ secs.—in the Catford 100 Miles, won by E. H. Low, Unity C.C., 50 mins. start, in 4 hrs. 59 mins. 28½ secs.

Although not many records were beaten during the season, those which fell were of more than ordinary interest. On the path, H. D. Buck reduced the quarter-mile, unpaced, standing start, amateur record to 28½ secs. Hamlin and Johnson set the quarter-mile, paced, standing start, tandem record at 28½ secs., and Matthews and Barnard the half-mile, tandem, unpaced, record at 54 secs., and the three-quarter-mile and one mile, flying start, unpaced, records at 1 min. 19½ secs. and 1 min. 49½ secs. respectively. V. L. Johnson reduced the mile, unpaced, standing start, record to 2 mins. 3½ secs. Several attacks were made on the Land's End to John o' Groats and 1,000 miles records, and at the end of the season both stood to the credit of W. Welsh, at 3 days 8 hrs. 4 mins. and 4 days 7 hrs. 40 mins. 38 secs. respectively.

FOOTBALL.

THE ASSOCIATION GAME.

THE season of 1907 will long be remembered for the most deplorable schism on record. For

several years discord had existed between a section of amateurs and the Football Association on the question of the admission of professional clubs to membership of the London F.A.; and when a special general meeting of that body passed, in deference to the expressed wish of the Council of the F.A., a resolution approving of the principle, a big minority of the amateur clubs revolted. The F.A. followed this with a mandate to the effect that such Associations as Middlesex, Kent, and Surrey should legislate for professional clubs within their respective areas. This led to more friction and the breaking away of hundreds of clubs from their allegiance to the governing body. An Amateur Football Association was formed, the Corinthians, most of the Old Boy (public schools) clubs, and the two Universities going over to it. The new Association claimed to be the governing body of amateur football, and the Rugby Union and the Hockey Association passed resolutions recognising it as such.

The International series of matches resulted in the Championship falling to Wales for the first time in its history. On February 16 England defeated Ireland (1-0) at Everton, and on the 23rd of the same month Wales beat Ireland at Wrexham (3-2). On March 4, at Wrexham, Scotland also succumbed to Wales (1-0); in Glasgow, on March 16, Scotland won against Ireland (3-0). England drew with both Wales (Fulham, March 18) and Scotland (Newcastle, April 6), the score being "one all" in each match. It will thus be seen that Wales went through the campaign without sustaining a defeat. The Scotland and England match was disappointing, and the gate receipts fell as low as £2,725 12s. It is worthy of note that it was Stephen Bloomer's 23rd International game, and in it he scored his 23rd goal in such contests. The full record for the series is appended:—

	Pld.	W.	L.	D.	F.	A.	Goals.	Pts.
Wales	3	2	0	1	5	3	5	5
England	3	1	0	2	3	2	4	4
Scotland	3	1	1	1	4	2	3	3
Ireland	3	0	3	0	2	7	0	0

League football in 1906-7 presented some remarkable features. Newcastle United, after being sensationally defeated at home by Crystal Palace in the English Cup, won the First Division Championship with a record of 51 points out of a possible 76. Of 38 matches they won 22 and drew 7, scoring 74 goals against 46. Bristol City, new to the division, did well in running up with a record of 47 points and 20 matches won; but Stoke and Derby County dropped down to the Second Division. In the two divisions and in the Southern League 1,140 matches were played, and it is estimated that 11,000,000 spectators attended. The Second League Championship was won by Notts Forest, who won 28 and drew 4 of their 38 engagements, totalling 60 points, and scoring 74 goals against 36. Chelsea finished second with 26 wins, 5 drawn games, and 57 points. Notts Forest and Chelsea thus stepped up into the First Division for the season of 1907-8. In the Southern League there was a tough struggle between Fulham and Portsmouth, but eventually the former secured the Championship for the second year in succession. Once more it was Fulham's defence that saved

them, as will be gleaned from the following figures:—

	Pld.	W.	D.	L.	F.	A.	Goals.	Pts.
Fulham	38	20	13	5	58	32	53	53
Portsmouth..	38	22	7	9	64	36	51	51

Before the opening of the 1907-8 season Fulham passed into the Second League, and the Southern League adopted the extraordinary procedure of electing Bradford Park Avenue in their place.

The competition for the Football Association Challenge Cup was as interesting as ever, and some excitement was caused by the Crystal Palace Club reaching the fourth round. Had they got into the final the Association would have been in a dilemma, as the rules insist upon a neutral ground for the semi-finals and the final, whereas the F.A. is under agreement to play the final at the Crystal Palace for a number of years. However, on April 20, Sheffield Wednesday, who had been rather fortunate throughout the competition, and Everton met at Sydenham before 84,584 people, and after an exciting match the former won by 2 goals to 1. Their previous success was against Wolverhampton Wanderers in 1895-6, the first time the present trophy was played for, the original cup having been stolen from a shop window in Birmingham.

Once more the Oxford and Cambridge match failed to rise above the ordinary, and it will suffice to mention that it was won by the Dark Blues by 2-1. Cambridge have now won 17 games and Oxford 16.

In the Western League, Fulham (Section A) and West Ham United (Section B) won, the latter securing the Championship match at Stamford Bridge on April 15 by 1-0. Crystal Palace Club won the United League Championship with 21 points out of a possible 28, and Woolwich Arsenal were successful in the premier division of the London League with 29 points out of a possible 36. The Hospital Cup, as in the previous season, was secured by Guy's, who have now won it ten times since its institution in 1884-5. The Sheriff of London Charity Shield was played for on March 9 at Fulham, when Newcastle United defeated the Corinthians by 5-2. The Corinthians have played in every match since the trophy was first offered with the exception of the 1899 game, but they have not won since 1904. Newcastle United had not previously figured in the competition. Clapton managed to keep the Amateur Cup in the south, and they are the first *bona-fide* London club to win it. They defeated Stockton in the final by 2-1.

Other challenge cups were won as follows:—Army Cup, Royal Engineers; Dunn Memorial Cup, Old Reptonians; English Schools Championship, West Ham; Irish Cup, Cliftonville; Kent Senior Cup, Maidstone; London Charity Cup, London Caledonians and Casuals (joint holders); London Senior Cup, West Norwood; Middlesex Charity Cup, Shepherd's Bush; Middlesex Senior Cup, New Crusaders; Scottish Cup, Celtic; Southern Charity Cup, Tottenham Hotspur; West Ham Charity Cup, Clapton; Welsh Cup, Oswestry.

The Secretary of the Football Association is Mr. F. J. Wall, 104, High Holborn. The Secretary of the Amateur Football Association is Mr. H. Hughes-Onslow, 60, Lincoln's Inn Fields, W.C.

RUGBY FOOTBALL.

Rugby football in 1906-7 certainly showed more signs of vitality than had been observable

in some previous seasons, and there was cause to think that the "All Blacks" campaign a year previously had served a sound educative purpose. One of the features of the season was the visit of a South African combination, which, if it did not arouse quite the interest associated with the previous Colonial tour, nevertheless proved highly successful. Once again national vanity received a rude shock, for the only International that the South Africans lost was that in which Scotland was engaged, although at the Crystal Palace England managed to make a draw.

As regards the full International Tournament, Scotland, at the bottom of the poll the previous season, jumped into first place. The actual positions will be readily gleaned by perusal of the following tables:—

THE INTERNATIONAL CHAMPIONSHIP, 1906-7.

SUMMARY OF RESULTS.

	G. T.	G. T.
Swansea Wales (22)...	2 4 bt England ...	0 0
Edinburgh Scotland (6)	0 2 bt *Wales (3)	1 0
Dublin †Ireland (17)	2 3 bt *England (9)	1 2
Edinburgh Scotland (15)	3 0 bt *Ireland (3)	1 0
Cardiff... †Wales (29)	4 4 bt Ireland.....	0 0
Blackth Scotland (8)	1 1 bt England (3)	0 1

*One penalty goal. †One goal from mark.

‡One penalty, one dropped goal.

4 England ...	0	0	3	0	9 1 3=12	‡5 8=47

*Two penalty goals. †Two penalties, one dropped goal. ‡One penalty, one mark goal. §One penalty goal. ¶One mark goal.

By winning all the Internationals, including that against South Africa, Scotland created a record, and a glance at the figures shows that her strength was mainly in defence. Only once was the goal line crossed, whilst it speaks well for their stamina that against Wales and against England they were in a minority at half-time. Scotland had not carried off the International Championship since the season of 1903-4. England's display in the series of matches was very disappointing indeed, and but little consolation could be gleaned from the fact that the team beat France at Richmond in January by 41 points to 13. The South Africans won 2, drew 1, and lost 1 of their 4 International matches, scoring 29 points to 22.

The North v. South match, at Blackheath, on November 24, was somewhat farcical, the South winning anyhow by 33 points to 3. A week later the selected England side was defeated at Coventry by "The Rest" by 13 points to 9; but the West v. The Rest of the South, and the Champion County v. The Rest of England games were not played.

For the first time since the Rugby County Championship was officially recognised in 1889-90, the competition was not finished. In the Northern Division, which embraces Durham, Cheshire, Lancashire, Yorkshire, and Northumberland, the first named headed the list with 10 points. There were two groups in the Southern Division, Devon heading the South-Western section and Kent the South-Eastern. In the

Southern final, at Blackheath, on February 20, Devon defeated Kent by 28 points to 3. Then in the final tie Devon and Durham, after playing a draw (1 try each) at West Hartlepool on April 13, and another draw (0-0) at West Hartlepool on April 30, became joint holders. Of other leading games, that between Oxford and Cambridge, decided at Queen's Club on Dec. 12, was played on ground made rotten by rain following upon frost. Oxford had exactly the same set of forwards as in the previous season. They won by 4 tries to a goal and a try, play being distinctly good all round. The Army and Navy met at Queen's Club on Feb. 27, the representatives of the Navy just snatching a victory by 15 points to 14.

At the Union's Annual General Meeting it was announced that a ground near Twickenham had been purchased by the Union as headquarters.

The Union Offices are at 35, Surrey Street, Strand; and Mr. H. B. Marriott is the Secretary.

GOLF.

THE year 1907 saw the game of golf continue to grow in importance. Many new clubs and courses were formed in different parts of the world; and there was hardly an instance of a club failing to obtain the amount of support necessary to make it a success. The leading events were, for the greater part, played in wet and generally unfavourable weather, and, in the Open Championship, scoring was higher than it had been for many years. Oxford v. Cambridge was, as usual, the first of the outstanding fixtures to be decided. It took place on the Royal Liverpool Club's course, at Hoylake, on April 17, and resulted, after a most interesting day's golf, in a win for Cambridge by one hole—23 holes to 22. M. T. Allen, the Cambridge captain, beat the Hon. C. N. Bruce, the Oxford captain, by 13 holes, a performance which practically won the contest. The Parliamentary Tournament, which was begun in May, fell to Mr. A. Bonar Law, M.P. Ireland was visited for the Ladies' Open Championship, which took place at Newcastle, co. Down, on May 7, 8, 9, and 10. Victory rested with Miss May Hezlet, of Portrush, who, in the final, defeated her sister, Miss Florence Hezlet, by 2 and 1. Indeed, the home country triumphed all along the line, Ireland also securing the annual International Tournament. The Amateur Championship, held at St. Andrews on May 27, 28, 29, 30, and 31, ended in a success for the older school of players. Mr. John Ball, of the Royal Liverpool Club, won for the sixth time (and that at the age of 44 years), defeating Mr. C. A. Palmer, a Birmingham golfer, who entered from the Royal and Ancient Club, in the final by 6 and 4. In the Amateur International contest, Scotland beat England by 8 matches to 1—the easiest success in the annals of the contest. On June 15, at Hoylake, however, England conquered Scotland in the Professional international contest by 8 matches to 5. On the same course, on June 18, 19, 20, and 21 came the Open Championship. For the first time it fell to a foreigner, Arnaud Massy, a Basque, born and bred at Biarritz and subsequently associated with the Société de Golf de Paris, gaining a brilliant victory. In the qualifying competitions he made easily the best score, and, in the Championship proper, he proved successful with rounds of 76, 81, 78, and 77, total 312. J. H. Taylor, of Mid-Surrey, was second with 79, 79, 76, and 80, total 314; while,

for third place, Tom Vardon, of Sandwich, and G. Pulford, of Hoylake, tied at 317. James Braid, the holder, and E. Ray came next with 318 each. Braid, Harry Vardon, Tom Vardon, and other British professionals crossed to Paris to endeavour to wrest the French Championship from Massy, on the course at La Boulie, on June 29 and 30, but they sustained another reverse. Massy won with 77, 72, 74, and 75, total 298; and another Frenchman in Jean Gassiot was second with 77, 76, 75, and 72, total 300. Braid finished third with 301. Braid subsequently challenged Massy to a match, over neutral courses, for £100 a side, but the champion did not accept. Mr. C. E. Dick, of Royal Liverpool, secured the St. George's Challenge Cup, at Sandwich, with a score of 82 and 79, total 161; and in September, at Portmarnock, the Irish Open Amateur Championship resulted in favour of Mr. J. Douglas Brown, a comparatively unknown member of the Murrayfield Club, Edinburgh. There were many surprises in this event, Mr. Ball, Mr. Palmer, and other well-known players being beaten. So far as concerns the leading events, the year practically concluded with the match-play stages of the Professional Golfers' Association's tournament for £240, presented by the proprietors of the *News of the World*, which took place at Sunningdale on October 15, 16, and 17. James Braid won the first prize of £100 for the third time in five years. In the final he beat J. H. Taylor by 4 and 2. In matters legislative, items of interest were the election of Mr. C. B. Macdonald, an American member of the Royal and Ancient Club, to the Rules of Golf Committee, and the selection of Deal as an additional open championship course.

GYMNASTICS, BOXING, AND FENCING.

DURING 1907 the Amateur Gymnastic Association carried out much about the same programme as formerly. The winner of the Individual Championship under their auspices was W. Tysall, Birmingham Athletic Institute. In the International Clubs Championship (teams of six) the Dolobran Athletic Club proved successful, as in the preceding year. England won the International Team Championship. The Annual Amateur Fencing Championships were held at the Sword Club, Durham House Street, Strand, London, on Monday, March 18, and at the Caxton Hall, Westminster, on March 25. Mr. Seligman retained the Foils Championship, and Mr. Fielmann won the Sabres, in which Mr. C. A. Wilson, of Leeds, the winner for three previous years, did not defend. The Amateur Boxing Championships were held at the Alexandra Palace in the last week of March. There was a record entry, and from one standpoint the meeting was a success. Only three previous winners defended their titles, but there were entries from New Zealand, South Africa, France, and Denmark. The class, however, was, generally speaking, poor. The winners were:—Bantam Weights (8 st. 4 lb.): E. Adams, Columbia B.C.; Feather Weights (9 st.): C. Morris, Polytechnic B.C.; Light Weights (10 st.): M. Wells, Lynn B.C.; Middle Weights (11 st. 4 lb.): R. C. Warner, Gainsford A.C.; Heavy Weights (any weight): H. Brewer, Polytechnic B.C. Some excellent sport resulted from the meeting of Oxford and Cambridge, at Cambridge, on March 5. The Cantabs won five of the eight events on the programme, taking the Bantam Weights (G. H.

Fisher, Clare College); the Middles (D. Portway, Downing College); the Heavies (A. H. Van der Byl, Pembroke College); and the Sabres (J. Greenwood, Peterhouse). Oxford won the Feather Weights (J. L. Walker, Trinity); the Light Weights (C. C. Wilson, Queen's); and in the Foils the Oxford first string (P. G. Doyne, Trinity), and the Cambridge second string (R. Pilter, Emmanuel) proved successful. There were record entries for the Public Schools Boxing Championships, at Aldershot, on March 21 and 22, 55 names being sent in for the four events, and all the entrants appearing. The "Feathers" went to R. M. R. Anderson, a useful two-handed boxer from Bedford Grammar School. The Light Weights were nearly all above the average, and after quite a number of warm heats W. G. Gabian (Charterhouse School) won the final heat from G. L. M. Warne (Dulwich College). The "Middles" furnished considerably more slogging than science, a remark that also applies to the Heavy Weights. Both went to St. Paul's by the success of the brothers C. O. and G. A. Lilley. St. Paul's, always prominent at Aldershot, only just missed three firsts. In the Fencing competitions C. M. G. Ogilvie (Bedford) won the Foils and W. S. L. Baird (Epsom) the Sabres. For the Gymnastic competitions there were no fewer than 34 couples entered, including representatives of the following schools:—Dean Close, Cheltenham, Marlborough College, Merchant Taylors, Cheltenham College, Bromsgrove School, Radley College, Harrow School, Bedford, Epsom College, Woodbridge, Berkhamsted, Haileybury College, St. Paul's, Blundell's, Dulwich College, Sherborne, Bradfield, Rugby, Aldenham, Felsted, Highgate, Wellington College, Cranleigh, Repton, King's College School, Wimbledon, Ipswich, St. John's, Westminster, Clifton, King's School, Canterbury, Oundle, Elizabeth College, Guernsey, Forest, and Eltham. The result was:—W. G. Hull and A. E. Bullock (St. Paul's School, Kensington), 194 points (winners of the shield, &c.), 1st; D. R. J. Halliday and M. C. Bird (Harrow School), 191½ points, and; C. G. Dickson and E. L. Farley (Blundell's School, Tiverton), 184 points, 3rd; F. H. St. Hill and L. M. Clark (Cheltenham College), 178½ points, 4th.

HOCKEY.

THE popularity that hockey attained during 1906 was fully maintained during 1907. As was the case the previous year, the International programme was a complete triumph for England. The various teams doing duty for the "predominant partner" won all four International engagements, and went through the season without having a goal scored against them. Ireland were defeated by 5-0, Wales by 10-0, Scotland by 3-0, and France by 14-0, giving a total of 33 goals to none. With the exception of the game against Wales, all the games were decided on English soil, the exception to the rule being played at Llandudno. Of the other leading games, the South of England had the best. They defeated the North by 4 goals to 2, the West by 3 goals to 2, and the Midlands by 2-1. The Midlands had the next best record, beating the West by 6-0 and the North by 5-1. The North only won one match—against the West—by 3 goals to 2. It will thus be seen that the West of England did not register a solitary success. The annual game between Oxford and Cambridge, played at Bromley on Feb. 15, was won

by the latter by 3 goals to 2. Generally speaking, the sport is in a highly flourishing condition. To the Hockey Association are affiliated the Midland Counties, the Northern, Southern, and Western Associations, and the New Zealand, Transvaal, Western Australia, Ireland, Scotland, Wales, France, Germany, and Dutch governing bodies. In addition, numerous county associations are affiliated. His Highness the Prince of Wales is President of the Hockey Association, whose Hon. Sec. is Mr. H. M. Tennant, 12, Lee Terrace, Blackheath, S.E.

LAWN TENNIS.

ALTHOUGH the wet weather seriously interfered with many of the tournaments, the season of 1907 was, on the whole, highly successful. A start was made early in April with the Covered Courts Championships at Queen's Club, London. In the Singles, A. F. Wilding proved successful, and with Mr. J. G. Ritchie carried off the Doubles, whilst with Miss Eastlake Smith as partner he won the Mixed Doubles. Miss Smith had previously taken the Ladies' Singles, whilst all the players mentioned met with success in the Paris Championships. Oxford and Cambridge met at the Queen's Club in June, the Dark Blues scoring 14 games to 4. A. F. Wilding won further honours in the Kent Championships in June, when Miss Sutton carried off the Ladies' Singles. The Irish Championships, at Dublin, only attracted a poor class entry, the only "crack" to compete being J. G. Ritchie, who won the Singles. T. D. Good and H. N. Craig were to the fore in the Doubles, and the successful lady was Miss Garfit, who also scored in the Mixed Doubles with W. Carey as partner. For the All England Championships, which commenced at Wimbledon on June 24, there was a record entry, including representatives from Germany, Austria, New Zealand, and Australia. H.R.H. the Prince of Wales patronised the meeting, but some disappointment was felt at the absence of the brothers Doherty, S. H. Smith, and F. L. Eiseley. N. E. Brookes won the Gentlemen's Singles, and with Wilding was successful in the Doubles. Miss Sutton won the Ladies' Singles, and with Beals Wright took the Mixed Doubles; whilst the Ladies' Doubles fell to Miss Wilson and Mrs. Lambert Chambers. Results of other important events during the season were: Welsh Championships—Gentlemen's Singles, J. M. Boucher; Ladies', Miss Sutton. Inter-County Championship—Gentlemen, Yorkshire; Ladies, Durham. Scottish Championships—Gentlemen's Singles, A. M. Mackay; Ladies', Miss A. M. Ferguson; Mixed Doubles, Miss A. M. Ferguson and A. M. Mackay.

RACKETS AND TENNIS.

RACKETS followed about the same course in 1907 as during the previous year. The first event of general importance was the Army Championship Meeting at Prince's on March 9. In this the 2nd Batt. Highland Light Infantry, once more represented by Messrs. H. M. Balfour Bryant (U.V.O.) and M. P. Bramwell Davis, won the Doubles for the fourth year in succession. Mr. Balfour Bryant also won the Singles. In the Amateur Championships at Prince's Club Mr. E. B. Wall proved successful, on March 25; and on the 28th Capt. W. L. Foster, D.S.O., and Mr. B. L. Foster proved successful in the Doubles. The Public Schools Championship in April fell to Wellington, represented by H. Brougham and

E. C. Harriman; whilst Oxford vanquished Cambridge in both Doubles and Singles matches, being represented in the former by Mr. G. N. Foster and Mr. C. V. L. Hooman, and in the latter by Mr. G. N. Foster.

The principal tennis events of the year were won as follows:—Amateur Championship, on May 4, Mr. Jay Gould; the U.C.C. Gold Prize, on July 16, by Mr. Vane Pennell; the Professional Championship, on May 16, 8, 11, by Peter Latham; and the Oxford v. Cambridge Doubles, on July 31, by Oxford; the Singles, on Aug. 1, by Oxford.

ROWING.

A PECULIAR feature of the 1907 season was that, although rain sadly interfered with most outdoor sports, the chief regattas were generally favoured with fine weather. Henley, unfortunately, proved the exception, and regular visitors of between twenty and thirty years' experience could not recall a more miserable celebration of the royal meeting. The racing, however, was quite up to, if not above, the average. Early in the year it became public property that the Amateur Rowing Association had consented to undertake the management of the rowing section of the Olympic Games in 1908. Those races will be decided over the Henley Regatta course at the close of next July, after the usual regatta at the beginning of the same month. The Henley stewards are members of the A.R.A., and in order that the Olympic races might not suffer by anything fixed to precede them, it was arranged that no foreign entries would be accepted for Henley in 1908. Probably this ruling would have been generally approved had not the Belgians won the Grand Challenge Cup at the previous gathering. The fact that they will be debarred from defending their possession next July gave rise to criticism.

The University Boat Race, over the usual Putney to Mortlake course, on Saturday, March 16, resulted in a most hollow victory for Cambridge, who led from the first two or three strokes, and won by four and a half lengths in 20 min. 26 secs. With five of the previous year's crew in the boat—including D. C. R. Stuart, the stroke—it was not surprising that the same modification of the usual English style of rowing observable in 1906 was adopted. This is partially modelled upon that of the Americans, and partially upon the best points of professional scullers, and, in the opinion of many experts, is bound to displace the old order of things. Oxford had three "old blues" in the boat, the crews and their weights being as follows:—

Oxford: W. T. Heard (Fettes and Balliol), bow, 11 st.; *† H. C. Bucknall (Eton and Merton), 11 st. 8 lb.; G. E. Hope (Eton and Christ Church), 12 st. 13 lb.; R. M. Peat (Sedburgh and Trinity), 11 st. 12 lb.; J. A. Gillan (Edinburgh Academy and Magdalen), 12 st. 7 lb.; * A. G. Kirby (Eton and Magdalen), 13 st. 10 lb.; * E. H. L. Southwell (Eton and Magdalen), 12 st. 1 lb.; A. C. Gladstone (Eton and Christ Church), stroke, 11 st.; A. W. Donkin (Eton and Magdalen), cox., 8 st. 5 lb.

Cambridge: G. A. B. Close-Brooks (Winchester and First Trinity), bow, 11 st.; † J. H. F. Benham (Fauconbergh and Jesus), 12 st. 5½ lb.;

* Rowed against Cambridge in 1906, and † against Cambridge in 1905. † Rowed against Oxford in 1906, † against Harvard University in 1905, and † against Oxford in 1905.

† H. M. Goldsmith (Sherborne and Jesus), 12 st. 6 lb.; J. S. Burn (Harrow and First Trinity), 12 st. 9½ lb.; H. G. Baynes (Leighton Park and First Trinity), 14 st.; † J. B. C. Johnstone (Eton and Third Trinity), 12 st. 9 lb.; † E. W. Powell (Eton and Third Trinity), 11 st. 6 lb.; † D. C. R. Stuart (Cheltenham and Trinity Hall), stroke, 11 st. 1 lb.; R. Boyle (Bradfield and Trinity Hall), cox., 8 st. 10 lb.

Aggregate weight—Oxford, 96 st. 8 lb.; Cambridge, 97 st. 9 lb. Average weight—Oxford, 12 st. 1 lb.; Cambridge, 12 st. 2½ lb.

Reference has been made to the bad weather at Henley. The entries beat all records, and college crews entered in greater numbers than for some years. For the second time the actual regatta extended over four days, starting on the first Tuesday of the month. Notable features were the gigantic entry for the Diamond Sculls, and the fact that a Belgian crew once more entered the lists for the Grand Challenge Cup. The visiting eight included several of the men who had secured the trophy the previous year—the first time it had been out of England. Leander were thought to be the most dangerous rivals of the foreigners, but they threw chances away. Thus, members of the eight were entered in fours, pairs, and sculls, and consequently could not give up the time for practice in the eight which would have welded them into one harmonious whole. Further, there were alterations in the order of rowing only a few days before the race. The Belgians and Leander met in the second heat, when half a gale of wind was blowing against the crews. A desperate race ensued, Leander leading until less than a furlong from home, when the Belgians spurted splendidly and won by a third of a length. That was on the Thursday, and the following afternoon the Sport Nautique de Gand, Belgium (to give them their official title), won the final from Christchurch, Oxford. The latter, stroked by A. C. Gladstone, had the worst station, but put up a most plucky fight, and were only vanquished by a bare length. The Belgian crew were P. De Geyter (bow), 10 st.; 12 lb.; G. Visser, 11 st. 6 lb.; Hugh Mourans, 10 st. 10 lb.; A. Van Roy, 12 st. 6 lb.; F. Vergucht, 12 st. 1 lb.; P. Vierman, 12 st. 5 lb.; O. Desonville, 12 st. 3 lb.; R. Poma (stroke), 11 st. 1 lb.; R. Colpaert (cox.), 8 st. 1 lb. The previous year, H. T. Blackstaffe, of the Vesta Rowing Club, had, at the thirteenth attempt, succeeded in winning the Diamond Sculls. He failed to retain his title, being defeated by Capt. W. H. Darrell, of the Household Brigade B.C., by a bare half-length. The foreign element in this competition was rather poor, but fine form was displayed by St. Bernard von Gatz, Viking Rowing Club, Germany. Capt. Darrell won the final by a length and a quarter from a very promising young sculler in Alexander McCulloch, University College, Oxford. The winners of the other trophies were:—Wyfold Cup: Magdalen College, Oxford; Thames Challenge Cup: Christ College, Cambridge; Ladies' Challenge Plate: Trinity Hall, Cambridge; Stewards' Challenge Cup: Magdalen College, Oxford; Silver Goblets: B. C. Johnstone (12 st. 12 lb.) and R. V. Powell (12 st. 6 lb.); Leander; Visitors' Challenge Cup: Magdalen College, Oxford. On the last day (Friday), Lord Desborough presented Baron Pierre Coubertin's cup to the Henley Regatta stewards. This cup is voted every four years by the International Olympic Committee to the association which has done the most during the

past year for the promotion of amateur sport, and the Henley stewards were unanimously voted as its recipients at its last meeting. In a private match (fours), Royal Engineers beat Royal Artillery by 2½ lengths.

At the Metropolitan Amateur Regatta, held under the management of the London Rowing Club on July 11, Captain W. H. Darrell followed up his Henley success by winning the London Cup. The London R.C. won the Metropolitan Pairs, and Thames R.C. (J. Beresford and K. Vernon) took the Champion Pairs. The Thames Cup for Senior Fours fell to the London R.C., and the Old Barnes Challenge Cup (eights) was secured by Vesta R.C. The Metropolitan Champion Cup for Senior Eights resulted in London beating Thames by a length, their crew being as follows:—O. M. Moullin, 11 st. 2 lb.; W. D. Lancaster, 12 st. 3 lb.; J. R. K. Fenning, 12 st. 5 lb.; H. J. Bryant, 11 st. 13 lb.; Guy Nickalls, 12 st. 11 lb.; R. B. Freeman, 13 st. 1 lb.; M. Donaldson, 13 st. 3 lb.; P. Dewar (stroke), 10 st. 5 lb.; C. H. L. Boyton (cox.), 8 st. 8 lb.

After his defeat at Henley, H. T. Blackstaffe decided to resign his title to the Wingfield Sculls (Amateur Championship of the Thames). The race took place on July 15, from Putney to Mortlake, and resulted in a great surprise. J. de G. Edey, Auriol R.C., who had made a poor show at Henley, and had been beaten at the Metropolitan Regatta, won easily from R. V. Powell (Leander R.C.) and Capt. Darrell, who steered very badly. The time was 23 min. 51 secs. There was but a small entry for the Amateur Punting Championship, decided over the Shepperton course on Tuesday, July 23. The distance was three-quarters of a mile—out and home—and J. H. Secker won from F. C. Covell. With H. T. Jaffe as partner, the latter won the Doubles Championship from J. H. Serker and A. Bennett. On July 24, A. T. Cook, of Hammersmith, was successful in the final heat for Doggett's Coat and Badge. The course was from London Bridge to Chelsea, and for the first time all restrictions as to the build of the boats were removed, and the competitors used ordinary outrigger racing craft. On the 25th of the month, W. Haines, of Old Windsor, once more secured the Professional Punting Championship. This was his ninth success.

The Hon. Sec. of the Amateur Rowing Association is Mr. G. M. Gridley, Leander R.C., Putney, or Henley-on-Thames.

SWIMMING.

THE year 1907 was a memorable one as regards swimming, and no doubt both as a sport and as a pleasurable exercise the art has made vast strides in popularity during recent years. There were the usual number of attempts to emulate Captain Webb's feat of swimming the Channel, J. Wolfe being the most persistent tryer in this respect; but although many good performances were put on record, actual success was not attained. Four members of the City Police force attempted to cross the Straits of Dover as a "relay" team, but they also were unsuccessful. The Oxford v. Cambridge races were decided at the Bath Club, London, on June 25. N. F. Howe Brown (Oriol, Oxford) won the 50 Yards race, and T. Williams (Peterhouse, Cambridge) the Hundred and the Quarter. Oxford took the Team race and drew (2-2) in the Polo. Owing to the system of awarding points in the swimming events, however, the match, as far as those three races were

concerned, was declared a tie, so that Oxford carried off the honours of the evening as the only actual winners of one contest—the Team race.

Under the conditions which govern the National and Southern Counties Championships in Life-Saving which are promoted by the Royal Life-Saving Society, it is not now necessary for the teams to travel, the officials examining clubs in their own baths some time before the end of October in each year, and sending the results of their examination, together with the aggregate times, to the executive of the Society, who, subject to the right to order a second test, either as a final or otherwise, award the medals and shields to the teams whose aggregate times are the lowest. The returns for 1907 disclose that the Bath Dolphin team—consisting of T. Crisp, W. H. Whipper, P. H. Morris, and S. W. Crisp—won the Southern Championship, their time being 16 mins. 37½ secs., as against 17 mins. 2½ secs. by the City of London Police (A. J. Greenop, M. H. Blackmore, J. G. Jagger, and G. L. Horton), who were second.

For the National Championship there was keen competition, victory resting with the Sheffield Otters, whose team—consisting of F. A. Unwin (Amateur Champion of England), C. Blatherwick (Amateur Champion of Yorkshire), S. Martin, and J. E. Clements—only occupied 13 mins. 57½ secs. in completing the tests. Edinburgh Police, the holders, came second (R. Work, C. L. Bruce, J. Hempseed, and D. S. Dakers), taking 15 mins. 58 secs.

Each member of a team had to be fully attired and carry another member of his team a distance of 20 yards, in four separate methods of rescue, and also pick up an iron object from the bottom by diving from the surface 15 yards from the starting point, and swimming back with it. Thus each team had to cover a distance of 760 yards, over 380 yards of which various methods have to be shown.

The competition which is annually promoted by the Royal Life-Saving Society for the Ladies' Championship Challenge Cup, and which is open to teams of six members from any ladies' swimming club whose headquarters are in the United Kingdom, provides that two members of each team swim 108 yards any stroke, two members 72 yards with the breast stroke, and two members 72 yards with the back stroke, and four members each to carry another member a distance of 18 yards, each rescuing member to perform separate methods of rescue. The aggregate times of each team are reported to the Society by the duly appointed officials, and the club with the lowest aggregate takes the Cup. The Weston-super-Mare Club team—consisting of Nellie Davey, Dorothy Thould, Daisy Baker, Margery Thould, Daisy Gillham, and Janet Basker—whose time was 10 mins. 22 secs., won the Cup; Sheffield Excelsior Ladies (time, 10 mins. 26½ secs.) being second.

As regards the Amateur Swimming Association Championships there were numerous notable incidents. Four new records were set up. Standing out by themselves are the wonderful performances of Mr. Daniels and Miss Fletcher over 100 yards, the former breaking record by 2 secs., and the latter by 3½ secs. The championship holders were very much the same as a twelvemonth previously. Indeed, except that Mr. Naylor, who won the Breast Stroke, had to take second place to Mr. Courtman, Mr. Hal-

may's win in the 220 Yards (which a year ago provided only one competitor, Mr. Healy), and Mr. Radmilovic's victory in the Long-Distance Championship, the winners were identical. Mr. Taylor again took the four events he won a year previously, and, curiously enough, was again beaten into second place in the Long-Distance Championship. The complete list of winners of Amateur Swimming Association Championships follows:—100 Yards, at Manchester, on Sept. 7, C. M. Daniels, time 55½ secs. (best on record); 100 Yards, Ladies, Miss J. Fletcher, at Manchester, Sept. 27, time 1 min. 27 secs. (best on record); 150 Yards, C. M. Daniels, at Liverpool, Sept. 14, time 1 min. 33 secs. (best on record); 150 Yards Back Swimming, F. A. Unwin, at Salisbury, Sept. 18, time 1 min. 59½ secs. (best on record); 200 Yards Breast Swimming, P. Courtman, at Birmingham, Sept. 16, time 2 mins. 55½ secs.; 220 Yards, Z. de Halma, at Weston-super-Mare, Aug. 19, time 2 mins. 34 secs.; 440 Yards, at South Shields, Aug. 14 (time 4 mins. 43 secs.); 500 Yards, at Walsall, Sept. 5 (time 6 mins. 22 secs.); Half-Mile, Highgate, July 6 (time 11 mins. 16½ secs.); and One Mile, at Swindon, Aug. 3 (time 25 mins. 4½ secs.). H. Taylor; Long Distance, in the Thames, July 13, P. Radmilovic 1st, H. Taylor 2nd, E. Brausch 3rd, 69 mins. 15½ secs.; Diving, London, Sept. 2, H. Smyrk; Plunging, London, Oct. 7, H. W. Allanson, 75 ft. 10½ ins. The Schoolboys' Team Championship was won, at Bradford, on Sept. 28, by the Seaman's Orphanage, Liverpool. In the final for the Club Water Polo Championship, at Birmingham, on Sept. 15, Weston-super-Mare, who had won the previous year, beat Wigan by 3 goals to 2; and in the decider for the Inter-County Polo Championship, at Newcastle, on Sept. 30, Lancashire retained their right to the title, defeating Somerset by 4 goals to 2. The International Water Polo matches did not lead to a complete series, but the record, as far as it went, was—

	Plyd.	Won.	Drn.	Lost.	For.	Goals Asst.
England	31	27	1	3	176	30
Scotland	26	12	1	13	65	82
Wales	26	10	3	13	76	99
Ireland	27	3	1	23	40	146

District Championships may be briefly summarised. In the South, H. W. Faircloth proved in wonderful all-round form, and won the 100 Yards, 150 Yards, 220 Yards, and 440 Yards; Miss F. Footman took the 100 Yards Ladies' event, and R. H. Hassall the Mile. In the North, H. Taylor took the Quarter, and the 1,000 Yards Salt Water, and J. H. Derbyshire the 150 Yards. P. G. Graham was the most prominent swimmer in the North-Eastern District, and W. Kell in the Midlands.

On Sept. 7 a race "through London," from Richmond to Blackfriars, in the Thames, was witnessed by many thousands of spectators. From an enormous entry over 30 competitors were selected, and finally J. A. Jarvis won with very great ease, beating, amongst others, some of the finest Continental swimmers of the day, and fairly establishing his right to be considered the Long-Distance Amateur Champion of the World.

THE TURF.

IN some respects the season of 1907 was a replica of its predecessor. The same moderate form was observable amongst the leading three-year-old horses, and there was the same en-

couragement to believe in the brilliancy of the foremost of the younger generation of thoroughbreds, although it is doubtful if any of the two-year-olds proved as excellent as did Polar Star in 1906. When the campaign ended in 1906 general regret was felt that Polar Star was not entered for the classic races of the ensuing season. How he would have fared in them can only be conjectured, as his three-year-old career was disappointing, with the exception that, with the stiff burden for a three-year-old of 7 st. 12 lb., he won the Great Jubilee Stakes at Kempton on May 12 from 11 very useful opponents. Polar Star was ridden by Higgs, and started favourite at 6 to 4 against. Probably his preparation for this event and the severity of the task taxed his constitution to such an extent that he was never the same animal after. Once again the horses bearing the colours of H.M. the King had a poor season. D. Maher, who in 1906 carried all before him as a jockey in big races, did not maintain his form, and had a comparatively poor time, although he rode over 100 winners.

The season presented few remarkable features, if the continual success of Irish-bred horses be omitted. There were far fewer instances of foul riding than in 1906. The first big handicap of the season produced a startling coincidence, for the six-year-old French horse Oh, ridden by G. Stern, won the Lincolnshire Handicap (£1,435) for the second year in succession, and thus created a record. There were 24 runners, and the winner's price in the betting was 25 to 1. The Liverpool Spring Cup (£225), over a distance of 1 mile 3 furlongs, was won on March 21 by the four-year-old Bridge of Canny, 8 st. 6 lb., ridden by D. Maher. This horse maintained excellent form throughout the season, and this success was the first for runner of others. On Friday, March 23, Eremon, 7 yrs., 10 st. 11 lb., ridden by A. Newey, starting at 8 to 1 against, won the Grand National Steeplechase by 6 lengths. Tom West (H. Murphy) was second, and Patlander (J. Lynn) third. It was Newey's first win in this race, in the course of which 15 of the 23 runners fell.

Newbury, the youngest of the enclosed meetings, again proved highly popular with owners, trainers, and public. Its Spring Cup (£1,052), on April 13, attracted no fewer than 17 good-class handicappers to the post. An aged importation in Dalkeith, 7 st. 12 lb., with William Griggs in the saddle, started at 8 to 1 and won by three-quarters of a length. Father Blind, 4 years, 6 st. 2 lb. (J. Howard), created a great surprise by winning the Great Metropolitan Stakes (£935) at Epsom; and on the following day that grand, but not quite dependable, five-year-old Velocity presented weight to a dozen others in the City and Suburban Handicap (£1,675), over 1½ miles, and won easily under the substantial burden of 9 st. 2 lb., H. Jones being the rider. Dalkeith, just referred to, was amongst the beaten lot, he, together with Magic Balm and Kolo, falling. More than one horse destined for distinction later in the year was behind the winner. The Two Thousand Guineas Stakes (£5,100) was decided at Newmarket on Wednesday, May 1. Slieve Gallion, who had retired into winter quarters with a fine reputation, started favourite, odds of 11 to 4 being betted on him. These he justified by beating nine competitors, winning by 3 lengths from Bezonian (Maher) and Linacre (W. Halsey); but later running proved the latter two to be decidedly moderate, and Slieve Gallion himself finished up

the season under a cloud. On the following Friday Witch Elm (B. Lynham) won the One Thousand Guineas (£4,150) easily from 16 opponents, none of whom, however, were destined to make turf history.

The Frenchmen once more gave English trainers a shock when, on Wednesday, May 8, Querido, 4 yrs., 8 st., ridden by John Reiff, cantered away with the Chester Cup (£2,030) from 11 opponents, including Bridge of Canny, who, under the welter weight of 9 st. 5 lb., finished fourth. As usual, the Kempton Jubilee Handicap, decided on Saturday, May 11, proved a great success. Polar Star's win has already been mentioned, but it may be added that amongst the horses finishing behind him were Dalkeith (8 st. 7 lb.) and Velocity (9 st. 12 lb.). The Newmarket Stakes (£2,050), on May 15, attracted an ordinary class field, of whom Acclaim, ridden by Higgs—who for a long while was almost as invincible in big races as Maher had been the previous season—defeated the better fancied Linacre by a short head. This race, in some previous years, had thrown light on the Derby, but it was not so this time. When the great event of the Epsom Summer Meeting was decided, on Wednesday, June 5, yet another surprise was in store. The race (worth £6,450) was won by Mr. Richard Croker's Orby, who had not previously been seen on an English racecourse, although he had won in Ireland, where Mr. Croker races and trains. J. Reiff was the jockey. Slieve Gallion (W. Higgs), on the strength of his success in the Two Thousand Guineas, was favourite at 13 to 8 on, but could only finish third to Wool Winder (Madden). The winner started at 100 to 9 against, and scored by 2 lengths, but the time (2 mins. 44 secs.) compared unfavourably with Spacemint's record of 2 mins. 36 secs. in 1906. Unfortunately, like his immediate predecessor, Orby later in the season succumbed to the exigencies of training, but not before he had won the Irish Derby at the Curragh.

The Royal Ascot meeting, which commenced on June 18, was notable for better going than is usually the case. In the hands of D. Maher, Golden Measure, 5 yrs., 9 st. 8 lb., won the Gold Vase (£900) on the Tuesday; and Torpoint, aged, 8 st. 4 lb., ridden by Madden, secured the Ascot Stakes (£1,660) from 10 opponents, the time for the 2 miles being 3 mins. 24½ secs. The Prince of Wales' Stakes (£2,175) on the same afternoon fell to Qu'Appelle, who was ridden by Maher. The Royal Hunt Cup (£2,110), over 7 furlongs 166 yds., was the feature of Wednesday's card. It attracted 24 competitors, and resulted in a great surprise, as Lally, the Derby disappointment of the previous season, who carried 8 st. and started at 100 to 6, won by half a length from Andover, Malua being third. The winner was ridden by L. Hewitt, an Australian jockey, whose first season in England it was. On Thursday The White Knight, starting at evens, and Eider ran a dead-heat for the Gold Cup (£3,570), but the latter was disqualified for bumping. Some unfavourable comment was directed towards the owners of The White Knight for lodging an objection, protests being almost unknown at the Royal meeting. On Friday the popular Wokingham Stakes (£860) was won by the three-year-old Forerunner II., 6 st. 11 lb., from 22 opponents, Watts riding.

On Wednesday, June 26, the Northumberland Plate (£925), now sadly shorn of its one-time

importance, was won by Killigrew (6 yrs., 6 st. 7 lb.), ridden by C. Ringstead. The rich July Stakes (£1,260), for two-year-olds, at Newmarket, on July 2, was noticeable for the success of His Majesty the King's Pearl of the Loch (H. Jones). This is a chestnut filly by Persimmon—Loch loon, which had won a little race at Newmarket in April. The Princess of Wales' Stakes (£4,840), next day, was taken by Polymelus (9 st. 7 lb., D. Maher) from a very poor field, as will be gathered from the fact that the badly named Nulli Secundus finished second. When, on Friday, July 19, Lally, ridden by Dillon, carried 9 st. 13 lb. into first place for the Eclipse Stakes (£9,285) at Sandown Park, beating Sancy, on whom odds of 5 to 2 were laid, by a head, it began to look as though the colt had indeed been unlucky in the previous year's Derby, but he fell off in form after this, and is evidently a delicate horse. On the succeeding afternoon the National Breeders' Produce Stakes (£4,357) was won by White Eagle. It was the fourth successive victory of the two-year-old son of Gallinule and Merry Gal, and this naturally caused the colt to be loudly proclaimed as the best of his year; but when in September he could only finish fourth to Lesbia in the Champagne Stakes (£1,770) at Doncaster, this opinion had to be modified. Lesbia, a filly by St. Frusquin—Glare, prior to winning the Champagne Stakes, on the occasion of her *debut* carried off the Prince of Wales' Plate (£887) at the York August meeting.

On Friday, July 26, Dinneford, 5 yrs., 8 st. 10 lb. (D. Maher up), won the Liverpool Summer Cup (£1,055); and a day later Fugleman, 4 yrs., 9 st. (Higgs), and Manaton, 6 yrs., 8 st. 6 lb. (Madden), ran a dead heat for the Newbury Summer Cup (£1,027). Goodwood, which opened on Tuesday, July 30, was a great success. On the first day Romney, 3 yrs., 6 st. 13 lb. (Watts), won the Stewards' Cup (£517) from 14 opponents, starting at 10 to 1. On the following afternoon Royal Dream, 4 yrs., 8 st. 1 lb. (Randall), starting at 3 to 1, defeated 10 others for the Goodwood Plate (£825); whilst on Thursday The White Knight, 4 yrs., 9 st. 10 lb. (Halsey), secured the Goodwood Cup (£800) from a field of five. The Rous Memorial Stakes (£1,185) only attracted three moderate two-year-olds, Persuasion winning; but for the Prince of Wales' Stakes (£2,800) there were eight competitors, of whom Lamose, ridden by W. Halsey, proved best. On the Friday Galvani, ridden by Dillon, defeated six moderate three-year-olds for the Gordon Stakes (£929), over one mile; and Velocity, 5 yrs., 9 st. 10 lb. (H. Jones), giving "lumps" of weight away to his 10 opponents, won the Chesterfield Cup (£547).

The next important race was the City of London Breeders' Foal Plate (£1,180), on August 15, and so easily did Wool Windr (W. Halsey) score in a field of six that he was at once talked of as the likely winner of the St. Leger (£4,125). Expectations were realised, for, with Halsey again on his back, Col. Baird's colt won by six lengths from Balinglass, with Acclaim third. Despite this decisive defeat, Balinglass was a hot favourite for the Cesarewitch (£825); but when that race was decided, on October 16, the colt was unplaced to Demure, 4 yrs., 6 st. 9 lb. (F. Wootton), who started at 4 to 1. The honours of the race, however, belonged to The White Knight, 4 yrs., 9 st. 12 lb. Had he won with that great weight he would have created a

record. The Cambridgeshire Stakes (£1,210), on Oct. 30, was won by the thoroughly exposed 4-year old Land League (7 st. 13 lb.), who, ridden by W. Higgs, beat the favourite, Malua (4 yrs., 8 st. 8 lb.), and 13 others by a neck. Next day the Irish filly Rhodora (W. Bullock) took the Dewhurst Plate (£1,492), and The White Knight was beaten by Mr. L. de Rothschild's Radium in the Jockey Club Cup (£648).

YACHTING.

THE season of 1907 was the most successful which has so far been experienced during the present century, and yachtsmen regard it as only the beginning of the long-looked-for revival in the sport. The international rating rules came into operation, and this fact assisted in giving an impetus to racing. A big class of yachts of 23-metre rating was formed, and consisted of three vessels—*Nyria*, built in 1906; *White Heather II.* and *Brynchild II.*, both new boats, built respectively for Mr. Myles B. Kennedy and Sir James Pender, Bart. *Brynchild* was most unfortunate throughout the season. In the opening race of the year she lost a man—killed by falling from aloft—and during the Cowes Week had another man washed overboard and drowned. *White Heather* proved almost invincible, and won twenty-three first prizes and one second as the result of thirty-one starts. Her prizes included a King's Cup, won at the regatta of the Royal Harwich Yacht Club. *Nyria* sailed the first four races of the season on even terms with her two opponents, and then, owing to having been built under an old rule, was given a time allowance of four seconds per mile; after sailing another three matches, this allowance was increased to seven seconds.

The class next in importance to that referred to was the 15-metre class, which is the equivalent of the 52-ft. class, which for many years alone sustained the interest in "class" racing. In the opening matches this fleet numbered five—*Maymon*, the champion of the 52-footers in 1904, now belonging to Mr. George Terrell; *Britomart* and *Sonya*, both old 52-footers; and *Shimna* and *Ma'ona*, new vessels built for Mr. W. Yates and Mr. J. Talbot Clifton respectively. *Shimna* was a life design, while the other was designed by Mylne. *Maymon*, after winning the first match of the season, performed very indifferently, and her owner withdrew from the "class," and sailed for the remainder of the season with the limited handicap yachts. *Sonya* did not compete after the Royal Cinque Ports Regatta, owing to the indisposition of her owner, Mrs. Turner Farley; so that the class for the remainder of the season consisted of three yachts. Before the racing season commenced, it was recognised that some time allowance might be necessary between the old and the new vessels, as it was not known how the new international rating rule might affect the new craft—whether they would be faster or slower than the old 52-footers. The racing, however, was sufficiently close to dispose of all consideration of time allowance. *Britomart*, champion of the 52-ft. class last year, repeated her success, and came out at the head of the records for the year.

In September, Sir Thomas Lipton forwarded a challenge for the America Cup, which was, however, declined by the New York Yacht Club on grounds which, in yachting circles, were regarded as merely technical and trivial.

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

THE following Table gives the "close" time for different kinds of Game for England, Scotland, and Ireland, during which it is illegal to pursue the game mentioned, all dates inclusive:—

GAME.	ENGLAND.	SCOTLAND.	IRELAND.
Black Game or Heath Fowl.	11th Dec. to 19th Aug. and 31st Aug. in Somerset, Devon, and New Forest.	11th Dec. to 19th Aug.	11th Dec. to 19th Aug.
Bustard	None.	None.	11th Jan. to 31st Aug.
Deer, Male.	None.	None.	1st Jan. to 9th June.
„ Fallow Male	None.	None.	to 9th June.
Grouse or Red Game	11th Dec. to 11th Aug.	11th Dec. to 11th Aug.	11th Dec. to 11th Aug.
Hare	None.	None.	1st Apr. to 11th Aug.
Heath or Moor Game	None.	As "Muir-fowl."	11th Dec. to 11th Aug.
Landrail	As "Wild Birds."	As "Wild Birds."	11th Jan. to 19th Sept.
Muirfowl, or Ptarmigan	None.	11th Dec. to 11th Aug.	11th Dec. to 19th Aug.
Partridge	and Feb. to 31st Aug.	and Feb. to 31st Aug.	and Feb. to 31st Aug.
Pheasant	and Feb. to 30th Sept.	and Feb. to 30th Sept.	and Feb. to 30th Sept.
Quail	As "Wild Birds."	As "Wild Birds."	11th Jan. to 19th Sept.

It is also unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for all these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds Protection Acts, 1880 to 1904, from 2nd March to 31st July, both inclusive. Otherwise this close-time applies to all wild birds throughout the United Kingdom. The penalty for killing any wild bird in such close-time, or for selling or having in possession between the 16th March and the 31st of July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence, or, in the case of the undermentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected—see next column) in respect of which the offence was committed. In the Island of St. Kilda the fork-tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked * to be omitted therefrom.

American quail.	Kittiwake.	Scout.
Auk.	Lapwing.	Sealark.
Avocet.	Lark.	Seamew.
Bee-eater.	Loon.	Sea parrot.
Bittern.	Mallard.	Sea swallow.
Bonxie.	Marrot.	Shearwater.
Colin.	Merganser.	Sheldrake.
Cornish chough.	Murre.	Shoveller.
Coulteneb.	Night-hawk.	Skua.
Cuckoo.	Night-jar.	Sniew.
Curlew.	Nightingale.	Snipe.
Diver.	Oriole.	Solan goose.
Dotterel.	Owl.	Spoonbill.

Kingfisher.	Sanderling.	Woodcock.
	Sandpiper.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Acts do not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, the Secretary for Scotland in Scotland, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

By the Wild Birds Protection Act, 1904, penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. November 1st is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about Aug. 12 to October 12 for stags, and from Nov. 10 to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound. This does not apply to foreign hares. The statutory close season for

hares in Ireland has been varied for some counties by order of the Lord Lieutenant, and it is now mostly from April 1st to August 12th.

CLOSE-TIME FOR SALMON.

I. ENGLAND AND WALES.

Under the Salmon Fishery Acts, salmon (including all migratory fish of the genus salmon, are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for any of such fish is prohibited. The close-time for nets begins on 1st September, and for rods on 2nd November; for both nets and rods it ends on 1st February. By an Act of 1907 the Board of Agriculture and Fisheries may make provisional orders varying the law on these and other points. The close-time may also be varied by a bye-law by local boards of conservators, provided it does not begin for nets later than 1st November, with a minimum of 154 days, or for rods not later than 1st December, with a minimum of 92 days. For putts and putchers the annual close season is from 1st September to 1st May, which cannot be altered by bye-law. The following are the cases in which the other dates have been varied:—

Close-time for	Nets.	Rods.
Adur	1 Sept. to 2 Feb.	1 Oct. to 2 Feb.
Hampshire††	31 July to 1 Feb.	2 Oct. to 1 Feb.

Axe	20 Sept. to 30 Apr.	15 Sept. to 10 Jan.
Avon (Devon)	30 Sept. to 1 May	15 Sept. to 10 Jan.
Camel	21 Sept. to 4 Apr.	15 Sept. to 10 Jan.
Rowey	11 Nov. to	15 Sept. to 10 Jan.

No fresh salmon may be sold between 3rd September and 1st Feb., except such as come from parts beyond the seas, or as have been

taken, if in the United Kingdom, in legal netting season and in legal manner. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1st February and 3rd November, may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1st Feb. and 3rd Nov., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 3rd September and 30th April, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the onus probandi lies on the person exporting. The capture and sale of "unclean" salmon, i.e., salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This close-time may be varied by the local conservancy boards, provided it is not less than 42 hours, nor more than 48 hours, and that it is fixed between Friday at midnight and noon on Monday.

II. SCOTLAND.

In Scotland the annual close time must not be less than 168 days. It is, for nets, from 27th August to 10th February, and, for rods, from 1st November to 10th February, except as follows:—

Close-time for	Nets.	Rods.
Tay	21 Aug. to 4 Feb.	16 Oct. to 14 Jan.
Forth	—	ditto.
Add, Aray, Eckraig,	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
N. & S. Esk, Fyne,		
Ruel, Shira.		
Beaully, Dunbeath,		16 Oct. to 10 Feb.
Lossie, Ness, Spey.		1 Oct. to 10 Jan.
Halladale, Strathly,		
Naver, Borgeie,		
Hehnsdale.		
Earn	—	1 Nov. to 31 Jan.
Bervie, Carradale,	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Fleet, Garnock,		
Girvan, Howmore,		
Inner, Iorsa, Ir-		
vine, Laggan, Luce,		
Sorn, Ugie, Ythan,		
and rivers of Ork-		
ney, Harris, & Uist.		
Nith	ditto.	15 Nov. to 24 Feb.
Annan, Stinchard ...	ditto.	16 Nov. to 24 Feb.
Rivers of Shetland.	ditto.	16 Nov. to 31 Jan.
Urr	ditto.	1 Dec. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	—	15 Sept. to 10 Jan.
Hope, Polla	—	11 Sept. to 10 Jan.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

* Except above Woodbury Road Station, 1 Sept. to 15 Apr.

† Above S. Biddick.

†† Above Hope Hill.

‡ Below Old Sandsfield. § Below Lostwithiel only.

** Except R. Erme, 30 Sept. (rods 30 Nov.) to 4 April.

‡‡ 16 Aug. to 1 Feb. below Bigweir Bridge.

§§ Above Lostwithiel, 1 Dec. to 1 April.

‡‡ West of Needles Lighthouse.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

In Scotland the law as to the sale of salmon differs somewhat from that in force in England.

III. IRELAND.

In Ireland the close-time for salmon applies also to trout. The netting close-time must never be less than 168 days. Many variations of the close season have been made, of which it is impossible to specify all the details here; the following list, however, shows the general close-time in force in the different districts, in parts of some of which, however, it is different (all dates inclusive). The second column gives the point of delimitation on the coast between the various districts, which include all rivers, &c., within their respective coast-limits.

District.	Coast Limits.	Cl.-T. Net.	Cl.-T. Rod.
Dublin.....	Skerries	16 Aug. to 1 Feb.	1 Nov. to 31 Jan.
Wexford	Wicklow	16 Sept. to 1 Oct.	1 Oct. to 14 Mar.
Waterford	Kiln Bay	16 Aug. to 31 Jan.	1 Oct. to 31 Jan.
Lismore	Helvick Head	31 July to 1 Feb.	30 Sept. to 1 Feb.
Cork	Ballycotton H.	16 Aug. to 14 Feb.	13 Oct. to 14 Feb.
Skibbereen	Galley Head	30 Sept. to 30 Apr.	1 Nov. to 1 Feb.
Bantry	Mizen Head	1 Oct. to 30 Apr.	1 Nov. to 16 Mar.
Kenmare	Crow Head	16 Sept. to 31 Mar.	1 Nov. to 31 Mar.
Killarney	Lamb Head	1 Sept. to 30 Apr.	Do.
Limerick	Dunmore Head	1 Aug. to 11 Feb.	1 Oct. to 31 Jan.
Galway	Hags Head	1 Sept. to 15 Feb.	16 Oct. to 31 Jan.
Connemara	Cashla Coast-Guard Stn.	6 Aug. to 31 Jan.	Do.
Ballinakill	Slyne Head	1 Sept. to 15 Feb.	1 Nov. to 31 Jan.
Bangor	Pigeon Point	Do.	1 Oct. to 30 Apr.
Ballina	Benwee Head	13 Aug. to 15 Mar.	16 Sept. to 31 Jan.
Sligo	Coonamore	16 July to 31 Dec.	1 Oct. to 31 Jan.
Ballyshannon	Mullaghmore	19 Aug. to 28 Feb.	10 Oct. to 28 Feb.
Letter-kenny	Rossan Point	20 Aug. to 3 Feb.	2 Nov. to 31 Jan.
London-derry	Malin Head	1 Sept. to 14 Apr.	11 Oct. to 2 Apr.
Coleraine	Downhill	20 Aug. to 3 Feb.	1 Oct. to 28 Feb.
Ballycastle	Portrush	20 Sept. to 16 Mar.	1 Nov. to 31 Jan.
Dundalk	Donaghadee	16 Sept. to 31 Mar.	1 Oct. to 2 Feb.
Drogheda	Clogher Head	5 Aug. to 11 Feb.	16 Sept. to 11 Feb.

In Ireland the weekly close-time is fixed at 48 hours, from 6 a.m. Saturday till 6 a.m. Monday. Salmon and trout must not be sold in Ireland in the close season.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between and October and 1st February, except (1) in parts of Norfolk and Suffolk where, under a local Act (the Norfolk and Suffolk Fisheries Act, 1877), the conservators have fixed the close-time for trout, for nets only, at from 10th Sept. to 25th Jan.; (2) in the Thames, where the close season is from 11th Sept. to 31st March; and (3) in the cases noted below, where, under an Act passed in 1876, the trout and char close-time (for rods and nets, except where specified) has been varied by bye-law by local boards of conservators. In the districts marked* the close-time, as altered, applies only to trout. The sale of trout and char is absolutely prohibited throughout England and Wales from 2nd Oct. to 1st Feb. :-

*Eden	2 Sept. (rods 2 Oct.) to 28 Feb.
*Urk	2 Sept. to 14 Feb.
Tyne	1 Oct. to 21 Mar.
Wye	2 Oct. to 14 Feb.
*Taft & Ely	20 Sept. to 1 Feb.
*Cleddy	29 Sept. to 1 Mar.
*Ogmore	30 Sept. to 28 Feb.
*Feign	1 Oct. to 2 Mar.
*Exe	15 Sept. to 28 Feb.
*Seint	15 Sept. to 1 Mar. (except Anglesey, 13 Feb.)
Derwent (Cumb.)	15 Sept. to 10 Mar.
W. Cumberland	Except Char in Crummock and Buttermere, 1 Nov. to 30 June.
Teify, *Avon (Devon), Conway	2 Sept. to 10 Mar.
Adu, Cuckm're, Rother	1 Oct. to 28 Feb.
*Hampshire	1 Oct. to 31 Mar.
Clwyd and Elwy, Dart	2 Oct. to 28 Feb.
Camel, Powey	1 Oct. to 15 Mar.
*Esk, *Tee, *Ayron	1 Oct. to 15 Mar.
*Severn, Towy, *Lunc, Ribble, Wear, Rummy, Tamar & Plym	2 Oct. to 1 Mar.
Kent	2 Oct. to 3 Mar.
*Ouse and Nene	2 Oct. to 31 Mar.
Yorks	2 Oct. to 15 Mar.
*Suffolk & Essex	2 Oct. to 10 Apr.
*Dec	14 Oct. to 14 Feb. (rods only).
*Coquet	1 Nov. to 3 Mar. (ditto).

In Scotland there is a close-time for trout from 15 Oct. to 28 Feb. In Ireland the close-time for trout is the same as for salmon. For pollen the close-time is from 14 Nov. to 31 Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char," as the case may be.

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15 March to 15

† River Avon between Amesbury and Bioton only: above Amesbury 15 Oct. to 31 Mar.

1 Char close-time throughout district 22 Oct. to 1 Mar. 2 2 Oct. to 1 April for R. Duddon; and 16 Sept. to 15 Feb. for R. Bela.

§ 1 April 30 between Lostwithiel and St. Winnow 2 Oct. to 30 June from R. Gwilli to G.W.R. Bridge.

June, both inclusive, for all parts of England and Wales except parts of Norfolk and Suffolk. The penalty for taking or selling freshwater fish in that period is £2 for a first and £5 for a subsequent conviction. The close-season, however, does not apply to eels taken otherwise than by angling or to fish taken in private waters by leave of the owner, in public waters by leave of a Board of Conservators, or taken (with the leave of the owner if in private waters) for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Board of Agriculture and Fisheries. The Axe, Avon and Stour, Avon (Devon), Wye, Eden, and Towy fishery districts have been so exempted; also the Kent and Leven and Severn districts, as regards pike; the Usk as regards eels; and certain parts of the Severn as regards other fish than grayling. In the navigable rivers of Norfolk and Suffolk and the broads connected therewith, close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from March 1 to June 30. For eels a separate close-time exists (so far as fixed engines in salmon rivers are concerned) in England from 1 Jan. to 24 June; in Ireland, with one or two exceptions, from 11 Jan. to 30 June. In the Severn, elvers, or the fry of eels, are protected between 1 Jan. and the last day of Feb., and between 26 April and 24 June.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under $\frac{1}{4}$ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of

the territorial seas has been increased, and in some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

CLOSE-TIME FOR OYSTERS.

There are also local regulations for the protection of oysters; and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a general close-time for the capture and sale of "Deep-Sea Oysters" is fixed from the 15th June to 4th August; and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14th May to 4th August. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from the 16th June to 31st August inclusive, in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and, until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1st May to 31st August, is to remain in force so far as French fishermen are concerned. It is customary, however, for both Powers to agree to suspend the operation of this close season till June 16 in each year. In Ireland, the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1st May and 1st September, though this close season has been varied in the following cases:—

Tralee Bay	11th Mar. to 31st Oct.
Galway Bay	1st Jan. to 30th Nov.
Strangford Lough	1st Mar. to 31st Aug.
Achill Sound, Clew Bay	2nd April to 30th Sept.
Sligo, Ballisodare and	
Drumcliffe Bays ..	30th April to 1st June.

Taking oysters from licensed beds is made larceny.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Soldiers, sailors, volunteers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are given at p. 458.

SALMON, TROUT AND CHAR LICENCES.—In all

salmon fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued, except that in Ireland rod licences are available in all parts of that country. The rates on salmon nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft nets, the kind most commonly used, is £3; in England and Wales it varies from £5 to £2. The licence duty on a salmon rod and line is £1 in Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Derwent, *Exe, Hampshire, *Wye, *Usk, 30/-; Taw and Torridge, 24/-; *Lune, *Ribbles, *Dec, Clwyd & Elwy, *Conway, *Dovey, *Teify, Avon (Devon), *Dart, *Teign, Frome, Stour (Kent), Yorkshire, Tees, *Tyne, 20/-; *Eden, *Seoint, *Dwyfach, Towy, 21/-; Avon, Brue, & Parret, *Fowey, 15/-; *Camel, 12/-; Cleddy, Taff & Ely, Ogmere, W. Cumberland, 10/6; *Kent & Leven, Rhymney, *Ayr, Severn, Axe, Trent, Tamar & Plym, 10/-; *Esk (Yorkshire), 7/6; Ouse (Sussex), Wear, Coquet, Cuckmere, Rother, Adur, 5/-.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and trout is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1907, and the Board of Agriculture and Fisheries Act, 1903, in the hands of local boards, with the Board of Agriculture and Fisheries as the central authority. Districts may be formed and Boards of Conservators appointed for waters containing

These Boards of Conservators consist of three classes of members—those appointed annually by the County Councils of the various counties through which the rivers flow; *ex-officio* members, or those qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by the persons who have paid licence duty on instruments other than rod and line, used for salmon fishing in public waters.

NAME OF DISTRICT.	COAST LIMITS OF DISTRICT.	ADDRESS OF CLERK.
+Eden	Sark Foot to Seaton.....	J. B. Slater, Carlisle.

+Tyne.....	Newbiggin Point to Hawick Burn.....	J. Gibson, Hexham.
+Coquet.....		C. Percy, Alnwick.

salmon or freshwater fish. Such Boards have been appointed for 53 Districts. [The districts generally include all rivers running into the sea between the points named, and in the cases marked + also include the sea for a distance of three miles from the shore, or to the mid-channel in estuaries.]

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Lee Conservancy Board, and Conservators of the Medway. These Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain

cases for the regulation of other kinds of fishing which are prejudicial to such Fisheries. They are also empowered to issue licences for fishing for salmon, trout, &c.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 23 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Board of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to appoint local Fisheries Committees, either for a single county or borough, or for several jointly. They have power to make bye-laws, to be confirmed by the Board of Agriculture and Fisheries, regulating or prohibiting the use of instruments for the capture of sea fish (including

shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the coast and territorial seas adjoining between the points respectively mentioned:—

1. Northumberland (coterminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, from Donna Nook to Happisburgh. 4. Kent and Essex, from Dovercourt to Dungeness, and including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (coterminous with that county). 6. Southern, from the western boundary of Dorset to Hayling Island. 7. Devon. 8. Cornwall (each coterminous with the respective counties). 9. Glamorgan, from Nash Point to Worms Head. 10. Milford Haven, from Worms Head to Cemmas Head. 11. Lancashire and Western, from Cemmas Head to Haverigg Point. 12. Cumberland, from Haverigg Point to Sark Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

The following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The asterisk (*) signifies that the fish are then

in their prime; the dagger (†) signifies that the fish may be obtained, but are not at their best; the double dagger (‡) signifies that it is "close-time" as fixed by statute.

(a) This is for sea crayfish. River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(c) In the close season salmon from Holland, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(d) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

Automobilism, 1906-7.

ON 14th November, 1896, a measure by which self-propelled vehicles other than traction engines were once again permitted to use the public highways of this country became law, and England then set out on her long stern chase of France and Germany in the production of automobiles. Although still in pursuit of her Gallic neighbour, the leeway made up in a decade has been enormous, and in the matter of industrial vehicles quite extraordinary, for in that section this country most undoubtedly leads the world to-day. The Bill of 1896 is called the "Motorists' Emancipation Act," and the anniversaries of its passage through Parliament have been celebrated by automobilists in various kinds of ways. Last year the decennial period was marked with more than usual ceremony by the pioneers of the industry and those connected with the movement prior to the passing of the Act above mentioned taking lunch together, under the chairmanship of that earliest apostle of automobilism, Sir David Salomons, Bart. The Automobile Club and the Motor Union celebrated the auspicious day in a similar manner.

During the month of November, 1906, it was announced that the Grand Prix Race in France in the following year would be run on a consumption basis of 30 litres of spirit to every 100 kilometres, without weight restriction; while the Automobile Club also propounded and issued its now well-known H.P. Rating Formula,

namely, $\frac{D^2 N}{2.5} = \text{H.P.}$, D being cylinder diameter in inches, N number of cylinders, and 2.5 the adopted constant founded on average piston speed. During the latter part of the year, motorists generally were considerably exercised in their minds with regard to a report current to the effect that the Government contemplated the imposition of a new tax on automobiles to the extent of £1 per horse-power, which would have formed a crushing impost and gone very far towards crippling the industry. The announcement of the intention of the authorities to impose this unconscionable tax was made in the *Autocar* of 8th September, 1906, considerable doubt being expressed at the time with regard to its probability. That the smoke was not without a solid substratum of fire was clearly shown upon the occasion of the Motor Union Emancipation Day dinner on the 14th November, when the Parliamentary Secretary of the Local Government Board stated plainly that the Government had relinquished their idea of imposing a horse-power tax on automobiles.

During the latter part of November was held at Olympia the Third Exhibition of Automobiles conducted by and for the trade under the direction of the Society of Motor Manufacturers and Traders, proving the most complete, the most interesting, and the most successful show of self-propelled vehicles yet held in this country. Huge as is the floor area covered by the roof of Olympia, it had on the occasion of the previous exhibition been found quite inadequate to the demands of the whole trade and industry if space were to be found for the machines which the heavy traffic and motor boat interests could stage. The heavies and the boats were accordingly banished, a separate exhibition being held for them, also at Olympia, in the early part of the present year. The magni-

tude of the exhibition of 1906 may be more or less realised by the consideration of the fact that the huge building at West Kensington then sheltered no less than 435 complete pleasure cars and 135 chassis, to say nothing of large exhibits of the varied accessories which appertain to motoring generally. As happened in 1905, the date of the English Show, preceding as it did the French Automobile Salon by nearly a month, forced the French makers, to whom the British market is at present all-important, to put their new types first on view in this country—a fact which tended largely to discount the importance of the Champs Elysées fixture.

The world could not have been said to be electrified by any great fundamental departure in automobile mechanism at Olympia, but all-round improvement in detail, finish, and accessibility was more than noticeable. The adoption of the six-cylinder engine was more general than was the case in 1905, for notwithstanding the stern fight put up by the staunch disciples of the four-cylinder petrol engine, the additional sweetness of running and evenness of torque of the six-cylinder motor has found favour with all to whom price is a secondary consideration. The general tendency shown in engine design was to cast the cylinders in pairs, put the valves all on one side, thus getting rid of one cam shaft, though magneto and water-circulating pumps were frequently driven off a common jointed spindle on the side of the engine opposite to the valve chambers. Separate exhausts from the cylinders gave way to a single horizontal exhaust port running at level of exhaust exits and so giving greater accessibility to the valve tappets below. Forced lubrication either to sight feeds or direct to the crank-shaft bearings and cylinder walls was more in evidence than before. A few of the leading makes deliver the oil under pressure through leads drilled in the crank-shaft cheeks, pins, and connecting rods. An oil sump is formed in the lowest part of the crank chamber from which the oil is raised by the circulating, mechanically driven pump. With this system, which it is hoped will become general, the emission of the horrible vapour of burnt lubricating oil does not occur.

In the matter of ignition, cylinder firing by current delivered from high-tension magnetos had largely increased, the improvement in the construction of magnetos being manifest on all hands. Chain drive for either ignition distributors, magnetos, or pumps had nearly disappeared. There was no increase in the number of engines fitted with low-tension magneto ignition, only a few of the leading foreign cars being so furnished. In the case of a French engine, steam engine practice had been followed to the extent of giving lead to the induction valves in proportion to the engine speed. It is by no means certain that this refinement has been embodied in the engines since issued. The carburetter, vital though this apparatus is to the efficiency of a high-speed internal combustion engine, marked no great advance in design. Accurate adjustment, and accessibility of float, jet, and petrol leads had, however, received a commendable amount of attention. There was a tendency shown to make the carburetter quite automatic and withdraw control of any sort from the driver. The employment of multi-disc clutches on Hele-Shaw lines was more general than at any previous show, although the leather-faced cone clutch, simple and effective as it is when well made,

quite held its own. In change-speed mechanism the slotted sector had almost entirely given way to the gate change with locking striking rods, although there is room for the simplification of the gate movement in many cases. The direct drive on third and geared drive on fourth speeds, introduced by Messrs. Rolls, Royce, Limited, in connection with their first Tourist Trophy car, had gained considerable ground. In but two or three instances only were ball-bearings used on crank-shafts, and those in connection with foreign engines. Ball-bearings were, however, very general to clutch and gear shafts and back axles. In the case of live axle cars the adoption of a tail-bearing either in balls or plain to the rearward end of the driving bevel-wheel spindle was welcome. Internal segmental expanding brakes still held their own, though in one or two cases both pedal and side lever applied brakes were relegated to drums on the road driving wheels. The adjustment of the steering gear and connections still leaves much to be desired. This consideration appears to have received less attention than any other part. The combined steel and wood frame dies hard, for examples were present. Evidences of the more general adoption of the wholly pressed frame, in which side members, cross members, engine and gearbox supports, and under-apron were all pressed out of the same sheet, were frequent. The adoption of a quarter elliptical laminated spring as a dumb iron, and the transverse rear spring with central carriage of body, showed some favour. Metal wheels, either pressed disc or cycle-built, did not obtain. Detachable rims and tyres were shown, but none of the special devices exhibited have become popular. The Michelin detachable rim, which has held the field throughout the present year, was not in evidence. It has only come into use since the beginning of the year. No specially fresh departure in body design was noticeable save the increasing favour of the covered carriage for town use. The attendance for the nine days during which the exhibition was open at Olympia totalled 192,496 in all, or 36,685 more visitors than in 1905.

November 14 was, amongst other things, remarkable for a National Conference of automobilists, presided over by the Hon. Art. Stanley, M.P., to consider particularly the Report of the Royal Commission on Motor Cars.

The French Show, which extended from 7th to 23rd November, was largely discounted by its anticipation by the Olympia Exhibition on this side of the Channel, and the English visitors were far fewer than in former years.

At the end of December the motoring public felt that the hitherto much-discussed Brooklands Motor Course was likely to become a factor in matters automobile, for racing rules, dates of meetings, and lists of events were issued. The Motor Car Act of 1903 was continued for another year by inclusion in "The Expiring Laws Continuance Bill, 1906."

In the beginning of January of the present year a very successful Automobile Show was held by the Irish Club in Dublin, and was characterised as quite the finest Automobile Show ever held outside London. The exhibition is to be an annual affair.

On 11th February died M. Leon Serpollet, who for many years had stood alone as the champion of the use of steam on common roads. The success of the well-known Serpollet cars was largely ascribable to an improved form of the

flash boilers invented by our own Hancock, seventy years before.

At the Automobile Club's Annual Dinner, which took place on the 8th March, the announcement was made that His Majesty the King had commanded that thenceforward the Automobile Club of Great Britain and Ireland should be known as the Royal Automobile Club. This sign of royal favour is earnest of the fact that His Majesty is entirely in accord with the work and aims of the Club, and that it is devoted to labours which must redound to the national weal. At this same function was announced the assumption of the chairmanship of the Club by Mr. C. D. Rose, M.P. for Newmarket, *vice* the Hon. Art. Stanley, M.P., resigned. The month of March was also remarkable for the most successful holding of a Commercial Motor Vehicle and Motor Boat Show, the vehicle portion of which was very interesting and largely patronised. The heavies and the motor boats will continue to have an exhibition always to themselves in future.

Smoke emission by self-propelled vehicles having long been the subject of complaint with the general public, the Royal Automobile Club held Smoke Emission Trials in March last, which were hardly so successful or so strongly supported as was expected. The method upon which the awards were made was also considered somewhat unsatisfactory under the circumstances.

In the early part of April it was announced that the Renault Patent, by which the French firm of that name claimed a master patent on gear-driven cars, had been amended, and it was thought that actions for infringement would follow, but up to the moment of writing nothing further has been heard of the matter. It is held on good authority that in this country, at least, the Renault divided shaft device has been anticipated.

Long-distance trials became the April fashion, a Deasy car completing 1,000 miles in Ireland, and a Siddeley car over 4,000 miles in the United Kingdom. But these were very soon to be overshadowed by much more ambitious performances.

In May a 30-h.p. Siddeley car completed an officially observed run of 10,000 miles, 7,089 miles of which were covered without an involuntary stop. Rivals in the shape of a six-cylinder Hotchkiss and a 40-h.p. six-cylinder Rolls-Royce were soon to share these honours. In the course of the month of May, and just previously to the Fuel Limit races in the Isle of Man, the Irish Automobile Club ran some very successful and well-patronised Reliability Trials. On Thursday, the 13th May, the Tourist Trophy and Heavy Touring Car Races were decided over the Isle of Man Course. Twenty-two cars started for the Trophy, and nine in the Heavy Event. The light cars were limited to a petrol allowance of one gallon for every twenty-five miles to be covered, while the original allowance for the heavies was one gallon per sixteen miles. This was increased, however, by a total of one gallon five pints, owing to the terrible condition of the roads. The rain fell heavily long before and throughout both races, turning the road surfaces into quagmires. The road over Snaefell—about ten miles—was traversed by the winning cars six times through a dense mist. The Tourist Trophy Race was won by a 20-h.p. Rover car which averaged 28.0 miles per hour, while the heavy honours fell to a 30-h.p. Beeston Humber at 28.7 miles per hour. The Rover had 32 ozs. of spirit to spare. The day following the *Graphic* Trophy was raced for, and

won by Mr. J. E. Hutton on a 60-h.p. Berliet. In the early part of June Russia rejoiced in her first great racing event, contested between Moscow and St. Petersburg by fourteen cars, of which a 70-h.p. De Dietrich, driven by Duray, was the winner.

The greatest speed competition of the year was undoubtedly the keenly contested race for the Kaiser's Cup on the 14th June. The entered cars, numbering fifty-four, were reduced to thirty-nine by a double eliminating contest on the previous day. In the actual race Nazarro on a Fiat won by five minutes from Hautvast on a Pipe. His Imperial Majesty the German Emperor was present on both days.

On Monday, 17th June, the Brooklands Track was informally opened by some exhibition speed driving on the part of many well-known drivers. The Herkomer Trophy Competition was concluded in Germany just before the Kaiserpreis Race.

In June, likewise, the Yorkshire A.C. held their annual races on Saltburn Sands, but the meeting, like many others of its kind during the past year, was spoiled by the weather. In the week ending 29th June that classic fixture, the Scottish Reliability Trials, was brought to a successful conclusion over a difficult series of Scottish roads. Ninety-six cars left Glasgow on the first day, and eighty-two returned on the evening of the last day. Eleven cars made non-stop runs throughout the whole five days.

On Friday, 28th June, and Saturday, 29th June, Mr. S. F. Edge drove a six-cylinder Napier car, 582 miles in twenty-four hours on the Brooklands Track—equal to an average speed of 65 miles 1,594 yards per hour throughout. In the fourteenth hour he covered 72 miles 152 yards.

The race for the Grand Prix, contested on a course near Dieppe 482½ miles in length, was won on the 2nd July by Nazarro on a Fiat car, beating the Renault driver Szisz by over six minutes. The petrol allowance was 30 litres per 100 kilos.

On the 6th July the first race meeting was held on the Brooklands Track, with a very large attendance, but the competitions did not arouse much enthusiasm.

On 27th July the *Autocar* published a Motor Census compiled from the registers, which showed that in the United Kingdom cars totalled 61,617, heavy cars 4,124, motor cycles 53,877, and driving licences 205,606. These totals show increases over 1906 of 15,917, 1,423, 8,232, and 58,041 respectively.

Dust Trials were held in July by the R.A.C. at Brooklands, and much valuable information gathered. It was conclusively shown that the wheels of a car are primarily responsible for lifting the dust off the road, although the vortices produced by the passage of the body through the air are responsible for throwing it aloft.

The second meeting at Brooklands, on 20th July, was very poorly attended, and it appeared that motor racing had failed to attract the public. On the same date the Motor Union held its Annual Meeting at Southport, the Hon. Art. Stanley, M.P., presiding.

The racing on the famous Ardennes Circuit lost some of its interest by division into three events—one for cars complying with Kaiserpreis conditions; one for vehicles complying with a special formula of the Belgian A.C.; and the Liedekerke Cup, a race for cars of 3,750 litres cylinder capacity.

The Kaiserpreis race was a triumph for Belgian (Minerva) cars and British drivers, the winner being steered by Moore-Brabazon. That popular Continental driver the Baron de Caters won the A.B.C. on a Mercedes car, followed home at less than a minute's interval by Lee-Guinness, who drove a Darracq. The Liedekerke Cup was won by Porliet on a Minerva, with Moore-Brabazon only 35 seconds behind on a car of the same make.

On 2nd August the Motor Yacht Club held the British International Motor Boat Race in Southampton Water. Two native and one American boat competed, the French craft all holding aloof. Dixie, the American boat, won in a very hollow fashion.

End to End Trials, Land's End to John o' Groats, have been frequent in the past, but in August a Sunbeam car made an end to end and back trip in Ireland as a reliability test.

Reliability Trials have lengthened considerably during the past year. Whereas 4,000 to 5,000 miles was previously considered an all-sufficient trial, the Siddeley suddenly broke fresh ground with 10,000 miles, and the 40-h.p. six-cylinder Rolls-Royce followed with 15,000 miles in forty days, a considerable portion of the latter distance being driven continuously day and night. At the conclusion of this trial the entrants permitted the club officials to totally dismantle the car and estimate the cost of the repairs to make all equal to new. The estimate for the work to be done was under £5. This has set the fashion for all future trials; indeed, a French car, the Hotchkiss, which completed a similar distance later, underwent a similar examination.

The report of the judges of the Royal Automobile Club Dust Trials was issued in the early part of August, but it merely awarded positions to the tested vehicles and described method of trial. It failed to draw any conclusions as to what might be valuable to designers contemplating the construction of cars which should raise the minimum amount of dust when on the road.

On Saturday, 10th August, Prince Scipion Borghese entered Paris on his 24-h.p. Itala, upon or with which he had travelled in some wise or other from Peking. Four other vehicles left Peking with the Prince, but at the time of his arrival they were still struggling in the bogs and morasses of Southern Siberia.

During this month an announcement was made to the effect that in 1908 the R.A.C. would hold and conduct a 2,000 miles Reliability Trial, somewhat on the lines of the classic 1,000 miles tour in 1906. The 1908 event is to include the 700 odd miles of the Scottish Reliability Trials, but held first and as a distinct feature.

The Wind Resistance Tests carried out by Mr. S. F. Edge on the Brooklands Track, the results of which are given in the technical journals of the week ending 24th August, are of immense value as showing the huge amount of power required to overcome the wind pressure on large carriage bodies when travelling at speed. The results deduced cannot but be of the greatest value to body builders.

On 20th August the six-cylinder Hotchkiss car already referred to completed a tale of 21,250 miles, of which, however, 6,250 miles were covered in France unobserved by the officials of the English Club. The final examination showed the wear on vital parts to be infinitesimal.

The Board of Trade Returns issued at the end

of August showed that the total value of motor cars and parts brought into this country during the seven months ending 31st July, 1907, was £2,934,688, as against £2,726,895 for the like period of 1905. The value of foreign cars and parts re-exported was £191,911, as against £312,201; while the value of British-built cars exported was £692,542, as against £358,239 over similar periods.

The relationship of the Automobile Association and the Motor Union became somewhat strained during the latter part of the year, chiefly by reason of the adoption of a car badge by the Motor Union, which was alleged by the road scouting body to be a colourable imitation of the insignia carried by their members for identification by their road scouts. The work done by the Association during the past year has proved invaluable in rendering roads upon which motorists had previously been pestered by police traps possible for driving without persecution. The A.A. men were posted upon nearly all the main roads out of London; and upon special occasions great lengths of the road, such as London to Edinburgh, London to Liverpool, and London to Bexhill, were covered by the scouts.

At the end of August some particularly valuable and interesting experiments to determine the effect of weight on speed were carried out by Mr. S. F. Edge on the Brooklands Track, a 40-h.p. six-cylinder car being used for the purpose. The results were not only astonishing, but should prove most useful.

The race for the Florio Cup, maximum cylinder capacity 8 litres, held on 1st September over the Brescia Circuit, was won by Minoia on an Isotta-Fraschini car; while the second great race, the Coupe de Vitesse (Grand Prix conditions) fell to Cagno on an Itala car.

On 9th September a huge train of no less than fifty-six commercial motor vehicles of all sorts and descriptions set out from Chiswick on a five weeks' trial of varying distances, with certain interspersed exhibitions. The vehicles ranged from 5-ton lorries with 2-ton trailers to 10-cwt. tradesmen's vans.

The fourth open meeting at Brooklands was, from a sporting point of view, infinitely more successful and attractive than its predecessors.

Motor Marks.

Real Property Sales of the Season.

IN a year which cannot be described as a good one, the transactions with which this brief sketch is concerned have not been so important as has been the case in some previous seasons. As usual, however, what may be termed the "heavy" firms of auctioneers have disposed of some notable properties both at auction and by private contract, and in dealing with the chief of these we shall first touch upon estates possessing some historical or general interest.

On 25 May Messrs. G. Trollope & Sons sold the Villa Palmieri at Florence, the property of the Earl of Crawford, which will be remembered as the occasional sojourn of the late Queen Victoria. The sale was a private one, and prices do not usually transpire in such cases, but that the figure was substantial may be presumed from the fact that when previously put up to auction the start suggested was £50,000. On 7 October another royal residence (that of the Dukes d'Aumale and d'Orleans) in Orleans House, Twickenham, was put up to auction, but withdrawn at £18,500, the "lot" being, no doubt, reserved by Messrs. Marler & Marler for private treaty negotiations. At the commencement of the year (26 January) Messrs. Giddy & Giddy sold Aubrey Manor, near Marlborough, Wiltshire (850 acres), privately, the property being part of the Meux Estates, which up to date, in the hands of the auctioneers mentioned, have realised in all £300,000. Stowe House, the ancient seat of the Dukes of Buckingham and Chandos, was also disposed of privately (8 June), the purchaser being the Baroness Kinloss, the daughter of the third Duke of Buckingham and Chandos, for whom Messrs. Collins & Collins were acting. On 28 May Messrs. Hampton & Sons obtained £23,905 for the Earl of Cottenham's Felcourt Estate, at Lingfield and Goldstone, Surrey, and extending to 1,108 acres, whilst the remainder of the property (1,100 acres) was subsequently sold by them by private treaty. Another sale of aristocratic property was that of the Farleigh Hungerford Estate, Somersetshire (1,133 acres), for which Messrs. Beadel, Wood & Co., on behalf of Lord Alington, obtained £50,000 from Earl Cairns (10 July). Portions of Lord Lucas's estates in the Midlands (457 acres) made £19,225 in July, in the hands of Messrs. Driver, Jonas & Co. Glastonbury Abbey, at one time one of the most celebrated and magnificent institutions in England, was purchased by Mr. E. Jardine, of Nottingham, for £30,000 on 6 June.

Other estates besides those just mentioned have, of course, associations of more or less interest, to which, however, the exigencies of space will not allow us to refer. In the height of the season Messrs. F. Lloyd & Sons sold the Mollington Estate, Cheshire (102 acres), for £39,000; Messrs. Bidwell & Sons disposed of Wellington Hall, South Runcton, Norfolk (1,741 acres), for £37,815; and Messrs. Ludlow & Briscoe obtained for the Little Aston Estate, Sutton Coldfield, Warwickshire (776 acres), £35,882. The Elms Estate, Nottinghamshire (505 acres), fetched £20,000 (Messrs. Humbert & Flint, 12 June); the Pigeonsford Estate (747 acres), Llangrands, South Wales, £15,270 (Messrs. Francis & Son, 14 June); Godmanstone Manor, Dorchester (1,140 acres), £13,000 (Messrs. H. Duke & Son, 23 February); and West Cliff Hall, Hampshire, £12,250 (Messrs. Alex. H. Turner & Co., 23 July). Auctions, it may be noted, are very commonly regarded simply as "bold adver-

tisements" for estates which are intended to be made the subjects of private negotiation. Of properties which were dealt with in this confidential manner, and of which the price can only be approximately calculated by experts, the following may be mentioned: Messrs. Debenham, Tewson, Richardson & Co. sold Barhatch, Cranleigh, Surrey (460 acres), on 24 August, the estate having been previously withdrawn at auction at £40,000. Judging also from the sums at which they were "passed" in the rostrum, the prices obtained for the Chessell Estate, Southampton (30 March), and the Littleton Park Estate (20 July) must have been high. Messrs. Edwin Fox & Bousfield, in conjunction with Messrs. Perkins & Sons, were the agents in the former case, and Messrs. Weatherall & Green in the latter. Messrs. G. Trollope & Sons, on 12 January, sold Polesden Lacey, Dorking (1,000 acres), formerly the seat of Sir Clinton Dawkins, and on 17 August also disposed of Taplow Lodge, Taplow, which adjoins Mr. W. W. Astor's Buckinghamshire seat of Cliveden. The same firm sold North Aston Hall (989 acres), Deddington, Oxfordshire, on 16 October, for £41,000. We believe we are correct in saying that just on £100,000 was the price obtained for Sherfield Manor, Basingstoke (850 acres), by Messrs. J. D. Wood & Co., on 20 July. Messrs. Farebrother, Ellis & Co. sold by private treaty in the months of May, June, and July respectively, Coverwood House, Shere, Surrey (231 acres); Snowdenhall Hall, Bramley, Surrey (258 acres); and Monkfield and Great Common Farms, Bourne, Lincolnshire (864 acres). In the spring Messrs. Chinnock, Clarke, & Chinnock sold Hundon Hall, Clare, Suffolk (2,700 acres), the property of the Right Hon. W. F. D. Smith, M.P., to Mr. T. Bower, of Stradishall Place, Newmarket; and Messrs. F. Newman & Blunt disposed of Carlton Hall, Halesworth, in the same county (700 acres), the property of the late Countess of Stradbroke. On 2 February Sir Percy Bates was the purchaser of Hinderton Hall, Liverpool (10,000 acres), which was in the hands of Messrs. Boulton, Sons & Co., and towards the end of the same month Mr. Frank Stubbs sold Beauworth Manor, Hampshire, and the "whole of the village." Silverlands, Virginia Water, the property of Sir P. H. Waterlow, was purchased by Messrs. Knight, Frank & Rutley on behalf of Sir John Brunner. On 24 September Messrs. W. Grogan & Boyd obtained, we believe, just on £35,000 for a portion of the Sutton and Cheam Building Estate, Surrey.

For high-class West End properties, whether business or residential, special customers are required, and vendors generally know into whose hands to put themselves. In this district freehold premises are rarely in the market, but at the commencement of the year Messrs. Edwin Fox & Bousfield obtained £3,500 for the site of No. 195, Oxford Street, held by this tenure; and other transactions later on that may be mentioned are the sale of Nos. 25 and 27 in the same thoroughfare, which Mr. Joseph Stower disposed of for £19,360, and that of No. 154, Strand (yearly rental £680), which realised £15,850 in the hands of Messrs. Chesterton & Sons. No. 114, New Oxford Street, a "Crown" lease, was sold by Messrs. Hodges & Redfern on 26 January. The sale on 16 March by Messrs. Godwin, Basley & Co. of Nos. 13 and 13A, Cockspur Street was also private, but here we are enabled to give the price as £33,000. On 11 July, Messrs. Farebrother,

Ellis & Co. found a purchaser for No. 2, Pall Mall (yearly rental £550) for £11,000. Coming further west, Messrs. Montagu & Robinson, in February, disposed of Nos. 129 to 161, High Street, Kensington, a consistently "improving" neighbourhood. These premises were part of the estate of the late Mrs. S. Lewis-Hill, and the price realised was just on £60,000. The residence of that lady, No. 16, Grosvenor Street, was subsequently disposed of privately by Messrs. Knight, Frank & Rutley, and we may proceed to notice some other residences in the aristocratic quarters of the town. On 24 January Messrs. G. Gouldsmith, Son & Co. obtained £15,190 for Nos. 9 to 17, Rutland Gate, Hyde Park (term 28 years, net rental £1,339). Messrs. W. Grogan & Boyd, on 18 May, sold No. 3, Hamilton Place, Piccadilly (term 59 years), for £30,000, and approximately the same price was obtained on 14 September by the firm for No. 2, Carlton House Terrace, the residence of the Earl of Liverpool. In the following private transactions prices did not transpire: No. 54, Portland Place, the property of the Right Hon. James Bryce, and No. 35, Sussex Gardens, Hyde Park (Messrs. Hampton & Sons, 9 February and 6 July); No. 45, South Street, Park Lane, and No. 61, Cadogan Place (Messrs. G. Trollope & Sons, July and September); and Saxon Hall, Palace Court, Kensington. This was disposed of by Messrs. Giddy & Giddy in the early part of the year, and in July the firm added to their list of business done No. 1, Lowther Gardens, Prince's Gate, the residence of the late Sir W. T. Makins, No. 1, Prince's Gate, No. 26, Queen's Gate, and No. 43, Portland Place. On 19 October a notable transaction occurred, as Messrs. Hampton & Son sold Queen Anne's Chambers, Westminster (rental £25,000) for £143,000.

It would be impossible here to mention all the superior City properties dealt with by such firms as Messrs. Debenham, Tewson, Richardson & Co.—this year, by-the-by, saw Mr. Tewson's business "jubilee"—Messrs. Edwin Fox & Bousfield, and others. All we can do is to select some more or less "glit-edged" transactions. A notable sale held by Messrs. Debenham, Tewson, Richardson & Co. was that of the freehold site of the Church of St. Peter le Poer, Old Broad Street. The date was 2 July, and the price £96,000, which works out at nearly £23 per foot. The purchasers were Messrs. St. Quintin & Son, on behalf of a firm of bankers. Another big freehold area disposed of by the same firm (23 July) was No. 48, Cheapside (1,200 feet), for which £25,500 was obtained, whilst £14,100 was realised by No. 6, Aldermanbury (freehold, 1,250 feet), on 26 February. Two other noteworthy freeholds were sold by Messrs. Edwin Fox & Bousfield in No. 5, Crosby Square and No. 8, Newgate Street, the prices being respectively £8,700 and £6,300 (6 March and 17 July). On 20 March Messrs. H. E. Foster & Cranfield sold Nos. 39 and 41, Great Arthur Street, Finsbury (term 74 years, yearly rental £692) for £9,000, and on 19 April Messrs. Jones, Lang & Co. obtained £9,200 for Nos. 68 to 70A, Queen Street, and No. 107, Cannon Street. A letting transaction by the same firm (18 February) was that of a site of 14,180 feet in West Smithfield. The auctioneers were acting by order of the governors of St. Bartholomew's Hospital, and Mr. Asher Wertheimer, to whom they let the property at £2,140 per annum, had to covenant to spend £23,000 on the buildings to be erected. Another letting transaction was that of a site of

57,000 feet in Jubilee Street, Mile End (Mercers' Estate), Messrs. Daniel Watney & Son, on 10 January, letting at £370 per annum (over 1½d. per foot), and here £20,000 were to be spent on the new buildings. On 31 March Messrs. Green & Son obtained £17,000 for Nos. 127 to 141, Queen Victoria Street (term 45 years, yearly rental £1,950), and £11,500 was the price fetched by the City Orthopedic Hospital, Hatton Garden (Messrs. Venton, Bull & Cooper, 26 February). Two private sales were those of No. 6, Martin's Lane, Cannon Street (Mr. George Stockings, 18 May), and of the headquarters of the Salvation Army in Queen Victoria Street, of which the London County Council are the owners (Messrs. S. Walker & Son, 27 July).

In May Messrs. Hibbard & Whittingham sold the Champion Vinegar Works, in the City Road (and 2 acres), by private treaty. The price we believe, was just on £100,000, and no doubt a heavy sum was forthcoming for another block of well-known trading premises—those of Messrs. Watling & Sons, in Brewer Street, Pimlico, which, together with the business of wholesale provision merchants, was disposed of by Messrs. Horne & Co. on 23 February.

To turn to the suburbs, the Battersea Rise Estate, Clapham Common (22 acres, including the house of the philanthropist Wilberforce), was sold by Messrs. Thurgood & Martin for £51,000 to Mr. Edwin Evans (20 June). The Statesbury Estate, Deptford, comprised 70 properties, and realised £20,676 in the hands of Messrs. Dyer, Son & Hilton (18 June); whilst for the Cuff Estate, New Barnet and Holloway (30 properties), £16,876 was given (Mr. E. Fergusson Taylor, 24 May), and for the Collis Estate, South Norwood (75 properties), £14,125 (Messrs. Browett & Taylor, 10 April). On 25 April Messrs. Stimson & Sons obtained £8,420 for 27 houses on Brixton Hill, and on 27 June the Forest Estate, Camberwell (42 properties) realised £12,960 through the same firm, the extent of whose business in the southern suburbs is well known. The Short and Pugh Estate, in Chelsea and Hampstead Road, was the subject of three sales on 15, 22, and 29 April respectively, which, under the conduct of Mr. Percival Hodson, realised £6,615, £9,505, and £8,542. Ten freehold properties in Albion Street, King's Cross (together with freehold ground rents amounting to £172), fetched £10,670 (Messrs. Jones, Lang & Co., 8 April), and for the High View Building Estate, Walthamstow, £6,000 was given (Messrs. David Burnett & Co., 6 May). In Hammersmith and the adjacent West London and West Middlesex districts our quotations must be restricted. In July Messrs. C. Rawley, Cross & Co. sold Nos. 15 and 16, The Broadway, Ealing, for £9,000, and in the same month Mr. J. C. Platt obtained £6,500 for the site of Nos. 271 and 273, in King Street, the leading Hammersmith thoroughfare. The big Anglo-French Exhibition at Shepherd's Bush, which it is designed to open in the spring of 1908, is calculated, no doubt, to have a stimulating effect on the enterprise of house and flat speculators in a district where the movement of business is always active.

With regard to those popular securities, freehold ground rents, a quite exceptional transaction was the sale, in June, for £109,092 of freehold ground rents amounting to £6,849, secured on properties in the city of Limerick. Messrs. James H. North & Co., acting for the Earl of Limerick, were the agents. On 9 January Messrs.

Edwin Fox & Bousfield sold freehold ground rents amounting to £116, secured on property at Notting Hill, at a price which worked out at 28½ and 25 years' purchase, and on 26 February Messrs. Debenham, Tewson, Richardson & Co. obtained £12,000 for a property of the kind, namely freehold ground rents of £370, secured on No. 44, Lombard Street. On 1 May Messrs. H. E. Foster & Cranfield realised £29,940 for freehold ground rents amounting to £340 and peppercorns in King's Road, Chelsea (Mr. W. Prince's Estate), and on 4 July rents amounting to £443 10s. fetched £15,235 in the hands of Messrs. Stimson & Sons. The rents were secured on property in London, but other lots were included in the sale. Other transactions which may be alluded to are:—£18,270 for freehold and leasehold ground rents of £835 18s. on suburban property (Messrs. Stocker & Roberts); £16,335 for £473 on property in Metropolitan districts (Messrs. Furber & Co., 4 July); £15,855 for freehold and leasehold ground rents of £853, secured on suburban premises (Barbrook Estate), which were sold by Messrs. Hunter & Hunter on 19 February; £9,000 for £275 on property in the Charing Cross Road (Messrs. D. Young & Co., 29 June); £8,200 for £369 on premises in Redcross

Street (Messrs. Jones, Lang & Co., 19 April); £7,720 for £260 on five houses in Queen's Gate, reversion in 49 years (Messrs. Chesterton & Son, 14 March); and £7,460 on freehold ground rents of £142 and three suburban properties (Messrs. Arber, Rutter & Co., 2 May). On 6 March Messrs. Rogers, Chapman & Thomas obtained £5,625 for freehold ground rents secured on Pimlico property and having early reversions. This was the second portion of Sir F. E. Waller's estate, the third portion being disposed of on 12 March by the same firm for £4,170, the total realisation up to date being £17,790.

On 5 June Messrs. Weatherall & Green obtained £12,550 for Gorleston Ferry, Yarmouth, of which the rent is £680. This special transaction of the well-known Chancery Lane firm is entitled, we suppose, to be included amongst "real property" sales. That heading, however, is scarcely appropriate to some of the transactions carried out by Messrs. H. E. Foster & Cranfield, though these may be of interest to those who attend the firm's popular sales at the Mart. The following may be noted:—£15,000 for bonus of £26,000 from Irish estates, payable in two years (21 February); absolute reversion to £12,490 gas stock (4 April).

Importation of Wine U.K. 1906.

THE following table shows the quantity of wine imported in *cask* during the year 1906. In addition to the figures here given 1,803,974 gallons of wine were imported in *bottle* (the alcoholic strength of which cannot be tested), making a total for the year of 13,103,304 gallons.

Country.	Not exceeding 30°.	Exceeding 30°.	Total.
	Gallons.	Gallons.	Gallons.
Portugal	518,124	3,173,994	3,692,118

Coal Exports 1906.

IN 1906 55,599,771 tons of coal were exported from the U.K. at prices varying from below 5s. to above 16s. per ton. The prices are given at the time of shipment and are *exclusive of the duty*. 954,638 tons did not exceed 5s. per ton; 4,969,422 between 5s. and 6s.; 603,729 between 6s. and 7s.; 5,803,425 between 7s. and 8s.; 10,211,584 between 8s. and 9s.; 8,969,926 between 9s. and 10s.; 4,614,958 between 10s. and 11s.; 4,853,484 between 11s. and 12s.; 7,861,297 between 12s. and 13s.; 3,632,560 between 13s. and 14s.; 1,936,704 between 14s. and 15s.; 591,808 between 15s. and 16s.; and 591,236 exceeding 16s. per ton; total 55,599,771 tons. The export duty of 1s. per ton was imposed by the Budget of 1901-2 and repealed by the Budget of 1907-8. It produced £1,494,777 in the financial year 1906-7; £2,183,973 in 1905-6; £2,052,774 in 1904-5; £2,051,652 in 1903-4; £1,991,764 in 1902-3 and £1,311,706 in 1901-2—a total of £11,086,649 in six years and a yearly (and increasing) average of £1,847,775.

TIDES AND TIDAL WAVES.

It is not possible within the limits assigned to this article to enter minutely into all the causes which produce the complex phenomena of the tides, though the most prominent factors may be explained without having recourse to the higher mathematics necessary to a full comprehension of this difficult subject.

The Newtonian law of gravitation teaches us "that every particle of matter in the universe attracts every other particle, with a force varying inversely as the square of their mutual distances, and directly as the mass of the attracting particle."

Suppose the Earth to be a sphere covered by a sea of uniform depth, and the Earth and Moon relatively at rest, then the layer of water immediately under the Moon will be attracted more per unit of mass than the Earth, and heaped up towards the Moon; the layer of water on the opposite side of the Earth will be attracted less than the solid Earth per unit of mass: being further off, the water here will be heaped up away from the Earth and Moon. At these opposite places there will be high water, though in this latter case not quite so high as in the former. The sea will thus have very nearly the form of a prolate spheroid, with the major axis passing through the Earth and Moon. At places situated on a circle 90° from the major axis there will be low water.

As the Moon revolves around the Earth, and the Earth rotates on its axis, this figure never has time to perfect itself, and an imperfect form of it travels round the Earth in a lunar day, which is longer than a civil day by about 50 minutes. So that high water occurs, generally speaking, about that timelater at the same place each day.

Besides the Moon, the Sun exerts a considerable disturbing force, producing tides exactly similar to those produced by the Moon, but smaller in effect, for although the mass of the Sun is immensely greater than that of the Moon, yet his distance from the Earth is such that the ratio of his tide-producing force to that of the Moon is as x to x^2 . The observed tide, therefore, is the effect of the superimposed lunar and solar tides. Calculation shows that the difference between the major and minor axes of the spheroid due to the Moon alone amounts to 58 in., and according to the ratio above would make the same difference due to the Sun alone about $2\frac{1}{2}$ in.

At New or Full Moon these two bodies are acting in concert, and as a consequence the tides are higher and lower; with the Moon in quadrature they are acting in opposition, and these tides are neither so high or low: in the former we have the Spring, and in the latter the Neap tides. It is not strictly true to say that high water takes place immediately under the Moon, because, owing to the irregular distribution of land and water, with the variation in the depth of the ocean, an amount of friction is caused which retards the passage of the tidal wave, making it come later than it otherwise would. This retardation is a matter of observation peculiar to each locality, and known technically as the Establishment of the Port. The actual high tide being that produced by the united action of the Sun and Moon, makes it necessary to correct the Establishment of the Port, in calculating the times of high water at any place, by a quantity depending upon their relative positions; thus, at the intermediate

phases of the Moon between New Moon and First Quarter, the Sun passes the Meridian before the Moon and, pulling the tidal wave towards the West, accelerates the time of high water: this is called the priming of the tides. On the other hand, between First Quarter and Full-Moon the tide lags. In like manner, between Full Moon and Last Quarter the tide primes, and from Last Quarter to New Moon lags. Since Newton's time the theory of the tides has been improved by the several mathematicians who have taken the problem in hand, but, from our want of knowledge of the depth of the ocean and the geography of its bottom, cannot yet be considered perfect.

With our actual geography many local complications arise: seas like the Mediterranean, Baltic, or Euxine offer so small an area that the Moon can only act upon each as a whole, and there is practically no tide. The disturbing action requires a very wide expanse of deep water, such as the great Southern Ocean, or the S. Pacific; and there, accordingly, is assigned the birthplace of our great tidal wave, to which many tides in distant seas are referred. One mighty pulse enters the Pacific in a N.W. direction, and another the Atlantic, both to be modified by the depth of water and the form of the coasts, and both extending to the bottom of the ocean. Owing to the islands of the Pacific the tides there become small as the impulse travels north; but in the long deep trough of the Atlantic the tidal force attains a velocity of from 600 to 650 miles an hour. The western impulse across the S. Pacific reaches Tasmania in 12 hours, and in 12 hours more dashes against Hindostan and S. Africa. Another 12 hours and the tidal wave has reached Newfoundland on the West, and the African Cape Blanco on the East. Turning eastward across the N. Atlantic, the tide in 4 hours is split into two waves at Land's End, one of which goes slowly up the shallow English Channel, while the main branch is borne round the North of Scotland—to bring high water to Aberdeen and the coasts of Norway and Denmark—and finally reaches the mouth of the Thames in 48 hours after leaving the Antarctic Ocean. The Atlantic, being deep and free of islands, produces an independent tide, which helps to modify the tidal impulse from the South, one result being the famous high tides of the Bay of Fundy.

The tides are locally affected by the configuration of the coasts, and also to a slight extent by the changes of atmospheric pressure. Where the tidal wave enters gulfs or estuaries which open in its direction, the difference between high and low water is much increased—e.g., Bristol Channel, 40 to 60 ft.; St. Malo, in the English Channel, 50 ft.; Chepstow, 60 ft.; Bay of Fundy, 70 ft. up to 100 ft. in the highest spring tides. The "bore" or "eagre" on certain rivers occurs when the advanced portion of the tidal wave moves so slowly, owing to shallowness or other circumstances, that the succeeding waters gather in a heap—e.g., Severn "head," 3 ft. high; Hoogly, 5 ft.; Amazons, 12 to 15 ft.—that on the Tsien Tang in China has been estimated to flow up the river with a velocity of 13 miles an hour. Another curious local modification of the tides is seen at Southampton, Poole, Weymouth, &c., where two tides occur in 12 hours; a similar anomaly near Clackmannan, on the Firth of Forth, is known as the "leaky tides."

The following heights of tides on the Thames,

with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* (cxliii. 204):—

	Height.	Distance.
	ft. in.	m.
London Docks.....	28 10	60
Putney	10 2	67½
Kew	7 2	73
Richmond	3 10	76
Teddington	1 4½	79

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe, a complete revolution among the Stars in the course of a year. If the plane of this apparent path had been parallel to the Earth's Equator, the Days and Nights would be equal all over the Globe, and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at $23\frac{1}{2}^{\circ}$; consequently, the Sun is alternately seen above and below the Equator by this amount, causing the phenomena of Summer and Winter: giving long days and Summer to the Northern Hemisphere when the Sun is North of the Equator, and short days and Winter when South of it.

This inclination of the two planes causes the Sun to cross the Equator twice in the year, viz., in the Spring and Autumn, at which times the Days and Nights are equal all over the world.

From Spring, through Summer to Autumn, the Sun traverses exactly one-half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by the eccentricity of the Earth's orbit and the Law of Areas—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. The Earth when farther from the Sun, as at the Summer Solstice, must move more slowly than at the Winter Solstice; because then the line joining the two bodies is longer. The effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

The Earth's atmosphere is generally supposed to extend some forty miles in height, probably farther, but becoming, at only a few miles from the surface, of too great a tenuity to support life. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the Sun; and, when laden with clouds, hindering the Earth from radiating its acquired heat into space. The

amount of heat absorbed in its passage through the atmosphere will depend upon the thickness of the stratum which the rays have to penetrate, and this on the meridian altitude of the Sun.

If the surface of the Globe were smooth, and consisted entirely of land or water, the mean temperature of our Seasons would depend solely on our geographical latitude; but being, as it is, made up of water and land very unequally distributed, the former occupying two-thirds of the entire surface of the Globe, the temperature of the Seasons at places on the same parallel of latitude is modified by the surrounding masses of land and water. The great capacity of water for heat, and its low power of radiation, make the great Ocean, extending from Pole to Pole, the reservoir which stores up for us the heat it has received from the Sun; while the land, radiating its heat very quickly, would soon grow cold. The principal medium by which this heat is conveyed to the land is that of the Winds, which, receiving their warmth and moisture from the water, pass over the land, and compensate for the loss of heat which the latter suffers from radiation. From this cause it is that islands enjoy more equable Seasons than inland countries, being neither so cold in Winter nor so hot in Summer; since the same clouded skies that retard the cooling of the land by radiation also shield it from the rays of the Sun in Summer. But in the interior of continents, where the winds have lost their moisture on their passage from the coast, great extremes are known to prevail between the Summer and Winter temperatures. We must not forget that the oceans and seas are traversed by currents of warm water from the Equatorial regions, which greatly promote the distribution of heat.

VARIABLE STARS.

Although the Stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst this class of Stars, is one situated in the constellation Cetus, and known by the name of α Ceti, or Mira Ceti. It has a period of nearly $33\frac{1}{6}$ days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. Quite recent observations seem to show that this Star has now settled down to the 8th magnitude, after having exhausted its changes of magnitude. It will be found in R.A. 21^{h} . 14^{m} . 42^{s} , and South Declination $3^{\circ} 24'$.

Another remarkable Variable Star is Algol, β Persei. This has a very short period—not quite three days—and has a range of magnitude from $2\cdot2$ to $3\cdot7$. It continues at its maximum for two days and a half, then begins to decrease very suddenly, and in rather more than four hours is reduced to a Star of nearly the fourth magnitude; after remaining at this magnitude for a quarter of an hour, it again

attains to its maximum in the same time that it took in passing from it to the minimum. This Star will be found in R.A. 3^h. 27^m. 11^s. and North Declination 40° 36'. It can be well observed in October and November.

U Ophiuchi varies from the 6th to the 6½ magnitude, with a period of 20^h. 8^m. It may be observed in June, something about midnight on the 9th. Will be found in R.A. 17^h. 12^m. 52^s. and North Declination 1° 19'.

The Variable Star β Lyrae is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this Star—that, although the two maxima are equal, the minima are unequal. It is situated in R.A. 18^h. 46^m. 41^s. and North Declination 33° 15'. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this Star.

The Star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5½ days. In passing from the minimum to the maximum it occupies less time than that required for it to reach the minimum again—in the proportion of 28 hours to 91. It is to be found in R.A. 22^h. 25^m. 45^s. and North Declination 57° 56'. August and September are the best months in which to observe it.

There are two hypotheses suggested to explain the phenomena exhibited by the variable or periodical Stars; one of which endeavours to account for the variations in magnitude by supposing that opaque bodies are revolving around these particular Stars, and that at certain times they are interposed between the Earth and the Star, and so cut off from us a portion of the luminous rays of the latter. The other hypothesis suggests that the Stars themselves may have portions of their surface of unequal brightness, and that in their rotations they present to us in turns these more or less bright parts, and so cause the variations that we observe. This theory fails to explain the changes observed in the stars of the Algol type, and is only applicable to such as are quite regular in their fluctuations. Professor Pickering has shown that none of the theories put forward to account for the variability of the light of such stars as Algol will satisfy the observed changes, except that of an opaque or less bright satellite. Adopting this theory (which is now generally accepted), he finds theoretically a satellite whose position and movements would agree with the observed facts.

TERRESTRIAL MAGNETISM.

Magnetism is that property possessed by certain bars of steel, called Magnets, of attracting pieces of iron and also other magnets: beyond this idea very little, if any, meaning is popularly attached to the term Magnetism.

Every magnet has two poles, each pole having, as the term implies, exactly opposite properties, such that if we suspend one magnet by a thread free to move in any direction it will be found that on bringing another magnet, held in the hand, near to one end of the suspended magnet, if the opposing poles of each are of like properties, they will repel each other, but if of unlike, they will be attracted towards each other. In the

mariner's compass we have a case of this kind, where the compass-needle is so suspended as to be free to move in the horizontal direction, the Earth itself being the other magnet, with its South Pole near to the Earth's North Pole, and its North Pole near to the Earth's South Pole; so that the North Pole of the compass will always point to the Magnetic South Pole of the Earth, differing from the true or astronomical north by a quantity called the "variation." The variation of the compass is not only different for different places on the Earth, but is, moreover, liable to slow variation from year to year. In 1580, at London, the needle had an eastern variation of about 11½°; between 1657 and 1662 its direction coincided with the plane of the astronomical meridian; that is to say, the variation, or declination, as it is generally called, was zero; since then it travelled westwards, and reached the maximum western declination in 1815, and is at the present time (1908) slowly moving towards the East.

The compass-needle, being constructed to move in a horizontal direction only, exhibits that component of the total magnetic force which determines the declination; but if the needle had been mounted on a horizontal axis, placed in the magnetic meridian, and left free to move in a vertical plane, it would have been found to *dip*, as it is technically called, or be inclined at an angle to the horizontal plane, the North Pole of the needle being depressed. The value of this *inclination* or *dip* varies in different places on the Globe, increasing towards the Poles, so that in the Northern Hemisphere, at the Magnetic Pole, we shall have the north end of the needle pointing directly downwards.

This North Magnetic Pole was found by Sir James Ross to be situated in 97° W. longitude and 70° N. latitude. The South Magnetic Pole is situated in about 168° E. longitude and 70° S. latitude. Between these points there are found places of no *dip*; all such places are said to be situated on the Magnetic Equator, a plane not far removed from the terrestrial Equator. The *dip*, like the declination, is subject to secular and other variations, the true laws of which are not yet understood, but for the investigation of which magnetic observatories have been established all over the world, and elaborate series of observations made on the motions of suspended magnets (their movements in most observatories being automatically recorded by photography), furnishing a continuous record from hour to hour, and year to year, of the forces acting upon them.

FORECASTING THE WEATHER.

All outdoor pursuits, undertaken for profit or pleasure, depend so much upon the weather that we can imagine mankind to have taken an interest in its study from very early times; and, as a matter of fact, the popular ideas about weather prognostics are much the same as those which were in vogue in the earliest ages. Aristotle, in his book on Meteors (which, in his time, were supposed to have an atmospheric origin), collected all the then known prognostics of the weather, but in this work no serious attempt is made to explain the phenomena observed. In the cases where the attempt is made, the explanations offered are often very absurd, and show entire ignorance of the principles of physical science.

The observation of the state of the sky taught

the meteorologists of early times when to expect variations in the weather, and the result of these observations, formulated into short and pithy sayings, made up, until quite recent times, the science of weather prognostics.

Birds and beasts are all more or less sensitive to coming changes in the weather, and by observation of their movements, warning of changes in the weather may be obtained. Among other instances, it is observed that sea birds, as stormy weather comes on, fly inland in search of food; wild fowl leave the marshy grounds for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees.
